INTRODUCTION

California Housing Element law requires every jurisdiction to prepare and adopt a housing element as part of its general plan. In California, it is typical for each city or county to prepare and maintain its own separate general plan and housing element. However, Fresno County and 14 of the 15 cities in Fresno County, with the help of the Fresno Council of Governments (FCOG), are preparing a Multi-Jurisdictional Housing Element for the fifth round of housing element updates. The Multi-Jurisdictional Housing Element provides an opportunity for countywide housing issues and needs to be more effectively addressed at the regional level rather than just at the local level. Regional efforts also provide the opportunity for the local governments in the county to work together to accommodate the Regional Housing Needs Allocation (RHNA) assigned to the Fresno County region. In addition, economies of scale can result in significant cost savings to jurisdictions preparing a joint housing element.

The primary objective of the project is to prepare a regional plan addressing housing needs through a single certified housing element for all 15 participating jurisdictions. The Fresno County Multi-Jurisdictional Housing Element represents an innovative approach to meeting State Housing Element law and coordinating resources to address the region's housing needs. The following jurisdictions are participating in the effort: Fresno County and the cities of Coalinga, Firebaugh, Fowler, Fresno, Huron, Kerman, Kingsburg, Mendota, Orange Cove, Parlier, Reedley, San Joaquin, Sanger, and Selma.

State Housing Element requirements are framed in the California Government Code, Sections 65580 through 65589, Chapter 1143, Article 10.6. The law requires the State Department of Housing and Community Development (HCD) to administer the law by reviewing housing elements for compliance with State law and by reporting its written findings to the local jurisdiction. Although State law allows local governments to decide when to update their general plans, State Housing Element law mandates that housing elements be updated every eight years. The Multi-Jurisdictional Housing Element will cover the planning period of December 31, 2023, through December 31, 2031, and must be adopted and submitted to HCD for certification by December 31, 2023. The Housing Element must include: 1) an identification and analysis of existing and projected local housing needs; 2) an identification of resources and constraints; and 3) goals, policies, and implementation programs for the rehabilitation, maintenance, improvement, and development of housing for all economic segments of the population.

HOUSING ELEMENT PURPOSE

This document is the 2023-2031 Housing Element for 15 jurisdictions in Fresno County, including unincorporated Fresno County. The purpose of the housing element is to identify a community's current housing needs; state the region's goals and objectives regarding housing production, rehabilitation, and conservation to meet those needs; and define the policies and programs that the community will implement to achieve the stated goals and objectives.

GENERAL PLAN CONSISTENCY

The Housing Element is a required element of the General Plan. State law requires that the Housing Element be consistent with the other elements of the jurisdictions' general plan. The policies and implementation programs in this Housing Element are consistent with the policies and implementation programs in the other elements of each jurisdiction's general plan. However, if during the implementation of this Housing Element, any inconsistencies are identified, a local government would need to amend its general plan to maintain consistency with other elements of the general plan. As other elements of the general plan are amended in the future, the local governments will review and revise as necessary to ensure internal consistency is maintained.

HOUSING ELEMENT ORGANIZATION

The Housing Element is organized into the following major sections:

- **Section 0. Introduction:** An introduction, reviewing the purpose, process, and scope of the Housing Element.
- **Section 1. Public Outreach and Engagement:** A summary of the public outreach processes performed during the development of the Housing Element as well as the feedback received from outreach participants.
- **Section 2. Housing Needs Assessment:** An analysis of the demographic profile, housing characteristics, and existing and future housing needs.
- **Section 3. Regional Fair Housing Assessment:** An analysis of available federal, state, and local data to assess fair housing needs in the region.
- **Section 4. Opportunities for Residential Development:** A summary of the land, financial, and organizational resources available to address the identified housing needs and goals. This section also includes an analysis of opportunities for energy conservation in residential development.
- **Section 5. Housing Constraints:** An analysis of the potential market, governmental, and environmental constraints in the region.
- **Section 6. Housing Goals and Policies:** The regional goals and policies that will help meet diverse housing needs.

The Housing Element also includes one appendix.

Appendix 1 has a separate, lettered section for each jurisdiction. Each section is structured into the following subsections.

0. **Summary of Needs and Conditions:** Provides a summary of the jurisdiction's specific findings from the Housing Needs Assessment, Housing Constraints, and Sites Analysis.
1. **Action Plan:** Details jurisdiction-specific implementation programs to be carried out over the planning period to address the regional housing goals, including quantified objectives.

Sites Inventory: Describes the jurisdiction-specific sites available to meet the RHNA.

2. **Fair Housing Analysis:** An analysis of available federal, state, and local data to assess fair housing needs in the jurisdiction.
3. **Housing Constraints:** Identifies potential jurisdiction-specific governmental constraints to the maintenance, preservation, conservation, and development of housing along with an analysis of the at-risk units by jurisdiction and their preservation options.
4. **Evaluation of Previous Housing Element:** When applicable, describes the progress with implementing the previous housing element's policies and actions.
5. **Public Outreach and Engagement:** A summary of the public outreach processes performed during the development of the Housing Element as well as the feedback received from outreach participants.

PUBLIC OUTREACH AND ENGAGEMENT

This page intentionally left blank.

PUBLIC OUTREACH AND ENGAGEMENT

State law requires local governments to make a diligent effort to achieve public participation of all socioeconomic segments of the community in the development of the housing element. The comments received at the workshops and through the online survey were considered in the preparation of this Housing Element, specifically in the goals, policies, and implementation programs.

The Fresno County Multi-Jurisdictional Housing Element update effort completed public outreach at the local and regional levels to encourage community involvement and comply with the requirements of State law. These efforts included:

- Project Website
- Stakeholder Consultations and Focus Groups
- Study Sessions with Planning Commissions, City Councils, and the County Board of Supervisors
- Community Workshops
- Community Survey

PROJECT WEBSITE

The Fresno County Multi-Jurisdictional Housing Element project website is a clearinghouse for all information related to the project, with information in English and Spanish. For meetings in the City of Fresno, event fliers were also made available in Hmong and Punjabi. Community members can visit the site to access all public materials, learn about the Housing Element and upcoming opportunities to get involved, sign up for email updates, and submit comments directly.

The project website also includes direct links to each of the participating Fresno County jurisdictions' websites to promote specific outreach from each city and the county, share updates, and highlight upcoming opportunities for involvement, including individual Housing Element meetings.

STAKEHOLDER CONSULTATIONS

To ensure that each jurisdiction solicits feedback from all segments of the community, consultations were conducted with service providers and other stakeholders who represent different socioeconomic groups.

Throughout the fall of 2022, staff consulted with stakeholders from 11 individual organizations and a multiorganization initiative that provides services in the Fresno County region to obtain input on housing needs and programs. The following stakeholders were contacted for an interview and either completed an interview or provided written responses to questions by email.

- Travis Alexander, Northern California Carpenters Regional Council

PUBLIC OUTREACH AND ENGAGEMENT

- Harvey McKeon, Field Representative, Northern California Carpenters Regional Council
- Laura Moreno, Fresno Madera Continuum of Care/County of Fresno Social Services
- Mariah Thompson, California Rural Legal Assistance (CRLA)
- Karla Martinez, Leadership Council for Justice and Accountability (LCJA)
- Patience Milrod, Law Office of Patience Milrod
- Sarah Harris, Resources for Independence Central Valley
- Eric Payne, The Central Valley Urban Institute
- Doreen Eley and Michael Duarte, Fresno Housing Authority
- Mike Prandini, BIA
- Greg Terzakis, California Apartment Association
- Mirna Garcia, Envision Fresno and Llaves De Tu Casa
- Reyes Ruiz, Union Bank
- Sabrina Brown, California Association of Realtors (C.A.R) and National Association of Real Estate Brokers (NAREB)
- Rick Gonzales and Alicia Bohigian, Self Help Enterprises
- Pablo Estrada, CORE Home Loans
- Lucy Sandoval, Realtor; Vice President of National Association of Hispanic Real Estate Professionals (NAHREP), Fresno
- Aldiva Rubalcava, NAHREP Fresno
- Rosie Lopez, Self Help Credit Union
- Charles Ratanavanh, Asian Real Estate Association of America (AREA)
- Martin Macias, GPUSD Superintendent, Golden Plains Unified School District
- Lori Villanueva, CHUSD Superintendent, Huron/Coalinga School District

Requests for consultation were extended to the following stakeholders but either no response was received or no one-on-one interview was completed. Some of these stakeholders participated in other community input processes, such as focus groups or stakeholder meetings:

- Janine Nkosi, Faith in the Valley
- Christine Barker and Jack Chang, Director of Special Projects, FIRM
- Adriana Cave, Assemi Group
- Sharrah Thompson, Tenants Together

- Jenny, Marjaree Mason Center
- Maria Pacheco, Kerman Care Center
- Edgar Olivera, Centro La Familia Advocacy Services
- Steve Hair, Mendota-area developer
- Roberto Castillo, Westside Family Preservation

In each consultation, the stakeholders were asked all or some of the following questions, depending on the type of organization interviewed:

- Opportunities and Concerns: What 3 top opportunities do you see for the future of housing in this jurisdiction? What are your 3 top concerns for the future of housing in this jurisdiction?
- Housing Preferences: What types of housing do your clients prefer? Is there adequate rental housing in this community? Are there opportunities for home ownership? Are there accessible rental units for seniors and persons with disabilities? Do your employees live in this jurisdiction? If not, why? Are there accessible rental units for seniors and persons with disabilities?
- Housing Barriers/Needs: What are the biggest barriers to finding affordable, decent housing? What are the unmet housing needs in this jurisdiction?
- Housing Constraints: Are there any city/county processes that you find difficult to navigate, increase costs, increase time, and/or increase uncertainty?
- Housing Conditions: How would you characterize the physical condition of housing in this jurisdiction? What opportunities do you see to improve housing in the future?
- Equity and Fair Housing: What factors limit or deny civil rights, fair housing choice, or equitable access to opportunity? What actions can be taken to transform racially and ethnically concentrated areas of poverty into areas of opportunity (without displacement)? What actions can be taken to make living patterns more integrated and balanced?
- How has COVID affected the housing situation?

Common themes in stakeholder responses across service areas included concerns about lack of reliable access to water and other infrastructure such as internet access and cell phone reception. Several stakeholders mentioned overcrowding in many units and a strong need for maintenance in affordable rentals and in mobile homes throughout the region.

Stakeholders highlighted the unique needs of farmworker communities and the challenges they face in finding necessary information about affordable housing opportunities and applying for deed-restricted rental housing. For community members who are undocumented, it can be impossible to achieve homeownership and challenging to have the required proof of income for rental housing. Several stakeholders also identified lack of credit and low incomes as a barrier to many residents in accessing stable housing.

STUDY SESSIONS

The participating jurisdictions held study sessions with their respective planning commission and/or city council to review the Public Review Draft Housing Element. At each of the study sessions, staff and the consultants presented an overview of the draft Housing Element, facilitated a discussion with the planning commission and/or city council, and requested input before submitting the document to HCD for review.

The participating jurisdictions provided public notice about these study sessions using their standard meeting notice procedures. Additionally, staff directly contacted local housing advocates, developers, social service providers, and key stakeholders to notify them of the study sessions.

PUBLIC OUTREACH AND ENGAGEMENT

The following study sessions were held in the county:

- **Fresno County:** September 15 and 20, 2022 (Planning Commission and Board of Supervisors, respectively)
- **City of Fresno:** September 29, 2022 (City Council Study Session)
- **City of Kerman:** August 24, 2022 (Planning Commission/City Council Joint Study Session)
- **City of Firebaugh:** September 12, 2022 (Planning Commission/City Council Joint Study Session)
- **City of Kingsburg:** August 11, 2022 (Planning Commission/City Council Joint Study Session)
- **City of Coalinga:** September 15, 2022 (Planning Commission/City Council Joint Study Session)
- **City of Mendota:** October 25, 2022 (Planning Commission/City Council Joint Study Session)
- **City of San Joaquin:** October 4, 2022 (Planning Commission/City Council Joint Study Session)
- **City of Reedley:** October 11, 2022 (Planning Commission/City Council Joint Study Session)
- **City of Orange Cove:** September 28, 2022 at (City Council Study Session)
- **City of Selma:** September 19, 2022 (Planning Commission/City Council Joint Study Session)
- **City of Fowler:** August 2, 2022, (Planning Commission/City Council Joint Study Session)
- **City of Huron:** September 7, 2022 (Planning Commission/City Council Joint Study Session)
- **City of Parlier:** October 20, 2022 (Planning Commission/City Council Joint Study Session)
- **City of Sanger:** October 6, 2022 (Planning Commission/City Council Joint Study Session)

Council, commission, and board members had the opportunity to ask questions and give feedback about the project. Common themes included concerns about lack of water access and the tension between limits to water use and the ability of each jurisdiction to meet its RHNA requirements. Others highlighted the tension between State and local land use controls and expressed a desire for more local control.

COMMUNITY WORKSHOPS

Throughout the summer and fall of 2022, the participating jurisdictions held workshops for key stakeholders and community members interested in housing issues in the county. Participants listened to a short introductory presentation about the Housing Element Update and were asked to provide input on key issues, barriers, and opportunities for creating affordable housing in the county. In total, 122 community members attended the workshops.

Individual jurisdictions made efforts to encourage participation, including handing out flyers at community events, advertising the meetings on the City's website and in the City's email newsletter, sending press releases to local newspapers, posting flyers at key locations, and contacting residents of affordable housing developments. Further efforts included posting the workshop information on an electronic reader board for visibility as people enter the city, and making the event a push item on the City's app. See Appendix 1 for a sample of the publicity materials.

The following community workshops were held in the county:

- **Fresno County:** September 19, 2022, from 2 to 3:30 pm and October 3, 2022, from 2 to 3:30 pm
- **City of Firebaugh:** August 18, 2022, from 1 to 2:30 pm

- **City of Fresno:** August 31, 2022, from 6 to 7:30 pm
- **City of Huron:** September 1, 2022, from 6 to 7:30 pm
- **City of Kerman:** October 5, 2022, from 6 to 7:30 pm
- **City of Kingsburg:** August 16, 2022, at 6:00 pm
- **City of Coalinga:** October 5, 2022, from 6 to 7:30 pm
- **City of Mendota:** October 6, 2022, from 6 - to 7:00 pm
- **City of Reedley:** September 20, 2022, from 6 to 7:30 pm
- **City of Selma:** September 2, 2022, from 2 to 3:30 pm
- **City of Parlier:** September 21, 2022, from 6 to 7:30 pm
- **City of Sanger:** August 30, 2022, from 6 to 7:30 pm
- **City of Orange Cove:** September 22, 2022, from 6 to 7:30 pm

Across the 15 meetings, 101 community members registered and 122 attended. Depending on community need, language interpretation services were made available in English, Spanish, Hmong, and Punjabi. Interpretation in Spanish was provided at events in the City of Fresno and the Fresno County unincorporated areas and for the web live stream in Huron.

Additionally, in the following cities outreach took place at existing local events:

- **City of San Joaquin:** On August 10, 2022, from 5:00 to 6:30 pm, outreach consultants attended a community event hosted by the City of San Joaquin and the Golden Plains Unified School District.
- **City of Fowler:** On August 24, 2022, from 5:30 to 8:00 pm, outreach consultants attended a Wednesday Nights at the Park event.
- **City of Orange Cove:** Outreach consultants attended a Fresno Economic Opportunities Commission Food Distribution event to distribute fliers and collect community feedback.

Common themes in the feedback provided by attendees included concerns about the limitations caused by a lack of water access, a desire for more opportunities for home ownership and a more diverse mix of unit types, and concerns about increased housing costs and associated overcrowding.

STAKEHOLDER FOCUS GROUPS

Two stakeholder focus groups were held as part of the Housing Element development process. Stakeholders were presented with information about the Housing Element process, particularly sections regarding community needs and fair housing, and were given the opportunity to weigh in on community needs.

The first focus group was held on October 25, 2022, from 9:30 to 11:30 am. The following stakeholders registered for the event, though not all were able to attend:

- Gregory Terzakis, CAA
- Mirna Garcia, Envision Realty Inc./NAHREP Fresno
- Kayla Camargo, Lance-Kashian

- Bernard Jimenez, County of Fresno
- Sharrah Thompson, Tenants Together
- Karl Schoettler, City of Firebaugh
- Michelle Zumwalt, City of Fresno
- Lily Cha, City of Clovis
- Thomas Gaffery, City of Fowler
- Kristine Cai, Fresno Council of Governments
- Tyrone Williams, Fresno Housing
- Jeff O'Neal, City of Parlier
- Sophia Pagoulatos, City of Fresno Planning & Development Dept
- Rodney Horton, City of Reedley
- Rob Terry, City of Selma
- Casey Lauderdale, City of Fresno
- Yvette Quiroga, Fresno County
- Clancy Taylor, CCRH
- Dr. K Jones, Jr., Handle It Helping Hands, Inc.
- Gregory Terzakis, CAA
- John Holt, City of Clovis
- Mariah Thompson, California Rural Legal Assistance, Inc.
- Andy Hausler, City of Clovis

Participants expressed concerns about corporate investment groups purchasing large amounts of local housing. Housing quality was identified as an opportunity for local investment, particularly in unincorporated areas, and participants cited mobile home repair funding as a current gap in available programming, along with mobile home financing. One participant suggested that a program to help mobile homeowners pay for back taxes is necessary, as a statewide amnesty program ended, and that a program to help mobile home renters purchase their units from corporate acquisition companies would help them to stay in their homes. Lack of internet access among residents of mobile home parks has made it difficult for those residents to apply for necessary building permits in order to comply with eviction notices.

According to participants, undocumented community members don't seem to be served by current housing stock or programming. One participant expressed a concern that monolingual speakers of languages other than English may be taken advantage of by the current housing environment.

Credit and income levels were two major barriers to decent housing in local communities that participants identified. Attendees noted that programs with a "sweat equity" component, such as those offered by Self Help Enterprises, might serve the community well. Additionally, housing types that promote intergenerational housing without forcing overcrowding situations would allow families to share costs.

One participant identified small lot sizes and overreliance on commercial zoning in the past Housing Element cycle as an issue to avoid while developing this cycle's sites inventories. Another expressed an interest in seeing large lots in the unincorporated county area subdivided into smaller lots. Local residents fear displacement and so have concerns about the development of new housing.

Increased construction costs were a concern raised by several attendees. One participant noted that there is an active market for the development of ADUs within the region, but that there are few housing developers in some cities. Material costs are also unsustainable in the area.

The second focus group was held on November 15th from 9:30 to 11:30 am and was attended by the following stakeholders:

- David Rivas, NCCRC
- Mike Prandini, BIA
- Doa Lur, The Fresno Center
- Mirna Garcia, Envision Fresno
- Phil Skei, City of Fresno
- Rob Terry, City of Selma
- Karl Schoettler, City of Firebaugh
- David Brletic, City of Sanger
- Sophia Pagoulatos, City of Fresno

Some participants expressed concern that some of the data in the Housing Element might be outdated, particularly in light of the effects of the COVID-19 pandemic, though others felt it was accurate.

Attendees highlighted the gap between program eligibility and the ability to afford available housing, as some applicants for affordable housing programs make too much money to qualify but still can't afford housing without the program's assistance. At a recent workshop for community members interested in participating in a down payment assistance program, none of the attendees qualified because their incomes were higher than 80 percent of the area median income. For other community members, being able to show an income level of at least twice the rent of an apartment in the area is impossible.

Lack of cultural competency of homeless services has caused issues for some local members of the Asian/Pacific Islander community. One attendee mentioned that members of this community who are experiencing homelessness prefer to couch surf within the community rather than use formal homeless services, which leads to an undercounting of community members experiencing homelessness.

Several participants expressed concern about the siting of recent affordable housing projects. In the city of Fresno, a recent project was sited near a rendering plant and far from amenities. Many families in the area require a car to access work and school as well as other amenities, and in many cases families only have one car, which limits their access to these resources if they are far away.

Increases in housing construction and development costs were highlighted as a barrier to meeting community housing needs. Infrastructure costs and district fees, along with increased labor and materials costs, have added to construction costs by a significant amount. This is compounded by competing interests among State agencies, such as limiting water supply while also increasing the amount of housing available. One participant expressed a concern that inclusionary zoning and rent control might provide further cost pressure.

Note: One additional focus group meeting will occur in April 2023. Feedback will be summarized and included.

FARMWORKER AND FARM EMPLOYER SURVEYS

Fresno County completed a survey of farm employers and farmworkers about local housing needs. From September 2021 to January 2022, 170 farm employers were surveyed, and from February to July 2022, 240 farmworkers were surveyed.

Farm worker survey questions included the status of participants' current housing situation and their preferred housing. Surveys were conducted verbally by County Public Works and Planning staff, and the answers were recorded on paper by the surveyors.

Outreach efforts were scheduled in advance, primarily in April and May 2022. Staff contacted multiple food processing plants, farmers, and labor contractors in Fresno County regarding the on-site surveys or permission to collect an interest list of agriculture workers willing to participate in the survey. All employers were initially contacted by phone. Many of the agencies contacted refused to participate during the initial call. Some employers provided an email contact and attempted to set up dates to conduct the surveys with their employees, but the staff did not receive any responses to email requests. Most of the employers were unwilling to work with the "County" or a government agency.

Additional methods of outreach had to be utilized to reach the farmworkers. These methods included outreach to churches in unincorporated areas of Fresno County, attending community meetings hosted by the County and other agencies such as Leadership Council for Justice and Accountability, door-to-door outreach, and outreach to food distribution sites throughout Fresno County.

One of the most successful methods was the outreach to various food distribution sites throughout the county. Outreach efforts focused on sites with a dense farmworker population, unincorporated areas of Fresno County (Biola, Caruthers, Del Rey, Easton, Huron, Lanare, Laton, Raisin City, Riverdale, Cantua Creek, and Tranquility), and the participating city of Mendota. Survey participants completed surveys while they waited in line at food distribution sites. County staff also completed surveys at two apartment buildings in the communities of Biola and Del Rey that had been specifically funded to house farmworkers. Staff conducted surveys on two separate occasions by going door to door in unincorporated communities and asking occupants if they would like to participate in the survey.

Farm Employer Survey Results for Desired Farm Labor/Worker Housing

County staff surveyed a total of 170 farm employers, 25 of whom currently have some type of farm labor housing on site, though not all of this housing is necessarily currently in use. Five of those employers would consider retaining the existing farm labor housing. Of the 145 farm employers who do not have any farm labor housing on-site, 28 would consider adding labor housing as single houses or cottages. One farm employer specified labor housing as apartments. The type of farm operation was not explicitly captured through the survey, but staff was able to determine through the phone conversations that dairy farmers were the most interested in providing on-site housing because their industry requires 24-hour staffing. All respondents said that they would consider providing on-site housing if financing was provided by the government or through grants.

Farmworkers Survey Results for Desired Farm Labor/Worker Housing

County staff surveyed 240 farmworkers, including 100 homeowners. Of the nonhomeowners surveyed, five specified a desire to live in owned farm labor housing; four of those specified housing as single-family residences. Only five farmworkers surveyed desired to live in some type of farm labor housing. Further analysis revealed that 47 percent of nonhomeowner households desired homeownership, with single-family residence as the majority choice.

In summary, the surveys indicate that traditional farm labor or worker camp housing is not desired by the Fresno County farmworkers or laborers. Even though a small number of Fresno County farm employers expressed that they might be interested, it would only be if the housing was subsidized. Survey results indicate that employers might have difficulties finding farmworkers to live at those housing units if they were constructed.

TRAVEL SURVEY

The Fresno Council of Governments completed a survey of travel patterns and needs in collaboration with seven other MPOs in the San Joaquin Valley. Results from this survey are primarily used in the calibration and validation of travel demand models. Results from the first round of outreach were available at the time of the publication of the draft Housing Element. This outreach was completed in the spring of 2022 and received 3,753 responses.

Several survey questions allowed respondents to provide information about their current housing situation, current barriers to housing access, and desires for new housing options. Among those who responded to a question regarding barriers to homeownership, the largest group that selected a response (17.1 percent of all survey respondents) stated that they don't wish to own a home in the community. A slightly smaller group (16.1 percent) answered that they do not currently have the financial resources for mortgage payments. Over one-third of respondents (41.8 percent) identified their neighborhood's proximity to school, work, or shopping as the best thing about the neighborhood. More than half of respondents (56.9 percent) selected that they wanted to see more single-family homes in their community. The two housing categories that received the next-largest rate of responses were permanent supportive housing (7.0 percent) and apartments (6.3 percent). Most respondents to the survey had not experienced discrimination in housing. The majority of respondents had either one or two cars in their household and were nearly evenly distributed between renters and homeowners. Most respondents lived in a detached single-family house.

TRANSLATION

Flyers, PowerPoints, and language interpretation services were made available in English and Spanish and, depending on community need, Hmong and Punjabi. Interpretation in Spanish was requested and provided at community workshops in the City of Fresno and the unincorporated county areas and for the web live stream of the community workshop in Huron.

OUTREACH NOTICING

Community workshops were advertised through a variety of methods, including physical flyers posted and distributed at central community locations and affordable housing projects. Digital fliers were also distributed to local stakeholders and through the Fresno COG email list and were posted to the Housing Element project website as well as to City websites and Facebook pages. Materials were made available in both English and Spanish in all jurisdictions, and in Hmong and Punjabi for workshops in the City of Fresno.

Council, commission, and board of supervisor's study sessions were noticed by individual jurisdictions in accordance with the jurisdiction's standard public meeting noticing procedures.

REGIONAL HOUSING NEEDS ASSESSMENT

This section provides a comprehensive assessment of housing needs as the basis for developing responsive policies and implementation programs. This section summarizes demographic, employment, and housing characteristics for the jurisdictions in Fresno County. The main source of the information is the pre-approved data package for Fresno County provided by the California Department of Housing and Community Development (HCD), which is noted in the sources for the data tables in this section. The pre-approved data package uses several data sources, including the 2020 American Community Survey (ACS) 5-Year Estimates (2016-2020) and the California Department of Finance (DOF) population estimates. Other sources of information in this section include the Fresno County Council of Governments (FCOG), the California Employment Development Department (EDD), the U.S. Department of Housing and Urban Development (HUD), the U.S. Department of Agriculture (USDA), and local economic data (e.g., home sales prices, rents, wages). It is important to note that the ACS data is a multi-year estimate based on sample data and has a large margin of error, especially for smaller cities. One jurisdiction (Clovis) did not participate in the multi-jurisdictional housing element and is not represented in the tables or analysis.

POPULATION TRENDS AND CHARACTERISTICS

Population Change

The DOF provides population estimates for each jurisdiction, shown in **Table 2-1 Change in Total Population (2000-2022)**. Analyzing population change can help assess where there may be a need for new housing and services.

Fresno County had a total population of approximately 1,011,273 in 2022. More than half the countywide population resides in the city of Fresno. The unincorporated area has the next-largest population of 160,074, followed by the city of Clovis with a population of 123,665. The remaining cities have populations of about 26,000 or less.

The countywide average annual growth was 2.0 percent between 2000 and 2022, compared to -0.01 percent statewide. The city with the greatest average annual population change from 2000 to 2022 was Kerman, with a 4.3 percent increase, followed by Clovis and Mendota with 3.7 and 3.4 percent average annual growth, respectively.

Table 2-1 Change in Total Population (2000-2022)

Jurisdiction	Total Population				2000-2022	
	2000	2010	2020	2022	Total Change	Average Annual Growth
Fresno County	700,407	930,450	990,204	1,011,273	310,866	2.0%
Clovis	68,468	95,631	120,124	123,665	55,197	3.7%

SECTION 2: REGIONAL HOUSING NEEDS ASSESSMENT

Jurisdiction	Total Population				2000-2022	
	2000	2010	2020	2022	Total Change	Average Annual Growth

Source: FCOG Data Packet, 2022 -- U.S. Census Bureau, American Community Survey 5-Year Estimates (2016-2020) and Department of Finance, E5, 2020-2022.

Household and Group Quarters Population

The total population includes the household population and people living in group quarters. A household includes all persons who occupy a housing unit as their usual place of residence. This may include a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements. Group quarters include such places as college residence halls, residential treatment centers, skilled nursing facilities, group homes, military barracks, correctional facilities, and workers' dormitories.

As shown in **Table 2-2 Change in Household Population (2010-2020)**, the population living in group quarters in most of the jurisdictions was very small. However, the group quarters population in Fresno, Coalinga, and the unincorporated county were much larger. In Coalinga, this group quarters population primarily resides in the Pleasant Valley State Prison and the Coalinga State Hospital. In Fresno, three local detention facilities are located downtown with a fourth located two miles south of downtown.

Although the total population in Coalinga, shown in **Table 2-1**, increased between 2010 and 2020, there was a reduction in the group quarters population (at Pleasant Valley State Prison) as a result of recent changes to state and federal policies. As shown in **Table 2-2**, the group quarters population in Coalinga decreased from 6,335 in 2010 to 4,499 in 2020, while the household population slightly increased.

Table 2-2 Change in Household Population (2010-2020)

		2010	2022	2010 to 2022	
				Numerical Change	Percent Change
Clovis	Household Population	95,243	123,246	28,003	29.4%
	Group Quarters Population	388	419	31	8.0%
Coalinga	Household Population	11,752	12,778	1,026	8.7%
	Group Quarters Population	6,335	4,499	-1,836	-29.0%
Firebaugh	Household Population	7,536	8,425	889	11.8%

Age Characteristics

Although population growth strongly affects total demand for new housing, housing needs are also influenced by age characteristics. Typically, different age groups have distinct lifestyles, family characteristics, and incomes. As people move through each stage of life, their housing needs and preferences also change. Age characteristics are therefore important in planning for the changing housing needs of residents.

Table 2-3 Population by Age Group (2020), shows a breakdown of each jurisdiction's population by age group and the median age. The age groups include school-age children (ages 5-17), college-age students (ages 18-24), young adults (ages 25-44), middle-aged adults (ages 45-64), and seniors (ages 65+). A population with a large percentage of seniors may require unique housing that accommodates disabilities, located near health care, transit, and other services. College students may need more affordable homes. Young adults and middle-aged adults, which make up the workforce, may need homes near employment or transit centers with adequate size for families. San Joaquin, Orange Cove, and Mendota have a large proportion of school-age students, while Mendota, Orange Cove and Coalinga have a large percentage of college-age populations in association with colleges (Fresno City College, California State University Fresno, Fresno Pacific University, and California Christian College). Fowler and Unincorporated Fresno County had a significantly high percentage of seniors followed by Clovis and Kingsburg. Seniors as a cohort on average comprise 12 percent of the population, in contrast to the young and middle-aged adults. Mendota and Orange Cove have the lowest median age at about 25. Kingsburg has the highest median age at about 34, nine years higher. Median age data for the unincorporated areas was not available.

Population by Race/Ethnicity

FIGURE 2-1 Race and Ethnicity (2020) shows race and ethnicity of residents in Fresno County jurisdictions. The majority of the population in most jurisdictions – except for the unincorporated county, Fresno, Kingsburg and Clovis – is Hispanic (of any race). Countywide, more than half of the population identified as being of Hispanic or Latino origin. The populations of Huron, Mendota, Parlier, and San Joaquin City are all more than 95.0 percent Hispanic. Clovis has the lowest percentage at 30.5 percent. The second-largest population group is White, Not-Hispanic, with a high of 48.2 percent in Clovis. The populations in the Clovis, Kerman, Fowler, Fresno and unincorporated county have Asian populations above 5.0 percent, with the highest proportions in Fresno and Fowler.

HOUSEHOLD TRENDS AND CHARACTERISTICS

A household refers to the people occupying a home, such as a family, a single person, or unrelated persons living together. This estimate does not include people living in group homes. Families often prefer single-family homes to accommodate children, while single persons often occupy smaller apartments or condominiums. Single-person households often include seniors living alone or young adults.

Historical Growth

Table 2-4 Change in Households (2010-2020), shows the change in the number of households by jurisdiction between 2010 and 2020. Orange Cove had the most significant average annual growth in the number of households from 2010 to 2020 (3.0 percent) followed by Huron, Fowler, Parlier, and Coalinga with just under 2.2 percent growth. The unincorporated area and Kingsburg lost population (-0.2 percent). The cities with the slowest amount of growth were San Joaquin followed by Firebaugh and Reedley, at 4.2 percent, 6.3 percent, and 7.0 percent respectively.

Table 2-4 Change in Households (2010-2020)

Jurisdiction	2010	2020	Change 2010-2020	Percentage Change 2010-2020	Average Annual Growth 2010-2020

Household Formation and Composition

Table 2-5 Persons per Household (2020), shows the average household size for Fresno County in 2020. A higher persons-per-household ratio indicates a larger proportion of families, especially large families, and fewer single-person households. The Fresno region has larger households than the statewide average. Countywide, the average household size was 3.1 persons per household in 2020, compared to 2.9 statewide. The two cities with the largest average household size in 2020 were Mendota (4.3) and Sanger (4.4), followed closely by Parlier (4.0), and Firebaugh, Huron, and Orange Cove (3.8). The cities with the lowest persons per household ratio were Clovis, Coalinga and Fresno (3.0), followed by Fowler (3.1) and Kingsburg (3.2). The larger household size throughout the county indicates a need for housing units with adequate number of rooms to accommodate families without overcrowding.

Table 2-5 Persons per Household (2020)

City	Average Persons Per Household
Fresno County	3.1
Clovis	3.0
Coalinga	3.0
Firebaugh	3.8
Fowler	3.1
Fresno	3.0
Huron	3.8
Kerman	3.6
Kingsburg	3.2

City	Average Persons Per Household
Mendota	4.3
Orange Cove	3.8
Parlier	4.0
Reedley	3.6
Sanger	4.4
San Joaquin	3.6
Selma	3.4
Unincorporated County	3.0

Household Income

Household income is a key factor affecting housing opportunity, determining a household's ability to balance housing costs with other basic necessities. Income levels can vary considerably among households based on employment, occupation, educational attainment, tenure, household type, location of residence, and race/ethnicity, among other factors.

Income Definitions and Income Limits

The state and federal governments classify household income into several categories based on the relationship to the county area median income (AMI), adjusted for household size. The HUD estimate of AMI is used to set income limits for eligibility in federal housing programs. The income categories include:

- Extremely low-income households, which earn up to 30 percent of the AMI;
- Very low-income households, which earn between 31 and 50 percent of the AMI;
- Low-income households, which earn between 51 and 80 percent of the AMI; and
- Median-income households, which earn 100 percent of the AMI.

For all income categories, income limits are defined for various household sizes based on a four-person household as a reference point. Income limits for larger or smaller households are calculated by HUD (see **Table 2-6 HUD Income Limits by Persons per Household (2022)**). According to HUD, the AMI for a four-person household in Fresno County was \$72,900 in 2022.

Table 2-6 HUD Income Limits by Persons per Household (2022)

Fresno County Income Categories	Median Income	Persons per Household				
		1	2	3	4	5
Extremely Low-Income Household (30%*)	\$72,900	\$16,350	\$18,700	\$23,030	\$27,750	\$32,470
Very Low-Income Household (50%)		\$27,300	\$31,200	\$35,100	\$38,950	\$42,100
Low-Income Household (80%)		\$43,650	\$49,850	\$56,100	\$62,300	\$67,300

Source: U.S. Department of Housing and Urban Development (HUD), 2022.

HCD uses the income categories shown in **Table 2-7 State of California Income Categories**, to determine eligibility for state housing programs. HCD's methodology for calculating AMI is slightly different from HUD's methodology; therefore, the AMI and income limits vary.

Table 2-7 State of California Income Categories

Income Category	Percentage of County Area Median Income (AMI)
Acutely Low	0%-15% of AMI
Extremely Low	15%-30% AMI
Very Low	31%-50% AMI
Low	51%-80% AMI
Moderate	81%-120% AMI
Above Moderate	120% AMI or greater

Source: Section 50063.5 of the California Health and Safety Code.

The State income limits for Fresno County are shown in **Table 2-8 HCD Income Limits by Person per Household (2022)**. The California 2022 AMI for a four-person household in Fresno County is \$80,300 (compared to the federal estimate of \$72,900). A four-person household earning \$62,300 or less would be considered low-income.

Table 2-8 HCD Income Limits by Person per Household (2022)

Fresno County Income Categories	Persons per Household							
	1	2	3	4	5	6	7	8
Acutely Low	\$8,450	\$9,650	\$10,850	\$12,050	\$13,000	\$14,000	\$14,950	\$15,900
Extremely Low-Income Household (30%*)	\$16,350	\$18,700	\$23,030	\$27,750	\$32,470	\$37,190	\$41,910	\$46,630
Very Low-Income Household (50%*)	\$27,300	\$31,200	\$35,100	\$38,950	\$42,100	\$45,200	\$48,300	\$51,450
Low-Income Household (80%*)	\$43,650	\$49,850	\$56,100	\$62,300	\$67,300	\$72,300	\$77,300	\$82,250
Median-Income Household (100%*)	\$56,200	\$64,250	\$72,250	\$80,300	\$86,700	\$93,150	\$99,550	\$106,000
Moderate-Income Household (120%*)	\$67,450	\$77,100	\$86,700	\$96,350	\$104,050	\$117,750	\$119,450	\$127,200

*Percentage Estimate of AMI: \$80,300

Median-Household Income

FIGURE 2-2 Median Household Income (2020), shows actual median household income for the jurisdictions in Fresno County, as reported by the 2020 ACS 5-Year Estimates. This median income is for all households, regardless of household size. The median household income in California was \$78,672 in 2020, higher than the Fresno County median of \$57,109. The city with the highest median household income in 2020 was Clovis at \$84,119, followed by the Kingsburg at \$73,281. The city with the lowest median income was Orange Cove at \$25,587, with five cities, Firebaugh, Huron, Mendota, Parlier, and San Joaquin with incomes below \$40,000.

FIGURE 2-2 Median Household Income (2020)

Note: Data for unincorporated area is based on compilation of available CDP data.

Source: FCOG Data Packet, 2022 -- U.S. Census Bureau, American Community Survey 5-Year Estimates (2016-2020).

According to the 2014-2018 HUD Comprehensive Housing Affordability Strategy (CHAS) Data, Firebaugh, Huron, Orange Cove, Sanger, and Selma all have a higher representation of very low-income households than the countywide average rate of 12.8 percent, as shown in **Table 2-9 Jurisdictions with Over-Representation of Very Low-Income (VLI) Families (2018)**. This data suggests that these households may experience challenges in finding housing affordable within their incomes.

Table 2-9 Jurisdictions with Over-Representation of Very Low-Income (VLI) Families (2018)

Jurisdiction	Total Families	Estimated Families VLI	Jurisdiction VLI Rate
Fresno Countywide Average	304,625	39,010	12.8%
Firebaugh	2,170	465	21.4%
Huron	1,770	410	23.2%
Orange Cove	2,385	670	28.1%
Sanger	7,085	1,225	17.3%
Selma	6,755	1,175	17.4%

EMPLOYMENT TRENDS AND CHARACTERISTICS

Fresno County's economy has a significant impact on housing needs. Employment growth typically results in increased housing demand in areas that serve as regional employment centers. Moreover, the type of occupation and associated income levels for new employment also affect housing demand. This section describes the economic and employment patterns in Fresno County and how these patterns influence housing needs.

Employment and Wage Scale by Industry

Occupations held by residents determine the income earned by a household and their corresponding ability to afford housing. Higher-paying jobs provide broader housing opportunities for residents, while lower-paying jobs limit housing options. Understanding employment and occupation patterns can provide insight into present housing needs.

FIGURE 2-3 Employment by Industry (2020), and Table 2-10 Employment by Industry (2020), show employment by industry for each jurisdiction. In Fresno County, the most common industry, at 24.7 percent, is educational services, health care and social assistance (shown in FIGURE 2-1 in red). This industry is also the most common in Clovis, Coalinga, Fowler, Fresno City, Kerman, Kingsburg, Sanger, Selma, and the unincorporated area.

Agriculture, forestry, fishing and hunting, and mining holds a significant percentage of employment in Firebaugh, Huron, Mendota, Orange Cove, Parlier, Reedley, and San Joaquin. Huron has the highest percentage at 63.6 percent. These areas are more rural and strongly based in agriculture.

Unemployment

According to the California EDD, in 2020, the statewide unemployment rate was 4.0 percent. The unemployment rate in Fresno County was significantly higher than the statewide rate at 5.8 percent. **FIGURE 2-5 Unemployment Rate (2022)**, shows unemployment in Fresno County by jurisdiction. The city with the highest unemployment rate was Firebaugh at 14.4 percent, followed by Huron at 12.9 percent. Parlier and Clovis had the lowest unemployment rate at about 3 percent, followed by Kingsburg at 3.5 percent, and Fowler at 3.6 percent. The high unemployment rate in many of the jurisdictions suggests that residents may be experiencing barriers to accessing employment opportunities and therefore may be at risk for housing displacement or homelessness.

Labor Force Trends

Table 2-11 Fresno County Job Growth by Industry Sector (2018-2028), shows employment projections by industry sector in Fresno County from 2018 to 2028. According to EDD data, industry employment in Fresno County is expected to grow by 30,800 jobs between 2018 and 2028, to an estimated 452,000 by 2022. Total nonfarm employment is projected to gain approximately 28,300 jobs by 2022. The health care and social assistance, educational services (private), leisure and hospitality sectors are expected to account for approximately 50 percent of all nonfarm job growth. The number of jobs in the educational services (private) industry is expected to increase by 17.8 percent. Health care and social assistance is projected to grow by 18.2 percent.

Table 2-11 Fresno County Job Growth by Industry Sector (2018-2028)

Industry Title	Estimated Employment 2018	Projected Employment 2028	Numeric Change 2018-2028	Percentage Change 2018-2028

FIGURE 2-6 Fresno County Average Annual Job Openings by Entry-Level Education (2010-2020) shows the average annual job openings by entry-level education. According to California EDD, most expected job openings between 2010 and 2020 will require a high school diploma or less. Registered nurses are the only occupation among the top 10 occupations with the largest number of job openings that has an entry education level requirement higher than a high school diploma. Of the top 20 occupations on the list of fastest-growing jobs, 13 are in a construction-related field due to the expected recovery in the construction industry over the projection period. Occupations requiring less education generally correspond to lower earnings potential, suggesting that housing affordable to lower-income households will continue to be needed throughout Fresno County.

FIGURE 2-6 Fresno County Average Annual Job Openings by Entry-Level Education (2010-2020)

POPULATION AND EMPLOYMENT PROJECTIONS

Table 2-12 Fresno County Population Forecast (2025-2050), and Table 2-14 Fresno County Employment Forecast (2025-2040), show population and employment forecasts, which are from the Fresno County 2019-2050 growth projections prepared for the Fresno County Council of Governments.

Population Forecast

Based on the forecast shown in **Table 2-12**, countywide population will grow to an estimated 1,240,090 persons by the year 2050. This assumes an average annual growth rate of 0.6 percent between 2025 and 2050. In the past, the county population has increased at rates of 2.0 percent a year from 1970 to 1990, and 1.8 percent a year from 2010 to 2014. During the next two and a half decades (2025-2050), 170,290, or 15.9 percent more people are expected to reside in Fresno County.

Table 2-12 Fresno County Population Forecast (2025-2050)

Year	Population
2025	1,069,800
2030	1,112,010
2035	1,151,390

2040	1,185,850
2045	1,215,740
2050	1,240,090

Source: Fresno County 2019-2050 Growth Projections.

Fresno County's share of California's population is expected to steadily increase, as shown in **Table 2-13 Population of Fresno County and California (1980-2040)**. From 1980 to 2010, the County share of the State's population grew from 2.2 to 2.5 percent. By 2040, that share is expected to increase to 2.7 percent, indicating that housing at adequate price points and sizes to accommodate the increased population will be needed.

Table 2-13 Population of Fresno County and California (1980-2040)

Year	Fresno County Population	California Population	Fresno County Share of California Population
1980	514,621	23,667,764	2.2%
1990	667,490	29,760,021	2.2%
2000	700,407	33,871,648	2.1%
2010	930,450	37,253,956	2.5%
2020	990,204	39,538,223	2.5%
2030	1,112,010	41,860,549	2.7%
2040	1,185,850	43,353,414	2.7%

Employment Forecast

Table 2-14 shows the employment forecast for Fresno County by 2050. The Fresno County employment level will increase during the 2025-2040 forecast period. However, the unemployment rate will continue to be higher than the California average.

Table 2-14 Fresno County Employment Forecast (2025-2040)

Year	Employment
2025	418,800
2030	432,400

2035	444,800
2040	456,500
2045	466,800
2050	475,000

HOUSING INVENTORY AND MARKET CONDITIONS

This section describes the housing characteristics and conditions that affect housing needs in Fresno County. Important housing stock characteristics include housing type, tenure, vacancy rates, age, condition, cost, and affordability.

Housing Stock Profile

Table 2-15 Housing Stock (2010-2022) shows estimates from the DOF of the number of housing units by type for each jurisdiction based on reported building and demolition permits. DOF reported that Fresno County had 343,513 housing units in January 2022. Of the total units, 70.3 percent were single family, 25.4 percent were multifamily, and 4.3 percent were mobile homes. The unincorporated area had the highest percentage of single-family homes in 2022 (82.7 percent) and mobile homes (11.7), with Huron having the lowest at 38.3 percent. Conversely, Huron had the highest percentage of multifamily units (55.6 percent), followed by Fresno at 32.9 percent, and Orange Cove at 32.8 percent. While mobile homes comprise 4.3 percent of housing stock countywide, 11.7 percent of housing stock in the unincorporated county are mobile homes, followed by mobile homes representing 10.9 percent of housing stock in Coalinga.

Countywide, the proportion of multifamily units slightly decreased by 1.4 percent between 2010 and 2022 in Fresno County, although in several smaller cities, including San Joaquin and Parlier, the proportion of multifamily units slightly increased. These two jurisdictions also have the lowest median household incomes in the county, suggesting these additional units may have been affordable housing complexes.

Clovis, in particular, had the most multifamily units constructed during the period for any of the larger cities (1,376), and also the second highest percentage of multifamily construction at nearly 15.7 percent of all new construction followed by the City of Reedley 23.9 percent increase. The larger city of Kerman and two smaller cities of Fowler and Kingsburg, which together total about 13,367 residents, had a combined total of 2,398 multifamily units constructed during the period.

A large proportion of the multifamily development that has occurred after the boom of the 1980s was subsidized through a variety of public housing and tax credit programs targeted to low-income residents (i.e., non-market rate affordable housing). As summarized in **Table 2-16 Affordable vs. Market-Rate Multifamily Housing (1980-2013)**, about 87 percent of the units developed during the 1980s were strictly market rate, compared to an estimated 69.0 percent in the 1990s and 65 percent between 2000 and 2013. When subsidized affordable units are excluded, the production of multifamily units after the mid-1980s has been even more limited.

Table 2-16 Affordable vs. Market-Rate Multifamily Housing (1980-2013)

Period	Market-Rate Multifamily Housing	Affordable Multifamily Housing	Mixed Market-Rate and Affordable Multifamily Housing
--------	---------------------------------	--------------------------------	--

Housing Tenure

Housing tenure (owner vs. renter) influences several aspects of the local housing market. Residential mobility is influenced by tenure, with ownership housing turning over at a much lower rate than rental housing. For example, in Fresno County, the median year that owners moved into their current unit was 2001, whereas the median year that renters moved into their current unit was after 2010 (2011-2013 ACS). **Table 2-17 Housing Tenure (2020)**, shows tenure by jurisdiction in 2020. Most jurisdictions have more owner-occupied units than renter-occupied units. The unincorporated county has the highest percentage of owner units at 68.9 percent, followed by Kingsburg at 68.9 percent. Huron has the lowest percentage of owner units at 20.9 percent. When compared to proportion of housing unit by type, this data indicates that single-family detached units comprise a portion of the rental stock in the majority of jurisdictions.

According to the Fresno County Affordable Housing Needs Report published by the California Housing Partnership Corporation in May 2022, asking rents in Fresno County increased by 10.7 percent between 2020 and 2021. According to the same report, although rents in Fresno County are typically lower than in other counties in the state, renters need to earn 1.6 times minimum wage to afford the average asking rent in Fresno County. Based on previous analysis of employment forecasts and income levels, increasing rental costs in Fresno County may pose a barrier to finding adequate housing opportunities for lower-income households.

Table 2-17 Housing Tenure (2020)

Jurisdiction	Total Households	Renter-occupied Units		Owner-occupied Units	
		Households	Percentage	Households	Percentage
Fresno County Total	310,097	143,677	46.3%	166,420	53.7%

Vacancy Rate

Table 2-18 Housing Stock and Vacancy Rate (2010-2022), shows housing units and vacancies in unincorporated Fresno County and the cities according to the 2010 and 2020 U.S. Census. The vacancy rate indicates the match between the demand and supply of housing. Vacancy rates of 5.0 percent to 6.0 percent for rental housing and 1.5 percent to 2.0 percent for ownership housing are generally considered optimum. A higher vacancy rate may indicate an excess supply of units, a softer market, and result in lower housing prices. A lower vacancy rate may indicate a shortage of housing and high competition for available housing, which generally leads to higher housing prices and diminished affordability.

As **Table 2-18** shows, the vacancy rate decreased in all communities between 2010 and 2022, except in Clovis, Huron, and Reedley. In 2022, the unincorporated area and the city of Firebaugh had the highest vacancy rate at 12.2 and 8.1 percent, respectively. The vacancy rate in the unincorporated area was still the highest in 2022, even though it decreased to 12.2 percent. However, much of the eastern unincorporated county is adjacent to the Kings Canyon and Sierra National Forests and many of the vacant units may be vacation rentals. Therefore, the vacancy rates in Firebaugh and Reedley, at 8.1 and 6.8 percent respectively, may be more indicative of a housing stock issue.

Table 2-18 Housing Stock and Vacancy Rate (2010-2022)

Jurisdiction	2010			2022

Housing Conditions

Housing conditions are an important indicator of quality of life in Fresno County communities. If not regularly maintained, structures can deteriorate as they age over time and discourage reinvestment, depress neighborhood property values, and even become health hazards. Maintaining and improving housing quality is an important goal for communities.

Housing age can be an indicator of the need for housing rehabilitation. Generally, housing older than 30 years (i.e., built before 1990), may require repair and improvement of such features as siding; fencing; roofs; and heating, ventilation, and air conditioning (HVAC) systems, while housing units older than 50 years (pre-1970) are more likely to require complete rehabilitation of systems such as roofing, plumbing, structural, and electrical.

Table 2-19 Age of Housing Stock (2020), shows the age of the housing stock in Fresno County. In almost all jurisdictions, more than half of the housing stock is over 30 years old. In Fresno County overall, 64.5 percent of the housing stock is over 30 years old, with 78.8 percent of the housing stock in the unincorporated county over 30 years, followed by Fresno City at 66.7 percent. These units may require repairs or improvements. The city with the highest percentage of new housing is Kerman, followed by Huron, Firebaugh, and Clovis. Less than 35.0 percent of the housing stock in all jurisdictions, except in unincorporated county and Parlier, is over 50 years old, with seven of the remaining 13 jurisdictions having between 30.0 and 35.0 percent of their housing stock over 50 years of age. Overall, almost one-third of Fresno County's housing stock is over 50 years of age and may require significant repairs in the near future to maintain inhabitability. The cost of repairs is often out of the capability of lower-income households.

SECTION 2: REGIONAL HOUSING NEEDS ASSESSMENT

Most jurisdictions have not completed housing conditions surveys in recent years due to limited financial resources for conducting the survey or for providing rehabilitation assistance. However, staff from the local jurisdictions provided rough estimates of the number of housing units needing rehabilitation or replacement based on code enforcement cases and local knowledge of the communities.

According to a code enforcement officer in Selma, 55 homes (0.8 percent of the housing stock) are in need of rehabilitation, and none are in need of replacement. The majority of the homes are in the neighborhood south of Rose Avenue and west of McCall Avenue.

According to a contract staff planner in Huron, 197 homes (12 percent of the housing stock) are in need of rehabilitation, and 49 (3 percent of the housing stock) are in need of replacement.

According to a staff planner in Sanger, 43 homes (0.5 percent of the housing stock) are in of rehabilitation, and 7 (less than 0.1 percent of the housing stock) are in need of replacement. The neighborhoods with the greatest need for rehabilitation are in the southeast and central core.

According to code enforcement in Reedley, there has been an average of 2 cases of substandard conditions per year during the 5th cycle planning period. Based on this, and local experience, the City estimates that less than 1 percent of the housing stock is in need of repair or replacement.

Overpayment (Cost Burden)

State and federal housing law defines overpayment (also known as cost burden) as a household paying more than 30 percent of gross income for housing expenses. As shown in **Table 2-20 Overpayment by Tenure (2018)**, the overall rate of overpayment in Fresno County is 37.8 percent. With the exception of Kingsburg, Coalinga, the unincorporated county, and Clovis, most jurisdictions have overpayment rates above 35.0 percent. Orange Cove has the highest percentage of total households overpaying for housing (53.9 percent), followed by Huron (47.4 percent), Mendota (46.7 percent), and Parlier (45.1 percent).

Housing overpayment is especially problematic for lower-income households that have limited resources for other living expenses. In all jurisdictions, a higher percentage of lower-income households are overpaying for housing, with 70.6 percent of lower-income households countywide experiencing overpayment. The jurisdictions of Clovis, Reedley, Fresno, Selma, Sanger, and unincorporated county have the highest percentage of cost-burdened lower-income households at 74.2 percent, 75.1 percent, 74.8 percent, 72.3 percent, and 70.6 percent respectively. In Kingsburg, where the overpayment rate is the lowest in the county at 16.2 percent, 63.5 percent of lower-income households are cost burdened, which aligns with the rate of overpayment among lower-income households in the majority of jurisdictions in Fresno County. However, in the unincorporated county, the overall rate of overpayment and rate of lower-income, cost-burdened households in almost equivalent, suggesting that moderate- and above moderate-income households are generally able to afford the units they occupy.

Generally, renters tend to be more affected by overpayment than owners, and this trend occurs in all jurisdictions in the county. Although the proportion of owners and renters countywide is fairly comparable, (52.8 percent homeowners and 47.2 percent renters), 52.2 percent of renters are cost burdened compared to 25.0 percent of homeowners. Jurisdictions with proportions of cost-burdened homeowners below the

countywide rate included Clovis, Kingsburg, Firebaugh, Fowler, Coalinga, and unincorporated county. Jurisdictions with cost-burdened renters below the countywide rate include Clovis, Coalinga, Huron, Kerman, Kingsburg, Mendota, San Joaquin, and unincorporated county. Reedley has the highest percentage of overpaying renters (82.1 percent), followed by Fowler (79.8 percent), Fresno (79.4 percent), and Clovis (78.7 percent). In Fresno County, while 62.2 percent of renters are lower-income households, lower-income households comprise approximately 90.0 percent of cost-burdened renters. Data indicates that in almost every jurisdiction, with the exception of unincorporated county, the total number of cost-burdened renters follows a similar trend, where the number of total cost-burdened renters is almost equivalent to the number of cost-burdened, lower-income renters. This trend suggests that the majority of moderate and above moderate-income renters are able to find rental housing at costs below 30 percent of their income. In unincorporated county, while 60.2 percent of renters are lower-income, only 19.3 percent of cost-burdened households are lower-income.

A similar trend in which the majority of cost-burdened homeowners are also lower income. However, in several jurisdictions, including Fresno County, Fresno City, Fowler, Kingsburg, and unincorporated county, the correlation between proportion of cost-burdened homeowners and lower-income, cost-burdened homeowners make up less than 65.0 percent compared to an average of 90.0 percent among renters. However, these rates of overpayment indicate that these households are generally not able to find adequate housing opportunities within their income range.

Overcrowding

HCD defines an overcrowded unit as one occupied by 1.01 persons or more per room (excluding bathrooms and kitchens). Units with more than 1.5 persons per room are considered severely overcrowded. A typical home might have a total of five rooms (three bedrooms, living room, and dining room). If more than five people were living in the home, it would be considered overcrowded. Overcrowding is strongly related to household size, particularly for large households, and the availability of suitably-sized housing. Overcrowding in households typically results from either a lack of affordable housing (which may force more than one household to live together) and/or a lack of available housing units of adequate size. Overcrowding increases health and safety concerns and stresses the condition of the housing stock and infrastructure. Overcrowding impacts both owners and renters; however, renters are generally more significantly impacted.

While family size and tenure are critical determinants in overcrowding, household income also plays a strong role in the incidence of overcrowding. Generally, overcrowding levels tend to decrease as income rises, especially for renters (particularly for small and large families).

Table 2-21 Overcrowding by Tenure (2020) shows overcrowding by tenure for each jurisdiction in Fresno County. The Fresno County overcrowding rate at 6.2 percent is slightly higher than the statewide overcrowding rate at 5.2 percent, while the severe overcrowding rate is 3.6 percent compared to 3.0 percent at the state level. The cities of Mendota, San Joaquin, Huron, and Orange Cove have the highest rate of overcrowding and severe overcrowding combined; at 27.3 percent, 24.1 percent, 17.0 percent, and 15.2 percent, respectively. The highest rates of severely overcrowded households are found in Mendota, Parlier, and San Joaquin. In contrast, the city of Kingsburg has low rates of overcrowding and no severely overcrowded households.

In Fresno County and statewide, overcrowding is typically more of a problem for renter households at 14.8 percent and 4.2 percent respectively, compared to overcrowding among owner households at 4.1 percent in Fresno County and 13.2 percent statewide. In the cities of Coalinga and Huron, the incidence of overcrowding is higher for owners than it is for renters, although in Huron renters represent more than double the proportion of homeowners. In Mendota and San Joaquin, the combined incidence of overcrowded and severely overcrowded households is comparable between both renters and owners.

HOUSING COST AND AFFORDABILITY

Home Price Trends

In Fresno County, as shown in **FIGURE 2-7 Median Sales Price for Fresno County**, the average single-family home value peaked in July 2022 at about \$375,000 and was at its lowest in 2013 at less than \$170,000.

FIGURE 2-7 Median Sales Price for Fresno County

Source: Zillow Data accessed at <https://www.zillow.com/research/data/> and Redfin (July, 2022)

Table 2-22 Home Sales Recorded in 2021-22, shows the number of home sales and median price for each jurisdiction in Fresno County as of May 2022. According to CoreLogic, in 2022, 1,135 homes were sold countywide with a median price of \$400,000. This is a 15.4 percent increase from the 2021 countywide median price. More homes were sold in 2022 in the city of Fresno than in all other jurisdictions combined. Among the incorporated jurisdictions, Clovis had the highest median sale price of \$475,000, followed closely by Fowler at \$455,000, and Huron had the lowest at \$155,000; however, the median in Huron is based on a very small number of home sales (three homes). The highest home sales prices were recorded in the unincorporated community of Shaver Lake at \$700,00, which also had the highest home sales price in 2021.

Table 2-22 Home Sales Recorded in 2021-22

	2022 Sale Counts	2022	2021	Percentage Year to Year Change

Rental Trends

Close to half of Fresno County households are renters. Although renters in general tend to live in multifamily units, about 43 percent of renter households in Fresno County live in single-family homes, compared to 36 percent statewide and about 34 percent nationwide. Given that very few developers build market-rate, single-family units for rent, data suggests that many single-family units originally built as for-sale products have been converted to rental property over time. This trend is particularly relevant to Fresno County as data indicates that family size tends to be larger in the county compared to other regions in the state, and as single-family homes generally have more bedrooms than the majority of multifamily units, would accommodate a portion of the need for larger units.

The median rent in Fresno County is well below the state average, especially when compared to urban areas where new rental products (e.g., multifamily apartments) are being developed. For example, based on data from Zillow.com, which has collected data on asking rents ranging from studios to single-family homes for most counties in the state for over four years, rents in Fresno County are about 61.7 percent of the state average in 2021, decreasing from 72.7 percent of the state average in 2014. Fresno County rents in 2021 were about \$300 less than those in the Stockton area, and approximately \$156 more than Bakersfield.

Table 2-23 Residential Rental Rate Comparison (2014-2021)

Jurisdiction	Rental Rate	Year		Growth of 2014-2021	
		2014	2021	\$ Change	Percentage Change
Fresno County	Average Rent	\$1,200	\$1,697	\$497	41.4%
California	Average Rent	\$1,650	\$2,749	\$1,099	66.6%
Fresno County as a percentage of California	Average Rent	72.7%	61.7%	N/A	-15.1%
Stockton	Average Rent	\$1,499	\$2,317	\$818	54.6%
Bakersfield	Average Rent	\$1,044	\$1,421	\$377	36.1%

Ability to Pay

Table 2-24 Fresno County Ability to Pay (2022), summarizes HCD-defined household income limits for very low-, low-, and moderate-income households in Fresno County by the number of persons in the household. The table also includes the maximum affordable monthly rents and maximum affordable purchase prices for homes. Households earning the 2022 area median income for a family of four in Fresno County (\$80,300), could afford to spend up to \$2,008 per month on rent without overpaying. A three-person household would be classified as low-income if its annual income was less than \$72,250. This household could afford a \$1,806 maximum monthly rent.

For renters, this is a straightforward calculation, but home ownership costs are less transparent. An affordable price depends on several factors, including the down payment, the level of other long-term obligations (such as a car loan), and interest rates. In practice, the interaction of these factors, as well as insurance and taxes allows some households to qualify for homes priced at more than three times their annual income, while other households may be limited to purchasing homes no more than two times their annual incomes. Interest rates, insurance, and taxes are held constant in **Table 2-24** to determine maximum affordable rent and purchase price for households in each income category. It is important to note that this table is used for illustrative purposes only.

Housing is generally affordable in Fresno County in comparison to more urbanized regions and coastal communities. The median home sale price countywide would be affordable to a four-person household earning the median income of \$80,300, as shown in **Table 2-24**. Even low- and very low-income households can afford the median priced home in many jurisdictions and unincorporated communities in the county. For example, a low-income four-person household making \$62,300 per year could afford an estimated maximum purchase price of \$290,133. Based on the median home sale prices previously reported in **Table 2-22**, a household earning this income could afford the median home sale price in Coalinga, Mendota, Parlier, and the unincorporated county. It should be noted however, that the home price survey reported in **Table 2-22** does not distinguish between number of bedrooms and single-family, condominium units, or mobile homes. Therefore, the lower purchase prices may include mobile home stock, which is generally priced lower than traditional single-family units, and may not be appropriate for families of four without overcrowding.

¹ Assumes that 30 percent (35 percent for moderate) of income is available for either: monthly rent, including utilities; or mortgage payment, taxes, mortgage insurance, and homeowners' insurance.

² Assumes 96.5 percent loan at 5.0 percent annual interest rate and 30-year term; assumes taxes, mortgage insurance, and homeowners' insurance account for 21 percent of total monthly payments.

³ 2022 State Area Median Income for Fresno County is \$80,300.

Table 2-25 HUD Fair-Market Rent by Bedroom (2022), shows HUD-defined fair-market rent levels (FMR) for Fresno County for 2022. In general, the FMR for an area is the amount needed to pay the gross rent (shelter rent plus utilities) of privately owned, decent, safe, and sanitary rental housing of a modest (non-luxury) nature with suitable amenities. The rents are drawn from the distribution of rents of all units that are occupied by recent movers. Adjustments are made to exclude public housing units, newly built units, and substandard units.

As shown in **Table 2-24**, a three-person household classified as low-income with an annual income of \$56,100 could afford to pay \$1,403 monthly gross rent (including utilities). As shown in **Table 2-25**, the 2022 FMR for a two-bedroom unit in Fresno County is \$1,137. Therefore, a low-income, three-person household at the middle of the income range can afford to rent a two-bedroom unit at the FMR level. A moderate-income, three-person household with an income of \$86,700 could afford to pay \$2,168 in rent without overpaying. This is enough to pay the FMR for a four-bedroom apartment (\$1,847). This data indicates that although rents in Fresno County are generally lower than in other regions, lower-income households may experience barriers to finding affordable housing unless the units are subsidized, or housing choice vouchers are available and accepted.

Table 2-25 HUD Fair-Market Rent by Bedroom (2022)

Bedrooms in Unit	2022 FMR
Studio	\$899
1 Bedroom	\$904
2 Bedrooms	\$1,137
3 Bedrooms	\$1,607
4 Bedrooms	\$1,847

SPECIAL NEEDS

Within the general population, there are several groups of people who have special housing needs. These needs can make it difficult for members of these groups to find suitable housing. The following subsections discuss these special-housing needs of six groups identified in State Housing Element Law (Government Code, Section 65583(a)(7): elderly, persons with disabilities (including developmental disabilities), large households, farmworkers, families with single-headed households, and families and persons in need of emergency shelter. This section also describes the needs of extremely low-income households. Where possible, estimates of the population or number of households in Fresno County belonging to each group are shown.

Senior Population

Seniors are defined as persons 65 years and older, and senior households are those households headed by a person 65 years and older. Seniors have special housing needs based on factors such as age, health, self-care capacity, economic status, family arrangement, and homeownership. Particular needs for the elderly include smaller and more efficient housing, barrier-free and accessible housing, and a wide variety of housing with health care and/or personal services. Various programs can help meet the needs of seniors including, but not limited to, congregate care, supportive services, rental subsidies, shared housing, and housing rehabilitation assistance. For the elderly with disabilities, housing with features that accommodate disabilities can help ensure continued independent living. Elderly with mobility/self-care limitations also benefit from transportation alternatives. Senior housing with these accommodations can allow more independent living.

As shown in **Table 2-26**, in 2020, 19.4 percent of the population statewide was over the age of 65 and Fresno County had a comparable representation of seniors at 12.0 percent. In general, the population in Fresno County is fairly young, partially attributed to the prevalence of larger families with children, with San Joaquin and Mendota having the lowest senior population, with less than 7.0 percent of the population over 65.

Table 2-26 Percentage of the Senior Population (65 and Over) (2020)

Jurisdiction	Total Population	Seniors	Percentage Seniors
Fresno County	990,204	118,595	12.0%

Source: FCOG Data Packet, 2022 -- U.S. Census Bureau, American Community Survey 5-Year Estimates (2016-2020)

Table 2-27 Senior Households by Tenure (2020), shows senior householders by tenure. In Fresno County, the majority of seniors (71.4 percent), were living in owner-occupied units in 2020, compared to 53.7 percent of all households, suggesting that many senior households may have aged in place in homes they purchased during the building boom of the 1980s and 1990s. Unincorporated county has the highest proportion of senior households, at 30.7 percent of total households, as well as the highest proportion of senior homeowners at 85.2 percent of senior households. Corresponding to the lower incidence of seniors in the communities of Huron and San Joaquin, the distribution of homeowners is also well below the county average, at 9.7 percent and 32.3 percent respectively.

As shown in **Table 2-28 Seniors with Disabilities (2020)**, the population 65 years and over has the highest rate of disabilities, typically those associated with aging. Countywide, an estimated 41.6 percent of seniors have a disability. The cities of Coalinga and Fowler have the highest rates of seniors with disabilities, at over one-half of the senior population, whereas San Joaquin and Mendota, more actively agricultural production communities, have the lowest rates of seniors with disabilities.

Table 2-28 Seniors with Disabilities (2020)

Source: FCOG Data Packet, 2022 -- U.S. Census Bureau, American Community Survey 5-Year Estimates (2016-2020)

Currently, the Fresno Housing Authority owns and manages three senior housing complexes with 124 senior housing units. While nearly all of the 4,000 housing units managed by the Housing Authority are available to seniors, these three residential communities are designated specifically for those over the age of 62. The communities are in the cities of Firebaugh Rio Villas (30 units) and Sanger (Wedgewood Villas, 64 units). A new affordable housing complex for seniors will be built in southeast Fresno. Brand Haven will feature 180 units, 144 of them one-bedroom units. It will also include an arts and crafts center and a lap pool.

The Fresno County Senior Resource Center operates a program, Adult Protective Services, which assists both disabled adults and seniors with all requests for assistance. The Fresno County Human Services System, Department of Adult Services, also provides housing and basic needs assistance to elderly persons. Low-income elderly persons also are eligible to apply to the Housing Authority's Housing Choice Voucher Program. The Fresno/Madera Area Agency on Aging (FMAAA) provides connections to programs, services, and resources elderly residents can use to maintain and improve their quality of life as they age. During the COVID-19 State of Emergency, senior and community centers in Fresno and Madera Counties have closed, and Congregate Nutrition meals are no longer being served.

For seniors and other persons requiring a supportive housing setting, there are 210 licensed care facilities in Fresno County with 4,953 beds. The majority of these facilities are in the city of Fresno. However, there are also 67 facilities in Clovis, 1 in Fowler and Kerman, 3 in Reedley, 3 in Sanger, and 1 in Selma. These facilities are listed in Appendix 1B.

Large Households

HUD defines a large household as one with five or more members. Large families may have specific needs that differ from other households because of income and housing stock constraints. The most critical housing need of large households is access to larger housing units with more bedrooms than a standard three-bedroom dwelling. As a result, large households may be overcrowded in smaller units, although in some circumstances families may choose to have two children share a room. In general, housing for large households should provide safe outdoor play areas for children and should be located to provide convenient access to schools and child care facilities.

Table 2-29 Large Households by Tenure (2020), shows large households by tenure. In Fresno County, 18.1 percent of households are considered large. The jurisdictions with the highest percentage of large households are San Joaquin (48.1 percent), Mendota (38.2 percent), Firebaugh (30.8 percent), and Parlier (31.2 percent); communities with active agricultural economic bases. The city of Fowler has the lowest rate with 13.7 percent, which is the same as the statewide rate of 13.7 percent.

In Fresno County, although a higher percentage of large households are homeowners, in San Joaquin, Huron, and Orange Cove, the majority of large households are renters, comprising 27.1 percent, 20.4 percent, and 19.3 percent respectively of total households. The distribution of large households by tenure throughout the county may be partially attributed to the types, cost, and sizes of rental and ownership housing available in each community, among other factors. However, overcrowding is an issue throughout the county, and in particular within several jurisdictions, in comparison with other regions in the state.

Single Female-Headed Households

According to the U.S. Census Bureau, a single-headed household contains a household head and at least one dependent, which could include a related or unrelated child, or an elderly parent. Female-headed households have special housing needs because they are often either single parents or single elderly adults living on low- or poverty-level incomes. Single-parent households with children often require special consideration and assistance due to a greater need for affordable housing, accessible day care, health care, and a variety of other supportive services. Moreover, because of relatively lower household incomes, single-parent households are more likely to experience difficulties in finding affordable, decent, and safe housing.

Table 2-30, Single Female-Headed Households (2020), shows the number of female-headed households in Fresno County with children. As shown in the table, 7.3 percent of households countywide were single, female-headed households with children, higher than the statewide rate of 4.7 percent. In Orange Cove, more than 17.1 percent of householders were single female-headed households, followed by Huron at 15.1 percent and San Joaquin at 14.0 percent. The unincorporated area, which would have the least number of services and amenities associated with childcare needs, had the lowest percentage of single female-headed households at 3.3 percent of total households.

Table 2-30 Single Female-Headed Households (2020)

Female-headed, single-parent households often experience a high rate of poverty. Countywide, 34.0 percent of the female, single-parent households were living under the poverty level, compared to 14.5 percent of all households (see **Table 2-31 Female-Headed Households in Poverty (2020)**). In San Joaquin, 68.4 percent of female-headed households were living in poverty, followed by Mendota (65.6 percent), Orange Cove (62.4 percent), and Huron (61.2 percent). The poverty rate for all households is also high in these areas. Kingsburg had the lowest percentage of female-headed households in poverty (16.8 percent), but it is still higher than the rate for all families. For comparison, statewide, 9.0 percent of families and 21.5 percent of female-headed households were in poverty, below the Fresno County level.

Table 2-31 Female-Headed Households in Poverty (2020)

Single-parent households can benefit from most affordable housing programs, including Housing Choice Vouchers, Homebuyer Assistance Program (HAP), and Housing Rehabilitation Program (HARP) in the county. The County offers the California Work Opportunity and Responsibility to Kids (CalWORKs) Program to help eligible needy families who have children under the age of 19 with cash assistance, Medi-Cal, and employment services. Assistance programs offered by organizations like First Five Fresno County and Pacific Gas and Electric Company (PG&E) can also assist these households with securing affordable childcare and housing.

Persons with Disabilities

Persons with disabilities typically have special housing needs because of their physical and/or developmental capabilities, fixed or limited incomes, and higher health costs associated with their disabilities. A disability is defined broadly by the Census Bureau as a physical, mental, or emotional condition that lasts over a long period of time and makes it difficult to live independently. The Census Bureau defines six disabilities: hearing, vision, cognitive, ambulatory, self-care, or independent living disabilities.

Persons with disabilities have different housing needs depending on the nature and severity of the disability. Physically disabled persons generally require modifications to their housing units, such as wheelchair ramps, elevators or lifts, wide doorways, accessible cabinetry, and modified fixtures and appliances. Special design and other considerations for persons with disabilities include single-level units, availability of services, group living opportunities, and proximity to transit. While regulations adopted by the State require all groundfloor units of new apartment complexes with five or more units to be accessible to persons with disabilities, single-family units have no accessibility requirements. If a disability prevents a person from operating a vehicle, then proximity to services and access to public transportation are particularly important. If a disability prevents an individual from working or limits income, then the cost of housing and the costs of modifications are likely to be even more challenging. Those with severe physical or mental disabilities may also require supportive housing, nursing facilities, or care facilities. In addition, many disabled people rely solely on Supplemental Security Income (SSI), which is insufficient for market-rate housing.

Severely mentally disabled persons are especially in need of assistance. Mentally disabled individuals are those with psychiatric disabilities that impair their ability to function in the community to varying degrees. In Fresno County, an estimated 189,579 residents have some form of mental disability that requires special housing accommodations, medical treatment, and/or supportive services such as In-Home Supportive Services (IHSS) provided by Fresno County.

According to the 2016-2020 ACS 5-Year Estimates, 12.9 percent of the population countywide age five and over is living with one or more disabilities. (**Table 2-32 Persons with a Disability (2020)**). This is higher than the statewide rate of 10.7 percent. The population 65 years and over has the highest rate of disabilities, as previously discussed. **Table 2-32 Persons with a Disability (2020)**, provides information on the nature of these disabilities. The total disabilities number shown for all age groups exceeds the number of persons with disabilities because a person can have more than one disability. The percentage of persons with each type of disability is based on total number of persons with disabilities and is not cumulative. The city of Fresno had the highest number of persons with a disability among the total population, at 74,571. However, Fresno also has the greatest representation of services and amenities for persons with disabilities, and a more comprehensive system of bus and transit services, which can partially contribute to the higher concentration of persons with disabilities in the city. In contrast, San Joaquin had the lowest rate of persons with a disability at 3.6 percent, correlating with the lowest representations of seniors and the lowest proportion of seniors with disabilities. Among hearing difficulty, Kingsburg had the highest percentage, while vision difficulty and independent living difficulty had the highest rate at 28.3 percent and 49.5 percent in Mendota. Kerman had the highest rate for cognitive difficulty at 51.5 percent, while Firebaugh had the highest rate for ambulatory and self-care difficulty (69.7 and 28.8 percent).

Developmental Disabilities

Senate Bill (SB) 812, which took effect January 2011, amended State housing element law to require an evaluation of the special housing needs of persons with developmental disabilities. A “developmental disability” is defined as a disability that originates before an individual becomes 18 years old, continues or can be expected to continue indefinitely, and constitutes a substantial disability for that individual. This includes intellectual disabilities, cerebral palsy, epilepsy, and autism. Many developmentally disabled persons are able to live and work normally. However, more severely disabled individuals require a group living environment with supervision, or an institutional environment with medical attention and physical therapy. Because developmental disabilities exist before adulthood, the first housing issue for the developmentally disabled is the transition from living with a parent/guardian as a child to an appropriate level of independence as an adult.

Table 2-34 Clients in Fresno County with Developmental Disabilities by Age (2022), shows the number of people in Fresno County jurisdictions receiving assistance as of April 2022. This is only a count of those developmentally disabled people receiving services from the Department of Developmental Services as of April 2022. It is likely that the actual count is higher.

The majority of these individuals (more than 7,000) lived in their own home and the rest lived in independent living or supportive living (about 900 persons), community care facilities (about 666 persons), foster or family homes (less than 369 persons), or an intermediate care facility (about 230 persons).

Table 2-34 Clients in Fresno County with Developmental Disabilities by Age (2022)

Jurisdiction	0-17 Years	18+ Years	Total

Licensed Care Facilities

For persons requiring a supportive housing setting, Fresno County has 210 licensed care facilities with 4,953 beds. The majority of these facilities are in the city of Fresno. However, there are also 67 facilities in Clovis, one in Fowler and Kerman, three in Reedley, three in Sanger, , and one in Selma.

Homeless

Most families become homeless because they are unable to afford housing in a particular community. Nationwide, about half of those experiencing homelessness over the course of a year are single adults. Most enter and exit the system fairly quickly. The remainder live in the homeless assistance system, or in a combination of shelters, hospitals, the streets, jails, and prisons. There are also single homeless people who are not adults, including runaway and “throwaway” youth (children whose parents will not allow them to live at home).

There are various reasons that contribute to homelessness. These may be any combination of factors such as loss of employment, inability to find a job, lack of marketable work skills, or high housing costs. For some, the loss of housing due to chronic health problems, physical disabilities, mental health disabilities, or drug and alcohol addictions, and an inability to access support services and long-term care may result in homelessness. Although each category has different needs, the most urgent need is for emergency shelter and case management (i.e., help with accessing needed services). Emergency shelters have minimal supportive services for homeless persons and are limited to occupancy of six months or less. No individual or household may be denied emergency shelter because of an inability to pay.

For many, supportive housing, transitional housing, long-term rental assistance, and/or greater availability of low-income rental units are also needed. Supportive housing has no limit on length of stay and is linked to on-site or off-site services that assist residents in retaining housing, improving his or her health status, and maximizing his or her ability to live and, when possible, work in the community.

Transitional housing is usually in buildings configured as rental housing developments but operated with State programs that require the unit to be cycled to other eligible program recipients after some pre-determined amount of time. Transitional housing programs provide extended shelter and supportive services for homeless individuals and/or families with the goal of helping them live independently and transition into permanent housing. Some programs require that the individual/family be transitioning from a short-term emergency shelter. Transitional housing may be configured for specialized groups within the homeless population, such as people with substance abuse problems, the mentally ill, domestic violence victims, veterans, or people with HIV/AIDS. In many cases, transitional housing programs will provide services for two years or more. The supportive services may be provided directly by the organization managing the housing or by other public or private agencies in a coordinated effort with the housing provider.

In 2001, Fresno County and Madera County formed the Fresno-Madera Continuum of Care (FMCoC). This community-based collaborative is the best available source for homelessness information and services for homeless individuals and families. The Continuum of Care services and resources include:

- Homeless Prevention

- Outreach, Intake, and Assessment
- Emergency Shelter
- Transitional Housing
- Supportive Services
- Permanent Housing
- Permanent Supportive Housing

The best estimate is the Homeless Census and Survey collected by FMCoC. In January 2022, the FMCoC published its Homeless Census and Survey Report (Point-in-Time [PIT]) count, which estimated 3,938 persons experiencing homelessness in Fresno County. Of that number, 1,728 persons were sheltered homeless and 2,210 were unsheltered homeless (**Table 2-35 Total Unsheltered and Sheltered Homeless Count: Fresno County (2022)**).

Table 2-35 Total Unsheltered and Sheltered Homeless Count: Fresno County (2022)

Population	2022 PIT Count
Unsheltered Homeless	2,210
Sheltered Homeless	1,728
Total	3,938

Source: FCOG Data Packet, 2022 --Fresno/Madera Continuum of Care, 2022.

The California Department of Education defines homeless children as individuals who lack a fixed, regular, and adequate nighttime residence. This definition also includes:

- Children and youth who are sharing the housing of other persons due to loss of housing, economic hardship, or a similar reason.
- Children who may be living in motels, hotels, trailer parks, shelters, or awaiting foster care placement.
- Children and youth who have a primary nighttime residence that is a public or private place not designed for or ordinarily used as a regular sleeping accommodation for human beings.
- Children and youth who are living in cars, parks, public spaces, abandoned buildings, substandard housing, bus or train stations, or similar settings.
- Migratory children who qualify as homeless because they are children who are living in similar circumstances listed above.

SECTION 2: REGIONAL HOUSING NEEDS ASSESSMENT

In February 2022, the FMCoC completed a PIT count and found that there were an estimated 541 people experiencing homelessness in Fresno County, which included the incorporated rural cities of Selma, Sanger Clovis and/or rural areas of unincorporated Fresno County. The PIT also identified 3,397 people experiencing homelessness in the city of Fresno. In an effort to provide an estimate of the number of homeless persons by jurisdiction, a percentage of the population was calculated as shown in **Table 2-36 Estimated Number of Homeless Persons by Jurisdiction**. This percentage assumes the countywide population for Fresno County population and subtracts the city of Fresno population since a total homeless count was done for the city. This percentage was then applied to the total homeless count of 541. The city of Fresno had the highest percentage of people experiencing homelessness at 53.8 percent, followed by the unincorporated county (34.2 percent) and the city of Clovis (26.4 percent). Each jurisdiction also supplemented the PIT count assumptions with local knowledge (police department, city/county staff, agency providing services to the homeless population) where available.

Table 2-36 Estimated Number of Homeless Persons by Jurisdiction

Jurisdiction	Total Population	% of County Pop*	Estimated Total Homeless	Local Estimate (Unsheltered)
City of Fresno	543,660	53.8%	3,397**	
Fresno County	1,011,273	100.0%	541**	
Unincorporated County	160,074	34.2%	185	
Coalinga	17,277	3.7%	7	
Firebaugh	8,439	1.8%	3	
Fowler	6,962	1.5%	3	
Huron	6,170	1.3%	2	49
Kerman	16,639	3.6%	7	16
Kingsburg	12,506	2.7%	5	6
Mendota	12,440	2.7%	5	
Orange Cove	9,497	2.0%	4	
Parlier	14,497	3.1%	6	
Reedley	24,982	5.3%	10	38
Sanger	26,304	5.6%	10	36
San Joaquin	3,639	0.8%	1	
Selma	24,522	5.2%	10	
Clovis	123,665	26.4%	49	

Source: FCOG Data Packet, 2022 --Fresno/Madera Continuum of Care, 2022.

* Percentages for all cities and the unincorporated county are calculated with the city of Fresno population removed.

* **Based on actual 2022 PIT counts.

According to the FMCoC, there are several emergency shelters for homeless individuals. The majority of those shelters are in the city of Fresno. **Table 2-37 Bed Inventory by Program Type, Fresno County and Madera County (2022)**, shows the number of beds and units available during the last week of February 23, 2022 dedicated to serving homeless persons, per HUD's definition. There were a total of 5,101 units available to the homeless in Fresno County and Madera County. Typically, the county's smaller cities and communities form alliances with agencies and organizations in the city of Fresno and encourage homeless persons to seek assistance in the city of Fresno where services are most available.

Table 2-37 Bed Inventory by Program Type, Fresno County and Madera County (2022)

Facility Type	Number of Beds
Emergency Shelter	1,795
Transitional Housing	358
Permanent Supportive Housing	389
Rapid Re-Housing	2,559
Total	5,101

Source: FCOG Data Packet, 2022 -- Fresno/Madera Continuum of Care, PIT Count 2022.

Appendix 1B lists all emergency shelters, transitional housing, safe havens, permanent supportive housing, and rapid re-housing projects within Fresno County. However, most of these are in the city of Fresno. There is one 18-bed transitional housing project in the city of Clovis and one 17-bed transitional housing project in the unincorporated county. Both are run by the Marjaree Mason Center and are targeted towards single females with children and victims of domestic violence. Additionally, the City of Reedley has an 18-person temporary emergency housing facility within an existing two-story single family residence.

Additional organizations providing assistance, services, and housing in the county include Catholic Social Services, Emergency Housing Center (Plaza Terrace), Evangel Home, Inc., United Way, Fresno Rescue Mission, and Marjaree Mason Center. To assist people with reaching services that can help them in their time of need, United Way of Fresno County offers a free 2-1-1 information and referral line. The database provides persons in need with links to over 500 government, community-based, faith-based, and private and public agencies with over 1,500 programs/services.

As discussed in Section 4, Housing Development Constraints, State law (Senate Bill 2) requires all jurisdictions in California to provide zoning for emergency shelters and transitional and supportive housing. The appendices provide information on compliance for jurisdictions in Fresno County.

Farmworkers

Farmworkers have a difficult time locating affordable housing in Fresno County. Due to a combination of limited English language skills and very low household incomes, the ability to obtain housing loans for home purchase is extremely limited. For the same reasons, rentals are also difficult to obtain. Housing needs include permanent family housing as well as accommodations for migrant single men, such as dormitory-style housing, especially during peak labor activity in May through October.

A growing number of migrant workers do not leave California during the non-farm season, but instead stay in the area and perform non-farm work such as construction and odd jobs. Housing needs of this migrant but non-farmworker population are partially addressed by year-round housing units, but additional migrant units are needed.

Migrant and other seasonal farmworkers usually do not have a fixed physical address and work intermittently in various agricultural and non-agricultural occupations during a single year, with only casual employer-employee links. Many workers and/or their families live in rural, often remote areas and are reluctant to voice their housing needs and concerns to local government or housing authorities.

Farmworkers have the lowest family income and the highest poverty rate of any occupation surveyed by the Census Bureau and, therefore, often face challenges to pay for adequate housing. According to California EDD, the most recent data from 2014 measured median wage for farmworkers, which was \$13.44/hour or approximately \$25,804 per year for full-time work, which is considered extremely low-income. Many farmworkers are forced to pay market rate for their housing, since most farm owners do not provide housing for their workers, and many publicly owned or managed housing complexes are restricted to families. Because market-rate housing may be more than they can afford, many workers are forced to share a housing unit with several other workers, causing a severely overcrowded living situation. Migrant and seasonal farmworkers face a number of housing challenges, but primarily substandard housing conditions.

The nature of agricultural work also affects the specific housing needs of farmworkers. For instance, farmworkers employed on a year-round basis generally live with their families and need permanent affordable housing, much like other lower-income households. Migrant farmworkers who follow seasonal harvests generally need temporary housing only for the workers themselves.

Determining the number of farmworkers in a region is difficult due to the variability of the definitions used by government agencies and other characteristics of the farming industry, such seasonal workers who migrate from place to place. The estimated number of farmworkers in Fresno County ranges from 37,966¹ (ACS, 2012) to 94,039 (UC Giannini Foundation of Agricultural Economics, 2012).²

The USDA Census of Agriculture reported 2,540 farms with a total of 37,819 workers in Fresno County (see **Table 2-38 Farmworkers in Fresno County by Days Worked (2017)**). The majority of the farmworkers were seasonal, working fewer than 150 days per year.

¹ U.S. Census Bureau, 2008-2012 American Community Survey ACS, 2012.

² UC Giannini Foundation of Agricultural Economics, 2012.

Table 2-38 Farmworkers in Fresno County by Days Worked (2017)

150 Days or More (Year-Round)		
Total Farms	Farms	2,540
	Workers	37,819
Large Farms (10 or more workers per farm)	Farms	1,557
	Workers	16,876
Fewer than 150 Days (Seasonal)		
Total Farms	Farms	1,753
	Workers	20,943

Source: FCOG Data Packet, 2022 -- USDA Agricultural Census, Table 7, 2017.

Another data source to consider is the ACS. The ACS is a national survey that uses a series of monthly samples to produce annual estimates for the same area surveyed. The 2016-2020 5-Year Estimates by ACS (**Table 2-39 Estimated Farmworkers (2020)**) provides information on agriculture, forestry, fishing and hunting, and mining employment by jurisdiction. Although not all of these workers are farmworkers, it can provide an estimate. This category makes up a significant percentage of employment in Huron, Mendota, Orange Cove, San Joaquin, and Firebaugh. Huron has the highest percentage at 63.6 percent. Given the seasonal and transient nature of the farmworker community, the ACS data is likely an underestimate of the actual farmworker population.

Table 2-39 Estimated Farmworkers (2020)

Jurisdiction	Total Employment	Agriculture, forestry, fishing and hunting, and mining	
	Number	Number	Percentage
Fresno County	408,625	36,163	8.8%

Source: FCOG Data Packet, 2022 -- U.S. Census Bureau, American Community Survey 5-Year Estimates (2016-2020)

The EDD estimates the total farm labor employment in 2021 was 96,300 (annual average). **FIGURE 2-8 Farm Employment, Fresno County**, demonstrates the fluctuation in EDD estimates of hired farmworkers from 1990 to 2021. In 1990, the estimated annual average farm labor was 42,200 and peaked at 91,200 in 1996, and decreased to a low of 67,700 in 2004. It peaked again in 2019 at 101,100 and dropped in 2020 during the COVID-19 pandemic. EDD Industry Employment Data is based on the Current Employment Statistics (CES) survey. The CES survey is administered to a sample of California employers to gather information including monthly employment, hours, and earnings.

FIGURE 2-8 Farm Employment, Fresno County

Source: CA Employment Development Department (EDD) Labor Market Information, 2022.

Looking at the U.S. Department of Agriculture Census of Farmworkers, the number of permanent farm workers in Fresno County has decreased slightly from 2002 to 2017, decreasing from 18,751 farmworkers to 16,876 farmworkers. However, there was a slight increase from 2007 to 2012, showing an increase from 14,873 farmworkers to 17,751 farmworkers. The seasonal number has also decreased from 51,240 in 2002 to 20,943 in 2017 (**FIGURE 2-8 Farm Employment, Fresno County**).

Agriculture, forestry, fishing and hunting, and mining holds a significant percentage of employment in Firebaugh, Huron, Mendota, Orange Cove, Parlier, Reedley, and San Joaquin. Huron has the highest percentage at 63.6 percent. These areas are more rural and strongly based in agriculture.

FIGURE 2-9 Farm Labor in Fresno County

Source: U.S. Department of Agriculture, Census of Farmworkers (2002, 2007, 2012, 2017), Table 7: Hired Farm Labor

Note: Hired farm workers (including direct hires and agricultural service workers who are often hired through labor contractors) are considered seasonal if they work on a farm less than 150 days in a year, while farm workers who work on a farm more than 150 days are considered to be permanent workers for that farm.

Seasonal Farmworker Housing

The Fresno Housing Authority manages 194 units of seasonal farmworker housing for migrant farmworkers. This includes 131 housing units in Parlier owned by the State of California, Office of Migrant Services, and 64 units in Firebaugh. These units are open about six months of the year, from April through October, to serve agricultural workers during planting and harvesting seasons when most workers are needed.

The Housing Authority also owns, manages, and maintains three year-round housing complexes, exclusively for farm laborers, including 60 units in Mendota, 30 units in Orange Cove, and 41 units in Parlier. Both the seasonal and year-round units are restricted to legal U.S. residents who earn at least \$5,752.50 annually from agriculturally related work. The cost of managing and maintaining the complexes is subsidized by the State of California, Office of Migrant Services, and the USDA Rural Development. In addition, some private farmworker housing units are available, such as Willow Family Apartments in Clovis, which has 30 units set aside for farmworkers.

Transportation

A four-county pilot program established in 2000 known as Agricultural Industries Transportation Services (AITS) provided safe, reliable transportation to agricultural workers. This program has evolved into CalVans. Sponsored by California Vanpool Authority, CalVans supplies qualified drivers with late-model vans to drive themselves and others to work or school. The California Vanpool Authority pays for the gas, maintenance, repairs, and a \$10 million insurance policy. These agriculture vanpool programs serve a wide range of California counties, including Fresno County. It offers a cost-effective commute rate with passengers paying (on average) a little over \$2 per ride. Farmworkers travel distances ranging from a few miles to over 70 miles one-way to work. This program provides workers opportunities to live in one residence throughout the season regardless of where they are needed to work in the fields or packing plants. The program allows the county to determine where to best place farmworker housing based on land availability, zoning, services, and other criteria, rather than where farmworkers might be working most often.

Migrant Workers

Farmworkers have a variety of special housing needs in terms of affordability, location, and duration of residence. The increase in farmworkers living in Fresno County on a permanent basis increases the need for local, affordable farmworker housing for household types other than single adult men and women, including family housing and all the services and neighborhood amenities associated with raising families and being permanent members of the community.

Farmworkers may face added affordable housing challenges due to immigration status. Federally funded affordable housing projects require the head of household to have documentation of legal resident status, precluding some farmworkers from subsidized farmworker housing. Even seasonal farmworkers may travel with families, with children who at least temporarily enroll in local schools.

According to the California Department of Education California Longitudinal Pupil Achievement Data System (CALPADS), there were about 5,902 migrant students throughout Fresno County. While these estimates are at the school district level (students can live in one City and attend a school located in a different City), the data shows that the vast majority of migrant students for 2020-2021 school year are within the City of Fresno where many services and farmworker housing in the county takes place. Typically, farmworker positions, unless they own the business, do not pay well and thus may have trouble finding adequate housing in the county.

Since 2016, the migrant worker student population in Fresno County has fluctuated. The City's with the consistent number of enrolled migrant labor students are the City of Fresno, Reedley, Mendota, Selma and the Unincorporated City of Caruthers. Overall, for Fresno County as a whole, the migrant worker student population increased by approximately 1,122 students from the 2016-17 school year to the 2020-21 school year, which identifies a need for farmworker housing and resources. (**Table 2-40 Migrant Worker Student Population**).

Notes: The data used for this table was obtained at the school site level and categorized by geography.

Non-English Speakers

California has long been an immigration gateway to the United States, which means that many languages are spoken throughout the State and the Central Valley. Since learning a new language is universally challenging, it is not uncommon for residents who have immigrated to the United States to have limited English proficiency. This limit can lead to additional disparities if there is a disruption in housing, such as an eviction, because residents may not be aware of their rights or may be wary to engage due to immigration status concerns. Regionwide and for Fresno County overall, the proportion of residents five years and older with limited English proficiency is 10.1 percent. The cities with the highest percent of limited English-speaking household were Mendota (51.9 percent), Huron (49.3 percent), San Joaquin (47.4 percent), and Firebaugh (43.9 percent). Both Firebaugh and Huron were also identified as having an over-representation of very low-income households. (**Table 2-41 Limited English-Speaking Households**).

Table 2-41 Limited English-Speaking Households

Notes: ¹ Averaged based off Auberry CDP, Big Creek CDP, Caruthers CDP, Laton CDP, Raisin City CDP and Riverdale CDP.

Income

According to the 2015-2019 ACS, the annual median income for the agriculture, forestry, fishing, and hunting category, was \$30,596 per individual. This income for a one or two person households, would fall into the very low-income category (see **Table 2-42 Resources for Farmworkers**).

SECTION 2: REGIONAL HOUSING NEEDS ASSESSMENT

In Fresno County, farmworker housing needs can be met with single family homes, multifamily units, Mobile and Manufactured Homes, ADUs, and with assistance from Housing Choice Vouchers. In addition to resources in Fresno County neighboring Kern, Merced, Madera and Kings counties as well as the State of California have resources available for farmworkers.

Resources

Table 2-42 Resources for Farmworkers

Provider	Area Served	Services Available
Binational Central California	Fresno, Madera, Merced, Stanislaus, San Joaquin, Tulare, Kings, and Kern counties	Immigration, healthcare, and educational resources
United Farm Workers Foundation	Fresno and Kern counties	Deferred Action for Childhood Arrivals (DACA), Family-based petitions, Naturalization/Citizenship, assistance with completing forms, Filings with USCIS, Representation before the Board of Immigration Appeals (BIA), Legislative advocacy (state or national), Referrals to other services
California Farmworker Foundation	Tulare, Santa Barbara, Kern, Fresno, Madera and Riverside counties	Education, Workforce Development, Health and Wellness, Immigration Services, and Community Wellness.
California Rural Legal Assistance	Sacramento and Fresno Counties	Housing advocacy, Immigration Law, Removal Defense, Impact Litigation, Labor + Employment, Pesticide + Work Safety, Sexual Harassment Prevention and Sustainable Rural Communities,
Larry Itliong Center	Tulare County	Community Space
Parlier Migrant Center	Fresno County	131 Farmworker Units
Green Raiteros	Fresno County	Transportation, workforce development and small business advancement.
Rural Mobile Health	Fresno County	Medical services and screenings at no-cost
Central California Food Bank	Fresno, Madera, Merced, Stanislaus, San Joaquin, Tulare, Kings, and Kern counties.	Food bank, School food programs, Fresh produce distributions, senior hunger programs, Emergency food assistance program (ERAP). CalFresh outreach, and Farm Worker Community Partnership.
Centro La Familia	Fresno County	Domestic Violence Assistance, Sexual Assault Services, Rescue and Restore Victims of Human Trafficking, Support services, Consumer and Family Advocacy, CalFresh Outreach and Education, Telecommunications Education and Assistance in Multiple languages (TEAM), and Immigration Services
Central California Legal Services	Fresno County	Legal Services

Refer to Section 3 – Regional Fair Housing Assessment for more information on Farmworker background and needs.

Extremely Low-Income Households

Extremely low-income households are defined as those households with incomes under 30 percent of the county’s median income. Extremely low-income households typically consist of minimum wage workers, seniors on fixed incomes, the disabled, and farmworkers. This group of households has specific housing needs that require greater government subsidies and assistance, housing with supportive services, single-room occupancy (SRO) and/or shared housing, and/or rental subsidies or vouchers. This income group is likely to live in overcrowded and substandard housing conditions. In recent years, rising rents, higher income, and credit standards imposed by landlords, and insufficient government assistance has exacerbated the problem. Without adequate assistance, this group has a high risk of homelessness.

For a family of four in Fresno County, a household making under \$27,750 in 2022 would be considered an extremely low-income household. The minimum wage in California is currently \$14.00, well above the current federal minimum wage of \$7.25 an hour. With a minimum wage of \$14.00, workers would receive an annual salary of \$29,120, which by 2022 income limits would be in between extremely low-income and very low-income.

As shown in **Table 2-43 Extremely Low-Income Households by Tenure (2018)**, an estimated 13.3 percent of households in Fresno County in 2018 were considered extremely low income. Some jurisdictions have very high rates of extremely low-income households, including San Joaquin (34.8 percent), Huron (30.9 percent), Parlier (26.6 percent), and Orange Cove (26.3 percent). Clovis and Unincorporated Fresno County has the lowest percentages of extremely low-income households (8.9 and 7.0 percent). Typically, extremely low-income households are renters, at 80.0 percent of extremely low-income households countywide, and only 20.0 percent own their homes.

Table 2-43 Extremely Low-Income Households by Tenure (2018)

Jurisdiction	Extremely low-Income Owner Households		Extremely low-Income Renter Households		Total Extremely Low-Income Households	Total Extremely Low-Income as Percentage of Total Households
	Number	Percent	Number	Percent

Source: FCOG Data Packet, 2022 -- CHAS (2014-2018)

Extremely low-income households face a higher incidence of housing problems. This population is at the highest risk of displacement, overpayment, and overcrowding and typically face the most barriers in accessing decent, safe, and affordable housing. There are four housing problems reviewed to determine at-risk extremely low-income populations: incomplete kitchen facilities, incomplete plumbing facilities, more than one person per room, and cost burden greater than 30 percent.

INVENTORY OF AFFORDABLE RENTAL HOUSING AND AT-RISK STATUS

The expiration of housing subsidies may be the greatest near-term threat to California's affordable housing stock for low-income families and individuals. Rental housing financed 30 years ago with federal low-interest mortgages are now, or soon will be, eligible for termination of their subsidy programs. Owners may then choose to convert the apartments to market-rate housing. Also, HUD Section 8 rent supplements to specific rental developments may expire in the near future. In addition, state and local subsidies or use restrictions are usually of a limited duration.

State law requires that housing elements include an inventory of all publicly assisted multifamily rental housing projects within the local jurisdiction that are at risk of conversion to uses other than low-income residential within 10 years from the Housing Element adoption deadline (i.e., by December 31, 2033).

Appendix 1 includes an analysis of the at-risk units by jurisdiction.

Preservation Options for At-Risk Properties

State law requires that housing elements include a comparison of the costs to replace the at-risk units through new construction or to preserve the at-risk units. Preserving at-risk units can be accomplished by facilitating a transfer of ownership to a qualified affordable housing organization, purchasing the affordability covenants, and/or providing rental assistance to tenants.

Acquisition and Rehabilitation

One method of ensuring long-term affordability of low-income units is to transfer ownership to a qualified nonprofit or for-profit affordable housing organization. This transfer would make the project eligible for re-financing using affordable housing financing programs, such as low-income housing tax credits and tax-exempt mortgage revenue bonds. These financing programs would ensure affordability for at least 55 years. Generally, rehabilitation accompanies a transfer of ownership.

Actual acquisition costs depend on several variables such as condition, size, location, existing financing, and availability of financing (government and market).

Replacement (New Construction)

Another strategy is to replace the units by constructing new affordable units. This includes purchasing land and then constructing affordable units. This is generally the most expensive option.

Rent Subsidy

Rent subsidies can also be used to preserve affordability of housing, although there are limited funding sources to subsidize rents. The amount of a rent subsidy would be equal to the difference between the HUD-defined fair-market rent (FMR) for a unit and the cost that would be affordable to a lower-income household based on HUD income limits. The exact amount is difficult to estimate because the rents are based on a tenant's income and, therefore, would depend on the size and income level of the household.

Qualified Entities

California Government Code Section 65863.10 requires that owners of federally assisted properties provide notice of intent to convert their properties to market rate at one year prior to, and again at six months prior to the expiration of their contract, opt-outs, or prepayment. Owners must provide notices of intent to public agencies, including HCD, the local public housing authority, and to all impacted tenant households. The six-month notice must include specific information on the owner's plans, timetables, and reasons for termination.

Under Government Code Section 65863.11, owners of federally assisted projects must provide a Notice of Opportunity to Submit an Offer to Purchase to Qualified Entities, non-profit or for-profit organizations that agree to preserve the long-term affordability if they should acquire at-risk projects, at least one year before the sale or expiration of use restrictions. Qualified entities have first right of refusal for acquiring at-risk units. Qualified entities are non-profit or for-profit organizations with the legal and managerial capacity to acquire and manage at-risk properties that agree to maintain the long-term affordability of projects. **Table 2-44 Qualified Entities (2022)**, contains a list of qualified entities for Fresno County that could potentially acquire and manage properties if any were to be at risk of converting to market rate in the future.

REGIONAL ASSESSMENT OF FAIR HOUSING

Assembly Bill (AB) 686 requires that all housing elements due on or after January 1, 2021, contain an Assessment of Fair Housing (AFH) consistent with the core elements of the analysis required by the federal Affirmatively Furthering Fair Housing (AFFH) Final Rule of July 16, 2015. Under California law, AFFH means “taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics.”³

California Government Code Section 65583 (10)(A)(ii) requires local jurisdictions to analyze racially or ethnically concentrated areas of poverty, disparities in access to opportunity, and disproportionate housing needs, including displacement risk. Government Code Section 65583(c)(10) requires all local jurisdictions to address patterns locally and regionally to compare conditions at the local level to the rest of the region. To that end, a Multijurisdictional Housing Element was completed for the cities of Coalinga, Firebaugh, Fowler, Fresno, Huron, Kerman, Kingsburg, Mendota, Orange Cove, Parlier, Reedley, San Joaquin, Sanger, Selma, and the County of Fresno, including a regional AFH, and each participating jurisdiction prepared a local AFH.

This section is organized by fair housing topics and is analyzed on a regional level. A local analysis, prioritization of issues, and identification of meaningful actions is included in each jurisdictions’ Local Assessment of Fair Housing.

OUTREACH

As discussed in Section 1-3, Public Outreach and Engagement, the Fresno Council of Governments (COG) made diligent efforts at the regional and local scales to encourage public and service-provider participation, particularly service providers for vulnerable populations, during the Housing Element update process. These efforts included two Housing Element community workshops on August 1 and 8, 2022; a Stakeholder Focus Group workshop on October 25, 2022; and seven regional service provider consultations between August 2022 and November 2022. Workshops were noticed in the jurisdiction where they were held with digital distribution of English and Spanish flyers through listservs and social media posts, and physical distribution in public buildings. A full summary of each workshop is provided in the local Assessment of Fair Housing. Stakeholder focus group meetings were noticed to service providers and local agencies identified by governmental staff throughout the county and to any other organizations that expressed interest.

³ California Department of Housing and Community Development, *Affirmatively Furthering Fair Housing: Guidance for All Public Entities and for Housing Elements (April 2021 Update)*, April 27, 2021, preface page, https://www.hcd.ca.gov/community-development/affh/docs/affh_document_final_4-27-2021.pdf.

Consultations

From August 2022 through November 2022, seven consultations were conducted with local nonprofits and service providers for vulnerable populations and fair housing advocates to receive one-on-one, targeted input from those who provide services for those most in need of housing or with special housing needs. In each of the consultations, service providers and fair housing advocates were asked some or all the following questions, depending on the type of organization they represented.

Opportunities and concerns: What three top opportunities do you see for the future of housing in Fresno County? What are your three top concerns for the future of housing?

Housing preferences: What types of housing do your clients prefer? Is there adequate rental housing in the county? Are there opportunities for home ownership? Are there accessible rental units for seniors and persons with disabilities?

Housing barriers/needs: What are the biggest barriers to finding affordable, decent housing? Are there specific unmet housing needs in the community?

Housing conditions: How do you feel about the physical condition of housing in the county? What opportunities do you see to improve housing in the future?

Unhoused persons: How many unhoused persons are in the county?

Housing equity and fair housing: What factors limit or deny civil rights, fair housing choice, or equitable access to opportunity? What actions can be taken to transform racially and ethnically concentrated areas of poverty into areas of opportunity (without displacement)? What actions can be taken to make living patterns more integrated and balanced?

As part of the regional effort, the following organizations provided responses:

- Leadership Council for Justice and Accountability, August 26, 2022
- Central Valley Urban Institute, September 7, 2022
- Fair Housing of Central California, September 27, 2022
- Fresno Madera Continuum of Care, October 3, 2022
- Patience Milrod, Civil Rights Attorney, October 31, 2022
- Resources for Independence Central Valley, November 1, 2022
- Building Industry Association, November 11, 2022

The one-on-one interviews with service providers and fair housing advocates raised observations and concerns related to housing issues facing the residents of Fresno County, with several common themes emerging. First was the demand for a range of affordable and accessible housing types for the large concentration of special needs populations in the county, including seniors, farmworkers, low-income households, and disabled persons. The need for additional affordable rental housing and higher densities was identified by most interviewees. Additionally, service providers noted a shortage of housing resources for those who are experiencing homelessness and lack of

re-integration services given the growing demand, specifically a need for housing-first projects across the county. This was noted in addition to growing populations of lower-income households at risk of displacement and unsheltered homeless residents. Therefore, identifying locations for alternative housing in the jurisdictions is a priority.

Stakeholders also identified a need for stronger strategies for the preservation and maintenance of the existing affordable housing stock, particularly mobile homes, which are a more naturally affordable housing resource. They expressed how income constraints often result in people living in substandard or overcrowded housing conditions, most often in rental situations, which often results in displacement and homelessness. Service providers and fair housing advocates also identified that there are substantial racial disparities in housing condition among communities of color, recommending that jurisdictions implement proactive code enforcement to hold landlords accountable, or pass ordinances that protect tenants from substandard living conditions. The shortfall of funding programs for mobile home renovation was reiterated in several of the interviews. During the consultations, service providers and fair housing advocates expressed a need for proactive tenant protections, such as rent control, just-cause protections, and other housing protection laws to keep more individuals housed, because eviction is the most common fair housing complaint encountered by service providers and fair housing advocates. In situations such as this, tenants require access to additional legal assistance to prevent displacement due to harassment or wrongful eviction, and landlords require education on the legality of their actions.

Multiple stakeholders also identified a trend of mobile homes being acquired by corporations, resulting in tenant evictions or substantial rent hikes. In response to this situation, stakeholders suggested that implementation or funding of programs to assist tenants to purchase their mobile homes, co-op purchase assistance, and long-term affordability covenants or rent control requirements in mobile home park buy-outs are essential to maintaining this affordable housing resource throughout the county. Additionally, they expressed that limited land zoned to accommodate mobile home parks in higher resource areas is an ongoing challenge to the provision of affordable housing in unincorporated areas, where higher density multifamily is not appropriate.

During consultations, service providers and fair housing advocates identified a need for landlord education and enforcement regarding fair housing laws and rental discrimination practices, in combination with jurisdictions contracting with fair housing providers for a comprehensive system to identify affordable housing resources and tenant protection, particularly for seniors, disabled persons, gender equality, familial status, and communities of color. Stakeholders identified a need for workshops on fair housing laws for residents and housing providers. The goal of these would be to inform housing providers of their rights and responsibilities under fair housing laws and provide education on discrimination, aiming to reduce the number of instances that result in fair housing complaints throughout the county. A tenant workshop counterpart was suggested to inform residents of their tenant rights.

Barriers identified to development of affordable housing included land costs, the length of entitlement processes, California Environmental Quality Act (CEQA) requirements, development fees, and other permitting processes, compounded by severe infrastructure constraints, particularly sewer and septic systems and the valleywide water shortage. All housing providers interviewed expressed that new low-income housing is not cost effective for developers, and that properties owned by jurisdictions are a valuable resource for providing lower-income housing, including homeownership opportunities through organizations, such as Habitat for Humanity, that assist

communities of color to attain homeownership, a group that has historically been underserved in the homeowner market. Another strategy identified to reduce costs of affordable development included adaptive reuse of existing underutilized buildings or property and maximizing infill opportunities where infrastructure is already in place, instead of focusing investment at the fringes of communities as is the current trend. The aim of this is to remedy historical disinvestment in older, lower-income neighborhoods and downtown cores. Interviewees identified that socioeconomic segregation does exist in Fresno County, and the majority of affordable housing continues to be located in low resource areas. In response, stakeholders noted that the primary strategy to reduce racially or ethnically concentrated areas of poverty has been implementation of inclusionary zoning, which is a controversial tool in many communities and has not been consistently effective at promoting affordable housing production in higher resource areas. Incentivizing and subsidizing the construction of ADUs on existing residential properties was recommended to help address the barriers associated with cost of land and shortage of available acreage for development of units for lower-income, farmworker, and senior households as well as persons with disabilities. Additionally, stakeholders recommended that jurisdictions explore the potential to assist rental property owners in working with nonprofits or the Fresno Housing Authority to acquire properties about to go into receivership and convert them to affordable housing. One housing provider also discussed Community Land Trusts as an underutilized opportunity to create permanent affordability as well as the availability of CalHome funding for implementing this option.

A final recurring theme around barriers to affordable housing that service providers and fair housing advocates identified was the current and historical challenges lower-income households face in obtaining financial assistance, such as lending discrimination, rental application and minimum income requirements, credit history, and security deposits. Additionally, it was also noted overall that there is a disconnect between the number of applicants for Housing Choice Vouchers (HCVs) and the availability of units that accept them, in addition to an insufficient supply of HCVs and the long waiting lists throughout the county. Education and outreach efforts of current fair housing practices to landlords and sellers were recommended.

Feedback received during the regional consultations was shaped by individual discussions and the experiences of each service provider, fair housing advocate, or community organization. Therefore, some questions did not receive direct responses, but instead focused on feedback they deemed relevant to their target population or experiences. The summary presented here reports feedback that was received and incorporated to inform the regional and local analyses as well as programs at the local level.

Stakeholder Focus Group Workshops

Two Stakeholder Focus Group workshops were held to foster participation from Fresno County jurisdictions, local organizations, and service providers for vulnerable populations. The first was held via Zoom on October 25, 2022, at 9:30 am, so participants could connect or call in from wherever they were located. The objectives of the meeting were to provide an overview of the Housing Element Update process; share initial findings about housing needs that inform each jurisdiction's housing plan; and gather initial community input on housing assets, issues, and opportunities as well as allow participants to share their insights on how housing opportunities can be improved locally and on a regional level. Many of the participants had been or were scheduled for individual interviews. There were eight participants in the first workshop as well as staff from each jurisdiction to engage and answer questions.

Workshop discussion focused on mobile home park issues and their place in Fresno County as an affordable housing resource that is facing corporate acquisition; farmworker and undocumented worker housing and the invisibility of this extremely underserved population; preventative displacement actions; and barriers to affordable housing in unincorporated areas, in particular the lot-consolidation policy. Overall, the primary fair housing concerns were the costs associated with development of housing, particularly affordable units; shortages of affordable housing and HCV)availability; limited opportunities for employment that offers livable wages and the prevalence of this in many of the agricultural- and manufacturing-based communities; housing challenges facing lower-income renters and first-time homebuyers; and providing housing opportunities for underserved populations, particularly farmworkers.

A second Stakeholder Focus Group workshop was held on Tuesday, November 15, at 9:30 am, again through Zoom. The objectives of the Stakeholder Focus Group meeting were the same as the first workshop. Twelve participants attended, and many of the participants had been or were scheduled for individual interviews.

The workshop began with a discussion regarding the challenges that lower-income individuals just over the area median income limit for certain programs and housing are facing in finding affordable rentals and in purchasing housing without down-payment or other forms of assistance. On the topic of affordable ownership options, one participant provided insight into sweat equity program models, how there are limitations for larger-sized households, and that time commitments often conflict with employment schedules. Another participant noted that there may be programs to assist potential homeowners acquire a home, yet they may not have the funds to maintain the property, particularly in cases where the home is older. Participants talked about the challenges lower-income households face in general to meet the requirements to qualify for rental housing. The issue of affordable housing often being in areas with limited access to services and amenities was cited by several stakeholders. One stakeholder identified an affordable housing project being developed in an environmentally unsound location in a low resource area, which is not furthering the fair housing objective of providing access to resource opportunities. Another stakeholder suggested that data on homelessness in the county may be undercounted, because homeless persons within the Asian and Pacific Islander communities tend to “couch surf” because the services and the food at shelters are not culturally compatible. Such implications of cultural differences in providing services for the homeless are typically not addressed in the larger picture of the homeless issue.

Discussion on barriers to provision of affordable housing included cost of land; tax credits and other state funding programs that trigger prevailing wage requirements and significantly increase the cost of production; inflation increasing price and availability of materials; city/county fees; infrastructure costs; special district fees; rising interest rates; CEQA requirements; and overregulation by the state, all of which are passed on to the end user. The issue of water shortage and ability to meet RHNA allocations were also identified as constraints that are particularly limiting in many of the jurisdictions in Fresno County. Several of the stakeholders indicated that they would be able to provide updated information on real estate prices and experience working with undocumented (non-citizen or non-permanent resident status) home buyers to help them access alternative financing.

The feedback received during these meetings informed the fair housing analysis and programs identified in this Housing Element.

FCOG Transportation Needs Survey

An FCOG survey was conducted between September and October 2022 to identify transportation project suggestions based on the experiences of residents throughout the county. While the survey asked a range of questions related to transportation, it also resulted in information about mobility options, residents' housing and discrimination experiences, barriers to homeownership, and housing type preferences that inform fair housing needs in the county.

There were a total of 3,753 respondents, of whom approximately 45.5 percent were homeowners and 47.0 percent were renters. The remaining 7.5 percent declined to respond or lived in situations where there was no rent or mortgage. Although approximately one-half of respondents were renters, the majority of respondents (68.7 percent) resided in a single-family detached or attached unit. Respondents were, for the most part, lower to moderate income based on HUD's area median income of \$72,900.

Approximately 89.0 percent of survey respondents reported that they had not experienced any type of housing discrimination. However, of those that had experienced discrimination, the most prominent issue reported was requests for repairs being delayed or ignored (47.5 percent), followed by paying higher rents (25.2 percent) or higher security deposits (22.8 percent) (see **FIGURE 3-1 DISCRIMINATION EXPERIENCED IN HOUSING**). In addition to these challenges, approximately 72 respondents, or 47.6 percent of those that had experienced housing discrimination, reported a range of other issues, such as real estate agents pushing homes in less desirable areas or hostile living environments. Of those that had experienced discrimination, approximately 41.7 percent, by far the largest proportion, alleged that the discrimination was on the basis of race, followed by source of income (29.4 percent) and family status (23.5 percent) (see **Figure 3-2 Discrimination Basis**). While these reports have not been investigated, they indicate a perceived barrier to housing, particularly for lower-income and non-White households.

FIGURE 3-1 DISCRIMINATION EXPERIENCED IN HOUSING

SECTION 3: REGIONAL ASSESSMENT OF FAIR HOUSING

Figure 3-2 Discrimination Basis

Source: FCOG Travel Survey, October 2022

When asked what participants found most appealing in their current neighborhood, proximity to educational facilities, shopping, or employment ranked the highest at 41.8 percent, followed by atmosphere and physical features, as shown in **FIGURE 3-3 MOST-LIKED FEATURE OF CURRENT NEIGHBORHOOD**. Less than 5 percent of respondents identified proximity to public transportation as their preferred aspect about their neighborhood, which may reflect a lack of mobility opportunities or a low desire for alternatives to automobile transportation.

FIGURE 3-3 MOST-LIKED FEATURE OF CURRENT NEIGHBORHOOD

Source: FCOG Travel Survey, October 2022.

SECTION 3: REGIONAL ASSESSMENT OF FAIR HOUSING

Approximately 25.0 percent of respondents identified their favorite aspect of their current neighborhood was the residents; conversely, 18.1 percent of respondents said that their neighbors were their least-liked aspect of their current neighborhood, followed by crime, lack of privacy, or security (14.8 percent), as shown in **FIGURE 3-4 LEAST-LIKED FEATURE OF CURRENT NEIGHBORHOOD**. The high cost of housing was identified by 11.2 percent of respondents as a least-liked feature, followed by lack of access to public transportation, shopping, schools, or employment for a combined 10.0 percent of responses. Overcrowding was reported as an issue by only 1.4 percent of respondents, suggesting that dwellings were available to fit their household needs within their ability to pay.

FIGURE 3-4 LEAST-LIKED FEATURE OF CURRENT NEIGHBORHOOD

Source: FCOG Travel Survey, October 2022.

Participants were also asked if they had encountered barriers preventing home ownership, shown in **FIGURE 3-5 BARRIERS PREVENTING HOMEOWNERSHIP**. Of the respondents who wished to own a home, the most common barriers to home ownership were related to financial challenges, including lack of financial resources for assuming a monthly mortgage payment, and finding a home that suited the household's needs (i.e., lack of disability accommodations, proximity to work), followed closely by lack of down payment resources and finding a home within one's budget. Overall, 45.6 percent of responses to this question centered around financial challenges in the current market, suggesting a need for additional housing at affordable price points and more information regarding available subsidies and financial assistance programs.

FIGURE 3-5 BARRIERS PREVENTING HOMEOWNERSHIP

Source: FCOG Travel Survey, October 2022.

Responses to the survey indicated a need for greater access to fair housing legal services, education for landlords on fair housing laws, and place-based revitalization efforts such as improved bicycle and pedestrian infrastructure, transit access, and safe and affordable housing. A full analysis of all responses to the FCOG Transportation Needs Survey are in Section 1 of the Housing Element.

Public Comments

To date, one letter has been received from the public on the Fresno County Multijurisdictional Housing Element. On September 29, 2022, the Leadership Council for Justice and Accountability (LCJA) shared a letter recommending holding interactive housing element workshops in at least three disadvantaged unincorporated communities (DUC) and lower-income communities, emphasizing that people in these areas are more likely to attend in their own communities due to transportation challenges. LCJA also identified a need for targeted outreach to members of special needs populations and protected classes, including but not limited to farmworkers, seniors, members of large families and single-headed households, and people of color and non-English speakers, and recommended multilingual noticing through a variety of mechanisms, including print media, radio, and television.

The LCJA also recommended that jurisdictions ensure that strong public engagement efforts are maintained following jurisdictions' adoption of the element and that jurisdictions consider expansion of local funding opportunities for farmworker housing in unincorporated county; local rent stabilization ordinances; tenant protections to reduce displacement risks, including just-cause eviction and right to counsel guarantees; permanent emergency rental assistance program for those at risk of homelessness; investments in mobile home parks; inclusionary housing ordinance; acquisition and rehabilitation funding; and other programs that might be considered by individual jurisdictions.

As with feedback received through the consultation process, input through public comments was received to inform policies and actions to address fair housing concerns and housing needs generally. Public comment will continue to be solicited, considered, and incorporated throughout the update process.

FAIR HOUSING ISSUES

Since 2017, the California Tax Credit Allocation Committee (TCAC) and Department of Housing and Community Development (HCD) have developed annual maps of access to resources such as high-paying job opportunities; proficient schools; safe and clean neighborhoods; and other healthy economic, social, and environmental indicators to provide evidence-based research for policy recommendations. This effort has been dubbed “opportunity mapping” and is available to all jurisdictions to assess access to opportunities within their community.

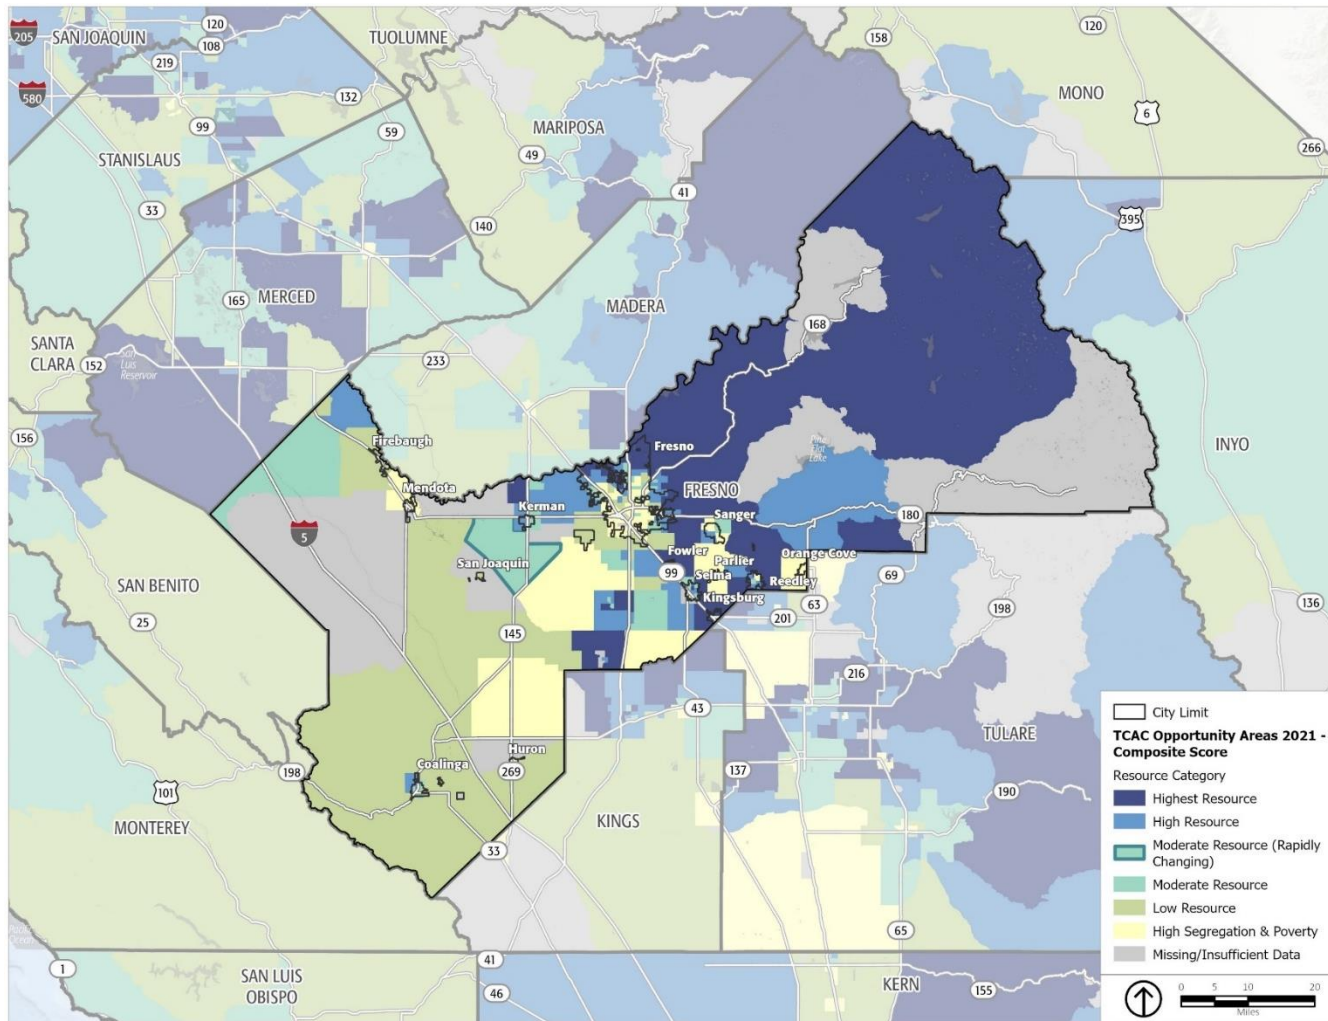

The TCAC/HCD Opportunity Maps can help to identify areas within the community that provide strong access to opportunity for residents or, conversely, provide low access to opportunity. The information from the opportunity mapping can help to highlight the need for housing element policies and programs that would help to remediate conditions in low-resource areas and areas of high segregation and poverty and to encourage better access for lower-income households and communities of color to housing in high-resource areas. TCAC/HCD categorized census tracts into high-, moderate-, or low-resource areas based on a composite score of economic, educational, and environmental factors that can perpetuate poverty and segregation, such as school proficiency, median income, and median housing prices. The TCAC/HCD Opportunity Maps use a regional index score to determine categorization as high, moderate, and low resource.

Areas designated as “highest resource” are the top 20-percent highest-scoring census tracts in the region. It is expected that residents in these census tracts have access to the best outcomes in terms of health, economic opportunities, and education attainment. Census tracts designated “high resource” score in the 21st to 40th percentile compared to the region. Residents of these census tracts have access to highly positive outcomes for health, economic, and education attainment. “Moderate resource” areas are in the 41st to 70th percentile and those designated as “moderate resource (rapidly changing)” have experienced rapid increases in key indicators of opportunity, such as increasing median income, home values, and an increase in job opportunities. Residents in these census tracts have access to either somewhat positive outcomes in terms of health, economic attainment, and education; or positive outcomes in a certain area (e.g., score high for health, education) but not all areas (e.g., may score poorly for economic attainment). Low-resource areas are those that score above the 70th percentile and indicate a lack of access to positive outcomes and poor access to opportunities. The final designation are those areas identified as having “high segregation and poverty;” these are census tracts that have an overrepresentation of people

of color compared to the county as a whole, and at least 30.0 percent of the population in these areas is below the federal poverty line (\$27,759 annually for a family of four in 2021).

As seen in **FIGURE 3-6 REGIONAL TCAC/HCD OPPORTUNITY AREAS**, most of Fresno County, particularly in the incorporated cities, is primarily a mix of low-resource or moderate-resource areas and areas of high segregation and poverty, with pockets of high-resource designations. The City of Fresno, as the largest city in the county, has the greatest variation in resource area designations among the incorporated cities of Fresno County. The central portion of the city is designated as low resource and high segregation and poverty, with moderate and high resource designations in the newer suburban communities along the northern and eastern edges of the city, including a pocket of unincorporated county that is surrounded by the incorporated city, designated as highest resource. In contrast, the adjacent City of Clovis is designated high resource with pockets identified as moderate resource. Two cities to the south along State Route 99 (SR 99), Fowler and Kingsburg, are designated as high resource, while Selma is designated an area of high segregation and poverty adjacent to SR 99, with moderate and high resource designations identified in the eastern portion. Additionally, the eastern cities of Sanger and Reedley all contain areas identified as high segregation and poverty in addition to moderate and high resource designations. Both Parlier and Orange Cove east of SR 99 are identified as predominantly areas of high segregation and poverty and low resource, as well as Mendota, Firebaugh, San Joaquin, and Huron in the eastern portion of the county. The City of Kerman, just east of the City of Fresno, and the City of Coalinga at the western edge of the county, are designated moderate and high resource. In the unincorporated county, high and highest resource areas are generally in the northeast and eastern portions of the county, including the unincorporated community of Squaw Valley, although most of the land is included within the Sequoia and Kings Canyon National Parks and is predominantly rural and sparsely inhabited, with pockets of higher resource designations in the unincorporated communities of Caruthers and Riverdale along State Route 41 (SR 41). Lower resource and areas of high segregation and poverty are identified in the western unincorporated areas of the county. Moderate-resource areas elsewhere, concentrated west of Fresno and within the triangle formed by SR 41, the southern boundary of the county, and SR 99. Given that much of unincorporated Fresno County is sparsely populated, with large agricultural and natural open space areas, the low- and moderate-resource areas may not accurately represent the access to opportunities for residents of unincorporated communities, where there is typically a concentration of resources.

FIGURE 3-6 REGIONAL TCAC/HCD OPPORTUNITY AREAS

Source: TCAC/HCD, 2021

Patterns of Integration and Segregation

Segregation exists when there are concentrations of a population, usually a protected class, in a certain area. Segregation can result from local policies, to the availability and accessibility of housing that meets the needs of that population, or a community culture or amenity that attracts the population. In the context of fair housing, segregation may indicate an issue where it creates disparities in access to opportunity, is a result of negative experiences such as discrimination or disproportionate housing need, or other concerns. Integration, in contrast, usually indicates a more balanced representation of a variety of population characteristics and is often considered to reflect fair housing opportunities and mobility.

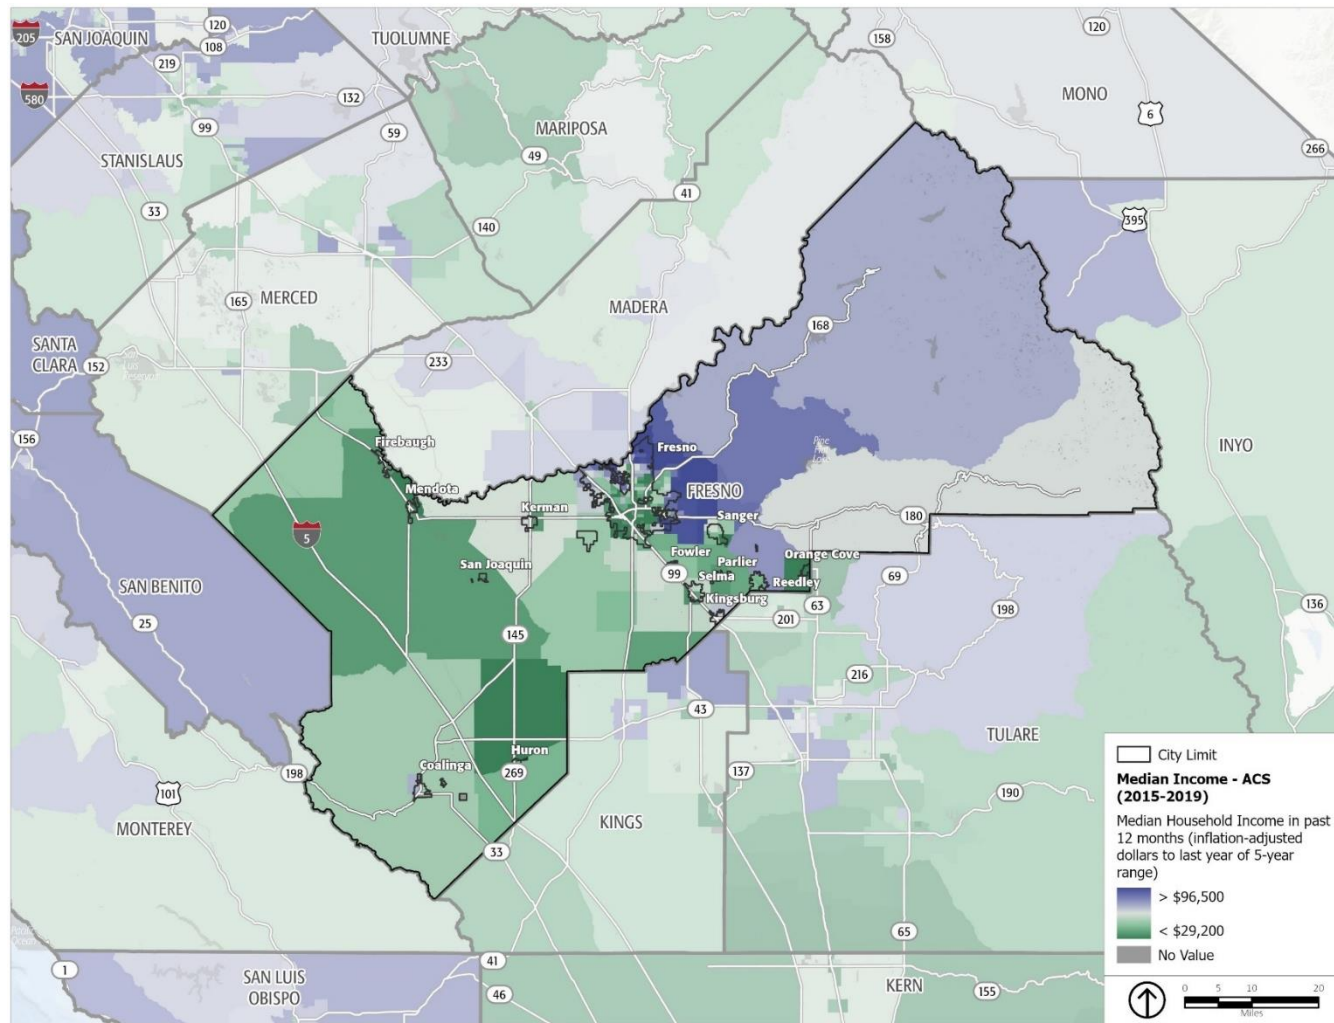

As identified in the previous discussion, a large portion of the City of Fresno; the rural area around the unincorporated community of Raisin City; a rural and agricultural tract north of Huron and one east of the Riverdale unincorporated community; the unincorporated area between, and including tracts within the cities of Sanger, Parlier, Orange Cove, and Mendota; and the unincorporated area north of the City of Mendota to the edge of the City of Firebaugh, are designated as areas of high segregation and poverty.

This analysis assesses four characteristics that may indicate patterns of integration or segregation throughout the region and local Fresno County jurisdictions: income distribution, racial and ethnic characteristics, familial status, and disability rates.

Income Distribution

At the regional level, income distribution can be measured between jurisdictions. **FIGURE 3-7 INCOME PATTERNS IN THE REGION**, presents the spatial distribution of income groups in Fresno County and surrounding San Joaquin Valley jurisdictions. There are concentrations of higher-income households in the City of Clovis, in the northern and southern portions of the City of Fresno (inclusive of unincorporated county islands, which are unincorporated neighborhoods surrounded by the incorporated municipality, and unattached to other unincorporated areas). On maps, these geopolitical anomalies will form jagged or complex borders and 'holes' in the city limits), in the eastern portion of the county, and in unincorporated areas surrounding the cities of Kingsburg, Selma, and Sanger. In surrounding counties, concentrations of higher-income households are found in the portion of Kings County northeast of the City of Hanford and in Tulare County in northern Visalia, north of the community of Woodlake, east of the City of Tulare, and in the sparsely populated Sequoia National Park area in the eastern portion of Tulare County. The neighboring Merced, San Benito, Monterey, and Madera Counties to the north and west generally reflect moderate and lower median incomes.

FIGURE 3-7 INCOME PATTERNS IN THE REGION

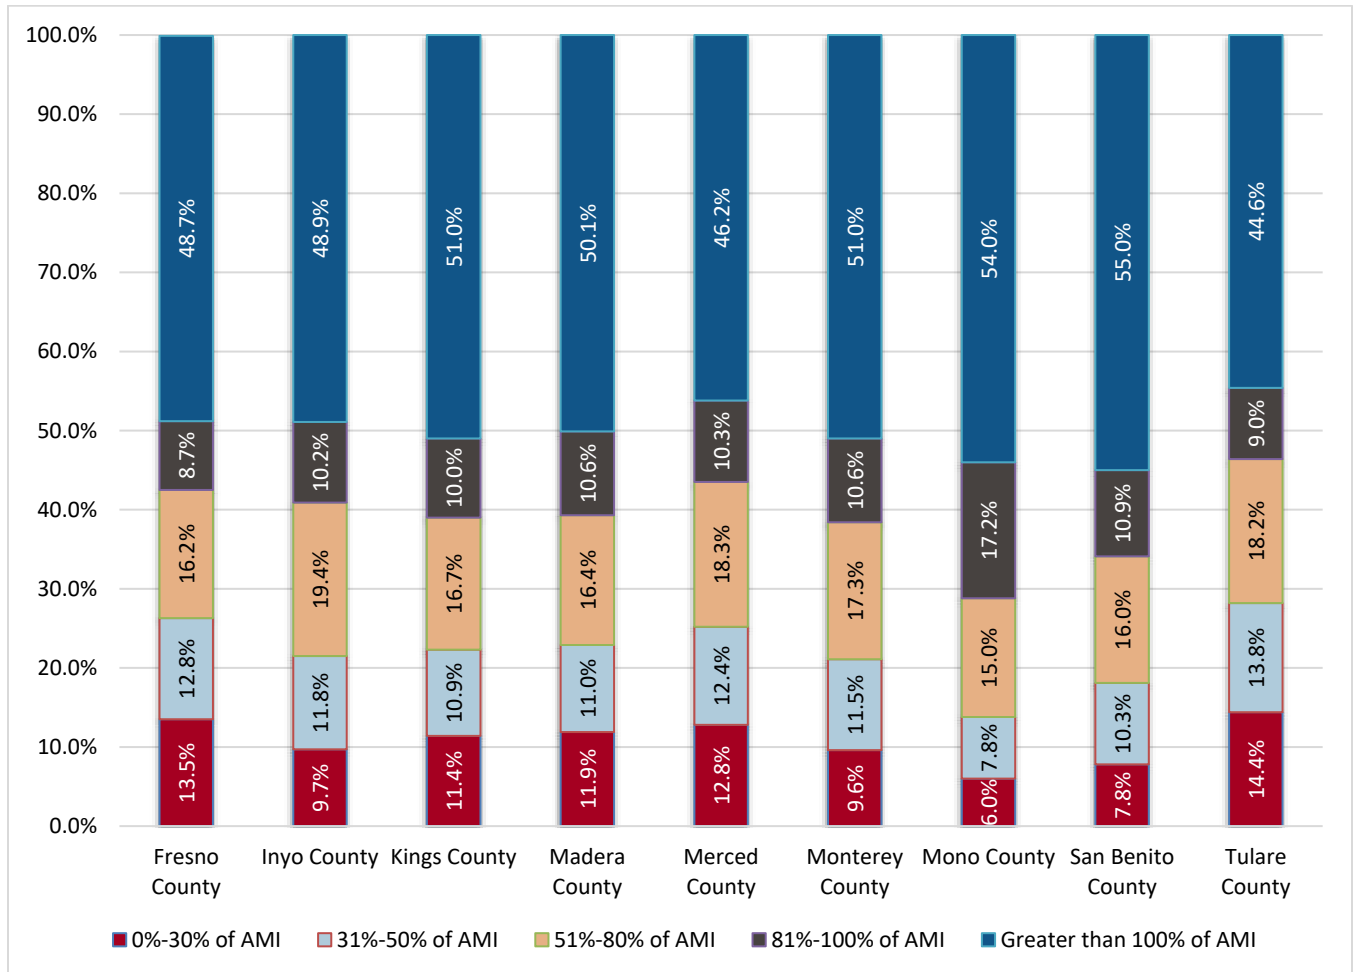

Source: 2015-2019 ACS

SECTION 3: REGIONAL ASSESSMENT OF FAIR HOUSING

When comparing income groups between San Joaquin Valley counties, patterns in Fresno County closely mirror many of the San Joaquin Valley counties, supporting the patterns shown in **FIGURE 3-7 INCOME PATTERNS IN THE REGION**. **FIGURE 3-8 REGIONAL MEDIAN INCOMES**, presents the geographic patterns of median income in Fresno County compared to the region.

FIGURE 3-8 REGIONAL MEDIAN INCOMES

Source: 2016 – 2020 ACS

Throughout the region, the highest median income is often found in medium-density urban areas, outside of the central core of the cities in the suburban residential developments, as is the pattern in the incorporated cities of Fresno and Clovis in Fresno County, and Visalia and Tulare in Tulare County, as well as unincorporated areas outside of these cities and in the vicinity of the national forest areas in the eastern portions of these counties. Lower-income concentrations are found within older city cores in the larger jurisdictions. However, in contrast to areas in the state with higher-density populations and uses, the San Joaquin Valley counties are not heavily populated and are instead heavily agricultural, and unincorporated areas are where more lower-income households are located. As shown in **FIGURE 3-8 REGIONAL MEDIAN INCOMES**, Fresno County reflects income distribution trends found in the region, with between 46.2 percent and 51.0 percent of the households with incomes 100 percent above the County median in Fresno, Inyo, Kings, Madera, and Monterey Counties. Additionally, the proportion of lower-income households hovers around 40.0 percent in these same counties. Lower-income households comprise

between 30.0 and 35.0 percent in Mono and San Benito Counties, and higher proportions of lower-income households, between 43.5 and 46.4 percent, are reported in Merced and Tulare Counties, respectively. Conversely, Merced and Tulare Counties had lower proportions of households with incomes above 100 percent of the median, and Mono and San Benito Counties had higher proportions of above median incomes. However, Mono and San Benito Counties are not comparable to the other San Joaquin Valley counties, as Mono County contains a significant portion of Mammoth Mountain recreational area and higher-income retirement residents, and San Benito County more closely reflects adjoining higher-income Santa Clara and Santa Cruz Counties.

Within Fresno County, the City of Clovis, followed by the City of Kingsburg and unincorporated area, has the largest proportion of moderate- and above moderate-income households earning more than 100.0 percent of the Area Median Income (AMI) at 64.9, 60.2, and 56.3 percent, respectively (**FIGURE 3-9 INCOME GROUPS WITHIN FRESNO COUNTY JURISDICTIONS**). Conversely, the cities of Huron, San Joaquin, Orange Cove, and Parlier have the highest percentage of households with extremely low incomes below 30.0 percent of the AMI, at 32.8, 30.0, 29.6, and 26.0 percent respectively. Overall, the City of Orange Cove has the highest percentage of lower-income households, constituting 80.8 percent of the total households, followed by the City of Huron at 78.0 percent of the total households, the City of Mendota at 73.9 percent of total households, and the cities of Parlier and San Joaquin at 67.8 and 67.6 percent. The distribution of income groups within Fresno County may be representative of the availability of affordable housing, the historic development patterns, and the employment opportunities in the San Joaquin Valley.

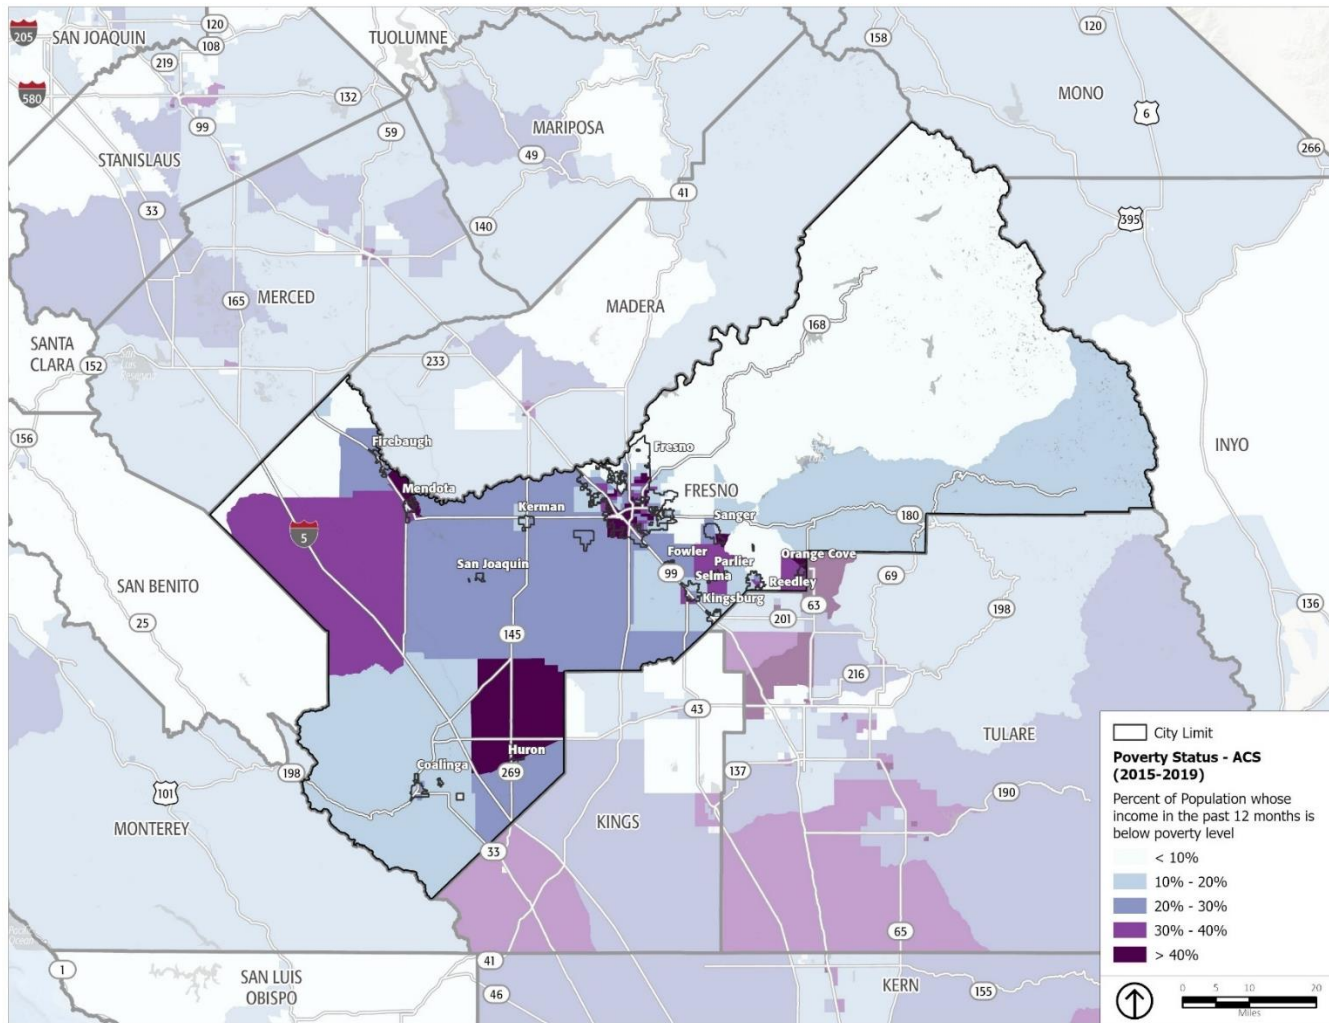

As shown in **FIGURE 3-9 INCOME GROUPS WITHIN FRESNO COUNTY JURISDICTIONS**, over half of the households in the cities of Huron and Orange Cove have incomes falling into the extremely low- and very low-income categories. In the cities of Mendota and San Joaquin, just over 46.0 percent of total median household incomes fall in the extremely low- and very low-income categories, corresponding with high rates of poverty shown in **FIGURE 3-10 REGIONAL POVERTY RATES**. While all jurisdictions in Fresno County, with the exception of the City of Clovis and the unincorporated county, have areas in which at least 10.0 percent of the population falls below the poverty line, the cities of Kerman, Selma, and Fowler have the lowest representation of population with incomes below 30.0 percent AMI, at 10.0, 10.1, and 10.4 percent, respectively.

Racial and Ethnic Characteristics

The Othering and Belonging Institute developed the Divergence Index tool that compares the relative proportions of racial groups (or any other groups) at smaller and larger geographies, looking for the degree of “divergence” between the two geographies, such as between a census tract and a county.⁴ The lowest possible value of the Divergence Index is 0, when the demographics of a smaller geography does not differ, or diverge, from that of the larger geography, suggesting minimal segregation, whereas higher values suggest higher divergence, and hence higher segregation. For example, if the population within an overall jurisdiction of two census tracts is predominantly Hispanic at 91.0 percent, and one census tract is 95.5 percent Hispanic, the Divergence Index in that tract would be low, as the tract does not differ significantly from the larger geographical unit. However, if the other census tract is primarily Hispanic at 74.0 percent and has higher proportions of other racial and ethnic groups, the Divergence Index would be higher, as that tract differs from overall geographical demographic patterns, and the Non-Hispanic residents would be the populations that are considered segregated. The mapping designation in that tract would be Low-Medium Segregation. In this case, a predominantly Hispanic community is not considered “segregated” as the majority of the population is homogeneous – it is the presence of other races/ethnicities within a smaller geographic unit where segregation, which may include White Non-Hispanic, Asian, Other, or any combination of racial/ethnic affiliation, that are actually the “segregated” populations within an area that is overall representative of Hispanic populations. The Divergence Index reveals patterns between racial and ethnic concentrations that may indicate segregation, such as “between-place” (or inter-municipal or regional segregation) and “within-place” (or intra-municipal) segregation. In other words, the Divergence Index measures the degree of segregation between neighborhoods within a city compared to the degree that it exists between cities within a metropolitan region.

While the Divergence Index indicates the separation of groups across space, it cannot, by itself, indicate if a place is truly “integrated.” A place could have a low level of segregation and yet not reflect what we would intuitively describe as “integrated.” This is because some places with little racial segregation may be racially homogeneous, with little underlying diversity that would result in segregation. Some communities and regions may appear to have relatively little racial residential segregation, but that may be a result of low diversity. The determination of high or low-medium segregation designations at the larger county level, for example, is not predicated solely on a predominance of one race or another. The distribution of population within racial/ethnic groups at the overall county level is established as a baseline. The Segregation/Integration designation is then determined on how each of the racial/ethnic populations are distributed proportionally at the jurisdictional level, compared to the percentage of the population in each racial/ethnic group at the baseline county level.

As shown in **FIGURE 3-11 SEGREGATION AND INTEGRATION, REGIONAL DIVERGENCE, 2020**, there is a mix of High and Low-Medium Segregation designations among the counties surrounding Fresno County. There are no counties identified as Racially Integrated. Fresno County has been identified as highly segregated, with a baseline distribution of 54.0 percent Hispanic, 24.0 percent White Non-Hispanic, 11.0 percent Asian, and 8.0 percent Other. Although the representation of the racial and ethnic populations in the City of Fresno closely

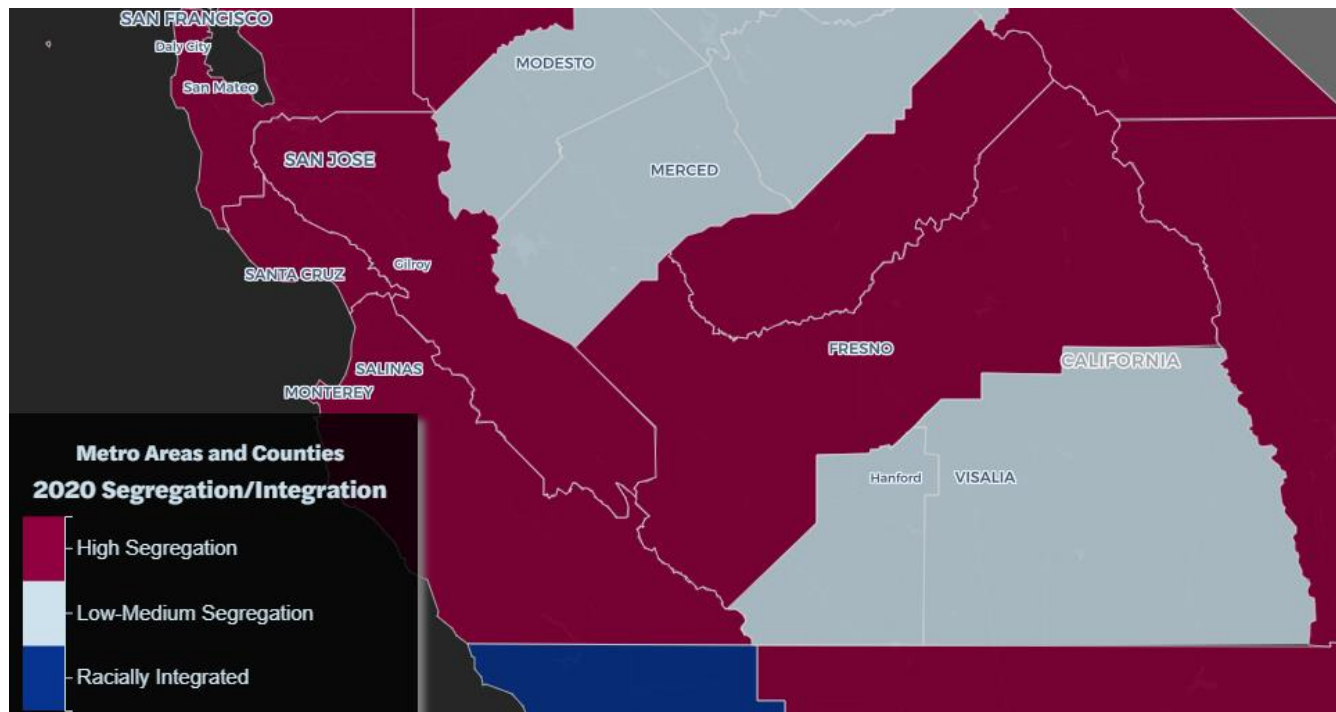

⁴ Othering and Belonging Institute, 2022, “Technical Appendix” in *The Roots of Structural Racism Project*, accessed October 5, 2022. <https://belonging.berkeley.edu/technical-appendix>.

correspond to the county baseline, eight of the jurisdictions in the county have Hispanic populations over 80.0 percent, thereby “diverging” from the county baseline and indicating a segregated population of color. In contrast, the City of Clovis has a White population that is almost double that of the overall county, and conversely the proportion of Hispanic residents is 31.0 percent compared to 54.0 percent per the county baseline, again indicating a divergence from the countywide racial and ethnic population distribution. The three remaining jurisdictions have proportional representations of racial and ethnic populations that generally diverge less than approximately 20 percentage points from the baseline and are designated low-medium segregation. However, the High Segregation allocation results from the prevalence of jurisdictions within the county that differ so significantly from the baseline.

Similar patterns of jurisdictions diverging from the county level racial and ethnic baseline occur in Monterey, Madera, Inyo, and Mono Counties, with associated High Segregation designations. Madera and Monterey Counties experience the divergence primarily within the Hispanic and Other populations. In Madera County, the racial and ethnic distribution is 60.0 percent Hispanic, 31.0 percent White Non-Hispanic, and 9.0 percent Other. However, Madera has a distribution that diverges from the baseline with 80.0 percent Hispanic, 13.0 percent White Non-Hispanic, and 8.0 percent Other, and Chowchilla has a lower proportion of Hispanic residents, a comparable White Non-Hispanic representation, yet a higher proportion of Black and Other residents at 15.0 percent. Monterey County’s High Segregation designation is attributed to the extreme divergence of racial and ethnic representation in the coastal cities from the baseline of 60.0 percent Hispanic, 27.0 percent White Non-Hispanic, and 12.0 percent Other, with White Non-Hispanic populations more than double the county baseline and Asian and Other proportions almost double the county baseline. In contrast, the inland jurisdictions along Interstate (I-) 5 in the rural agricultural portions of the county have high proportions of Hispanic communities between 20 and 33 percentage points from the baseline, with corresponding low White Non-Hispanic and Other populations.

In contrast, in Mono and Inyo Counties, the High Segregation designation is based on the predominance of a countywide White population at 66.0 and 58.0 percent, respectively, and although there is a comparable racial and ethnic composition in the single incorporated jurisdiction in each, the remainder of each of the counties’ census designated places (CDPs) have proportional representations of racial and ethnic groups that are divergent from the county baseline, and therefore have been identified as a High Segregation statistical area. The remaining adjacent Merced, Tulare, and Kings Counties are considered Low-Medium Segregation, with the proportions of Hispanic, White Non-Hispanic, Asian, and Other communities of color more closely correlating with the baseline distributions of racial/ethnic populations. San Benito County is included in the San Jose/Sunnyvale, Santa Clara Metropolitan Statistical Area (MSA) and therefore not comparable in this analysis.

FIGURE 3-11 SEGREGATION AND INTEGRATION, REGIONAL DIVERGENCE, 2020

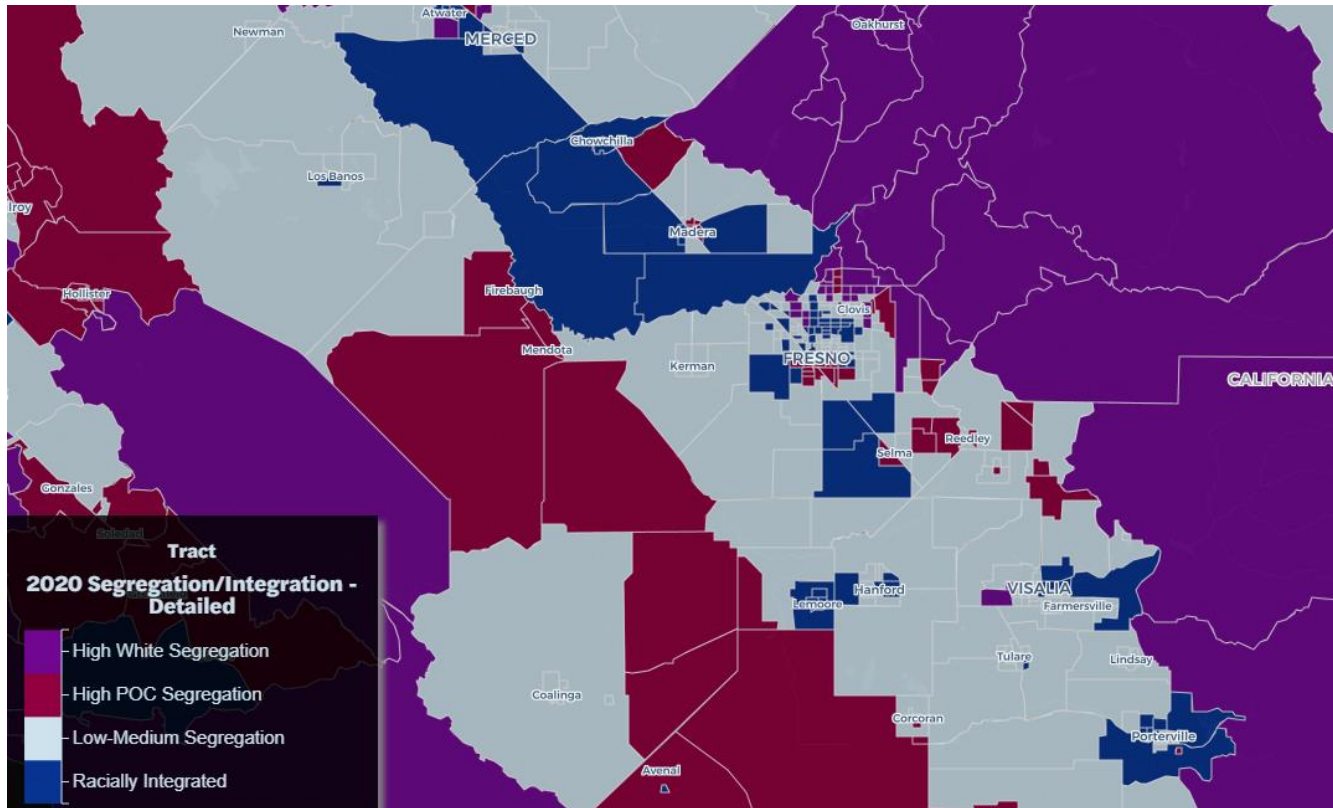

Source: Othering and Belonging Institute, 2020

As shown in **FIGURE 3-12 RACIAL AND ETHNIC DIVERGENCE, FRESNO COUNTY REGION**, the detailed Segregation and Integration Index is an alternative measurement of segregation and integration from a more qualitative perspective, although the categories are based on quantitative proportions, classified as high white segregation (more than 51 percent White population); high People of Color (POC) segregation (above 75 percent total Non-White populations); low-medium segregation (between 50 and 74 percent predominant population and 25 to 50 percent White populations); and racially integrated (below 50 percent representation of all racial and ethnic groups). Within Fresno County, there are pockets of high POC segregation correlating to many of the eastern jurisdictions, within and around the cities of Fresno and Clovis, and large areas of high POC segregation in the western portion of the county, correlating to a predominance of Hispanic populations. Conversely, there are no areas of high White segregation west of SR 99 in Fresno County, although the eastern portion of Fresno County, as well as Mono and Inyo Counties, are identified as high White segregation areas, correlating to the predominantly White, non-Hispanic population. In contrast, the high White segregation designation is also found in San Benito and Monterey Counties, which were, at the MSA level, considered highly segregated, yet this designation is due to the physical concentrations of predominantly White, non-Hispanic populations along the coast in Monterey County and more sizeable non-Hispanic White representation in San Benito County.

At the census tract level, many of the jurisdictions in Fresno County designated as High Segregation at the higher level include census tracts (comprising the entire city or a majority of the census tracts in the city) designated as High POC Segregation, including Mendota, Selma, Reedley, Sanger, Parlier, Orange Cove, and Huron, as well as census tracts in the western unincorporated county, as they are predominantly Hispanic, which is divergent from the county baseline (although internally the level of segregation is low). These designations are often reflective of the intra-city relationships between racial and ethnic groups and high representations of Hispanic populations. In the City of Clovis, as well as unincorporated county islands in the City of Fresno, and eastern census tract adjacent to the national forest areas, also designated as High Segregation at a broader level, the majority of census tracts are identified as High White Segregation. Those census tracts that are identified as High POC in the City of Clovis reflect a high concentration of Asian residents in combination with an average of 20.0 percent Hispanic and Other at approximately 6.0 percent. A large portion of the census tracts within the cities of Fresno, Kerman, Kingsburg, Clovis, and Coalinga, as well as unincorporated suburbs of the City of Fresno, are designated as areas of Low-Medium segregation, which relate to intra-city distribution of racial and ethnic populations within the total city composition. While there are no jurisdictions in Fresno County designated as racially integrated in their entirety, Racially Integrated designations exist at the census tract level in the cities of Fresno and Clovis and south along SR 99 that correspond to Diversity Index percentiles not reflected at the jurisdictional-level profile.

FIGURE 3-12 RACIAL AND ETHNIC DIVERGENCE, FRESNO COUNTY REGION

Source: Othering and Belonging Institute, 2020

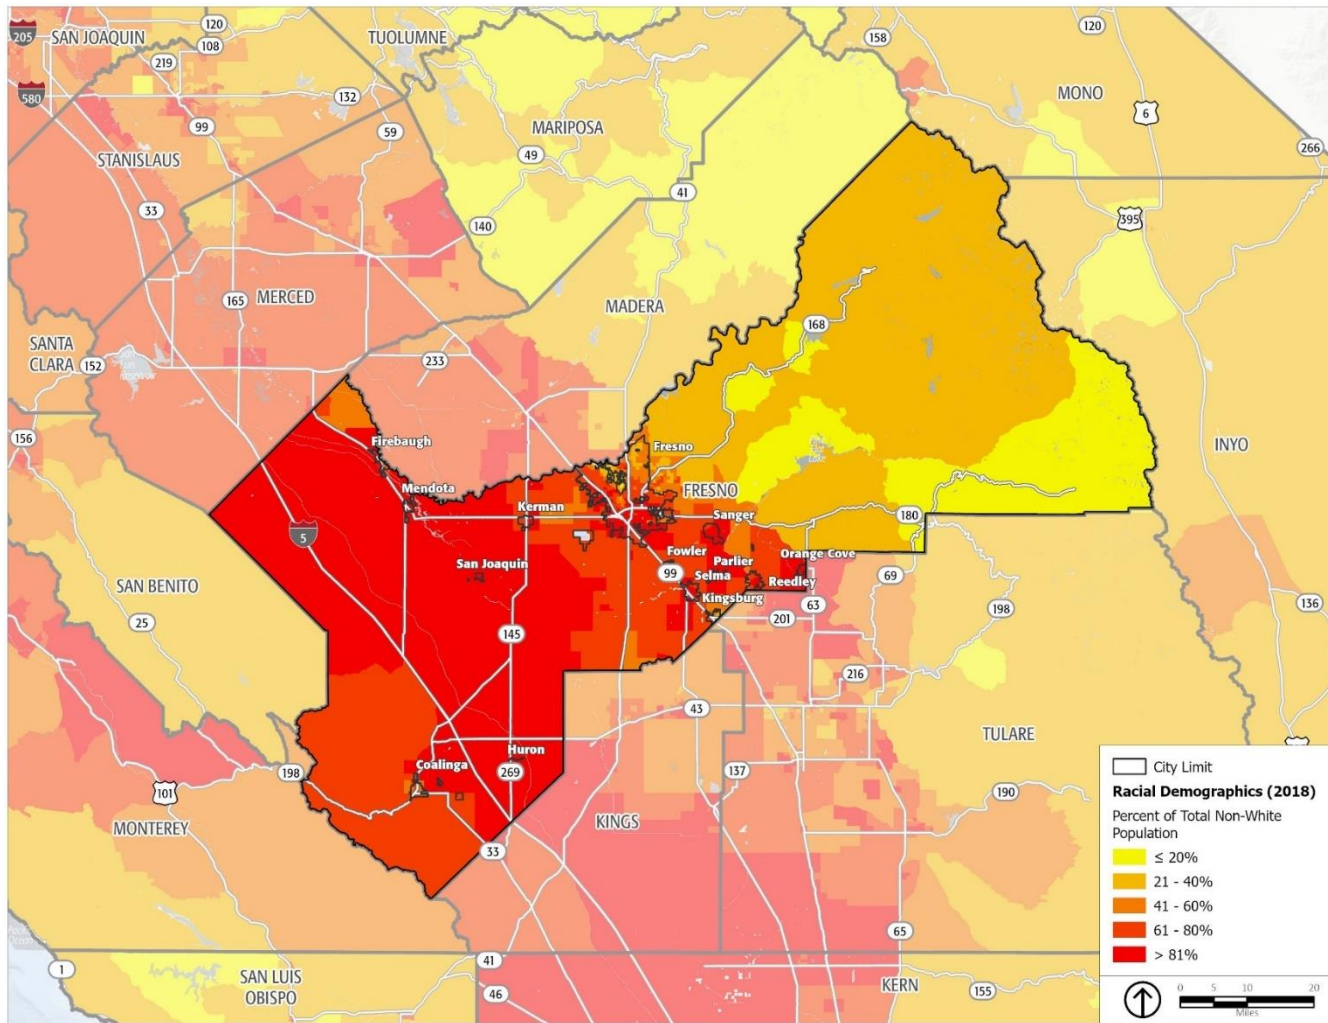

In Fresno County, as in much of the surrounding San Joaquin Valley region following SR 99 and to the west, the population is primarily Non-White, (**FIGURE 3-13 REGIONAL DEMOGRAPHIC COMPOSITION, 2020**, and **FIGURE 3-14 REGIONAL RACIAL DEMOGRAPHICS**) with the predominant population identifying as Hispanic, with the exception of portions of Clovis and pockets of unincorporated areas. The northern portion of the San Joaquin Valley region has similar racial and ethnic patterns, with most of Merced, Madera, and Tulare Counties being 61.0 to 81.0 percent Non-White with predominantly Hispanic populations, with concentrations of Non-White populations above 81.0 percent in the core areas of jurisdictions. San Benito County has a slightly less diverse population, with 41.0 to 60.0 percent of the population identifying as Non-White and a sizeable White population. In the eastern Inyo and San Joaquin Counties, the population is predominantly White Non-Hispanic, with communities of color comprising less than 40.0 percent of the population. These racial and ethnic trends in the flatland areas of the San Joaquin Valley reflect patterns of the historical agricultural economy and associated lower-income distribution with higher rates of poverty.

FIGURE 3-13 REGIONAL DEMOGRAPHIC COMPOSITION, 2020

FIGURE 3-14 REGIONAL RACIAL DEMOGRAPHICS

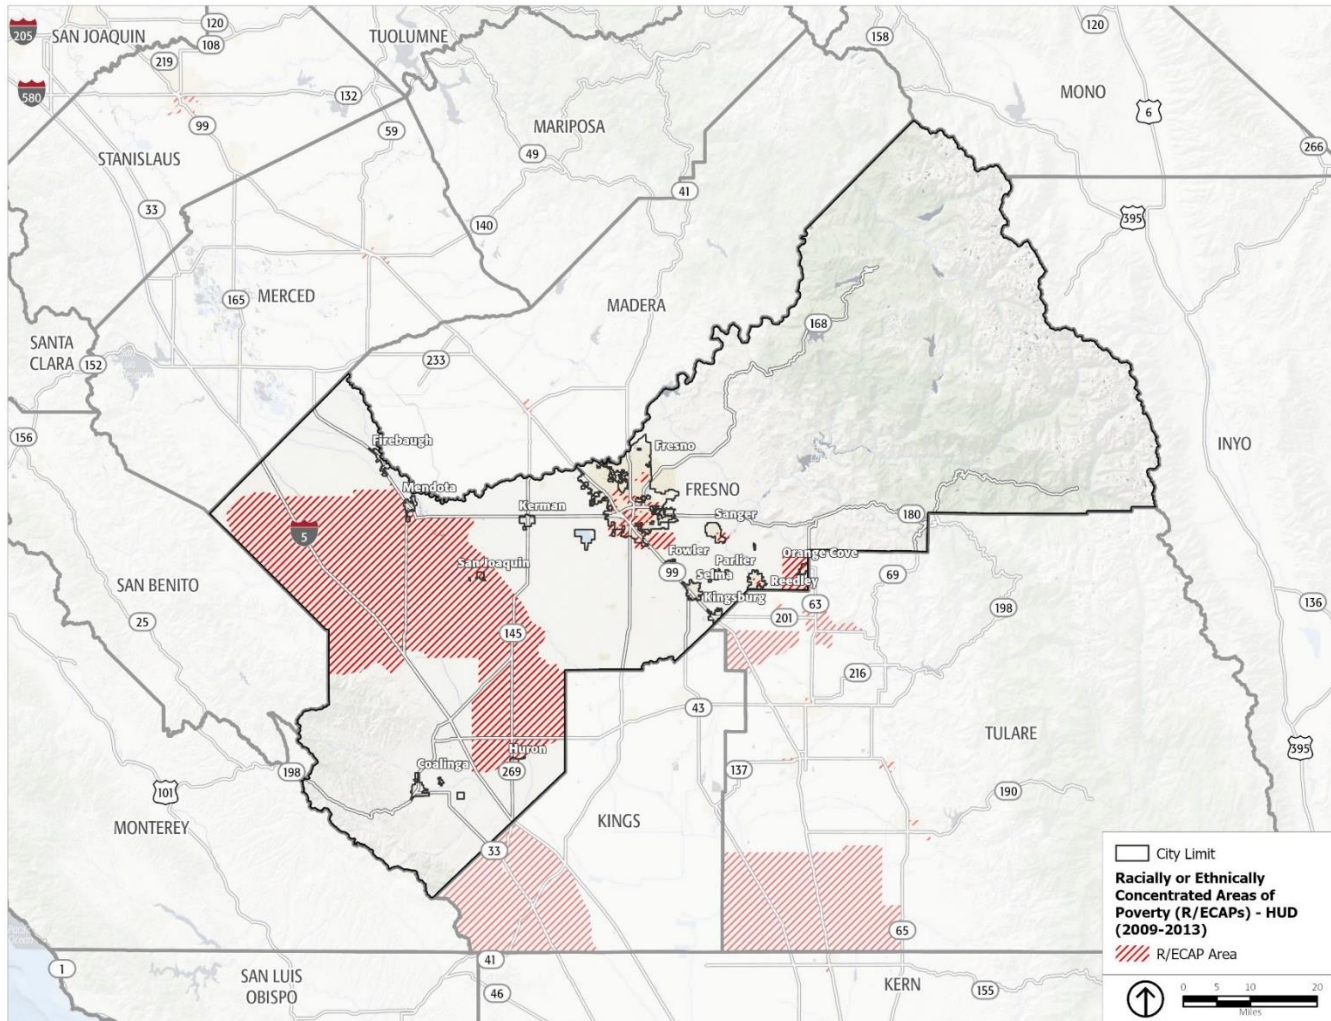

Source: Esri, 2018

Concentrations of minority populations, or concentrations of affluence, may indicate a fair housing issue despite relative integration compared to the region. A racially and ethnically concentrated area of poverty (R/ECAP) is defined by the United States Department of Housing and Urban Development (HUD) as an area in which 50.0 percent or more of the population identifies as non-White and 40.0 percent or more of households are earning an income below the federal poverty line. HCD has identified racially concentrated areas of affluence (RCAAs) in California as census tracts in which the total population that identifies as White is 1.25 times higher than the average percentage of the total White population in the local COG (60.3 percent in FCOG) and a median income that is 1.5 times higher. There are 36 tracts identified as R/ECAPs in the City of Fresno; one within the limits of the City of Sanger; two within the limits of the City of Orange Cove; one within the limits of the City of Reedley; one within the limits of both the Cities of Mendota and San Joaquin, including the surrounding unincorporated areas; and one within the limits of the City of Huron, all of which are discussed in more detail in their respective jurisdictional analysis. There are several other R/ECAPs in the southern San Joaquin Valley region in Tulare County, and in San Benito County, while there are several in the cities of Merced and Madera (see **FIGURE 3-15 REGIONAL R/ECAPS**). However, the incidence of R/ECAPS is far greater in the larger, more urbanized jurisdiction of Fresno. In contrast, there are several RCAAs in Fresno County (see **FIGURE 3-16 REGIONAL RCAAS**), in the cities of Clovis and Fresno, including unincorporated islands and unincorporated areas east of Clovis and Fresno. RCAAs are also evident throughout the southern and eastern portions of the region, including portions of the cities of Visalia, Tulare, and Hanford and adjacent unincorporated area, and the Sequoia National Forest communities.

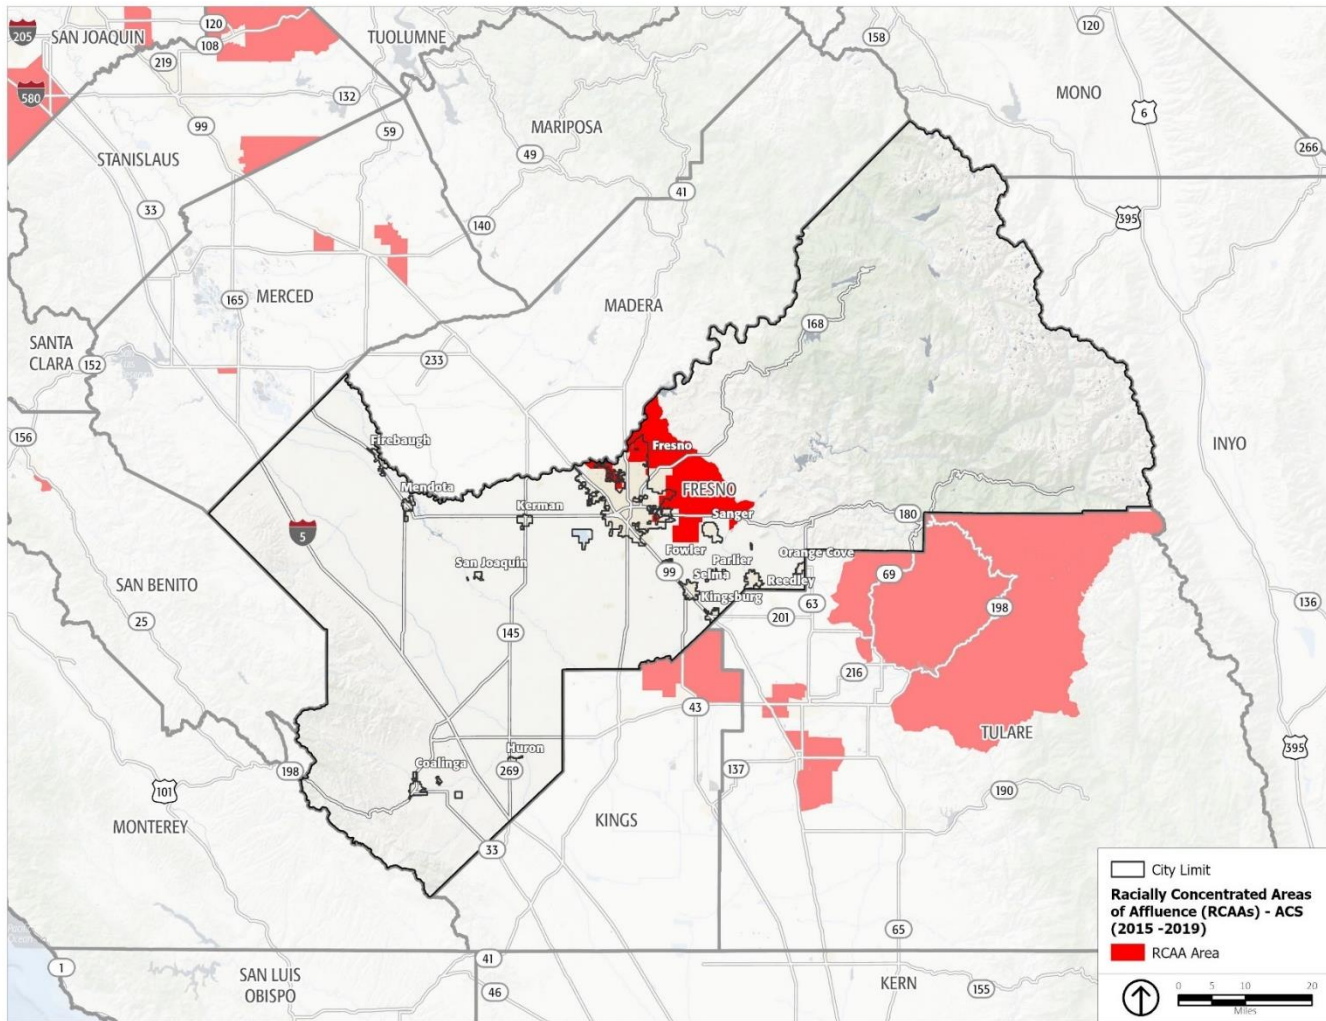

At the local level, the AFFH diversity data map provides a current reflection of local integration. As shown in **FIGURE 3-17 DIVERSITY INDEX WITHIN FRESNO COUNTY**, the Diversity Index percentile closely corresponds to the racial demographics data presented in **FIGURE 3-18 FRESNO COUNTY JURISDICTION RACIAL DEMOGRAPHICS**. Areas with the lowest diversity indices are found in Clovis and the unincorporated island in northern Fresno, as well as the eastern communities of Squaw Valley and Aubrey. The majority of cities fall within the 70.0 to 85.0 percent diversity percentile, with the highest diversity scores above the 85th percentile found in and surrounding the City of Fresno, in the City of Fowler, west and south in the unincorporated county towards the cities of Caruthers, Huron, and Coalinga, and also in portions of the City of Mendota and the City of Kerman. In some jurisdictions, the percentage of the population that identifies as other Non-White (including Black/African American, Native American, Asian, and Multiple Race) is so low, as shown in the **FIGURE 2-1 Race and Ethnicity (2020)**, in the Needs Assessment, that diversity indices may not accurately represent their distribution.

Familial Status

Patterns of familial status present a potential indicator of fair housing issues, as it relates to availability of appropriately sized or priced housing when certain family types are concentrated. As a protected characteristic, concentrations of family types may also occur as a result of discrimination by housing providers, such as against families with children or unmarried partners. Furthermore, single-parent, female-headed households are considered to have a greater risk of experiencing poverty than single-parent, male-headed households due to factors including the gender wage gap and difficulty in securing higher-wage jobs.

SECTION 3: REGIONAL ASSESSMENT OF FAIR HOUSING

In 2021, the HUD Office of Fair Housing and Equal Opportunity (FHEO) reported the number of housing discrimination cases filed with HUD since January 2013. Of the 140 cases in Fresno County, approximately 9.3 percent (13 cases) alleged familial status discrimination (**Table 3-1 Regional Familial Status Discrimination, 2013-2021**). According to the FHEO, six cases were filed in Fresno County in 2020, none of which were familial status related. While it is important to note that some cases may go unreported, 13 cases in 8 years reflects fairly low rates of familial status discrimination in Fresno County. Further, the incidence of discrimination against familial status in Fresno County is relatively low compared to the region, with three counties having lower rates, and two counties having rates approaching 30.0 percent.

Table 3-1 Regional Familial Status Discrimination, 2013-2021

County	Total Cases*	Cases Alleging Familial Status Discrimination	
		Number	Percentage of Total Cases
Fresno County	140	13	9.3%
Inyo County	N/A	N/A	N/A
Kings County	14	4	28.6%
Madera County	11	0	0%
Merced County	27	3	11.1%
Mono County	2	0	0%
Monterey County	98	18	18.4%
San Benito County	10	3	30.0%
Tulare County	47	4	8.5%

**Cases that were withdrawn by the complainant without resolution, resulted in a no-cause determination, or were not pursued as a result of failure of the complainant to respond to follow-up by HUD are not included in this total.*

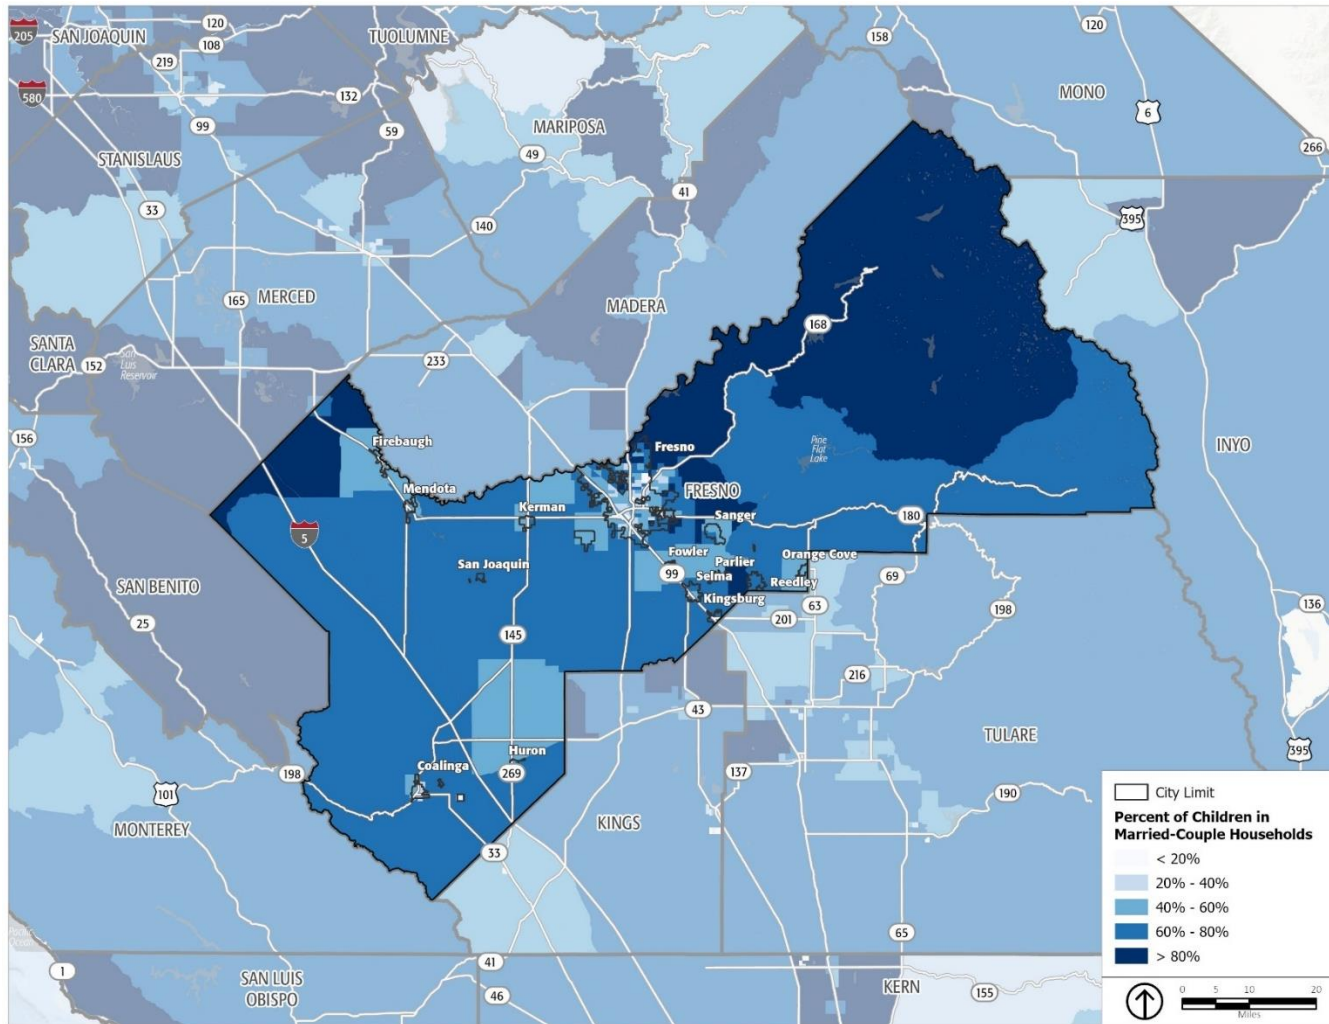

Source: HUD, 2021

While discrimination against familial status does not appear to pose a fair housing issue in Fresno County, particularly compared to the region, there are still notable patterns of distribution for varying family types. As seen in **FIGURE 3-19 PERCENTAGE OF CHILDREN IN MARRIED-COUPLE HOUSEHOLDS IN THE REGION**, most of Fresno County has moderate to high rates of this family type, comparable to surrounding San Joaquin Valley jurisdictions. In the San Joaquin Valley, in areas where residences are typically more dispersed and uses are more agricultural or limited by topography, there is a higher incidence of families with children than is found in the central and southern neighborhoods of the City of Fresno, as well as portions of the cities of Coalinga, Kerman, Mendota, Firebaugh, Fowler, Parlier, Orange Cove, and Sanger, inclusive of adjacent unincorporated areas. This trend is also present in the more urbanized areas of Tulare, Merced, and Madera Counties. In contrast, Inyo, Mono, the eastern portion of Monterey, and San Benito Counties, which have relatively few pockets of urbanization, have the highest rates of married-family households with children. The highest rates of female-headed households with children in Fresno County, between 20.0 and 40.0 percent, are in, or immediately adjacent to, incorporated cities, likely where there is better access to schools, transit, services, and jobs, as well as a greater range of housing types to meet a variety of needs (**FIGURE 3-20 PERCENTAGE OF CHILDREN IN FEMALE-HEADED**

HOUSEHOLDS IN THE REGION). This pattern is seen throughout the San Joaquin Valley region, with greater concentrations of female-headed households in and near cities, as well as in the eastern areas of Fresno and Tulare Counties, and throughout Mono and Inyo Counties. Higher rates of married-couple households are found further from urban centers, west of SR 99, in higher-income communities, and also in the eastern areas of Fresno, Madera, Merced, and Tulare Counties, and throughout Mono and Inyo Counties.

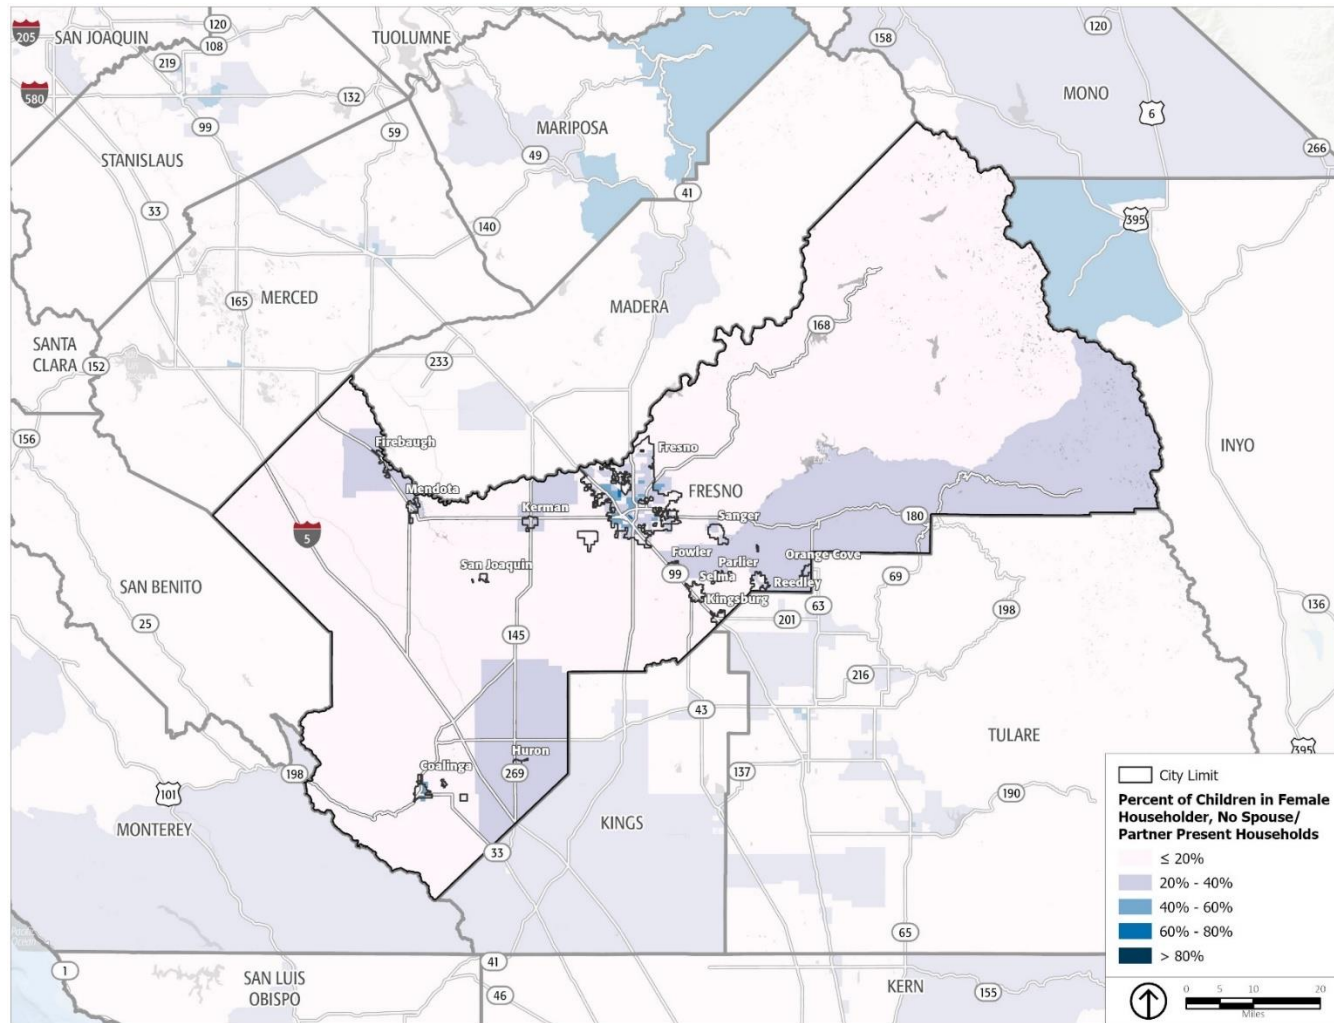

Within Fresno County, the highest concentration of female-headed households, 60.0 to 80.0 percent of total households, is evident in two census tracts in the City of Fresno. There are several tracts in Fresno, predominantly along SR 99 and SR 41, with proportions of female-headed households comprising 40.0 to 60.0 percent of the total households, as well as two tracts in the City of Clovis. In line with this, Fresno has tracts with lower concentrations of married-couple households with children, which is the dominant family type in the remainder of the county and nearby areas of the unincorporated county. In other jurisdictions in the county, there is a more balanced representation of a variety of family types, though married couples are still the primary family type throughout Fresno County and the region.

Source: 2015-2019 ACS

FIGURE 3-20 PERCENTAGE OF CHILDREN IN FEMALE-HEADED HOUSEHOLDS IN THE REGION

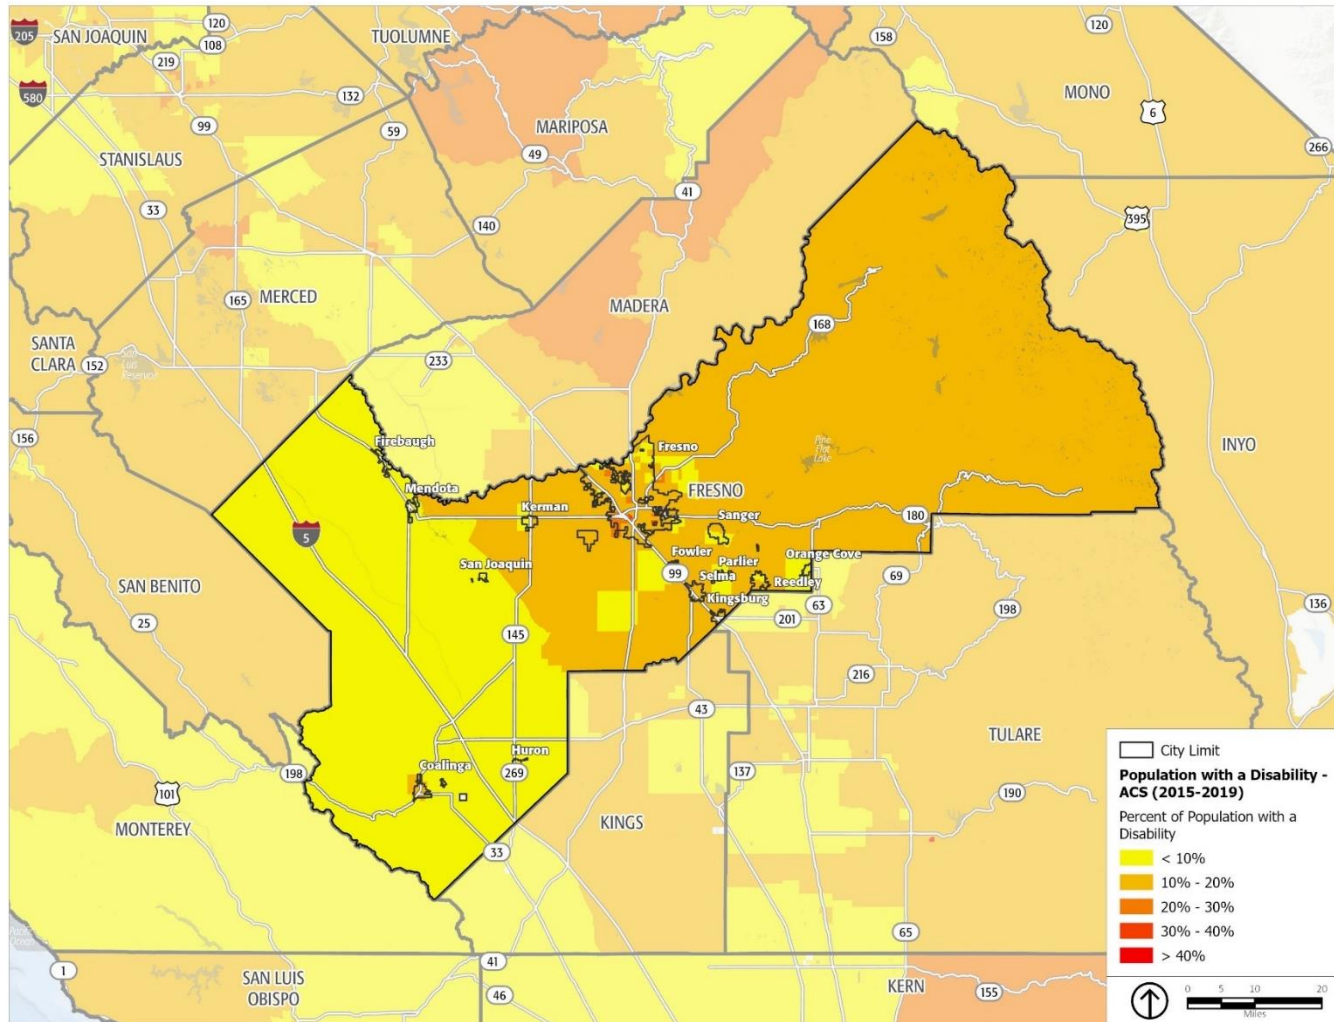

Source: 2015-2019 ACS

Disability Rates

FIGURE 3-21 POPULATION WITH A DISABILITY IN THE REGION, and **FIGURE 3-22 REGIONAL DISABILITY BY TYPE**, identify that a majority of Fresno County has a disability rate of 13.0 percent. The proportion of the population with disabilities range from a low of 6.4 percent in Mono County to a high of 15.3 percent in Inyo County, with the rates in Merced and Madera Counties slightly exceeding that of Fresno County. Monterey County and San Benito County to the west report a lower incidence of persons with disabilities than Fresno County and the remainder of the region. Overall, independent living and ambulatory disability are the most common types of disability experienced, with the highest incidence of cognitive and vision problems found in Fresno County. Inyo County reports the highest proportion of persons experiencing independent living problems, followed by Fresno County and then Tulare County, reflecting the more urban opportunities found in the cities of Fresno, Clovis Visalia, and Tulare.

FIGURE 3-21 POPULATION WITH A DISABILITY IN THE REGION

Source: 2015-2019 ACS

FIGURE 3-22 REGIONAL DISABILITY BY TYPE

Source: 2016-2020 ACS

In Fresno County, the only areas having a concentration of persons with a disability over 20.0 percent are in the cities of Fresno and Clovis, suggesting a correlation between housing opportunities for seniors in more urbanized areas with access to public transportation, services, and amenities. The other jurisdictions in Fresno County either contain a population of which less than 10.0 percent of the population reports a disability, or the jurisdiction is split between areas of less than 10.0 percent, and 10.0 to 20.0 percent of the households experiencing one or more disabilities.

As shown in **Table 3-2 Regional Demographic Characteristics of the Population with a Disability**, 41.6 percent of the population in Fresno County with a disability falls into the over 65 age group, suggesting that the higher rate of disability in the Fresno/Clovis area is likely due to the concentration of seniors. With the exception of these two areas of senior populations, disability rates in Fresno County largely reflect patterns seen throughout the San Joaquin Valley, with slightly higher rates of disability in the more urbanized areas in Tulare and Madera Counties. This is likely due to proximity to services and accessible housing options that are often desirable to persons with disabilities. Regional service providers indicate that residents living with disabilities prefer to live independently but limited housing options may restrict options to care facilities. Additionally, senior residents typically make up a substantial share of residents living with disabilities.

Table 3-2 Regional Demographic Characteristics of the Population with a Disability

Access to Opportunity

Transit Mobility

Transit mobility refers to an individual's ability to navigate a region daily to access services, employment, schools, and other resources. Indicators of transit mobility include the extent of transit routes, proximity of transit stops to affordable housing, and frequency of transit.

AllTransit is a transit and connectivity analytic tool developed by the Center for Neighborhood Technology for the advancement of equitable communities and urban sustainability. The tool analyzes the transit frequency, routes, and access to determine an overall transit score at the city, county, and regional levels. AllTransit scores geographic regions (e.g., cities, counties, MSAs) on a scale of 0 to 10. Figure 3-23, AllTransit Transit Access in the Region, depicts where in Fresno County transit is available and areas with higher connectivity scores. Although it appears public transit in Fresno County is largely isolated within incorporated jurisdictions, with little to no available transit between cities or within unincorporated areas with the exception of cities along SR 99 and SR 41, the AllTransit methodology does not take into account the Fresno County Rural Transit Agency services (described herein), which include 25 local transit operators providing both intra- and inter-city services within and to outlying communities. Therefore, the scores identified at the jurisdictional level may not accurately reflect the transit opportunities available through public service providers. AllTransit ranks the lowest scores in Fresno County in the cities of San Joaquin (0.0), Kerman (0.1), Caruthers (0.5), Selma and Kingsburg (0.7), and higher scores are found in the cities of Clovis (1.1), Coalinga (1.1), Huron (1.2), Reedley (2.2), and Fresno (5.0). Amtrak offers the San Joaquins route with connections from Bakersfield to Oakland or Sacramento, and the Amtrak Thruway system offers city to city connections throughout California that has stops along the SR 99 corridor.

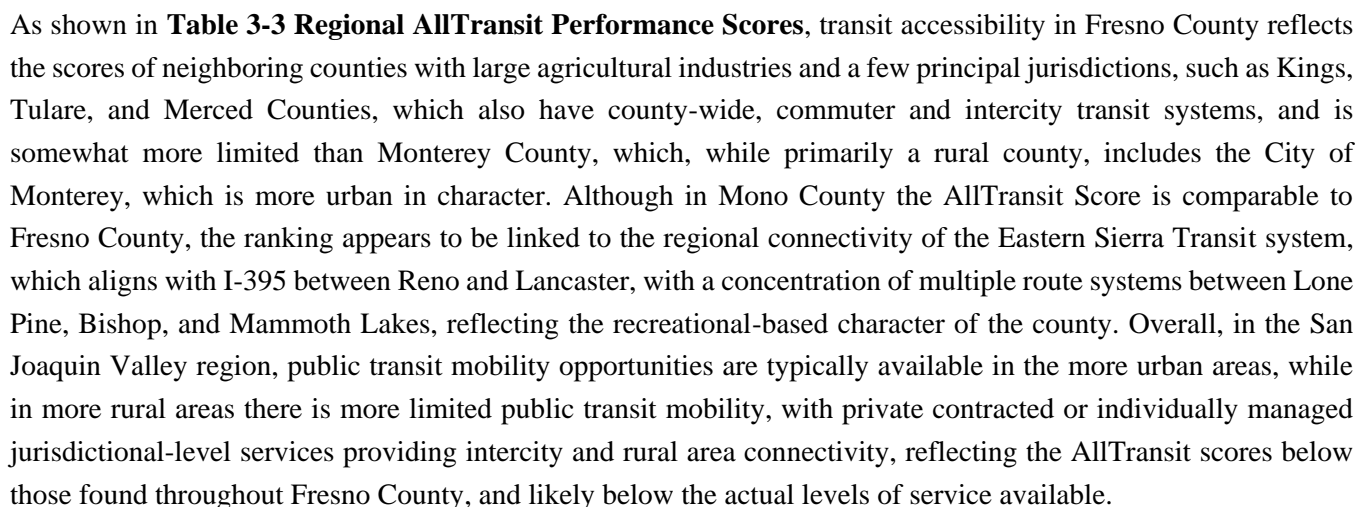

Table 3-3 Regional AllTransit Performance Scores

Jurisdiction	AllTransit Score
Fresno County	3.2
Inyo County	0.4
Kings County	3.0
Madera County	1.2
Merced County	2.4
Monterey County	4.2
Mono County	3.5
San Benito County	1.7
Tulare County	4.1

Source: AllTransit.cnt.org, 2022

In Fresno County, there are several transit options available to residents that do not appear to have been included in the AllTransit methodology, depending on where they live within the county. The Fresno County Rural Transit Agency (FCRTA) operates 25 transit subsystems that operate in 13 rural incorporated cities throughout the Valley (**Table 3-4 Fresno County Rural Transit Agency Intercounty Connections**, and **FIGURE 3-24 FRESNO COUNTY RURAL TRANSIT AGENCY INTERCOUNTY ROUTES**). Several of the connections operate on fixed-route schedules, although most are on demand or require reservations. None of the services are available on Sunday, while Sanger Transit, Rural Transit, Reedley Transit, and Coalinga Inter-City Transit offer Saturday service. The FCRTA's transit services are available to the elderly (60+), disabled, and veterans at no charge and to the general public within each of the 13 rural incorporated cities of Fresno County.

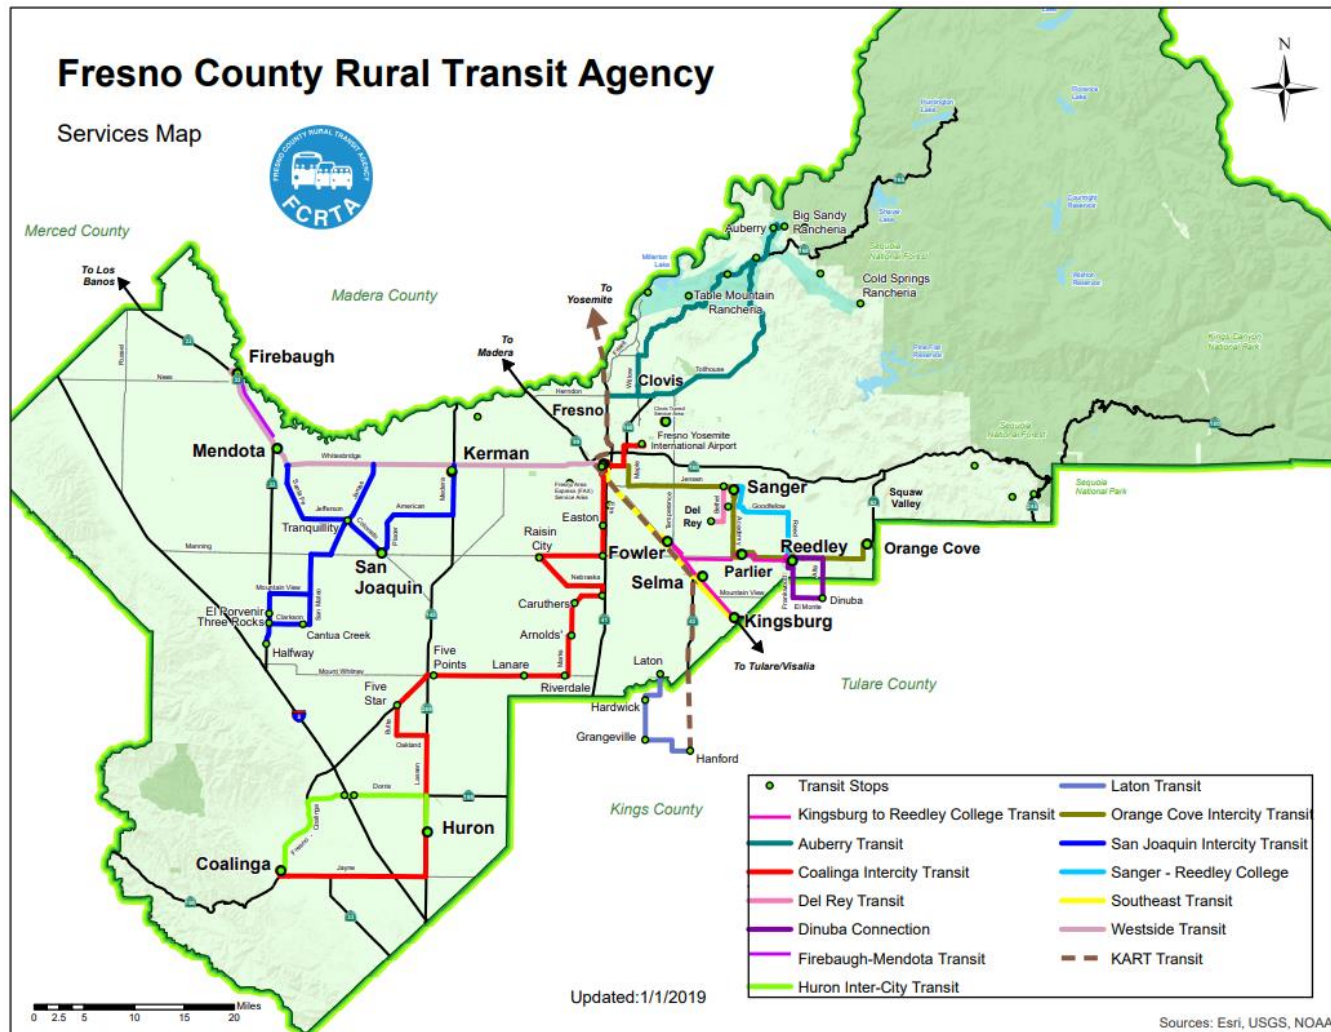

Table 3-4 Fresno County Rural Transit Agency Intercounty Connections

Fixed Route/ On Demand	Fresno County Rural Transit Agency Services	
	SubSystem Provider	Transit Service Routes
On Demand	Auberry Transit	Provides transit service between the foothill communities and the Big Sandy and Cold Springs Rancherias, inter-city service to the Fresno-Clovis area is available Tuesdays and requires 24-hour advance reservation.
On Demand	Coalinga Transit	Provides Dial-A-Ride service within the City of Coalinga.
Fixed Route	Coalinga Intercity Transit	Provides scheduled round-trip service from Coalinga to the Fresno-Clovis Metropolitan Area with stops in Huron, 5-Points, Lanare, Riverdale, Caruthers, Raisin City, Easton.
On Demand	Del Rey Transit	Provides service within the Community of Del Rey and to and from City of Sanger.
Fixed Route	Dinuba Connection	Travels from Dinuba in Tulare County to Reedley in Fresno County. Transfers to Cutler-Orosi, Orange Cove, Parlier, Sanger, and the Fresno-Clovis Metropolitan Area are available. Stops include the

Fixed Route/ On Demand	Fresno County Rural Transit Agency Services	
	SubSystem Provider	Transit Service Routes
		Dinuba Vocational Center, Adventist Medical Center, Reedley College, Palm Village Retirement Community, and Walmart.
On Demand	Firebaugh Transit	Provides local intracity transit service.
On Demand	Firebaugh-Mendota Transit	Provides local intercity transit service between Firebaugh and Mendota.
On Demand	Fowler Transit	Provides local intracity transit service.
On Demand	Huron Transit	Provides local intracity transit service.
Fixed Route	Huron Inter-City Transit	Scheduled round-trip service between Huron and Coalinga.
On Demand	Kerman Transit	Dial-A-Ride provides (demand responsive) curb-to-curb service to the general public.
Fixed Route	Kings Area Regional Transit (KART) – Hanford Fresno Transit	Provides transportation from Hanford in Kings County to the Fresno-Clovis Metropolitan Area. Stops include Valley Children’s Hospital, the Veteran’s Hospital, and Kaiser Hospital.
Fixed Route	Kingsburg to Reedley College Transit	Provides scheduled round-trip service between Kingsburg, Selma, Fowler, and Parlier to Reedley College.
Fixed Route	Laton Transit	Operated by KART with scheduled round-trip intercity service between Laton and Hanford with stops in Grangeville and Hardwick.
On Demand	Mendota Transit	Provides local intracity transit service.
On Demand	Orange Cove In-City Transit	Provides local intracity transit service.
Fixed Route	Orange Cove Intercity Transit	Scheduled round-trip inter-city service through Orange Cove, Reedley, Parlier, Sanger to the Fresno-Clovis Metropolitan Area.
On Demand	Parlier Transit	Provides local intracity transit service.
On Demand	Reedley Transit	Provides local intracity demand responsive service.
On Demand	Rural Transit	Addresses the previously unmet transit needs of truly rural area residents living beyond the existing transit service areas, which is considered outside the city limits and Spheres of Influence (SOIs) of the 15 incorporated cities in Fresno County. Requires 24-hour advance notice.
On Demand	Sanger Transit	Local intracity transit service.
Fixed Route	Sanger Express to Reedley	Service from the Sanger Community Center to Reedley College.
On Demand	San Joaquin Transit	Intracity and inter-city service from San Joaquin to Tranquility, Cantua Creek, Halfway, El Porvenir, and Three Rocks. Requires reservations or Dial-A-Ride is available with reservations and limited on-call availability.
On Demand	Selma Transit	Local intracity transit service.
Fixed Route	Southeast Transit	Round-trip inter-city service between Kingsburg, Selma, and Fowler to the Fresno-Clovis Metropolitan Area.
Fixed Route	Westside Transit	Round-trip inter-city service between Firebaugh, Mendota, and Kerman to the Fresno-Clovis Metropolitan Area.

Source: Fresno County Rural Transit Agency, 2022

FIGURE 3-24 FRESNO COUNTY RURAL TRANSIT AGENCY INTERCOUNTY ROUTES

Source: Fresno County Rural Transit Agency, 2019

FCRTA offers connections to the Fresno-Clovis Metropolitan Area through the following area transportation providers:

- Fresno Area Express (FAX) with 16 scheduled, fixed-route service with connections to Valley Children’s Hospital in Madera County
- FAX’s Handy Ride Americans with Disabilities Act (ADA) demand-responsive services
- Clovis Transit’s Stageline with two scheduled, fixed-route services
- Clovis Transit’s Round-Up’s demand-responsive ADA services
- Kings Area Rural Transit (KART) scheduled, fixed-route service to Fresno and Hanford
- Dinuba Connection scheduled fixed-route travels from Dinuba to Reedley with transfers to Cutler-Orosi, Orange Cove, Parlier, Sanger, and Fresno
- Yosemite Area Regional Transit System offers a fixed-route system from Fresno to the Yosemite Valley with options for commuter passes, and reduced fares for seniors, veterans, and persons with disabilities
- ValleyRides rideshare matching service for commuters within the San Joaquin Valley region

While there are a variety of transit options available in Fresno County, residents in many smaller incorporated jurisdictions, agricultural, and rural communities are more limited than elsewhere in the region to demand-responsive transit options that do not offer weekend service, which may limit employment opportunities for those employed in certain occupations, such as retail, medical/hospital, or restaurant services, and present a barrier to housing mobility for those households reliant on transit.

Housing Mobility

Housing mobility refers to an individual’s or household’s ability to secure affordable housing in areas of high opportunity, move between neighborhoods, and purchase a home if they so choose. Indicators of housing mobility include distribution of Housing Choice Vouchers (HCVs), availability of rental and ownership opportunities throughout the jurisdiction, and vacancy rates. A “healthy” vacancy rate is considered to be approximately 5.0 percent, indicating that there are available housing units for those seeking housing, but not an oversaturated market that results in homes left unused. In Fresno County, the vacancy rate in 2020 was approximately 5.7 percent, indicating a relatively “healthy” vacancy rate, reflecting a fairly similar rate as most primarily agricultural counties in the surrounding region (**Table 3-5 Regional Vacancy Rates**). This suggests that residents living in Fresno County, or seeking to live in Fresno County, have similar mobility options overall compared to most of the region, with the more tourism and recreational/natural resource-based counties, Mono and Inyo, having higher proportions of vacancies based likely on the seasonal rental nature of their economies. Mobility based on vacancy varies within Fresno County by jurisdiction is discussed further herein.

Table 3-5 Regional Vacancy Rates

Jurisdiction	Total Housing Units	Occupied Housing Units	Vacant Housing Units	Percentage Occupied	Percentage Vacant
Fresno County	338,441	319,296	19,195	94.3%	5.7%
Inyo County	9,469	8,046	1,423	85.0%	15.0%
Kings County	46,287	44,100	2,987	95.3%	4.7%
Madera County	49,572	45,607	3,965	92.0%	8.0%
Merced County	87,783	83,464	4,319	95.1%	4.9%
Monterey County	143,631	131,789	11,842	91.8%	8.2%
Mono County	13,589	5,474	8,115	40.3%	59.7%
San Benito County	20,365	19,484	826	95.7%	4.3%
Tulare County	150,562	141,987	8,575	94.2%	5.8%

Source: Department of Finance E-5 City/County Population and Housing Estimates, 2022

HCVs, or Section 8 vouchers, provide assistance to lower-income households to secure housing in the private market that might otherwise be unattainable. In Fresno County, vouchers are allocated by the Fresno Housing Authority to residents throughout the county, including both incorporated and unincorporated areas. Section 8 participants can use their voucher to find the housing unit of their choice that meets health and safety standards established by the local housing authority. The housing authority will then subsidize an amount up to the fair-market rent (FMR) established by HUD toward the contract rent, with any remainder to be paid by the participant. The subsidy increases housing mobility opportunities for Section 8 participants and ensures that they are provided safe housing options. Fresno County falls within the Fresno MSA, for which HUD establishes FMRs annually to be used as the baseline for Section 8 subsidies (**Table 3-6 Fresno MSA Fair-Market Rents, 2022**).

Table 3-6 Fresno MSA Fair-Market Rents, 2022

Unit Size	FMR
Studio	\$899
1-bedroom	\$904
2-bedroom	\$1,137
3-bedroom	\$1,607
4-bedroom	\$1,847

Source: HUD, 2022

In Fresno County, HCV use is most concentrated within the City of Fresno with rates up to 52.2 percent of households in tracts along SR 41 (1,800 HCVs in four tracts) and a concentration of areas with rates between 15.0 and 30.0 percent of households in the central portion of the city and along the SR 99 corridor. The higher rates of HCV use also tend to correspond to, or are adjacent to, census tracts where public housing or subsidized housing is located. Although there are pockets of HCV use between 15.0 and 30.0 percent in the surrounding San Joaquin Valley region, within the cities of Tulare and Merced in the vicinity of SR 99, Fresno County is the only jurisdiction within the greater San Joaquin Valley region with such a high concentration of HCVs.

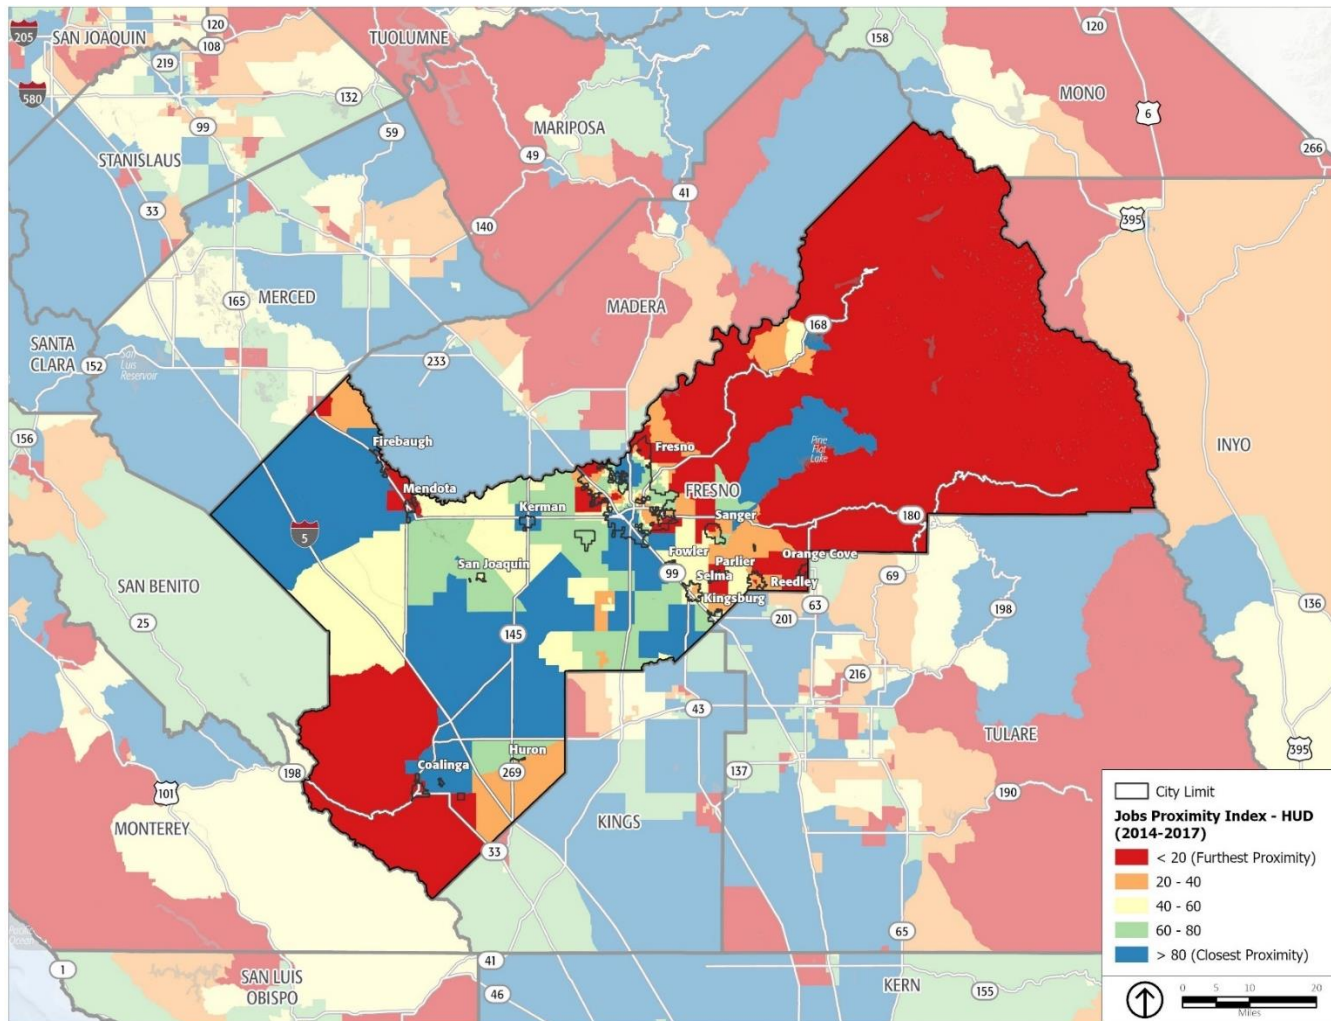

Employment Opportunities

HUD developed two indices to analyze access to employment opportunities: the jobs proximity index and the labor market engagement index. The jobs proximity index identifies census tracts based on their proximity to employment opportunities and the labor market engagement index scores labor force participation and human capital in each tract, with consideration of unemployment rates and educational attainment. For both indices, a higher score indicates stronger job proximity or labor force participation.

According to these indices, Fresno County has fairly comparable proximity to jobs as the adjacent Madera and Tulare Counties. In Fresno County, stronger proximity scores are found to the west of SR 99 and lower proximity scores are found to the east towards the Sierra Nevada range and rural western edges of the counties. However, much of the land that identifies as having the closest job proximity in these eastern areas and counties to the north of Fresno County is rural farmland or open space, which suggests that the property owner lives and works on-site, compared to residents' access to employment opportunities within incorporated jurisdictions. Labor force engagement patterns in Fresno County more closely reflect the neighboring Madera and Tulare Counties, where population distribution and industries are similar to most of Fresno County.

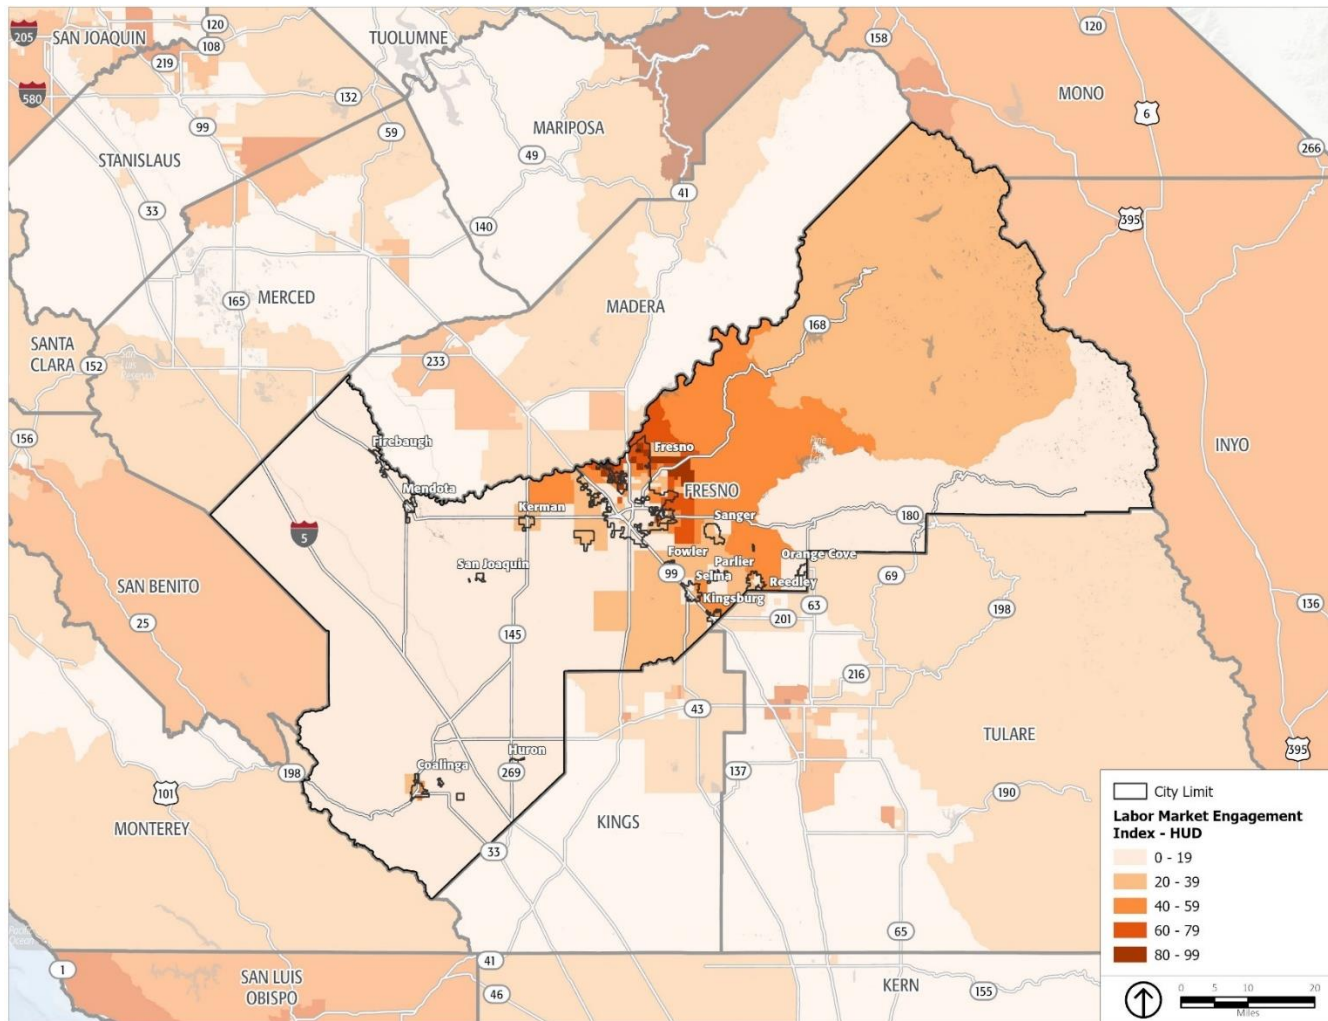

Higher labor force engagement scores are evident in the western side of Fresno, including the unincorporated county islands in northern Fresno, and the majority of Clovis and unincorporated area immediately adjacent to Clovis on the east, as well as in the more urbanized jurisdictions found within Fresno County and in adjacent Madera and Tulare Counties along SR 99 and SR 41 (**FIGURE 3-25 REGIONAL JOBS PROXIMITY**, and **FIGURE 3-26 REGIONAL LABOR MARKET ENGAGEMENT**). The area with the lowest labor force engagement in Fresno County is in the furthest western tract that includes the cities of Mendota and Firebaugh adjoining San Benito County. In Firebaugh, there is a sizable senior population (22.0 percent of the total households), a population more likely to be retired, although this does not apply to Mendota. However, given that there remains a sizeable working force in these cities, other factors are likely to influence the low labor force engagement scores.

FIGURE 3-25 REGIONAL JOBS PROXIMITY

FIGURE 3-26 REGIONAL LABOR MARKET ENGAGEMENT

Source: HUD, 2017

SECTION 3: REGIONAL ASSESSMENT OF FAIR HOUSING

As shown in **FIGURE 3-27 REGIONAL UNEMPLOYMENT RATES, 2010-2022**, the unemployment rate in Fresno County in 2022 is moderate at 6.0 percent, in comparison to other counties in the adjacent counties region, including Tulare, Merced, and Kings Counties at 7.4 percent, 7.3 percent, and 6.6 percent, respectively. The lowest unemployment rates correspond to the least urbanized counties, Inyo and Mono, which are largely sportsmen based-tourism economies associated with travelers to the Mammoth Lakes recreation area, with ranching as the local industry. However, Fresno County saw one of the largest decreases in unemployment since 2010, surpassed only by Madera and Merced Counties, and closely followed by Tulare, San Benito, and Kings County.

FIGURE 3-27 REGIONAL UNEMPLOYMENT RATES, 2010-2022

Source: California EDD, 2022

The U.S. Census Longitudinal Employer-Household Dynamics (LEHD) reports the distance and direction between home and work for residents of each jurisdiction and the ratio between jobs and households. According to LEHD, approximately 72.8 percent of Fresno County's labor force works within the county and 27.2 percent work outside Fresno County. In comparison, 37.7 percent of the Tulare County workforce, 52.7 percent of the Kings County workforce, and 56.7 percent of the Madera County workforce work outside of the county in which they reside. Of the 27.2 percent of the Fresno County labor force that commutes outside of the county, 4.2 percent travel to destinations within adjacent Tulare County, 3.8 percent travel to adjacent Madera County, and 1.6 percent travel to Kings County. Approximately 2.7 percent commute into Los Angeles County and 1.5 percent into Santa Clara County. Overall, approximately 27.2 percent of the individuals that work in Fresno County commute in from areas outside of the county, with the largest shares coming in from Tulare County (4.8 percent), Madera County (3.8 percent), and Kings County (2.2 percent).

The greatest concentration of jobs are in the City of Fresno (71.2 percent of Fresno County jobs), City of Clovis (10.6 percent), City of Reedley (2.8 percent), City of Sanger (2.5 percent), and the City of Kerman (2.1 percent). Approximately 57.3 percent of Fresno County residents live within 10 miles of their job. Of those residents commuting 10 to 24 miles, 24.6 percent commuted northwest into the City of Fresno from the southern jurisdictions of Fowler, Selma, Parlier, and Kingsburg, whereas 24.0 percent traveled south or southwest from the City of Fresno and Clovis towards the jurisdictions along SR 99. Approximately 17.6 percent of Fresno County residents report commuting more than 50 miles to their job, with 35.5 percent commuting northwest into the Bay Area, and 29.2 percent into Tulare County and towards Bakersfield. In comparison, 34.7 percent of residents in Madera County live within 10 miles of their job, and 21.7 percent live more than 50 miles from their job; in Tulare County, 45.7 percent of residents live within 10 miles of their job, and 25.0 percent live more than 50 miles from their job; and in Kings County, 38.7 percent of residents live within 10 miles of their job, with 24.5 percent living more than 50 miles from their job.

In Fresno County, the jobs-household ratio, which is an indicator of whether there is a balance between the number of jobs and the number of households, was 1.23 in 2020 according to 2016-2020 American Community Survey (ACS). This ratio suggests that there was a surplus of jobs in Fresno County to support the number of households, which may partially contribute to the number of commuters coming from outside of the county for work. This also indicates that there is a shortage of housing to support the job base in this region. Generally, Fresno County appears to have sufficient housing for those jobs in the county filled by residents, as 72.8 percent of the jobs in the county are filled by residents according to U.S. Census LEHD data. However, Fresno County still has a higher rate of unemployed persons than the overall rate of unemployment in the state regardless of the job opportunities, which also suggests that there is a lack of correlation between the types of employment opportunities in the region and the job qualifications and experience of the residents in Fresno County.

Educational Opportunities

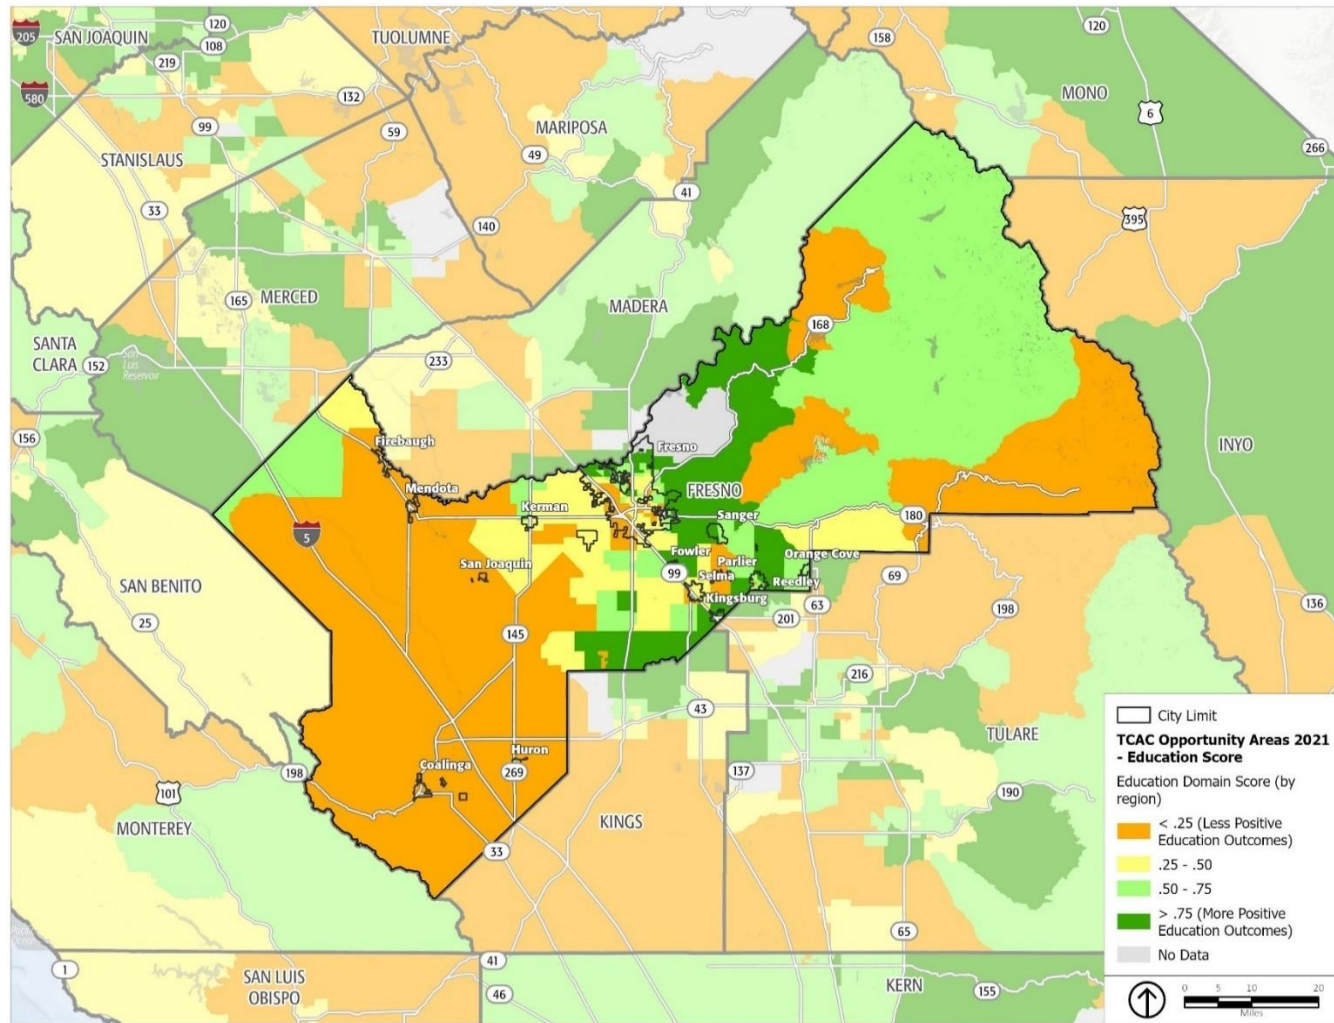

School quality is often tied to housing, with neighborhoods or communities with higher median incomes and home values often having access to higher-performing schools than residents of lower-income neighborhoods. Income distribution influences home values and property taxes, and therefore funding for public schools. As such, school districts with higher concentrations of affordable housing typically have lower test scores in schools, creating a

cyclical problem of not offering these students equal educational opportunities. Therefore, disparities in access to strong school opportunities serves as an indicator of fair housing and equal access to opportunities.

Each year, the California Department of Education (DOE) publishes performance metrics for public schools in the state, including student assessment results for English Language Arts and Mathematics as they compare to the state grade-level standards and demographic characteristics of each school's student population. The characteristics reported on include rates of chronic absenteeism and suspension, percentage of students that are socioeconomically disadvantaged, percentage of students that are in foster care, percentage of students learning the English language, and the percentage of high school students that are prepared for college. Chronic absenteeism refers to the percentage of students who are absent for 10.0 percent or more of instructional days that they were enrolled at the school, with the state average being 10.1 percent of students. Students who are eligible for free or reduced-priced meals, or who have parents or guardians who did not receive a diploma, are considered socioeconomically disadvantaged. TCAC and HCD rely on this data from DOE to determine the expected educational outcome in each census tract and block group within the state. TCAC and HCD's educational domain score reflects mathematics proficiency, reading proficiency, high school graduation rates, and student poverty rates of all schools for which this data is available, culminating in a score ranging from 0 to 1, with higher values being the most positive expected educational outcome.

In 2021, TCAC/HCD reported the strongest projected educational outcomes for students in the cities of Clovis, Kingsburg, Sanger, and the unincorporated communities of Riverdale, Auberry, and Caruthers as well as the unincorporated areas east of Clovis and west of Sanger as well as portions of the county along the southern boundary from Riverdale to east of Reedley (**FIGURE 3-28 REGIONAL TCAC/HCD EDUCATIONAL DOMAIN SCORES**). However, the unincorporated county areas with the highest educational scores according to TCAC/HCD, also have the lowest population density in the county, and likely either attend the higher-performing schools in adjacent jurisdictions or are home schooled. As such, for a regional analysis, the TCAC/HCD map may not accurately compare educational opportunity in Fresno County to the surrounding region. However, similar TCAC/HCD Educational Domain patterns are seen in adjacent Tulare, Merced, and Madera Counties. At the local level, data based on school performance is more readily available and likely more accurate.

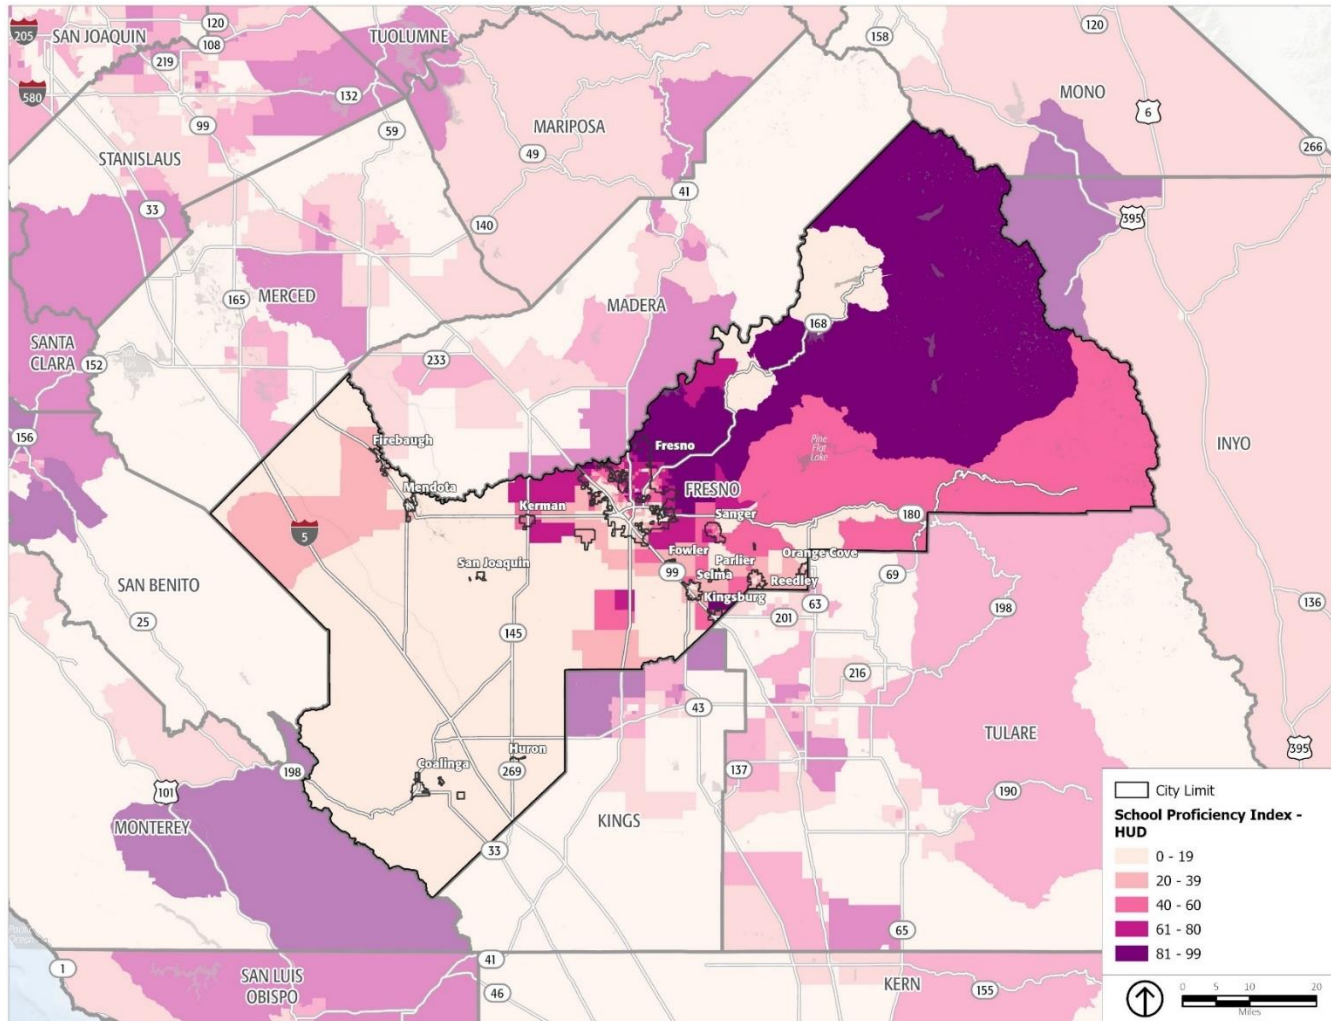

FIGURE 3-28 REGIONAL TCAC/HCD EDUCATIONAL DOMAIN SCORES

Source: TCAC/HCD, 2021

The HUD School Proficiency Index more accurately reflects school performance by residential living patterns in the region. The HUD School Proficiency Index ranges from 0 to 100, with higher values indicating better school performance. Though demographic patterns have changed throughout the region slightly since 2010, as discussed in the local assessment, typically schools in Fresno County and throughout the region are more proficient in areas of increased population density and affluence or in affluent unincorporated areas, particularly in the portions of the county east of the Cities of Clovis and Fresno (see **FIGURE 3-29 HUD SCHOOL PROFICIENCY INDEX**). Although residents of Fresno County in the vicinity of Fresno and particularly Clovis have access to higher-performing schools than the western portion of the county, schools throughout the remainder of Fresno County generally score lower than those in much of Monterey County, and portions of Tulare County, which correspond to higher-income areas. To ensure all students have access to a quality education, the local assessment identifies appropriate programs.

FIGURE 3-29 HUD SCHOOL PROFICIENCY INDEX

Environmental Health

A disadvantaged community or environmental justice community (EJ Community) is identified by the California Environmental Protection Agency (Cal EPA) as “areas that are disproportionately affected by environmental pollution and other hazards that can lead to negative health effects, exposure, or environmental degradation,” and may or may not have a concentration of low-income households, high unemployment rates, low homeownership rates, overpayment for housing, or other indicators of disproportionate housing need. In February 2021, the California Office for Environmental Health Hazard Assessment (COEHHA) released the fourth version of CalEnviroScreen, a tool that uses environmental, health, and socioeconomic indicators to map and compare community environmental scores. In the CalEnviroScreen tool, communities that have a cumulative score in the 75th percentile or above (25.0 percent highest score census tracts) are those that have been designated as disadvantaged communities under Senate Bill (SB) 535. The cumulative score that can result in a disadvantaged community designation is calculated based on individual scores from two groups of indicators: Pollution Burden and Population Characteristics. Pollution Burden scores exposure to negative environmental hazards, such as ozone concentrations; fine inhalable particles, with diameters that are generally 2.5 micrometers and smaller (PM_{2.5}) concentrations; drinking water contaminants; lead risk from housing; traffic impacts; and more. Population Characteristics scores the rate of negative health conditions and access to opportunities, including asthma, cardiovascular disease, poverty, unemployment, and housing cost burden. For each indicator, as with the cumulative impact, a low score reflects positive conditions.

Much of Fresno County, particularly the western area and the cities along the SR 99 corridor, have high cumulative scores, as shown in **FIGURE 3-30 REGIONAL CALENVIROSCREEN PERCENTILES**. This is a result of high scores for indicators of pollution burden, primarily pesticides, drinking water contaminants, particulate matter, and ozone, although the western portion of the county is primarily agricultural land with limited residential development, so these scores are likely a result of agricultural industry practices. In the surrounding region, high percentiles are mostly concentrated in the urbanized communities along SR 99 and prevalent in the rural agricultural areas. Fresno County closely reflects the agricultural areas of Merced, Madera, Tulare, and Kings Counties. Within each jurisdiction of Fresno County, patterns differ as a result of level of urbanization and socioeconomic population characteristics; however, regionally, Fresno County reflects jurisdictions to the north and south rather than the eastern Mono and Inyo County and western San Benito and Monterey County jurisdictions.

The Public Health Alliance of Southern California developed the Healthy Places Index (HPI), a supplemental data tool, in partnership with the Virginia Commonwealth University’s Center on Society and Health. The tool predicts life expectancy based on community conditions. Community condition indicators include economic stability, neighborhood and built environment, health and access to health care, education, social and community context. The HPI provides a single health metric for each Census tract using 25 community characteristics. Higher HPI values indicate healthier conditions. The HPI also reflects agricultural areas as least healthy due to pesticides, dust, and agricultural runoff, as well as exposure to industrial and road pollution, which contribute to low (unhealthy) scores in the more urbanized areas, particularly those along the SR 99 and SR 41 corridors in Tulare, Madera, Kings, and Merced Counties.

FIGURE 3-30 REGIONAL CALENVIROSCREEN PERCENTILES

Source: COEHHA, 2021

The counties within San Joaquin Valley and surrounding jurisdictions to the east and west in the Fresno County region have a challenging environmental context as a major agricultural producer and part of the San Joaquin Valley air basin, raising serious air and water quality concerns. Agricultural production can harm water quality by discharging fertilizer contaminants into the groundwater via runoff. Over time, the region's water supply has contended with a wide range of contaminants, including nitrates, arsenic, and pesticides. Due to geographic, topographic, meteorologic, and environmental conditions, the region's air basin has particular challenges for air quality. Given the regional context, the local assessment places an emphasis on assessing disproportionate impacts pollutant exposure has on disadvantaged communities or lower-income housing sites in their purview.

Disproportionate Housing Need and Displacement Risk

Overcrowding

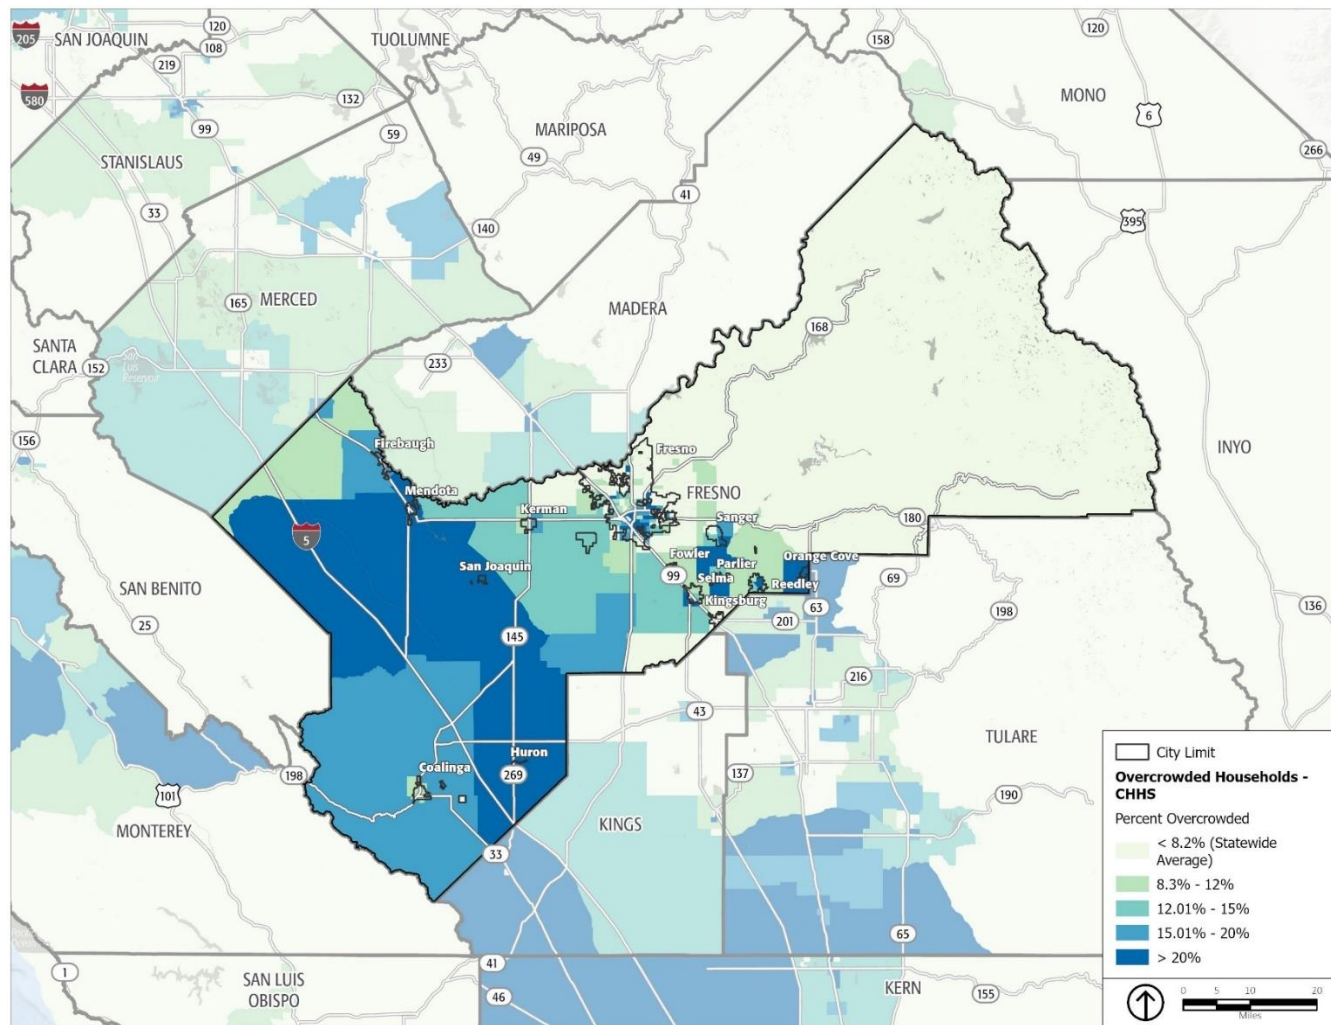

Overcrowding occurs when the number of people living in a household is greater than the home was designed to hold. The U.S. Census Bureau considers a household overcrowded when there is more than one person per room, excluding bathrooms, hallways, and kitchens, and severely overcrowded when there are more than 1.5 occupants per room. A typical home might have a total of five rooms that qualify for habitation under this definition (three bedrooms, living room, and dining room). If more than five people were living in the home, it would be considered overcrowded. Overcrowding is strongly related to household size, particularly for large households, and the availability of suitably sized housing. A small percentage of overcrowded units is not uncommon, and often includes families with children who share rooms or multi-generational households. However, high rates of overcrowding may indicate a fair housing issue resulting from situations such as two families or households occupying one unit to reduce housing costs (sometimes referred to as “doubling up”). Situations such as this may indicate a shortage of appropriately sized and affordable housing units as overcrowding is often related to the cost and availability of housing and can occur when demand in a jurisdiction or region is high.

In Fresno County, approximately 6.1 percent of households experience overcrowding and 3.6 percent experience severe overcrowding, as presented in Table 2-21, *Overcrowding by Tenure* (2020), in the Needs Assessment. Overcrowding is a greater problem among renter-occupied households, at 8.6 percent of households, which exceeds the statewide average of 5.2 percent compared to 3.9 percent of owner-occupied households, which falls below the statewide average.

As shown in **FIGURE 3-31 OVERCROWDED HOUSEHOLDS IN THE REGION**, Fresno County has some areas in the City of Fresno, jurisdictions to the south along SR 99, and in the western jurisdictions with higher incidence of overcrowding, including concentrations above 20.0 percent of households. The overall rate of overcrowding countywide is lower compared to some of the counties in the region to the north and south along SR 99, and fairly equivalent to Merced and Kings Counties. Following the trends of several other fair housing indicators in the region, the overall rate of overcrowding is lower in Inyo, Mono, and San Benito Counties, although each has a particular tenure population experiencing a higher incidence of overcrowding. Among renter households, Fresno County has significantly lower overcrowding rates than Madera, Monterey, San Benito, and Tulare Counties (**FIGURE 3-32 REGIONAL OVERCROWDED HOUSEHOLDS BY TENURE**), although the rates of severely overcrowded renters in Fresno County is higher than all counties except for Monterey County. Typically, areas with higher rates of lower-income households and more dense housing types have higher rates of overcrowding, as is

seen in census tracts within or adjacent to the incorporated jurisdictions in the region, although overcrowding also is shown in some of the agricultural areas, suggesting the presence of extended or large families or lack of appropriately sized housing units. Many farmworkers pay market rates for their housing, since most farm owners do not provide housing for their workers, and many publicly owned or managed housing complexes are restricted to families. Because market-rate housing may be unaffordable, workers may share a housing unit with other workers to afford housing costs, resulting in severely overcrowded living situations. The rate and pattern of overcrowding in Fresno County generally reflects the communities in the immediate region, with higher rates of renter overcrowding, although homeowner overcrowding rates are lower in Fresno County than the majority of jurisdictions in the region. The relatively lower rates of overcrowding in Fresno County may indicate that there are more appropriately sized housing opportunities at a range of price points to meet housing demand than is found in other areas of the region, although concentrations of overcrowding are more prevalent in the more densely developed City of Fresno.

Source: CHHS, 2021

FIGURE 3-32 REGIONAL OVERCROWDED HOUSEHOLDS BY TENURE

Source: 2016-2020 ACS

Overpayment

HUD considers housing to be affordable for a household if the household spends less than 30.0 percent of its income on housing costs. A household is considered “cost-burdened” if it spends more than 30.0 percent of its monthly income on housing costs, while those who spend more than 50.0 percent of their income on housing costs are considered “severely cost-burdened.” In Fresno County, approximately 25.4 percent of all households were cost-burdened in 2020, and 16.3 percent were severely cost-burdened (**FIGURE 3-33 OVERPAYMENT RATES IN THE REGION**). Of these households, a significantly larger proportion of renters experienced overpayment than owners. This trend can be seen throughout both the region, on average over 15.0 percent of owners and over 22.0 percent of renters are cost burdened, and generally over 25.0 percent of homeowners and 20.0 percent of renters are severely cost burdened. Fresno County is comparable to surrounding counties, with 15.3 percent of owners and 25.4 percent of renters cost burdened and 10.1 percent of owners and 27.0 percent of renters severely cost burdened. While owner overpayment rates in Fresno County are comparable or slightly lower than the region overall (with the exception of Kings and Inyo Counties), renter overpayment rates are slightly higher (with the exception of Monterey County). This reflects feedback from stakeholders and service providers received for the San Joaquin Valley REAP, *Taking Stock: A Comprehensive Housing Report for the San Joaquin Valley*, in 2022. Stakeholders throughout the region reported a shortage of rental opportunities resulting in disproportionately high prices for tenants.

FIGURE 3-33 OVERPAYMENT RATES IN THE REGION

Source: HUD, CHAS 2014-2018

Substandard Housing

As discussed in the Housing Needs Assessment, housing condition can be an indicator of quality of life. Substandard conditions present a barrier to fair housing as occupants are susceptible to health and safety risks associated with poor housing conditions, as well as at risk of displacement if conditions make the unit uninhabitable or if property owners must vacate the property to conduct repairs. As housing units age, they deteriorate without ongoing maintenance, which can present a fair housing issue for occupants, reduce property values, and discourage private reinvestment in neighborhoods dominated by substandard conditions. Typically, housing over 30 years is more likely to need repairs or rehabilitation than newer units. As shown in **FIGURE 3-34 AGE OF HOUSING STOCK IN THE REGION**, approximately 64.8 percent of housing units in Fresno County are older than 30 years and may need repairs. This is relatively comparable to adjacent Merced and Tulare Counties, at 62.2 and 62.7 percent, respectively, yet higher than Madera, Kings, and San Benito Counties, at 54.7, 58.3, and 59.5 percent respectively. However, Mono, Inyo, and Monterey Counties have a higher proportion of older housing than Fresno County, with the largest proportion of homes built during the 1970s. This may indicate a fairly comparable or slightly greater need for rehabilitation in Fresno County compared to the greater region with the exception of the counties that are at the eastern and western edges of the more centralized counties in the valley region.

FIGURE 3-34 AGE OF HOUSING STOCK IN THE REGION

Source: 2016-2020 ACS

Farmworkers

According to the 2014 San Joaquin Valley Fair Housing and Equity Assessment, Fresno County and adjacent counties have the highest farmworker population compared to other regions in California. Farmworkers often face unique challenges locating affordable housing due to a combination of a higher rate of this population having limited English language proficiency, very low incomes, challenges securing home loans, and barriers to qualifying for rental units. Additionally, USDA data collected at the state and national level indicates that familial composition of farmworkers has changed since 1996 to include more families and fewer individuals; therefore, farmworker housing needs have likely also shifted from primarily seasonal housing for migrant workers to more permanent affordable housing for low wage working families. Although housing for all household types of farmworkers must be accommodated, much of the housing need for family households is best met near services, educational facilities, amenities and other resources that are more readily available in suburban and urban areas.

The Association of Bay Area Governments has identified three types of farmworkers in the state:

- **Permanent Residents:** Permanent residents of the county in which they work and may require housing which accommodates families and may fall into the extremely low-income category for seasonal workers who do not work in the off-season.
- **Migrant Farmworkers:** Perform agricultural labor on a seasonal or temporary basis and typically need housing for individuals, such as single occupancy rooms, bunkhouses, or dormitory style living.

- H-2A Visa Workers: Enter the U.S. under a federal guest worker program for a limited term and require a sponsor employer who provides housing, meals, and transportation to the job site.

The California Institute for Rural Studies (CIRS) reports that an estimated 85.0 percent of farmworkers in the state are from various regions in Mexico, and 5.0 percent from Central America, largely depending on which immigration period they entered the United States. An Indigenous Farmworker Study conducted in 2010 by California Rural Legal Assistance and other private parties estimated that approximately 25.0 percent of farmworkers statewide speak non-Spanish native languages of Mexico (including Zapoteco, Triqui and Mixteco), with significantly higher concentrations (up to one-third of farmworkers) in the Central Valley and Central Coast regions.

History of Farm Working

A history of farm working in the United States prepared by the National Farm Worker Ministry, an organization that advocates for and represents farmworkers, reports that following the Civil War, the gold rush and concurrent expansion of the railroad system led to California becoming a major agricultural center, in particular Fresno, Tulare, and Kern counties in the San Joaquin Valley. Initially, immigrants from China turned to agricultural labor as rail work diminished, followed by a wave of immigrants from elsewhere in Asia, primarily from Japan, the Philippines, and the Punjab province of India. According to federal law at the time, these newer immigrants were not allowed to own property or become citizens. During WWI, with most local American farm laborers engaged in the war, the demand for farmworkers increased. The Youth and Young Adults (YAYA) Timeline for Agricultural Labor in the U.S.A. reports that the first guestworker program was initiated in 1914 for Mexican labor to meet the need, ending in 1921. Following this, a combination of the Dust Bowl and the Depression brought a surge of migrant workers from the central states to California, as farmers were forced to sell their farms and travel west in search of work. Concurrently, the population of Mexican migrant workers decreased, as pressure increased for this population to leave or be deported during what was called the Mexican Repatriation.

The 2014 San Joaquin Valley Fair Housing and Equity Assessment found that White Dust Bowl farm laborers lived in shacks, tent camps, trailers, even their vehicles, as the Farm Security Administration established only eight farm labor camps in the entire San Joaquin Valley region. Where camp accommodations were provided for non-White farmworkers, they were segregated from the White camps and typically substandard in comparison. Most farmworkers had to find lodging in less desirable neighborhoods in cities or rural settlements, many of which were largely devoid of infrastructure improvements. Labor laws that were passed in the 1930s did not apply to farm workers, excluding them from protections such as worker's compensation, child labor, unionizing and collective bargaining, and overtime pay.

In August 1942, due to labor shortages associated with WWII, and six months after the start of the internment camps and the forced relocation of Japanese farmworkers, the federal government allowed for temporary contract laborers from Mexico as part of the Emergency Farm Labor Relief, or Bracero program. Although the Bracero program was initially established as a temporary wartime measure, Congress extended it through the late 1940s until it was ended in 1964. By the late 1950s, it is estimated that up to 200,000 of the laborers that migrated to the United States as part of this program worked in the San Joaquin Valley, many living in the vacated redlined urban neighborhoods left behind as previous immigrants integrated into the communities and were able to relocate, or within the post-

Depression farm labor camps that had been inhabited by the White Dust Bowl migrant laborers. These communities expanded as immigrants from Mexico and Central America continued to fill cheap labor positions.

Many farmworker communities developed in rural areas, just outside of, or within, jurisdictions' spheres of influence in the late 1900s, and often were not included in governmental investment of basic infrastructure as they generally were considered temporary accommodations. Additionally, many of these neighborhoods were exposed to higher rates of environmental pollution due to adjacency of major circulation routes, contaminated water systems associated with pesticides and agricultural runoff, and heavy industrial uses. Many of these neighborhoods have grown into established communities such as Del Rey, Cantua Creek, Easton, Five Points, Tranquility, and Raisin City, as well as others, yet continue to be underserved. These areas are analyzed in more detail in the local assessments of fair housing.

Key Housing Issues and Trends

The 2017 USDA Census of Agriculture reported 4,774 farms in Fresno County, a reduction from 5,683 in 2012. Although the 2022 Census of Agriculture has not yet been released, it is likely that this trend that has continued as development occurs at the periphery of jurisdictions, as well as the effect of the drought. As shown in **FIGURE 3-35 REGIONAL FARM OPERATIONS AND AGRICULTURAL EMPLOYEES**, Fresno County has the largest number of agricultural operations in the region and 89.5 percent of its land designated for agriculture, followed by Tulare County with 4,187 farms and 81.8 percent of land designated for agriculture. North of Fresno County, both Madera and Merced Counties have fewer agricultural operations, with 1,386 and 2,337 farms, respectively, but a higher proportion of land designated for agriculture (88.2 percent in Madera County and 91.1 percent in Merced County). Similarly, while Kings County only has 968 reported farm operations, 91.8 percent of its land is designated for agriculture. In contrast, counties west of Fresno County are less agriculturally oriented. Although there are 1,104 farms in Monterey County, only 61.3 percent of the land is designated for agriculture, and there are 610 farms in San Benito County with 75.6 percent of acreage designated for agriculture. Both Mono and Inyo Counties have fewer than 100 farms each, and therefore are not reflected on **FIGURE 3-35**.

FIGURE 3-35 REGIONAL FARM OPERATIONS AND AGRICULTURAL EMPLOYEES

Source: 2016-2020 ACS and U.S. Census of Agriculture, USDA, 2017

Note: Inyo and Mono Counties are not included in chart as the proportion of persons employed in agriculture, forestry, fishing and wildlife was below 4.0 percent

Local stakeholders estimate that official counts of farmworkers significantly underestimate the true numbers, as undocumented residents often do not participate in traditional data collection methods. Further, farmworkers may be difficult to count due to their mobility, shared housing situations, and distrust of authorities. According to the 2016-2020 ACS, the largest concentration of farmworkers in the region are in Fresno County, although this population comprises only 8.8 percent of employed residents in Fresno County. Following Fresno County, Monterey and Tulare Counties have comparable numbers of farmworkers, but the population represents a notably higher proportion of the employed persons population in each county, at 15.8 and 15.6 percent of the labor force, respectively. Further, 15.0 percent of the labor force in Madera County, 15.4 percent in Kings County, and 11.7 percent in Merced County are employed in agricultural operations. Only San Benito (6.7 percent), Mono (2.0 percent), and Inyo Counties (3.7 percent) have lower proportional representations of farmworkers than Fresno County.

As discussed previously, farmworkers face unique housing challenges due to low wages, high poverty rates, linguistic isolation, and, in many cases, citizenship status. The composition of farmworker households is shifting from primarily migrant individual males to more family households, including a growing number of single female-headed households with children according to the CIRS COVID-19 Farmworker Survey. The combination of socioeconomic characteristics of farmworkers, in Fresno County suggest that the conventional housing resources generally available to such lower-income households often correspond to TCAC/HCD Areas of High Segregation and Poverty, and/or HUD R/ECAPs. Further, due to housing costs, multiple families or individuals may share a single-family unit, converted garages, or accessory structures. The correlation between potential areas where farmworkers may access affordable housing opportunities is discussed in more detail in each of the individual jurisdictions' assessments of fair housing.

According to the State of California's Analysis of Impediments to Fair Housing, privately owned employee housing licensed by the State of California has been steadily diminishing and currently only accommodates a small fraction of agricultural workers in the state. According to HCD's Employee Housing Facilities database, there are 562 units of farmworker employee housing throughout Fresno County with potential to house approximately 1,260 persons, including 6 set-aside units in Parlier Apartments in Parlier and Maldonado Plaza in Firebaugh. There are 645 units for H-2A workers, which can accommodate approximately 2,540 workers, which often are bunkhouses, dorms, or motel rooms. An additional 261 farmworker housing resources, including beds in the Parlier Migrant Center, single units, apartment complexes managed by the Fresno Housing Authority for seasonal and permanent occupancy, and 60 units of farmworker housing in Mendota, developed as part of the USDA Rural Area Development Program.

Between September 2021 and January 2022, the Fresno County conducted a Farmworker Survey and a Farmworker Employer Survey. A second round of each survey was conducted between February 2022 and July 2022. In total, the County surveyed 240 farmworkers, of whom 100 were homeowners, and 170 farm employers. Overall, less than 1 percent of all farmworkers surveyed desired to live in some type of farm labor housing, and 47.0 percent of non-homeowner households desired homeownership opportunities for single-family units. Of farm employers, 25 currently have some type of farm labor housing on-site. Of those that do not have on-site farm labor housing, 28 reported that they would consider adding labor housing as single houses or cottages and 1 specified that they would consider adding apartment style farm labor housing. Based on phone conversations, dairy farmers were most

interested in providing on-site housing due to the 24-hour staffing required. All employers indicated that they would consider adding housing if financing was provided by the government or through grants.

Housing Need

The surveys conducted by CIRS and Fresno County indicate that traditional farm labor and worker camp housing is not desired by most Fresno County farmworkers and laborers, and only a small number of Fresno County farm employers are interested in providing on-site housing if government subsidies were available. Further, based on survey results farmworkers expressed greater interest in off-site housing options, reflecting the concerns of farm employers of finding farmworkers to live in on-site units.

While many of the farmworkers in Fresno County may reside in communities where affordable housing resources are available, and some permanent residents may be eligible for HCVs, they must compete with other lower-income households, often resulting in overcrowding, substandard conditions, and overpayment. Often, particularly for single laborers, dwellings are converted garages, vehicles, farm buildings, or tents. Undocumented laborers face even greater challenges in securing housing. The shortage of affordable housing for the farmworker community represents a significant barrier to fair housing for this population in Fresno County, as well as the region and statewide. Throughout Fresno County, farmworkers face a disproportionate need for safe and affordable housing options that provide access to jobs as well as other resources and amenities. This need is analyzed locally to inform each jurisdiction's Action Plan in the local Assessment of Fair Housing.

Displacement Risk

A combination of factors can result in increased displacement risk, particularly for lower-income households. Displacement risk increases when a household is paying more for housing than their income can support, their housing condition is unstable or unsafe, and when the household is overcrowded. Each of these presents barriers to stable housing for the occupants. As discussed in the analyses of Patterns of Integration and Segregation, Overcrowding, and Overpayment, there are disproportionate patterns of concentrated poverty in the county that may correlate with increased displacement risk. The identification of over 40 R/ECAPs in the county is also a significant factor in the potential for displacement, particularly in the incorporated areas of Fresno, Sanger, Reedley, Orange Cove, Mendota, Huron, and San Joaquin, and unincorporated areas east and west of I-5 in the western portion of the county. Other factors contributing to the risk of displacement include those previously discussed, as well as vacancy rates, availability of a variety of housing options, and increasing housing prices compared to wage increases. Additionally, the increase in the incidence of both sheltered and unsheltered homelessness points to the correlation between housing affordability, income, and, in many cases, racial and ethnic characteristics. According to the Urban Displacement Project (**FIGURE 3-36 SENSITIVE COMMUNITIES, 2020**), a large portion of Fresno County, largely corresponding to census tracts with low median incomes and high diversity and/or concentrations of populations of color, have been identified as sensitive communities, which are susceptible to changes if housing prices increase.

The annual rate of increase in average home value or rental prices compared with annual changes in the average income in the county may also indicate an increased risk of displacement due to housing costs outpacing wage increase, a trend that is felt throughout the region, state, and nation. Dramatic increases in home and rental prices have impacted residents throughout the county, though renters are typically disproportionately burdened by housing market increases in annual rate increases, compared to homeowners who have fixed-rate mortgages. For households attempting to enter the homeowner market for the first time, however, the cost of homes and rising interest rates present a barrier for lower-income households to attain homeownership.

According to Zillow and Redfin (July 2022), the average home value in Fresno County has increased 122.6 percent since 2013, an average of 15.3 percent annually. However, the annual average increase in home prices between 2013 and 2020 pre-pandemic was 7.6 percent, while the median home cost increased 12.7 percent during the height of the pandemic between 2020 and 2021, and 28.9 percent between 2021 and 2022. According to Zillow and Redfin, the median sales price of a home in Fresno County jumped from \$291,409 in 2021 to \$375,000 in 2022. As shown in Table 2-22, Home Sales Recorded 2021-2022, in the Needs Assessment, the survey of home sales in each jurisdiction, with the exception of the City of Clovis as no data was available at the time of the survey, and unincorporated areas conducted in May 2022 by CoreLogic, the highest increases in housing costs were seen in Kingsburg, Coalinga, and City of Fresno, followed by Fowler, Kerman, and Selma, as well as the unincorporated communities of Shaver Lake and Caruthers.

3-72

FRESNO MULTI-JURISDICTIONAL HOUSING ELEMENT | APRIL 2023

While housing costs have increased rapidly, wages have not kept pace. The average median household income in Fresno County has increased an average of 3.1 percent annually from \$45,741 in 2012 to \$57,109 in 2020 according to 2016-2020 ACS data. Until 2020, the annual rate of increase in income was keeping a fairly steady pace with rising housing prices. However, between 2020 and 2022, based on a 2022 HCD estimate of Fresno County median income at \$80,300, the annual rate of increase in household income was 6.8 percent, as compared to the rate of increase in housing prices discussed previously. The difference in these trends indicates growing unaffordability of housing in Fresno County.

In general, the Fresno County region has relatively low housing values and lower housing costs compared to many areas of the state; however, homeowners and renters experience housing cost burdens on par with state levels due to the region's comparatively lower incomes. According to the San Joaquin Valley REAP 2022, estimated home values are at their highest point in decades. The impact of demographic shifts since the start of the COVID-19 pandemic are noticeable in home values in the Fresno County region, with values in several counties having risen nearly \$100,000 since early 2020. As shown in Table 2-24, Fresno County Ability to Pay, in the Needs Assessment, the median home price in Fresno County is only affordable to moderate- and above moderate-income households, based on a family of four. Rent prices in Fresno County have also increased significantly and present a barrier to lower-income households at a comparable rate with home values, at 7.6 percent annually. Between 2014 and 2021, the average rent for a two-bedroom unit, for example, increased from \$1,200 to \$1,835 according to a Zillow 2021 survey, and was affordable only to moderate-income households and above.

Data from Rentcafe.com (2022) indicates that 7.0 percent of units in the City of Fresno rent for less than \$1,000 monthly, 54.0 percent rent for \$1,001 to \$1,500 monthly, 30.0 percent rent for \$1,501 to \$2,000 monthly, and 10.0 percent are above \$2,000 monthly. However, these rent ranges do not differentiate between studio units and three- to four-bedroom units, and therefore the median rent estimate of \$1,480 may not represent the overpayment and overcrowding challenges faced by special needs and larger households. Rentcafe.com also provides average rents for other jurisdictions in Fresno County and adjacent counties, with Clovis at \$1,588, Coalinga at \$1,114, Kerman at \$1,167, Hanford at \$1,581, Sanger at \$1,093, Tulare at \$1,787, Visalia at \$1,691, and Merced at \$1,262. The countywide rate of lower-income renter overpayment is 75.4 percent, with rates exceeding those in the cities of Fresno, Fowler, Reedley, Sanger, and Selma. As renter households within most of the Fresno County jurisdictions comprise between 40.0 and 60.0 percent of the total households, and lower-income renters tend to have higher rates of overpayment than moderate- and above moderate-income renter households, this constitutes a significant proportion of renter households. As discussed in the analysis of Patterns of Integration and Segregation, the highest rates of poverty along the SR 99 corridor are in the City of Fresno, Sanger, Selma, Parlier, and Reedley, corresponding to the highest rates of cost-burdened, low-income renter households. In comparison, the lower-income renter overpayment rate in the unincorporated county is 13.5 percent.

In Fresno County, overpayment is pervasive and is not necessarily linked to areas with a lower median income, although within the county, 60.2 percent of lower-income homeowner households overpay as compared to 25.0 percent of total homeowners; and 75.4 percent of lower-income renters overpay compared to 52.2 percent of total renter households. The highest rates of lower-income homeowner overpayment above the countywide rate are

SECTION 3: REGIONAL ASSESSMENT OF FAIR HOUSING

present in Fresno, Kerman, Kingsburg, Mendota, Parlier, Reedley, Sanger, San Joaquin, and Sanger, while the lowest rates are found in the unincorporated county, Coalinga, Fowler, Firebaugh, and Huron.

Feedback received in response to the San Joaquin Valley REAP, *Taking Stock: A Comprehensive Housing Report for the San Joaquin Valley*, have identified that there is an overall lack of production at any price point, but particularly in multifamily construction and affordable units. For rentals, very low inventory and high cost to initiate tenancy (e.g., deposits, first and last month's rent) may result in the need for hundreds or thousands of dollars up front to secure the rental unit.

According to the California Housing Partnership, the average cost of living for a family of three in the San Joaquin Valley is about \$48,293. This regional cost of living is 14.0 percent below the regional median household income of \$56,247; however, it is 66.0 percent higher than the state minimum wage income of \$29,120

This page intentionally left blank.

OPPORTUNITIES FOR RESIDENTIAL DEVELOPMENT

REGIONAL HOUSING NEEDS ALLOCATION

State law (California Government Code Section 65584) requires that each city and county plan to accommodate its share of the region's housing construction needs, called the Regional Housing Needs Allocation (RHNA). The RHNA is intended to promote an increase in the housing supply and mix of housing types, infill development, socioeconomic equity, and efficient development patterns; protect environmental and agriculture resources; and improve jobs/housing relationships.

The California Department of Housing and Community Development (HCD) is responsible for projecting the housing needs for each of the state's regional governing bodies, or councils of governments. This demand represents the number of additional units needed to accommodate the anticipated growth in the number of households within each region. State law provides for councils of governments to prepare regional housing allocation plans that assign a share of a region's housing construction need to each city and county.

In Fresno County, the Fresno Council of Governments (FCOG) is the entity authorized under state law to develop a methodology to distribute the future housing needs to the jurisdictions within the region. The jurisdictions and FCOG collaborated to determine how the regional need would be distributed among the jurisdictions. In October 2022, FCOG adopted its final Regional Housing Needs Allocation Plan for the June 30, 2023, through December 31, 2031, RHNA projection period. As required by state law, the Plan divides the allocation of projected housing demand into four income categories:

- Very low-income – Up to 50 percent of the area median income;
- Low-income – 51 to 80 percent of the area median income;
- Moderate-income – 81 to 120 percent of the area median income; and
- Above moderate-income – More than 120 percent of the area median income.

Adjusting the allocation by income category allows for a balanced distribution of lower-income households between jurisdictions. Based on the requirements of Assembly Bill (AB) 2634 (Statutes of 2006), each jurisdiction must also address the projected needs of extremely low-income households, defined as households earning less than 30 percent of the median income. The projected extremely low-income need can be assumed as 50 percent of total need for the very low-income households. **Table 4-1** shows the RHNA for all jurisdictions in Fresno County, adjusted to include the projected needs for extremely low-income households.

State law also requires all jurisdictions in Fresno County, including the County of Fresno, to demonstrate that they have or will make available adequate sites with appropriate zoning and development standards to

SECTION 4: OPPORTUNITIES FOR RESIDENTIAL DEVELOPMENT

accommodate the RHNA. The following section discusses the assumptions for this analysis and Section 2 of Appendix 2 shows how each jurisdiction will meet this requirement through units built or under construction, planned or approved projects, and vacant and underutilized sites.

Table 4-1 2023-2031 Regional Housing Needs Allocation by Jurisdiction

Jurisdiction	Housing Units by Income Level				Total Housing Units
	Very Low ¹	Low	Moderate	Above Moderate	
Clovis	2,926	1,549	1,448	3,054	8,977

ASSEMBLY BILL 1233 RHNA “CARRY-OVER” ANALYSIS

AB 1233, passed in 2005, amended State Housing Element law (Government Code Section 65584.09) to promote the effective and timely implementation of local housing elements. This bill applies to jurisdictions that included programs in their previous housing elements to rezone sites as a means of meeting their previous RHNA, as well as jurisdictions who failed to adopt a State-certified housing element in the previous housing element cycle. Key provisions of Government Code Section 65584.09 state that where a local government failed to identify or make adequate sites available in the prior planning period, the jurisdiction must zone or rezone adequate sites to address the unaccommodated housing need within the first year of the new planning period. In addition to demonstrating adequate sites for the new planning period, the updated housing element must identify the unaccommodated housing need from the previous planning period.

Some of the jurisdictions in Fresno County that did not adopt housing elements for the previous planning period or adopted a housing element and had a rezone program are affected by AB 1233. These jurisdictions must identify their unaccommodated housing need from the January 1, 2006, through June 30, 2013, RHNA projection period. Section 2 of Appendix 2 contains the RHNA carry-over analysis for these jurisdictions.

The methodology used to calculate the unaccommodated need starts with the 2006-2013 RHNA and subtracts:

- The number of units approved or constructed (by income category) since the beginning of the previous RHNA projection period start date (i.e., January 1, 2006);
- The number of units that could be accommodated on any appropriately zoned sites available during the previous RHNA projection period;
- The number of units accommodated on sites that have been rezoned for residential development pursuant to the site identification programs in the element adopted for the previous planning period (if applicable); and
- The number of units accommodated on sites rezoned for residential development independent of the sites rezoned in conjunction with the element’s site identification programs, as described previously.

If this analysis reveals an unaccommodated need (in any income category) from the 2006-2013 RHNA, the jurisdiction must adopt a program to rezone sites within the first year of the new planning period to meet the housing need pursuant to Government Code Sections 65584.09 and 65583(c)(1).

AVAILABILITY OF LAND AND SERVICES

The State law governing the preparation of housing elements emphasizes the importance of an adequate land supply by requiring that each housing element contain “an inventory of land suitable for residential development, including vacant sites and sites having potential for redevelopment, and an analysis of the

relationship of zoning and public facilities and services to these sites” (Government Code Section 65583(a)(3)).

Units Built or Under Construction and Planned or Approved Projects

Jurisdictions can credit units from approved or projects pending approval to meet a portion of the RHNA. Each jurisdiction’s Housing Element includes a list of all residential projects that are planned or approved and scheduled to be built by the end of the current RHNA projection period (December 31, 2023).

Accessory Dwelling Unit Potential

California Government Code Section 65583.1(a) states that a town, city, or county may identify sites for accessory dwelling units (ADUs) based on the number of ADUs developed in the prior Housing Element planning period, whether the units are permitted by right, the need for ADUs in the community, the resources or incentives available for their development, and any other relevant factors. Based on recent changes in state law reducing the time to review and approve ADU applications, requiring ADUs that meet requirements to be allowed by right, eliminating discretionary review for most ADUs, and removing other restrictions on ADUs, it is anticipated that the production of ADUs will increase in the 6th cycle Housing Element planning period.

Vacant and Underutilized Land Inventory

The residential land inventory is required “to identify sites that can be developed for housing within the planning period and that are sufficient to provide for the jurisdiction’s share of the regional housing need for all income levels” (Government Code Section 65583.2(a)). The phrase “land suitable for residential development” includes vacant and underutilized sites zoned for residential use as well as vacant and underutilized sites zoned for nonresidential use that allow residential development. All parcels (or portions of parcels) in the vacant and underutilized sites inventory were reviewed by local staff and the consultants to confirm vacancy status, ownership, adequacy of public utilities and services, possible environmental constraints (e.g., flood zones and steep slopes), and other possible constraints to development feasibility.

Sites Identified in Previous Housing Element

Pursuant to California Government Code Section 65583.2(c), a nonvacant site identified in the previous planning period and a vacant site identified in two or more previous consecutive planning periods cannot be used to accommodate the lower-income RHNA unless the site is subject to an action in the Housing Element that requires rezoning within three years of the beginning of the planning period that will allow residential use by right for housing developments with at least 20 percent units affordable to lower-income households.

Affordability and Density

To identify sites that can accommodate a local government’s share of the RHNA for lower-income households, housing elements must include an analysis that demonstrates the appropriate density to

encourage and facilitate the development of housing for lower-income households. The statute (Government Code Section 65583.2(c)(3)) provides two options for demonstrating appropriate densities:

- Provide a detailed market-based analysis demonstrating how the adopted densities accommodate this need. The analysis shall include, but is not limited to, factors such as market demand, financial feasibility, or information based on development project experience within a zone or zones that provide housing for lower-income households.
- Use the “default density standards” that are “deemed appropriate” in state law to accommodate housing for lower-income households given the type of the jurisdiction. With the exception of the cities of Fresno and Clovis, all jurisdictions in Fresno County are considered “suburban jurisdictions” with a default density standard of 20 units per acre. HCD is required to accept sites that allow for zoning at this density as appropriate for accommodating a jurisdiction’s share of the regional housing need for lower-income households. The cities of Fresno and Clovis are considered metropolitan jurisdictions and have a default density of 30 units per acre.

Density is a critical factor in the development of affordable housing. In theory, maintaining low densities typically increases the cost of land per unit and increases the amount of subsidy needed to ensure affordability while higher-density development can lower per-unit land cost and facilitate construction in an economy scale.

The majority of jurisdictions in the Multi-Jurisdictional Housing Element have land use policies and zoning provisions that allow for residential development up to or exceeding 20 units per acre. However, development trends in the region have demonstrated that the default density of 20 units per acre is not necessary to support affordable housing construction, particularly within smaller cities and in the unincorporated areas of the county. In some cities, such as Selma, Parlier, and Reedley, some single-family developments are affordable. Specifically, Valley View Village in Selma offers affordable rental housing for lower-income households and Parlier offers affordable ownership housing for lower-income first-time homebuyers in two single-family tracts.

To demonstrate that a density of 15 units per acre can encourage the development of housing affordable to lower-income households, a three-part analysis was prepared based on market demand, financial feasibility, and project experience within the zone(s).

Market Demand

Market rents for apartments are near the upper range of affordable costs for lower-income households. One-bedroom rents generally range from \$779 to \$904 with an average rent of \$842 near the upper income range for a lower-income household (see **Table 4-2**). Also, a two-bedroom average rent is \$1,060 near the range for a lower-income household. While the built densities and age or amenities of apartments for these figures are unknown, market rents, without financial subsidies, are not disproportionate with lower-income affordability ranges. This indicates that densities around 15 units per acre can facilitate affordability for lower-income households.

Table 4-2 Affordable Rent to Market Rent Comparison

Bedroom Type	Affordability for Lower-Income Household	Market Rent Range	Market Average Rent
1 bedroom	\$1,091	\$779 - \$904	\$842
2 bedroom	\$1,246	\$983-\$1,137	\$1,060
3 bedroom	\$1,403	\$1,274-\$1,607	\$1,441

Sources: American Community Survey (5-Year Estimates) and HUD Fair Market Rents, 2022; Fresno County MSA.

Land prices in Fresno County are generally much less expensive than other parts of California, especially the coastal region. Based on a sampling of land sales in August 2022, per-acre prices were found to generally range between \$17,900 and \$1,256,410 per acre (see **Table 4-3**). Based on information provided by multifamily developers, recent land prices were consistent with this range.

Financial Feasibility

Given the availability and affordability of land in the Fresno County region, densities of 15 units per acre encourage the development of housing affordable to lower-income households. This assumption is further supported by conversations with nonprofit developers. Based on conversations with several developers of housing affordable to lower-income households, the availability of land, sizeable parcels (e.g., an acre or more), and subsequent economies of scale and construction costs for garden-style apartments are contributing factors to the cost-effectiveness of 15 units per acre.

This cost-effectiveness of 15 units per acre, in simple terms, can be expressed as land costs per unit at various densities. For example, **Table 4-3** uses a land price of \$280,826 per acre. Based on a typical total development cost of approximately \$256,475 per unit, the table shows a less than 2 percent significant difference between lower densities (e.g., 15 units per acre) and higher densities such as 20 units per acre. Specifically, land costs per unit at 20 units per acre are \$14,041 per unit and represent 5.5 percent of total development. Similarly, at 15 units per acre, land costs are estimated at \$18,722 per unit, which represents about 7.3 percent of total development costs. Given land costs at 15 units per acre are similar to 20 units per acre and 20 units per acre is deemed appropriate to accommodate housing for lower-income households (Government Code Section 65583.2(c)), a density of 15 units per acre is also appropriate for housing affordable to lower-income households.

Table 4-3 Costs per Unit

Units per Acre	Land Costs per Unit	Percentage of Total Development Costs
15 units per acre	\$18,722	7.3%
18 units per acre	\$15,601	6.1%
20 units per acre	\$14,041	5.5%

Assumptions: Average land price of \$280,826 per acre and total development costs of \$256,475 per unit.

Adequacy of Public Facilities

One major constraint to new housing development is the availability and adequacy of infrastructure, including water and wastewater infrastructure. The unincorporated areas of the county are particularly constrained by a lack of infrastructure. The County of Fresno generally does not provide water and sewer services in existing unincorporated communities. These services are provided by independent community services districts. Most of the existing community services districts do not have excess capacity and would require significant expansion to accommodate any additional growth. For this reason, most new growth is directed to urban areas where infrastructure systems are more developed.

However, many of the cities also face infrastructure constraints. Water and sewer infrastructure needs to be extended into new-growth areas before development can occur, and existing infrastructure systems will require upgrades. Jurisdictions rely on development impact fees to cover the cost of infrastructure improvements as they grow. These costs are added to the cost of new housing units, impacting affordability.

Water supply is one of the most critical issues for Fresno County. Jurisdictions in the county rely on a combination of groundwater and surface water. While projects in the county are served by independent wells or community facilities districts, cities typically have independent water sources either from a third party or a municipally operated system. During drought years or other mandated reductions for environmental purposes, total water supply can fluctuate from year to year. In rural areas, groundwater levels are dropping, causing domestic wells to dry up.

Jurisdictions in Fresno County have and will continue to pursue grant funding to improve infrastructure availability and reliability. Furthermore, the jurisdictions may adopt, or work with local water providers to adopt, policies to grant priority for water and sewer service to proposed developments that include housing units affordable to lower-income households.

Financial and Administrative Resources

Jurisdictions in Fresno County have access to a variety of existing and potential funding sources for affordable housing activities. These include programs from federal, state, local, and private resources. This section describes the key housing funding sources currently used in the city, which include Community Development Block Grant (CDBG) funds from the state and Section 8 rental assistance. **Table 4-4** lists a range of potential financial resources that may be used in these jurisdictions.

Table 4-4 Financial Resources

Program Name	Description	Eligible Activities
Federal		
Community Development Block Grant (CDBG)	Grants administered and awarded by the state on behalf of HUD to cities through an annual competitive process.	Acquisition Rehabilitation Homebuyer Assistance Economic Development Infrastructure Improvements Homeless Assistance Public Services
HOME Investment Partnership Act Funds	Flexible grant program for affordable housing activities awarded by the state on behalf of HUD to individual cities through an annual competitive process.	Acquisition Rehabilitation Homebuyer Assistance New Construction
Section 8 Rental Assistance Program	Rental assistance payments to owners of private market-rate units on behalf of very low-income tenants.	Rental Assistance
Section 203(k)	Single-family home mortgage program allowing acquisition and rehabilitation loans to be combined into a single mortgage.	Land Acquisition Rehabilitation Relocation of Unit Refinancing of Existing Indebtedness
State Programs		
Emergency Shelter Grant Program	Program funds to rehabilitate and operate emergency shelters and transitional shelters, provide essential social services, and prevent homelessness.	Support Services Rehabilitation Transitional Housing Supportive Housing
Rural Development Loans and Grants	Capital financing for farmworker housing. Loans are for 33 years at 1 percent interest. Housing grants may cover up to 90 percent of the development costs of housing. Funds are available under the Section 515 (Rental Housing), Section 502 (Homeownership Loan Guarantee), Section 514/516 (Farm Labor Housing), and Section 523 (Mutual Self-Help Housing) programs.	Purchase Development/Construction Improvement Rehabilitation

SECTION 4: OPPORTUNITIES FOR RESIDENTIAL DEVELOPMENT

Program Name	Description	Eligible Activities
Multifamily Housing Program (MHP)	Deferred payment loans for new construction, rehabilitation, acquisition, and preservation of permanent and transitional rental housing.	New Construction Rehabilitation Acquisition Preservation
California Housing Finance Agency (Cal HFA) Residential Development Loan Program	Low interest, short-term loans to local governments for affordable infill, owner-occupied housing developments. Links with CalHFA's Down Payment Assistance Program to provide subordinate loans to first-time buyers. Two funding rounds per year.	New Construction Rehabilitation Acquisition
California Housing Finance Agency (Cal HFA) Homebuyer's Down Payment Assistance Program	CalHFA makes below market loans to first-time homebuyers of up to 3% of sales price. Program operates through participating lenders who originate loans for CalHFA. Funds available upon request to qualified borrowers.	Homebuyer Assistance
California Housing Finance Agency (Cal HFA)	The Forgivable Equity Builder Loan gives first-time homebuyers a head start with immediate equity in their homes via a loan of up to 10% of the purchase price of the home. The loan is forgivable if the borrower continuously occupies the home as their primary residence for five years.	Homeowner Assistance
Low-Income Housing Tax Credit (LIHTC)	Tax credits are available to persons and corporations that invest in low-income rental housing. Proceeds from the sale are typically used to create housing.	New Construction Rehabilitation
California Self-Help Housing Program	State program that provides technical assistance grants and loans as well as deferred payment conditionally forgivable mortgage assistance loans for the rehabilitation or construction of new affordable housing.	New Construction Rehabilitation
CalHOME	Grants to cities and nonprofit developers to offer homebuyer assistance, including down payment assistance, rehabilitation, acquisition/rehabilitation, and homebuyer counseling. Loans to developers for property acquisition, site development, predevelopment, and	Predevelopment, Site Development, Site Acquisition Rehabilitation Acquisition/rehab Down Payment Assistance Mortgage Financing

SECTION 4: OPPORTUNITIES FOR RESIDENTIAL DEVELOPMENT

Program Name	Description	Eligible Activities
	construction period expenses for homeownership projects	Homebuyer Counseling
Tax Exempt Housing Revenue Bond	Supports low-income housing development by issuing housing tax-exempt bonds requiring the developer to lease a fixed percentage of the units to low-income families at specified rental rates.	New Construction Rehabilitation Acquisition
Affordable Housing Sustainable Communities Program	This program provides grants and/or loans, or any combination, that will achieve GHG emissions reductions and benefit Disadvantaged Communities through increasing accessibility of affordable housing, employment centers, and key destinations via low-carbon transportation.	New Construction
Local		
First Time Homebuyer Assistance Program (HAP)	The First Time Homebuyer Assistance Program (HAP) offers no-interest loans of up to 20 percent of a home's sale price to income-qualifying first-time home buyers. The buyer must contribute at least 1.5 percent of the sale price and must purchase the house as their primary residence.	Down Payment Assistance Mortgage Financing
Housing Assistance Rehabilitation Program (HARP)	This program provides no-interest loans to income-qualifying households for moderate to substantial home reconstruction/rehabilitation projects. Code deficiencies, as well as owner-requested non-luxury improvements, are addressed. HARP loans are funded by various federal and state agencies and are specifically designed to assist low-income families make such improvements.	Rehabilitation
Rental Rehabilitation Program (RRP)	This program offers zero-interest loans to repair rentals in unincorporated areas and participating cities. Loans cover the entire cost of rehabilitation and are repaid over 20 years.	Rehabilitation
Habitat for Humanity – Greater Fresno Area	Homeownership through sweat equity. Homeowners also receive counseling and	Homebuyer Assistance

SECTION 4: OPPORTUNITIES FOR RESIDENTIAL DEVELOPMENT

Program Name	Description	Eligible Activities
	training on homeownership and maintenance. Homeowners buy their completed homes from Habitat for Humanity and repay them over 30 years through an affordable mortgage	
Private Resources/Lender/Bank Financing		
Federal National Mortgage Association (Fannie Mae) Community Homebuyers Program	Fixed rate mortgages issued by private mortgage insurers.	Homebuyer Assistance
	Mortgages that fund the purchase and rehabilitation of a home.	Homebuyer Assistance Rehabilitation
	Low down payment mortgages for single-family homes in underserved low-income and minority cities.	Homebuyer Assistance
California Community Reinvestment Corporation (CCRC)	Nonprofit mortgage banking consortium designed to provide long-term debt financing for affordable rental housing. Nonprofit and for-profit developers contact member banks.	New Construction Rehabilitation Acquisition
Federal Home Loan Bank Affordable Housing Program	Direct subsidies to nonprofit and for-profit developers and public agencies for affordable low-income ownership and rental projects.	New Construction
Freddie Mac	Home Works – Provides first and second mortgages that include rehabilitation loan. County provides gap financing for rehabilitation component. Households earning up to 80% Median Family Income (MFI) qualify.	Homebuyer Assistance Combined with Rehabilitation
Bay Area Local Initiatives Support Corporation (LISC)	Provides recoverable grants and debt financing on favorable terms to support a variety of community development activities including affordable housing.	Acquisition New Construction Rehabilitation
Northern California Community Loan Fund (NCCLF)	Offers low-interest loans for the revitalization of low-income communities and affordable housing development.	Acquisition Rehabilitation New Construction
Low-Income Investment Fund (LIHF)	Provides below-market loan financing for all phases of affordable housing development and/or rehabilitation.	Acquisition Rehabilitation New Construction
Administrative Resources		

SECTION 4: OPPORTUNITIES FOR RESIDENTIAL DEVELOPMENT

Program Name	Description	Eligible Activities
RH Community Builders	RH Community Builders is a nonprofit housing developer active in the region. The organization develops cost effective, high quality, permanently affordable housing throughout the Central Valley and beyond. RH Community Builders is focused on building a multi-faceted approach to ending homelessness in the Central Valley. By assisting community members in accessing needed services and increasing the inventory of affordable housing.	New Construction Rehabilitation Acquisition

Administrative Capacity

Beyond local city and county staff that administer housing programs, there are a number of agencies and organizations that are important in the overall delivery system of housing services in the region, including new construction, acquisition and rehabilitation, and preservation of affordable housing.

Fresno Economic Opportunities Commission

The Fresno Economic Opportunities Commission (Fresno EOC) is a private nonprofit corporation governed by a 24-member tripartite Board of Commissioners. The Fresno EOC provides services that include energy services such as the weatherization program for both homeowners and renters in Fresno County who are income eligible.

Fresno Housing Authority

The Fresno Housing Authority provides affordable housing to over 50,000 residents throughout Fresno County, either through Housing Choice Vouchers (HCV) or in Housing Authority-owned complexes. Specifically, the HCV program is assisting 12,000 households. As of October 2015, there are 42,587 residents outside the City of Fresno on the waitlist for HCVs. Applicants are randomly selected through a lottery system.

Table 4-5 shows the subsidized rental units owned and/or managed by the Fresno Housing Authority throughout the county.

* Including one manager's unit

** Single-family homes

Nonprofit Housing Providers

There are numerous nonprofit organizations that are active in constructing, managing, and preserving affordable housing in the region. According to Affordable Housing Online, there are 12,585 units of affordable housing in 138 properties throughout the county, including those operated by the Housing Authority. More than half of these affordable units are in the City of Fresno; however, every city and several unincorporated communities also contain affordable housing units. Within the smaller cities and unincorporated areas, one of the more active nonprofit housing providers has been Self-Help Enterprises. Self-Help Enterprises focuses on providing self-help housing, sewer and water development, housing rehabilitation, multifamily housing, and homebuyer programs in the San Joaquin Valley of California. They currently assist the City of Coalinga to oversee their housing rehabilitation and down payment assistance programs.

OPPORTUNITIES FOR ENERGY CONSERVATION

State law requires an analysis of the opportunities for energy conservation in residential development. Energy efficiency has direct application to affordable housing since higher energy bills result in less money available for rent or mortgage payments. High energy costs have particularly detrimental effects on low-income households that do not have enough income or cash reserved to absorb cost increases and many times must choose between basic needs, such as shelter, food, and energy.

California Building Code, Title 24

California Title 24 regulations require higher energy-efficiency standards for residential and nonresidential buildings. The building code provides a great deal of flexibility for individual builders to achieve a minimum “energy budget” through the use of various performance standards. These requirements apply to all new residential construction, as well as all remodeling and rehabilitation construction.

Utility Programs

Pacific Gas and Electric Company (PG&E), which provides electricity service in Fresno County, provides a variety of energy conservation services for residents as well as a wealth of financial and energy-related assistance programs for low-income customers:

- **The Budget Billing Program (BPP).** Designed to eliminate big swings in customer monthly payments by averaging energy costs over the year.
- **CARE (California Alternate Rates for Energy).** PG&E provides a 20 percent discount on monthly gas and energy bills for low-income households.
- **Energy Savings Assistance Program:** Provides low-income customers with energy-efficiency upgrades such as attic insulation, caulking, weather stripping, water-saving devices, and energy-efficient lighting.
- **Multifamily Energy Savings Program:** Offers cash incentives on the installation of new, energy-efficient equipment or systems.
- **The Family Electric Rate Assistance (FERA) Program.** PG&E provides a rate reduction program for low-income households of three or more people.
 - **REACH (Relief for Energy Assistance through Community Help).** The REACH program is sponsored by PG&E and administered through the Salvation Army. PG&E customers can enroll to give monthly donations to the REACH program. Through the REACH program, qualified low-income customers who have experienced unforeseen hardships that prohibit them from paying their utility bills may receive an energy credit up to \$200.
- The Fresno Economic Opportunities Commission (FEOC) operates over 35 human service programs designed to reduce poverty, increase self-sufficiency, and build stronger communities. The agency budget is approximately \$100 million annually with funding from private, local, regional, state, and federal sources. One of the programs includes energy services such as free solar panel installation and weatherization programs:
- **Free Home Solar Program:** The Transform Fresno Project provides up to a 6,000 Watts solar system for homes in the designated project area. The solar system and installation are 100 percent free. Homeowners will own the system free and clear. A limited number of systems are available.
- **Low-Income Home Energy Assistance Program (LIHEAP):** Provides financial assistance to help offset an eligible Fresno County household's home energy cost.
- **Weatherization services:** Homeowners and renters in Fresno County who are income-eligible can qualify for weatherization services with qualified mobile homes, apartments, houses, and condos. Weatherization measures include:

SECTION 4: OPPORTUNITIES FOR RESIDENTIAL DEVELOPMENT

- Weather-stripping doors and caulking windows or gaps around home
- Testing, repairing, or replacement of refrigerators, water heaters, heating and/or cooling systems, and cooking appliances
- Insulating exterior walls, ceilings, and floors
- Installing low-flow shower heads
- Upgrading interior and exterior lighting services to LED
- Duct repair and replacement

SECTION 5: HOUSING CONSTRAINTS

This page intentionally left blank.

HOUSING CONSTRAINTS

Actual or potential constraints to the provision of housing affect the development of new housing and the maintenance of existing units for all income levels. State housing element law requires cities and counties to review both governmental and nongovernmental constraints to the maintenance and production of housing for all income levels. Since local governmental actions can restrict the development and increase the cost of housing, State law requires the housing element to “address and, where appropriate and legally possible, remove governmental constraints to the maintenance, improvement, and development of housing” (Government Code Section 65583(c)(3)). The housing element must also analyze potential and actual constraints on the development, maintenance, and improvement of housing for persons with disabilities.

Nongovernmental constraints are not specific to each community and are described in this section at the regional level. Governmental constraints, on the other hand, are specific to each local government and are described only generally in this section. The appendices contain a more detailed governmental constraints analysis for each local government.

GOVERNMENTAL CONSTRAINTS

Local governments have little or no influence on the national economy or the federal monetary policies that influence it. Yet, these two factors have some of the most significant impacts on the overall cost of housing. The local housing market, however, can be encouraged and assisted locally. One purpose of the housing element is to require local governments to evaluate their past performance in this regard. By reviewing local conditions and regulations that may impact the housing market, the local government can prepare for future growth through actions that protect public health and safety without unduly adding to the cost of housing production.

It is in the public interest for a local government agency to accommodate development while protecting the general welfare of the community, through a regulatory framework/environment. At the same time, government regulations can potentially constrain the supply of housing available in a community if the regulations limit the opportunities to develop housing, impose requirements that unnecessarily increase the cost to develop housing, or make the development process so arduous as to discourage housing developers.

Land Use Controls

Land use controls provided in the general plan and the zoning ordinance influence housing production in several ways. The permitted and conditionally permitted uses in each district guide new development and provide both developers and the public with an understanding of how vacant land will develop in the future. This includes the density of development that will occur within a particular zone, the compatibility of planned uses in a given area, and the range and type of buildings and uses that will be located throughout the city or the county.

General Plan

Each city and county in California must prepare a comprehensive, long-term general plan to guide growth and development. The land use element of the general plan must contain land use designations, which establish the basic allowed land uses and density of development for the different ranges and areas within the jurisdiction. Under State law, the zoning districts must be consistent with the general plan land use designations. The general plan land uses must provide suitable locations and densities to accommodate each jurisdiction's regional housing needs allocation (RHNA) and implement the policies of the housing element. Appendix 1 provides a description of each jurisdiction's general plan land use designations.

Zoning Ordinance

Land use controls provided in the zoning ordinance influence housing production in several ways. The permitted and conditionally permitted uses in each district guide new development and provide both developers and the public with an understanding of how vacant land will develop in the future. This includes the density of development that will occur within a particular zone, the compatibility of planned uses in a given area, and the range and type of buildings and uses that will be located throughout the jurisdiction.

Local governments regulate the type, location, and scale of residential development primarily through the zoning ordinance. The zoning ordinance implements the general plan. It contains development standards for each zoning district consistent with the land use designations of the general plan. Appendix 1 provides a description of each jurisdiction's zoning districts and development standards.

Residential Development Standards

Each jurisdiction's zoning ordinance contains development standards for each zoning district. These standards vary by jurisdiction, but typically include density, parking requirements, lot coverage, height limits, lot size requirements, setbacks, and open space requirements. The Housing Element must analyze whether development standards impede the ability to achieve maximum allowable densities.

Parking

Parking requirements do not constrain the development of housing directly. However, parking requirements may reduce the amount of available lot areas for residential development. Most of the participating jurisdictions require two parking spaces per single-family dwelling unit. Several, but not all jurisdictions, have reduced parking standards for multifamily and elderly housing.

Open Space and Park Requirements

Open space and park requirements can decrease the affordability of housing by increasing developer fees and/or decreasing the amount of land available on a proposed site for constructing units. All jurisdictions require that park space is set aside in new subdivisions, or that developers pay a fee in lieu of providing parks.

Density Bonus

Under current state law (Government Code Section 65915), cities and counties must provide a density increase up to 80 percent over the otherwise maximum allowable residential density under the Municipal Code and the Land Use Element of the General Plan (or bonuses of equivalent financial value) when builders agree to construct housing developments with 100 percent of units affordable to low- or very low-income households.

Density bonus law also imposes statewide parking standards that a jurisdiction must grant upon request from a developer of an affordable housing project that qualifies for a density bonus. These parking standards are summarized in **Table 5-1**. These numbers are the total number of parking spaces, including guest parking and handicapped parking. The developer may request these parking standards even if they do not request the density bonus. Appendix 1 provides a description of whether or not individual jurisdictions comply with California’s density bonus law.

Table 5-1 Statewide Density Bonus Parking Standards

Number of Bedrooms	Required On-Site Parking
Studio/1 bedroom	1 space
2 to 3 bedrooms	1.5 space
4 or more bedrooms	2.5 spaces

Source: Government Code Section 65915 (9)(p)(1)

Growth Control

Growth-control ordinances or policies are designed to limit the amount or timing of residential development. Since growth-control policies, by definition, constrain the production of housing, local governments must analyze whether or not local growth-control policies limit the ability to meet the RHNA. Most jurisdictions have not adopted growth-control policies. Appendix 1 describes which jurisdictions have other growth-control policies or ordinances.

While not a form of growth control, all jurisdictions in Fresno County are subject to the City/County memorandum of understanding (MOU), which establishes procedures for annexation of land to cities. The City/County MOU encourages urban development to take place within cities and unincorporated communities where urban services and facilities are available or planned to be made available in an effort to preserve agricultural land. The MOU standards for annexation require that a minimum of 50 percent of annexation areas have an approved tentative subdivision map or site plan. Therefore, cities must wait for private developers to request an annexation before initiating an annexation. In cities that are mostly built out within their current city limits, the MOU limits the cities’ ability to accommodate future housing needs. While cities can take certain steps to “prezone” land in advance of annexation, the annexation of land into the city limits is not entirely within the cities’ control.

Airport Land Use Compatibility

State law requires each local agency having jurisdiction over land uses within an Airport Influence Area (AIA) to either: (1) modify its general plan, zoning ordinance, or other applicable land use regulation(s) to be consistent with the Airport Land Use Compatibility Plan (ALUCP); or (2) overrule all or part of the ALUCP within 180 days of its adoption. If a city or county fails to take either action, the agency is required to submit all land use development proposals to the Airport Land Use Commission (ALUC) for consistency review until such time as the ALUC deems their general plan consistent with the ALUCP. The Fresno Council of Governments (COG) Airport Land Use Commission has completed ALUCPs for airports within its jurisdiction. The following are the most recently adopted plans for public airports in Fresno County.

- Coalinga Airport Land Use Plan
- Fresno County Airports Land Use Policy Plan
- Fresno-Chandler Executive Airport Land Use Plan
- Fresno Yosemite International Airport Airport Land Use Compatibility Plan
- Harris Ranch Land Use Plan
- Reedley Airport Land Use Plan
- Selma-Reedley-Firebaugh-Mendota Airports Land Use Plans
- Sierra Sky Park Land Use Plan

The ALUCP has the potential to constrain residential development, if deemed incompatible with the ALUCP. No incompatibility has been identified with existing General Plan land uses and none is anticipated in the future. Sites identified in the residential sites inventory are not constrained by the land use compatibility requirements of any ALUCP. As such, the ALUCP is not considered a significant constraint in Fresno County and is not addressed in Appendix 1.

Zoning for a Variety of Housing Types

State Housing Element law (Government Code Section 65583(c)(1) and 65583.2(c)) requires that local governments analyze the availability of sites that will facilitate and encourage the development of a variety of types of housing for all income levels, including multifamily rental housing, factory-built housing, mobile homes, housing for farmworkers and employees, emergency shelters, transitional and supportive housing, single-room occupancy (SRO) units, group homes and residential care facilities, and second dwelling units.

Multifamily

Multifamily housing includes duplexes, apartments, condominiums, or townhomes, and is the primary source of affordable housing. Appendix 1 provides descriptions of the restrictions on multifamily housing units in each jurisdiction.

Manufactured Housing

Manufactured housing can serve as an alternative form of affordable housing in low-density areas where the development of higher-density multifamily residential units is not allowed or not feasible because of

infrastructure constraints. California Government Code Sections 65852.3 and 65852.4 specify that a jurisdiction must allow manufactured homes on a foundation on all “lots zoned for conventional single family residential dwellings.” Permanently sited manufactured homes built to the United States Department of Housing and Urban Development (HUD) Code are subject to the same rules as site-built homes, except architectural requirements concerning the manufactured home’s roof overhang, roofing materials, and siding materials.

The only two exceptions that local jurisdictions are allowed to make to the manufactured home siting provisions are if: (1) there is more than 10 years’ difference between the date of manufacture of the manufactured home and the date of the application for the issuance of an installation permit; or (2) if the site is listed on the National Register of Historic Places and regulated by a legislative body pursuant to Government Code Section 37361.

Appendix 1 provides descriptions of the allowances and restrictions on manufactured homes in each jurisdiction and whether the zoning ordinances in the jurisdictions comply with State law requirements for manufactured homes.

Farmworker Housing/Employee Housing Act

The Employee Housing Act (Health and Safety Code Sections 17021.5 and 17021.6) requires jurisdictions to permit employee housing for six or fewer employees as a single-family use. The California Department of Housing and Community Development (HCD) also indicates that employee housing shall not be included within the zoning definition of a boarding house, rooming house, hotel, dormitory, or other similar term that implies that the employee housing is a business run for profit or differs in any other way from a family dwelling. Jurisdictions cannot impose a conditional use permit, zoning variance, or other zoning clearance of employee housing that serves six or fewer employees that are not required of a family dwelling of the same type in the same zone. In addition, in any zone where agriculture is permitted or allowed by a conditional use permit, employee housing containing up to 36 beds and 12 units must be treated as an agricultural use. No conditional use permit, zoning variance, or other zoning clearance shall be required for this type of employee housing that is not required of any other agricultural activity in the same zone.

Appendix 1 provides an analysis of whether or not each jurisdiction complies with the Employee Housing Act.

Emergency Shelters

Emergency shelters are defined by the California Health and Safety Code (Section 50801) as:

Housing with minimal supportive services for homeless persons that is limited to occupancy of six months or less by a homeless person. No individual or household may be denied emergency shelter because of an inability to pay”

Senate Bill (SB) 2 (Government Code Section 65583) was enacted in 2008 to support the needs of the homeless by removing barriers to and increasing opportunities for development of emergency shelters. SB

SECTION 5: HOUSING CONSTRAINTS

2 requires every jurisdiction in California to identify a zone (or zones) where emergency shelters are allowed as a permitted use without a conditional use permit or other discretionary permit. To address this requirement, a local government may amend an existing zoning district, establish a new zoning district, or establish an overlay zone. The zone(s) must provide sufficient opportunities for new emergency shelters to meet the homeless need identified in the analysis and must in any case accommodate at least one year-round emergency shelter. SB 2 requires that emergency shelters only be subject to those development and management standards that apply to residential or commercial use within the same zone, except the local government may apply certain objective standards, as follows:

- The maximum number of beds or persons permitted to be served nightly by the facility.
- Off-street parking based on demonstrated need, provided that the standards do not require more parking for emergency shelters than for other residential or commercial uses within the same zone.
- The size and location of exterior and interior on-site waiting and client intake areas.
- The provision of on-site management.
- The proximity to other emergency shelters provided that emergency shelters are not required to be more than 300 feet apart.
- The length of stay.
- Lighting.
- Security during hours that the emergency shelter is in operation.

Assembly Bill (AB) 2339 (Government Code Section 65583 (a)(4)) requires jurisdictions provide a calculation methodology for determining the sufficiency of sites available to accommodate emergency shelters in the identified zoning designation.

Appendix 1 analyzes each jurisdiction's compliance with State law requirements for emergency shelters.

Low-Barrier Navigation Centers

Government Code Section 65662 requires that the development of low-barrier navigation centers be developed as a use by right in zones where mixed uses are allowed or in nonresidential zones that permit multifamily housing. For a navigation center to be considered "low barrier," its operation should incorporate best practices to reduce barriers to entry, which may include, but are not limited to, the following:

- Permitting the presence of partners if it is not a population-specific site, such as for survivors of domestic violence or sexual assault, women, or youth
- Pets
- Ability to store possessions
- Providing privacy, such as private rooms or partitions around beds in a dormitory setting or in larger rooms with multiple beds

Appendix 1 analyzes each jurisdiction's compliance with State law requirements for low-barrier navigation centers.

Transitional and Supportive Housing

Pursuant to Government Code Section 65583, transitional and supportive housing shall be treated as a residential use and allowed in all zones that allow residential uses, subject only to those restrictions that apply to other residential uses of the same type in the same zone.

According to recent changes in State law, Government Code Sections 65650 and 65583 (AB 2162), states that the City must also allow 100 percent affordable projects that include 25 percent, or 12 units of supportive housing, by right where multi-unit and mixed-use development is permitted. The Housing Element includes an implementation program to comply with this new provision of State law. Transitional housing is a type of housing used to facilitate the movement of homeless individuals and families to permanent housing. Residents of transitional housing are usually connected to supportive services designed to assist the homeless in achieving greater economic independence and a permanent, stable living situation. Transitional housing can take several forms, including group quarters with beds, single-family homes, and multifamily apartments; and typically offers case management and support services to help return people to independent living (often six months to two years).

The State defines transitional housing as:

“Transitional housing” shall mean buildings configured as rental housing developments, but operated under program requirements that require the termination of assistance and recirculating of the assisted unit to another eligible program recipient at a predetermined future point in time that shall be no less than six months from the beginning of the assistance (Health and Safety Code Section 50675.14).

Supportive housing links the provision of housing and social services for the homeless, people with disabilities, and a variety of other special-needs populations. Similar to transitional housing, supportive housing can take several forms, including group quarters with beds, single-family homes, and multifamily apartments. The State defines supportive housing as:

“Supportive housing” shall mean housing with no limit on length of stay, that is occupied by the target population and that is linked to onsite or offsite services that assist the supportive housing resident in retaining the housing, improving his or her health status, and maximizing his or her ability to live and, when possible, work in the community (Health and Safety Code Section 50675.2(h)).

The State defines the target population as:

“Target population” shall mean persons with low incomes who have one or more disabilities, including mental illness, HIV or AIDS, substance abuse, or other chronic health condition, or individuals eligible for services provided pursuant to the Lanterman Developmental Disabilities Services Act (Division 4.5 (commencing with Section 4500) of the Welfare and Institutions Code) and may, among other populations, include families with children, elderly persons, young adults aging out of the foster care system, individuals exiting from institutional settings, veterans, or homeless people (Health and Safety Code Section 53260(d)).

Appendix 1 analyzes compliance with State law requirements for transitional and supportive housing in each jurisdiction.

Single-Room Occupancy Units

Single-room occupancy (SRO) unit means a living or efficiency unit, as defined by California Health and Safety Code Section 17958.1, intended or designed to be used, as a primary residence by not more than two persons for a period of more than 30 consecutive days and having either individual bathrooms and kitchens or shared bathrooms and/or kitchens. SRO units can provide affordable private housing for lower-income individuals, seniors, and persons with disabilities. These units can also serve as an entry into the housing market for formerly homeless people. Appendix 1 provides descriptions of the allowances and restrictions for SRO units in each jurisdiction.

Group Homes/Residential Care Facilities

The Lanterman Developmental Disabilities Services Act (Lanterman Act) and Health and Safety Code Sections 1267.8, 1566.3, and 1568.08 sets out the rights and responsibilities of persons with developmental disabilities. A State-authorized, certified, or licensed family care home, foster home, or a group home serving six or fewer disabled persons or dependent and neglected children on a 24-hour-a-day basis must be considered a residential use that is permitted in all residential zones. Local agencies must allow these licensed residential care facilities in any area zoned for residential use and may not require licensed residential care facilities for six or fewer persons to obtain conditional use permits or variances that are not required of other family dwellings.

Appendix 1 provides descriptions of the restrictions on group homes in each jurisdiction.

Accessory Dwelling Units

Accessory dwelling units (ADUs), also called “second units” or “granny flats” are attached or detached residential dwellings that provide complete, independent living facilities for one or more persons. That is, they include permanent provisions for living, sleeping, eating, cooking, and sanitation on the same parcel as a single-family dwelling and must be permitted ministerially subject to objective design standards (Government Code Section 65852.2).

Junior accessory dwelling units (JADUs) are ADUs of less than 500 square feet and must be permitted within the walls of the proposed or existing single-family dwelling. An existing bedroom or interior entry into the single-family home is not required for JADUs.

Appendix 1 analyzes compliance with State law requirements for ADU/JADUs in each jurisdiction.

On-/Off-Site Improvement Standards

On/off-site improvement standards establish infrastructure or site requirements to support new residential development, such as streets, sidewalks, water and sewer, drainage, curbs and gutters, street signs, park dedications, utility easements, and landscaping. While these improvements are necessary to ensure public

health and safety and that new housing meets the local jurisdiction’s development goals, the cost of these requirements can sometimes represent a significant share of the cost of producing new housing.

Appendix 1 describes specific site improvement standards for each jurisdiction. Although improvement requirements and development fees increase the cost of housing, jurisdictions have little choice in establishing such requirements due to the limitations on property taxes and other revenue sources needed to fund public improvements.

Fees and Exactions

State law limits fees charged for development permit processing to the reasonable cost of providing the service for which the fee is charged. Local governments charge various fees and assessments to cover the costs of processing permit applications and providing services and facilities, such as parks and infrastructure. Almost all of these fees are assessed based on the magnitude of a project’s impact or on the extent of the benefit that will be derived. Additional fees and/or time may be necessary for required environmental review, depending on the location and nature of a project.

In 2019, National Impact Fees Survey examined 37 jurisdictions in California. The study reports average impact fees of \$37,471 per single-family unit and \$21,703 per multifamily unit in California.

Appendix 1 provides an analysis of permit and processing and development impact fees in each jurisdiction. In addition to the fees shown in Appendix 1, jurisdictions in Fresno County are subject to two regional impact fees, including Regional Transportation Mitigation fees and San Joaquin Valley Air Pollution Control District fees.

Regional Transportation Mitigation Fees

In addition to local planning and development impact fees, Regional Transportation Mitigation Fees, shown in **Table 5-2**, are payable to the Fresno COG as a part of “Measure C,” approved by Fresno County voters in 2006. Jurisdictions have no control of these fees, which are paid to ensure that future development contributes toward the cost to mitigate cumulative, indirect regional transportation impacts. These fees are the same throughout the county and fund important improvements needed to maintain the transportation system.

Table 5-2 Fresno COG Transportation Impact Fee

Residential Developments (\$/Dwelling Unit)	Fee
Single-Family Dwelling (Market-Rate)	\$2,118
Single-Family Dwelling (Affordable)	\$1,059
Multifamily Dwelling (Market-Rate)	\$1,642
Multifamily Dwelling (Affordable)	\$821

Source: Fresno Council of Governments, 2020.

San Joaquin Valley Air Pollution Control District Fees

Fresno County is within the regulatory jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The air basin as a whole does not meet ambient air quality standards set at the state and federal levels and is within a “non-attainment” area for ozone, particulate matter with a diameter of 10 microns or less (PM₁₀; state), and particulate matter with a diameter of 2.5 microns or less (PM_{2.5}).

As a consequence of these conditions, the SJVAPCD has implemented an Indirect Source Review (ISR) process to reduce the impacts of growth in emissions from all new land development. An Air Impact Assessment (AIA) and potential mitigation fees are required for residential projects that contain 50 or more units and when there is a discretionary approval required. Fees are also exacted by the SJVAPCD to offset emissions created by typical operational sources. These fees can add hundreds of dollars to the cost of development. However, the cost is applied to all jurisdictions in the air basin and may be eliminated for a lesser number of units or reduced with additional mitigation measures.

Processing and Permit Procedures

Jurisdictions have various procedures that developers must follow for processing development entitlements and building permits. Processing times vary and depend on the size and complexity of the project. Appendix 1 provides more information on the processing and permit procedures in each jurisdiction.

Senate Bill 35

SB 35 requires jurisdictions that have failed to meet their RHNA to provide a streamlined, ministerial entitlement process for housing developments that incorporate affordable housing.

Appendix 1 analyzes each jurisdiction’s compliance with State law requirements.

Senate Bill 330

SB 330, the Housing Crisis Act of 2019, established specific requirements and limitations on development application procedures. Housing developments for which a preliminary application is submitted that complies with applicable general plan and zoning standards is subject only to the development standards and fees that were applicable at the time of submittal. This applies to all projects unless the project square footage or unit count changes by more than 20 percent after the preliminary application is submitted. The developer must submit a full application for the development project within 180 days of submitting the preliminary application.

Appendix 1 analyzes each jurisdiction’s compliance with State law requirements.

Building Codes and Enforcement

Building codes and their enforcement can increase the cost of housing and impact the feasibility of rehabilitating older properties that must be upgraded to current code standards. In this manner, building codes and their enforcement can act as a constraint on the supply of housing and its affordability.

The California Building Standards Code, Title 24, serves as the basis for the design and construction of buildings in California. State law prohibits the imposition of additional building standards that are not necessitated by local geographic, climatic, or topographic conditions, and requires that local governments making changes or modifications in building standards must report such changes to HCD and file an expressed finding that the change is needed. Appendix 1 provides more information on building codes and enforcement by jurisdiction.

Constraints on Housing for Persons with Disabilities

In accordance with SB 520 (Chapter 671, Statutes of 2001), jurisdictions must analyze the potential and actual governmental constraints on the development of housing for persons with disabilities. Appendix 1 contains a detailed review of zoning laws, policies, and practices in each jurisdiction to ensure compliance with fair housing laws.

California Building Code

The 2019 California Building Code, Title 24 regulations, provide for accessibility for persons with disabilities. The Housing Element must identify the version of the Building Code adopted in each jurisdiction and whether or not a jurisdiction has adopted any amendments to the Code that might diminish the ability to accommodate persons with disabilities. Appendix 1 provides information on which jurisdictions have adopted the 2019 California Building Code, including Title 24 regulations of the code concerning accessibility for persons with disabilities.

Definition of Family

There are a number of state and federal rules that govern the definition of family, including the Federal Fair Housing Amendments Act of 1988, the California Fair Housing and Employment Act, the California Supreme Court case *City of Santa Barbara v. Adamson* (1980), and the California Constitution privacy clauses. The laws surrounding the definition of family have a few primary purposes: to protect people with disabilities, to protect nontraditional families, and to protect privacy. According to HCD and Mental Health Advocacy Services, there are three major points to consider when writing a definition of family:

- Jurisdictions may not distinguish between related and unrelated individuals.
- The definition may not impose a numerical limit on the number of persons in a family.
- Land use restrictions for licensed group homes for six or fewer individuals must be the same as those for single families.

Appendix 1 analyzes whether or not the zoning ordinances in each jurisdiction contain restrictive definitions of “family.”

Zoning and Land Use Policies

Restrictive land use policies and zoning provisions can constrain the development of housing for persons with disabilities. The Housing Element must analyze compliance with fair housing laws, provisions for group homes, and whether or not jurisdictions have adopted any minimum distance requirements or other

zoning procedures or policies that would limit housing for persons with disabilities. Appendix 1 provides information on zoning and land use policies.

Reasonable Accommodation Procedure

Both the federal Fair Housing Amendment Act (FHAA) and the California Fair Employment and Housing Act direct local governments to make reasonable accommodations (i.e., modifications or exceptions) in their zoning laws and other land use regulations when such accommodations may be necessary to afford disabled persons an equal opportunity to use and enjoy a dwelling. It may be reasonable to accommodate requests from persons with disabilities to waive a setback requirement or other standard of the zoning ordinance to ensure that homes are accessible for the mobility impaired. Whether a particular modification is reasonable depends on the circumstances and must be decided on a case-by-case basis. Appendix 1 provides information on reasonable accommodation policies and procedures in each jurisdiction.

NONGOVERNMENTAL CONSTRAINTS

The availability and cost of housing is strongly influenced by market forces over which local governments have little or no control. Nonetheless, State law requires that the housing element contain a general assessment of these constraints, which can serve as the basis for actions to offset their effects. The primary nongovernmental constraints to the development of new housing are land costs, construction costs, and availability of financing. This section also discusses environmental constraints that might affect housing development in the region.

Land Costs

The cost of land can be a major impediment to the production of affordable housing. Land costs are influenced by many variables, including scarcity and developable density (both of which are indirectly controlled through governmental land use regulations), location, site constraints, and the availability of public utilities. For example, available land parcels in downtown Fresno are small in size due to limited available land. The range is from \$375,000 to \$495,000, less than the high county average. This is often because sites are smaller and/or occupied by existing uses that generate revenue to property owners. As shown in **Table 5-3** and **Table 5-4**, smaller sites (under 10 acres) have a smaller cost-per-acre in both the cities and unincorporated area.

As shown in **Table 5-3**, in August 2022, land was listed for more in the incorporated area. Excluding the City of Fresno, whose land costs are not reflective of the rest of the county, seven properties were listed for sale in the incorporated cities (three in Clovis, and one each in Kerman, Orange Cove, Parlier, and San Joaquin). The properties ranged in size from 1.7 acres for \$499,000 (\$297,024 per acre) to 20 acres for \$358,000 (\$17,900 per acre). The average list price per acre was \$282,686.

As shown in **Table 5-4**, in the unincorporated area (Auberry, Squaw Valley, Wonder Valley outside of Sanger), eight properties were listed for sale in August 2022. The properties ranged from 4.7 acres for \$80,000 (\$17,021 per acre) to 25 acres for \$199,000 (\$7,960 per acre). The average list price per acre was \$18,048.

Table 5-3 Listed Land Prices, Incorporated Cities (2022)

Lot Size	Incorporated		
	Average Per-Acre Cost	Average Range Per-Acre Cost	Number of Listings
Less than 10 acres	\$383,601	\$40,379 – \$1,269,430	5
10 or more acres	\$30,398	\$17,900 – \$42,895	2
Average \$/acre	\$282,686	\$17,900 – \$1,256,410	7

Table 5-4 Listed Land Prices, Unincorporated Areas (2022)

Lot Size	Unincorporated		
	Average	Average Range	Number of Listings
Less than 10 acres	\$23,325	\$17,021 – \$36,853	5
10 or more acres	\$9,253	\$7,800 – \$12,000	3
Average \$/acre	\$18,048	\$7,800 – \$36,853	8

Source: Redfin, August 2022.

As shown in **Table 5-5**, in August 2022, land sold for less in the incorporated area. Excluding the City of Fresno, whose land costs are not reflective of the rest of the county, eight properties were sold in cities (two in Sanger, three in Clovis, one each in Selma, Coalinga, and Firebaugh). The properties ranged from 0.5 acres for \$135,000 (\$6 per acre) to 160.0 acres for \$1,559,396 (\$9,746 per acre). The average sale price per acre was \$67,582.

As shown in **Table 5-6**, in the unincorporated area, 13 properties were sold in August 2022, ranging from 4.1 acres for \$35,000 (\$8,495 per acre) to 54.3 acres for \$215,000 (\$3,959 per acre). The average cost per acre of all sold properties in Fresno County was \$13,907.

Table 5-5 Land Sale Prices, Incorporated Cities (August 2022)

Lot Size	Incorporated		
	Average	Range	Number of Listings
Less than 10 acres	\$85,152	\$6–\$236,666	6
10 or more acres	\$14,873	\$9,746–\$20,000	2
Average \$/acre	\$67,582	\$6–\$236,666	8

Construction Costs

Construction costs for a single-family home are approximately \$143 per square foot. This is based on costs calculated for a 2,000-square-foot, wood-framed, single-story, four-cornered home of good quality construction and including a two-car garage and forced-air heating and cooling in Fresno County. Estimated total construction costs for such a home are \$286,664. These construction costs include labor, materials, and equipment but do not include costs of buying land.⁵

Costs for multifamily construction are approximately \$95 per square foot. This is based on costs calculated for a three-story building in Fresno County with 30 units and an average unit size of 800 square feet each. The calculation is for a wood or light steel frame structure, including forced-air heating and cooling and constructed of good-quality materials. The estimated total construction costs for each unit are \$71,736, and total construction costs for the building are \$2,294,428. These construction costs include labor, materials, and equipment but do not include costs of buying land.⁶

The availability and demand for materials, such as asphalt, roofing, and pipes, affect prices for these goods. Another major cost component of new housing is labor. The cost of labor in Fresno County is comparatively low because the area's cost of living is relatively low compared to other areas in California. However, labor for government-subsidized housing work is additionally costly for the Central Valley, as wages are rooted in the required State Labor Standards based on higher northern and southern California prevailing wages. There is little that municipalities can do to mitigate the impacts of high construction costs except by avoiding local amendments to uniform building codes that unnecessarily increase construction costs without significantly adding to health, safety, or construction quality. Because construction costs are similar across jurisdictions in Fresno County, the cost of construction is not considered a major constraint to housing production.

⁵ 2022 National Building Cost Manual and 2022 15 zip code modifiers, Craftsman Book Company.

⁶ 2022 National Building Cost Manual and 2022 15 zip code modifiers, Craftsman Book Company.

Dry Utilities

Dry utilities, including cable, electricity, and telephone service, are available to all areas in the city. There is sufficient capacity to meet the current need and any future need. Service providers for Fresno County are:

- Electricity: Pacific Gas and Electric Company (PG&E)
- Telephone:
 - Landline: Pacific Bell
 - Cellular: AT&T, Verizon, Sonic, and more
- Internet Service: AT&T, Verizon, Sonic, and Xfinity

Availability of Financing

Mortgage interest rates have a large influence over the affordability of housing. Higher interest rates increase a homebuyer’s monthly payment and decrease the range of housing that a household can afford. Lower interest rates result in a lower cost and lower monthly payments for the homebuyer. When interest rates rise, the market typically compensates by decreasing housing prices. Similarly, when interest rates decrease, housing prices begin to rise. There is often a lag in the market, causing housing prices to remain high when interest rates rise until the market catches up. Lower-income households often find it most difficult to purchase a home during this time period.

As shown in **Figure 5-1**, the interest rate on a 30-year fixed-rate mortgage was an average of 3.85 percent in 2015. Interest rates hit a historic low in 2020 at 2.96 percent for a 30-year fixed-rate mortgage. As of August 2022, rates remain near average rates around 4.3 percent.

**FIGURE 5-1 HISTORICAL MORTGAGE INTEREST RATES, UNITED STATES
2015-2022**

Source: Freddie Mac Primary Mortgage Market Survey, August 2022.

Interest rates are determined by national policies and economic conditions and there is little that a local government can do to affect these rates. However, to extend homebuying opportunities to lower-income households, jurisdictions can offer interest rate write-downs. Additionally, government-insured loan programs may be available to reduce mortgage down payment requirements.

Homebuyer assistance programs that provide mortgage assistance can be useful tools for helping lower-income residents with down payment and closing costs, which are often significant obstacles to homeownership. There are also areas of the county where housing is deteriorating. Residents in these areas are often unable to qualify for home improvement loans because of their low income. Housing rehabilitation programs can help these low-income residents with meeting their home improvement needs.

Environmental Constraints

Typical environmental constraints to the development of housing in Fresno County include physical features such as floodplains, sensitive biological habitat, and seismic zones. In many cases, development of these areas is constrained by state and federal laws (e.g., Federal Emergency Management Agency [FEMA] floodplain regulations, the Clean Water Act and the Endangered Species Act, and the California Fish and Game Code and Alquist-Priolo Earthquake Fault Zoning Act), Agricultural Mitigation, Sustainable Groundwater Management, and California Environmental Quality Act (CEQA) preparation timelines.

Floodplains

Official floodplain maps are maintained by FEMA. FEMA determines areas subject to flood hazards and designates these areas by relative risk of flooding on a map for each community, known as the Flood Insurance Rate Map (FIRM). The 100-year flood is defined as the flood event that has a 1 percent chance of occurring in any given year.

Principal flooding problems lie along the San Joaquin and Kings Rivers, smaller perennial streams in the Sierra Nevada foothills, and to areas in western Fresno County. This area includes the cities of Huron and Mendota that become flooded from streams flowing east from the Coast Range. Friant and Pine Flat Dams, upstream reservoirs, and stormwater detention/retention facilities operated by the Fresno-Clovis Metropolitan Flood Control District have minimized flooding problems in highly urbanized areas in the valley.

Development within a flood zone typically is required to be protected against flood damage. FEMA requires developers to obtain a flood zone elevation certificate when they apply for their permit. These certificates require elevating the developed area (i.e., house pad) above the known flood level of that particular flood zone. The sites in the inventory must obtain a flood zone elevation certificate, which may increase the cost of a development but is necessary nation-wide to protect against flood risks.

Each sites inventory provides parcel-specific environmental constraints, including whether or not the site is within the FEMA 100-year flood zone. While residential development can certainly occur within these

zones, it does add an additional constraint. The sites inventories include vacant sites within the FEMA 100-year flood zone, but no jurisdiction relies on these sites to meet its RHNA in any of the income categories.

Seismic Zones

There are a number of active and potentially active faults within and adjacent to Fresno County. Two of the active faults in western Fresno County have been designated Alquist-Priolo Earthquake Hazard Zones. No structure for human occupancy may be built within an Earthquake Hazard Zone (EHZ) until geologic investigations demonstrate that the site is free of fault traces that are likely to rupture with surface displacement. Special development standards associated with Alquist-Priolo requirements would be necessary for development in those areas.

Although all development must consider earthquake hazards, there is no specific threat or hazard from seismic ground shaking to residential development within the county, and all new construction will comply with current local and State building codes. Between the minimal historical hazard of earthquakes in the county and the use of the most current building codes and construction techniques, earthquakes pose a less-than-significant danger to residential development.

Biological Resources

A large percentage of Fresno County is occupied by orchard-vineyard habitat that grows crops such as almonds, nectarines, figs, and table wine and raisin grapes. Cultivated vegetable, fruit, and grain crops are also grown on cropland in Fresno County and can consist of corn, cotton, or grapes in this part of the valley. Urban development occurs mostly in the valley floor and Sierra Nevada foothill regions.

Fresno County supports a large diversity of habitats for vegetation and wildlife in four generalized biotic regions. Approximately one-third of the county lies within land under federal jurisdiction. The United States Forest Service and National Park Service manage these lands for recreation, biology, wilderness, tourism, timber, and mining under guidelines, policies, and laws separate from local government. Areas that are outside of federal ownership and, therefore, most subject to development include the Coast Range, valley floor, and lower Sierra Nevada foothill biotic regions. Sensitive biological resources are associated with specific habitat types (natural habitat areas not intensively farmed, wetlands, riparian, vernal pools, etc.) or habitat elements such as specific soil types (clay, alkaline, serpentine). The western valley floor and Coast Range biotic regions, in particular, have special planning concerns because of the San Joaquin kit fox (*Vulpes macrotis mutica*), San Joaquin kangaroo rats (*Dipodomys nitratoideis*), and blunt-nosed leopard lizard (*Gambelia silus*). Regional habitat planning efforts can be used as the basis for addressing sensitive biological resources in the area.

SECTION 6: HOUSING PLAN

This page intentionally left blank.

HOUSING PLAN

This eight-year housing plan sets forth a comprehensive strategy and program of actions to address housing issues identified within the participating jurisdictions in Fresno County. The first section contains the shared goals and policies that the County of Fresno and the cities of Coalinga, Firebaugh, Fowler, Fresno, Huron, Kerman, Kingsburg, Mendota, Orange Cove, Parlier, Reedley, San Joaquin, Sanger, and Selma will all strive to achieve. Appendix 1 contains the specific programs to be implemented by each of the jurisdictions over the eight-year planning period.

GOALS AND POLICIES

1. New Housing Development

Every jurisdiction in Fresno County must plan to accommodate its agreed upon fair share of the regional housing needs. As a region, the total housing needed over the 2023-2031 Regional Housing Needs Allocation (RHNA) projection period is 58,298 units. For the jurisdictions participating in the Multijurisdictional Housing Element, the total RHNA is 49,321 units. This includes 12,666 very low-income units, 7,595 low-income units, 7,599 moderate-income units, and 21,462 above moderate-income units. This housing element reflects the shared responsibility among the cities and the unincorporated County to accommodate the housing needs of all economic segments of the community.

- | | |
|-------------------|---|
| Goal 1 | Facilitate and encourage the provision of a range of housing types to meet the diverse needs of residents. |
| Policy 1.1 | Provide adequate sites for new housing development through appropriate planned land use designations, zoning, and development standards to accommodate the regional housing needs for the 2023-2031 planning period. |
| Policy 1.2 | Facilitate development of new housing for all economic segments of the community, including extremely low, very low-, low-, moderate-, and above moderate-income households. |
| Policy 1.3 | Continue to direct new growth to urban areas in order to protect natural resources. |
| Policy 1.4 | Promote balanced and orderly growth to minimize unnecessary development costs adding to the cost of housing. |
| Policy 1.5 | Encourage infill housing development on vacant, by-passed, and underutilized lots within existing developed areas where essential public infrastructure is available. |
| Policy 1.6 | Promote development of higher-density housing, mixed-use, and transit-oriented development in areas located along major transportation corridors and transit routes and served by the necessary infrastructure. |

- Policy 1.7** **Ensure the adequate provision of water, sewer, storm drainage, roads, public facilities, and other infrastructure necessary to serve new housing.**
- Policy 1.8** **Approve new housing in accordance with design standards that will ensure the safety, quality, integrity, and attractiveness of each housing unit.**
- Policy 1.9** **Encourage development around employment centers that provides the opportunity for local residents to live and work in the same community by balancing job opportunities with housing types.**

2. Affordable Housing

The shortage of affordable housing is an issue facing most communities in California. In Fresno County, nearly half of all households are considered “cost burdened,” paying more than 30 percent of their income on housing costs. For lower-income households, this rate is even higher – nearly three-quarters of lower-income households are cost-burdened. Building affordable housing has become even more challenging after the State eliminated redevelopment agencies, depriving jurisdictions of the largest source of local funding for affordable housing. At the same time, State and Federal funding for affordable housing has also been reduced. While the region faces many challenges in meeting their housing needs for lower-income residents, there are several actions jurisdictions can take to facilitate affordable housing.

- Goal 2** **Encourage and facilitate the development of affordable housing.**
- Policy 2.1** **Support innovative public, private, and nonprofit efforts in the development of affordable housing, particularly for the special needs groups.**
- Policy 2.2** **Continue to support the efforts of the Fresno Housing Authority in its administration of Section 8 certificates and vouchers, and the development of affordable housing throughout the County.**
- Policy 2.3** **Encourage development of affordable housing through the use of development incentives, such as the Density Bonus Ordinance, fee waivers or deferrals, and expedited processing.**
- Policy 2.4** **Provide technical and financial assistance, where feasible, to developers, nonprofit organizations, or other qualified private sector interests in the application and development of projects for Federal and State financing.**
- Policy 2.5** **Pursue grant funding to subsidize the development of affordable housing for low- and very low and extremely low income households through new construction, acquisition, and/or rehabilitation.**
- Policy 2.6** **Encourage the development of second dwelling units to provide additional affordable housing opportunities.**
- Policy 2.7** **Work to ensure that local policies and standards do not act to constrain the production of affordable housing units.**

Policy 2.8 **Expand homeownership opportunities to lower- and moderate-income households through downpayment assistance and other homeownership programs.**

Policy 2.9 **Encourage sweat equity programs as a means for increasing homeownership opportunities for lower-income residents.**

3. Housing and Neighborhood Conservation

The existing affordable housing stock is a valuable resource and conserving and improving the existing affordable housing stock is a cost-effective way to address lower-income housing needs. Actions are needed to monitor the status of these units and work with non-profits and the private sector to preserve affordable housing. In addition, improvements are needed to maintain existing ownership housing and the quality of residential neighborhoods.

Goal 3 **Improve and maintain the quality of housing and residential neighborhoods.**

Policy 3.1 **Preserve the character, scale, and quality of established residential neighborhoods by protecting them from the encroachment of incompatible or potentially disruptive land uses and/or activities.**

Policy 3.2 **Assist low income homeowners and owners of affordable rental properties in maintaining and improving residential properties through a variety of housing rehabilitation assistance programs.**

Policy 3.3 **Continue code enforcement efforts to work with property owners to preserve the existing housing stock.**

Policy 3.4 **Encourage and facilitate the improvement or replacement of unsafe, substandard dwellings that cannot be economically repaired.**

Policy 3.5 **Invest in public service facilities (streets, curb, gutter, drainage and utilities) to encourage increased private market investment in declining or deteriorating neighborhoods.**

Policy 3.6 **Preserve assisted rental housing for long-term occupancy by low- and moderate-income households.**

4. Special Needs Housing

Within the general population there are several groups of people who have special housing needs. These special needs can make it difficult for members of these groups to locate suitable housing. Special needs groups include persons experiencing homelessness; single-parent households; seniors; persons with disabilities including developmental disabilities; farmworkers; and large households.

- Goal 4** **Provide a range of housing types and services to meet the needs of individuals and households with special needs.**
- Policy 4.1** **Encourage public and private entity involvement early and often through the design, construction, and rehabilitation of housing that incorporates facilities and services for households with special needs.**
- Policy 4.2** **Assist in local and regional efforts to secure funding for development and maintenance of housing designed for special needs populations such as the senior and persons with disabilities.**
- Policy 4.3** **Support the use of available Federal, State, and local resources to provide and enhance housing opportunities for farm workers.**
- Policy 4.4** **Encourage development of affordable housing units to accommodate large households (three and four bedroom).**
- Policy 4.5** **Ensure equal access to housing by providing reasonable accommodation for individuals with disabilities.**
- Policy 4.6** **Working in partnership with the other jurisdictions and the private/non-profit sectors in Fresno County, facilitate the provision of housing and services for persons experiencing homelessness and those at-risk of becoming homeless.**

5. Fair and Equal Housing Opportunities

Federal and State laws ensure all persons, regardless of their status, have equal opportunities to rent or purchase housing without discrimination. Mediating tenant/landlord disputes, investigating complaints of discrimination, providing education services, and improving public awareness are all part of a comprehensive program.

- Goal 5** **Affirmatively Furthering Fair Housing (Government Code Section (65583(C)(C)(5) & (10) by securing safe, sanitary, and affordable housing for all members of the community regardless of race, sex, or other factors.**
- Policy 5.1** **Collaborate with state and federal agencies and local fair housing agencies to enforce fair housing laws addressing discrimination in the building, financing, selling or renting of housing based on race, religion, family status, national origin, disability, or other protected class.**
- Policy 5.2** **Collaborate with local and regional agencies to provide multilingual fair housing education services and regional efforts to affirmatively further fair housing.**
- Policy 5.3** **Work with federal, state, local and private entities to identify funding, financing and assistance programs throughout the planning period.**

6. Energy Conservation and Sustainable Development

High energy costs have particularly detrimental effects on low-income households that do not have enough income or cash reserves to absorb cost increases and must choose between basic needs such as shelter, food, and energy. While new construction can help achieve energy conservation goals, more than half of the housing stock in the region was built before California’s energy code was adopted in the 1980s. Consequently, the existing building stock offers considerable opportunity for cost-effective energy efficiency retrofits to decrease energy consumption.

- Goal 6** **Encourage energy efficiency in all new and existing housing.**
- Policy 6.1** **Encourage the use of energy conserving techniques in the siting and design of new housing.**
- Policy 6.2** **Actively implement and enforce all State energy conservation requirements for new residential construction.**
- Policy 6.3** **Promote public awareness of the need for energy conservation.**

SECTION 6: HOUSING PLAN

This page is left intentionally blank.

APPENDIX 1D: CITY OF FOWLER

SECTION 1D-1: ACTION PLAN

Summary of Needs and Conditions

Housing Needs Assessment

As part of the Housing Element, the City prepared a detailed Needs Assessment (Section 2) analyzing Fowler's demographics. The Needs Assessment identified a number of trends that informed the goals and policies of the updated Housing Element, including:

- The City's population increased by 3.4 percent on average between 2000 and 2022, which was higher than the countywide average annual growth rate of 2.0 percent. Similarly, the number of households in Fowler increased by 1.8 percent between 2010 and 2020, a higher rate of growth than the rate countywide.
- The largest group of residents in Fowler by age were school-age students (5 to 17 years, 28.9 percent of residents), and there were equally sized populations of young adults (25 to 44 years, 24.1 percent of residents) and middle-aged adults (45 to 64 years, 24.1 percent of residents).
- Over half residents of Fowler, 66.4 percent, identified as Hispanic or Latino of any race.
- The median household income in Fowler in 2020 was \$59,663, slightly higher than the countywide median income of \$57,109.
- In 2020, the most common industry for employment in Fowler was educational services, and health care and social assistance, with 30.1 percent of employed residents working in this field.
- In 2022, 3.6 percent of Fowler residents were unemployed, among the lowest rates of unemployment in the county.
- Over half of all households in Fowler (53.4 percent) were renters as of 2020.
- Fowler's vacancy rate in 2022 was 4.5 percent across all housing units, regardless of tenure. This was a notable decrease from its 2010 vacancy rate of 6.5 percent.
- Over half of all housing units in Fowler (51.7 percent) were built more than 30 years ago, and 31.3 percent were built more than 50 years ago. This is lower than the rate of older housing stock countywide.
- Fowler had a lower rate of households overpaying for housing than the county as a whole in 2018, with 35.1 percent of all households in the city overpaying for housing compared to 37.8 percent across the county. Similarly, the number of lower-income households overpaying for housing was lower in Fowler (69.7 percent in Fowler compared to 70.6 percent countywide).
- In 2020, the city had the same rate of household overcrowding as the countywide rate (6.1 percent of households in both jurisdictions). There was a higher rate of

- severe overcrowding within Fowler (4.6 percent of households) than in the county as a whole (3.6 percent)
- Fowler had a lower rate of large households, those with five or more members, compared to the county as a whole (13.7 percent of households in Fowler compared to 18.1 percent countywide).
- Between 2021 and 2022, the average sale price of a home in Fowler increased by 12.4 percent. Average sale prices rose 15.4 percent in the county as a whole during the same period.
- In 2020, the percentage of Fowler's population that was aged 65 or older was higher than the percentage of seniors in the county as a whole (14.1 percent in Fowler compared to 12.0 percent of the county). Over half (57.2 percent) of Fowler's senior households were homeowner households.
- Of the total number of seniors living in the city, 51.3 percent had a disability.
- The percentage of Fowler households with single female heads of household was lower than the countywide rate (6.3 percent in the city compared to 7.3 percent in the county). However, 42.0 percent of single-female-headed households in Fowler were living under the poverty level, which is disproportionate to the total number of households in poverty in the city (13.8 percent).
- Fowler had a higher rate of residents with disabilities than the county as a whole (17.3 percent compared to 12.9 percent across the county). Ambulatory difficulties were the most commonly reported disability.
- Estimates from the 2022 Point-in-Time count suggest that 3 persons in Fowler may have been experiencing homelessness at that time.
- Of the 58,762 year-round and seasonal farmworkers across the county in 2017, 37,819 (64.3 percent) worked 150 days or more each year, and 35.7 percent worked less than 150 days per year. An estimated 7.5 percent of Fowler's employed population worked in agriculture, which is lower than the countywide rate (8.8 percent).
- Extremely low-income residents (those earning 30 percent or less of median income) made up 15.5 percent of the total households in Fowler. Of those, 84.7 percent were renter households.

Housing Constraints

While the City has made extensive efforts to encourage development of affordable and market-rate housing, there are many governmental and nongovernmental constraints that can make housing development more difficult. Governmental constraints are typically rules that apply to all development and are intended to meet other community interests.

- The City continues to encourage and facilitate the development of ADUs.
- The City's Zoning Ordinance provides for a range of housing options. Updates to the ordinance are underway to bring it in line with State law, including changes to the zones that permit ADUs, emergency shelters, low-barrier navigation centers, residential care facilities, farmworker and employee housing, single-room occupancy units, transitional and supportive housing, and mobile and manufactured homes.
- The City's Affordable Housing Density Bonus will need to be updated to be consistent with State law.

- Fees charged by the City as part of the development process, along with fees charged by regional agencies, are not considered a constraint to development but will be monitored by the City.
- Current standards for on-site and off-site improvements are not considered a barrier to housing production.
- The City will review its design standards to ensure objectivity.
- The City will establish formal procedures for permit processing consistent with the requirements of SB 330 and will establish an application process related to SB 35.
- The City does not currently have a formal process to grant reasonable accommodation requests. The zoning ordinance will be amended to establish a formal reasonable accommodations process.
- The City will amend its Zoning Ordinance to update the definition of “family.”

Nongovernmental constraints include challenges such as water access, availability of financing, and the high cost of land in the City and across the region. A number of the goals and policies in the Housing Element are aimed at eliminating or lessening constraints to the development of housing.

Housing Resources

A major component of the Housing Element is an analysis of sites that are available for the development of housing to meet the City’s RHNA. The Housing Element identifies sites in Fowler where zoning is in place to allow for housing development, including higher-density housing (20+ units per acre) that is suitable for affordable housing development.

- The City has identified sufficient housing sites to meet its lower-, moderate- and above-moderate housing allocation.
- The City partners with Fresno County to provide several programs designed to help residents find affordable housing. These programs include the Fresno County Housing Assistance Rehabilitation Program (HARP), the Fresno County Rental Rehabilitation Program (RRP), and the Fresno County Homebuyer Assistance Program (HAP).
- The City was awarded a Permanent Local Housing Assistance (PLHA) Grant which will be used for first time homebuyer downpayment assistance.
- The City will encourage the development of ADUs by educating the public about this housing type and providing informational materials to all discretionary land use applicants.

Regional Collaboration

Program 1: Regional Collaboration on Housing Opportunities

The Multi-Jurisdictional Housing Element provides an opportunity for countywide housing issues and needs to be more effectively addressed at the regional level rather than just at the local level, and the 15 participating jurisdictions are committed to continuing the regional collaboration in the implementation of the Housing Element. By working together, the jurisdictions can share best practices, explore opportunities for further collaboration, and make the best use of limited resources. The following efforts will be made to further regional collaboration:

- The County of Fresno Public Works and Planning Department, with assistance of the Fresno COG, will take the lead in coordinating the Countywide Sixth Cycle Housing Element Committee meetings.
- Continue to participate in the Countywide Housing Element Technical Committee to collaborate on housing program implementation and regional issues including, disadvantaged unincorporated communities (SB 244), infrastructure challenges, farmworker housing, homelessness, and fair housing.
- The Committee will meet at least biannually to evaluate successes in implementation of programs and to identify gaps and additional needs.
- The Committee will meet annually with the California Department of Housing and Community Development (HCD) to discuss funding opportunities and challenges in implementation of programs, and seek technical assistance from HCD and other State agencies in the implementation of housing programs and the pursuit of grant funding.
- The Committee will meet periodically with Fair Housing of Central California to discuss fair housing issues and opportunities for education.
- The Committee will advocate on behalf of the Fresno County region for more grant funding for affordable housing and infrastructure improvements.
- Continue to seek partnerships with other jurisdictions in the region and other agencies (such as the Housing Authority), housing developers, community stakeholders, and agricultural employers/employees to explore viable options for increasing the availability of farmworker housing in suitable locations in the region.
- Develop a directory of services and resources for lower-income households available in the region, and review and update it annually. Make the directory available on City/County websites and at City/County offices.

Financing:	General Fund
Time Frame	Continue to meet with the Housing Element Technical Committee twice per year, meet with HCD annually. Develop a directory of services and resources by December 2025, update annually as needed.
Implementation Responsibility:	Community & Economic Development Department
Relevant Policies:	Policy 1.3, Policy 1.4, Policy 2.1, Policy 4.2

Program 2: Review Annexation Standards in Memorandum of Understanding

All jurisdictions in Fresno County are subject to the City-County Memorandum of Understanding (MOU), which establishes procedures for annexation of land to cities. The City/County MOU encourages urban development to take place within cities and unincorporated communities in an effort to preserve agricultural land. The MOU standards for annexation require that development be imminent and a minimum of 25 percent of annexation areas have an approved tentative subdivision map or site plan. While cities can take certain steps to “prezone” land in advance of annexation, the annexation of the land into the city limits is dependent upon private developers to request an annexation.

During the Housing Element planning period, the County of Fresno and the cities within the County shall work together to review and revise, as deemed appropriate by all parties, the standards for annexation contained in the Memorandum of Understanding between the County and the cities.

Financing:	General Fund
Time Frame:	Meet with the County by December 2026 to review the MOU standards, and update within a year if changes are needed
Implementation Responsibility:	City Manager
Relevant Policies:	Policy 1.1, Policy 1.2, Policy 1.3, Policy 1.4

Program 3: Homeless/Unhoused Needs

The City will cooperate with neighboring cities, the County, and other agencies in the development of programs aimed at providing homeless shelters and related services. During this coordination, the City will monitor the demographic composition of the unhoused population to identify needs for targeted resources and determine what efforts to take, such as providing education on financial assistance and programs available. The City will also support local homeless service providers, agencies, and other community organizations to pursue funding from available sources for homeless services.

Financing:	General Fund
Time Frame:	Continue to engage with the County and other agencies regularly to assist homeless persons.
Quantified Objective	Assist with program development and funding identification that will assist at least three homeless persons.

Implementation Responsibility:	Community & Economic Development Department
Relevant Policies:	Policy 1.1, Policy 1.2, Policy 4.6

Adequate Sites

Program 4: Provision of Adequate Sites

The City of Fowler will provide for a variety of housing types and ensure that adequate sites are available to meet its Regional Housing Needs Allocation (RHNA) of 339 units. As part of this Housing Element update, the City has developed a parcel-specific inventory of sites suitable for future residential development. The suitability of these sites has been determined based on the development standards in place and their ability to facilitate the development of housing to meet the needs of the City’s current and future residents, pursuant to State laws. The City will:

- Maintain and annually update the inventory of residential land resources.
- Provide the updated inventory on City website and make copies available upon request.
- Monitor the availability of sites appropriate for lower-income housing in keeping with state “no net loss” provisions (Government Code Section 65863), if development projects are approved at densities lower than anticipated in the sites inventory, and, if necessary, rezone sufficient sites to accommodate the RHNA within 180 days, ensuring that there is sufficient higher-density residential land available in areas throughout the city to deconcentrate poverty.
- Monitor and report residential development through the HCD annual report process.
- Actively participate in the development of the next RHNA Plan to better ensure that the allocations are reflective of the regional and local land use goals and policies.

Financing:	General Fund
Time Frame:	Annually monitor as projects are processed.
Implementation Responsibility:	Community & Economic Development Department
Relevant Policies:	Policy 1.1, Policy 1.2, Policy 1.3, Policy 1.4, Policy 1.5, Policy 1.6, Policy 1.7, Policy 1.8, Policy 1.9

Program 5: Water and Wastewater Service

The development viability of the vacant sites in the inventory is directly linked to the availability and capacity of public facilities and services. The City continues to work to address water supply issues and infrastructure capacity limitations.

Additionally, California Government Code Section 65589.7 requires water and sewer providers to establish specific procedures and grant priority water and sewer service to developments with units affordable to lower-income households. The statute also requires local governments to immediately deliver the housing element to water and sewer providers. The City of Fowler is the water service provider; the Selma-Kingsburg-Fowler County Sanitation District (SKF) provides sewer service in the City.

Financing:	General Fund
Time Frame:	By 2025, adopt procedures to allocate priority water and sewer service in compliance with Government Code Section 65589.7.
Implementation Responsibility:	Community & Economic Development Department, Public Works Department, and SKF
Relevant Policies:	Policy 1.7

Affordable Housing Development and Preservation

Program 6: Affordable Housing Incentives

The City continues to have needs for affordable housing for lower-income households, especially for seniors, people with disabilities (including persons with developmental disabilities), farmworkers, female-headed and single-parent households, persons experiencing homelessness, and extremely low-income households. The City will continue to work with housing developers to expand affordable housing opportunities by doing the following:

- Continue to seek partnerships and meet at least every other year with other agencies (such as the Housing Authority), housing developers, community stakeholders, and employers to discuss and pursue viable opportunities for providing affordable housing, with an emphasis on housing opportunities for very low- and extremely low-income households, as well as special-needs populations, such as seniors, persons with disabilities (including developmental disabilities), farmworkers, female-headed and single-parent households, persons experiencing homelessness, and extremely low-income households. Meet more frequently if development rates increase.
- Work with public or private sponsors to identify candidate sites for new construction of housing for special needs and take all actions necessary to expedite processing of such projects.
- Continue to offer fee reductions and deferral of development impact fee payments to facilitate affordable housing development and special-needs projects, particularly those on infill sites.
- Continue to promote the State density bonus and provide streamlined processing to facilitate affordable housing development and provide for additional flexibility for affordable housing and special-needs housing through the minor deviation process. The City will promote this

program by publicizing the incentives on the City website and by conducting pre-application consultation with developers regarding available incentives. Examples of flexible development standards include reduced parking requirements; reduced requirements for curb, gutter, and sidewalk construction; common trenching for utilities; and reduced water and wastewater connection fees.

- Consider incentives for builders to provide housing with multiple bedrooms affordable to lower- and moderate-income households to meet the needs of female-headed, single-parent, and large-family households of all income levels. Possible incentives may include reduced setbacks, reduced parking requirements, and technical assistance with applications for funding.
- Continue to streamline the environmental review process for housing developments to the extent possible, using available State categorical exemptions and federal categorical exclusions, when applicable.
- Monitor HCD's website annually for Notices of Funding Ability (NOFA) and, where appropriate, prepare or support applications for funding for affordable housing for lower-income households (including extremely low-income households), such as seniors, disabled (including persons with developmental disabilities), the homeless, and those at risk of homelessness.
- Facilitate the approval process for land divisions, lot line adjustments, and/or specific plans or master plans resulting in parcel sizes that enable affordable housing development and process fee deferrals related to the subdivision for projects affordable to lower-income households.
- Work with developers of multifamily and affordable housing projects to identify site opportunities in higher-resource areas and areas with higher median incomes to reduce concentrations of poverty and improve access to resources.

Financing:	HOME, CDBG, Successor Agency funds, LIHTC, Multi-Family Housing Revenue Bond, and other funding sources as available
Time Frame:	Ongoing, as projects are processed by the City. Annually apply for funding.
Implementation Responsibility:	Community & Economic Development Department
Quantified Objective:	Expand the City's affordable housing inventory by 13 units over the next eight years – 1 extremely low-income, 1 very low-income, 3 low-income, and 8 moderate-income units.
Relevant Policies:	Policy 1.2, Policy 2.1, Policy 2.2, Policy 2.3, Policy 2.4, Policy 2.5, Policy 2.6, Policy 2.7, Policy 4.3, Policy 4.4, Policy 5.2

Program 7: Support Funding for Farmworker Housing

The farming industry is the foundation of the County's economy base. According to the United States Department of Agriculture (USDA) 2017 Census of Agriculture, about 37,819 workers were employed in farm labor throughout the county, indicating a significant need to provide housing for farmworkers and their families, particularly during peak harvest seasons.

The City will engage with housing developers in the application of funds for farmworker housing, including HCD and USDA Rural Development loans and grants and other funding sources that may become available. The City will also continue to offer incentives such as density bonuses, streamlined processing, and the minor deviation process to facilitate development of farmworker housing.

The City will annually monitor the status of farmworker housing as part of their annual report to HCD on Housing Element progress and evaluate if City efforts are effective in facilitating the provision of farmworker housing. If appropriate, the City will make necessary changes to enhance opportunities and incentives for farmworker housing development.

Financing:	General Fund
Time Frame:	Continue to engage with farmworker housing developers and advocates on a biannual basis to discuss their needs and offer assistance in the form of letters of recommendation for grant applications, assistance with site identification and grant opportunities, and discuss incentives for constructing farmworker housing.
Implementation Responsibility:	Community & Economic Development Department
Quantified Objective:	10 lower-income units set aside for farmworkers and their families to reduce displacement risk for this population.
Relevant Policies:	Policy 1.2, Policy 2.1, Policy 2.2, Policy 2.4, Policy 2.5, Policy 4.2, Policy 4.3

Program 8: Farmworker Preference in New Affordable Housing

For new affordable housing projects developed with City assistance, incentives, and/or subject to City requirements, the City will require that the developer give qualified farmworker households a preference for 15 percent of the new units. Should demand from farmworker households be insufficient to fill the set-aside units, then the units will be made available to other qualified households. The City will annually reach out to affordable housing developers to gather interest and input on how to best implement this program and will provide information on available funding.

Financing:	General Fund, CDBG, HOME, USDA Rural Development
Time Frame:	Ongoing, as projects are processed; annually reach out to developers and determine next steps within six months.
Implementation Responsibility:	Community & Economic Development Department
Quantified Objective:	20 lower-income units set aside for farmworkers or other qualified households to reduce displacement risk.
Relevant Policies:	Policy 1.2, Policy 2.1, Policy 4.2, Policy 4.3

Program 9: Extremely Low-Income Households

Assembly Bill (AB) 2634 requires the quantification and analysis of existing and projected housing needs of extremely low-income households. To support the development or rehabilitation of single-room occupancy (SR) units and/or other units affordable to extremely low-income households, such as supportive and multifamily units, the City will continue to seek and pursue state and federal funds to offer a variety of incentives or concessions, such as:

- Provide financial support annually, as available, to organizations that provide counseling, information, education, support, housing services/referrals, and/or legal advice to extremely low-income households, to mitigate risk of displacement and support housing stability for extremely low-income households, persons with disabilities, farmworkers, and persons experiencing homelessness.
- Expand regulatory incentives for the development of units affordable to extremely low-income households and housing for special-needs groups, including persons with disabilities (including developmental disabilities), and individuals and families in need of emergency/transitional housing.
- Encourage the provision of affordable housing for young adults, particularly former foster youth and young mothers, through planning consultations, streamlined permit processing, and funding assistance. Establish provisions to permit SRO facilities, transitional and supportive housing, and other special housing arrangements.

Financing:	General Fund, CDBG, HOME
Time Frame:	Ongoing, as projects are processed. By December 2024, conduct outreach to organizations that support extremely low-income residents to understand funding needs, and review and prioritize local funding at least twice in the planning period, and support expediting applications on an ongoing basis.

Implementation Responsibility:	Community & Economic Development Department
Quantified Objective:	151 lower-income units, including 15 units for extremely low-income households to prevent displacement and provide housing mobility opportunities.
Relevant Policies:	Policy 1.2, Policy 2.1, Policy 4.2, Policy 4.6

Program 10: Preservation of At-Risk Housing Units

Preserving the existing affordable housing stock is a cost-effective approach to providing affordable housing in Fowler. The City must guard against the loss of housing units available to lower-income households. As of October 2022, there are no affordable units considered at risk of conversion to market rate in the next 10 years. The City has a total of 143 publicly assisted rental units in three projects. No publicly assisted rental housing units are considered at risk of converting to market-rate housing before December 31, 2031. For complexes at risk of converting to market rate, the City shall:

- Contact property owners of units at risk of converting to market-rate housing within one year of affordability expiration to discuss the City’s desire to preserve complexes as affordable housing.
- Coordinate with owners of expiring subsidies to ensure the required notices to tenants are sent out at 3 years, 12 months, and 6 months.
- Reach out to agencies interested in purchasing and/or managing at-risk units.
- Work with tenants to provide education regarding tenant rights and conversion procedures pursuant to California law.

Financing:	General Fund, LIHTC, Multifamily Housing Revenue Bond, and other funding sources as available.
Time Frame:	Annually monitor units at risk of converting; coordinate noticing as required per California law.
Implementation Responsibility:	Community & Economic Development Department
Relevant Policies:	Policy 3.6

Program 11: Encourage and Facilitate Accessory Units

An accessory dwelling unit (ADU), sometimes called a “granny flat,” is an additional self-contained living unit either attached to or detached from the primary residential unit on a single lot. It has cooking, eating, sleeping, and full sanitation facilities. ADUs can be an important source of affordable housing given that

they typically are smaller and have no associated land costs. The City will encourage the construction of ADUs, particularly in predominantly single-family neighborhoods with higher median incomes. The City will:

- By 2024, implement a public education program advertising the opportunity for ADUs by updating informational handouts and brochures about ADUs that are available on the City’s website and at the public counter annually, or as needed to reflect changes in State law.
- Provide informational materials on ADU opportunities to all discretionary land use applicants.
- At least annually, publish informational materials pertaining to ADUs through a combination of media, including the City’s social media accounts and direct mailing.
- By December 2025, provide resources for ADU standard plans to developers for their use in the City.
- By December 2024, identify incentives for construction of ADUs with new development, which may include differing collection times for impact fees for the square footage associated with the ADU.

Financing:	General Fund
Time Frame:	Update ADU materials annually, or as needed to reflect changes in State law, and identify incentives for construction by December 2024.
Implementation Responsibility:	Community & Economic Development Department
Quantified Objective:	2 ADUs for lower-income households, 3 for moderate-income households, and 2 for above moderate-income households to improve housing mobility opportunities and reduce displacement risk.
Relevant Policies:	Policy 1.3, Policy 2.1, Policy 2.6

Program 12: Replacement Units

To reduce displacement risk and in accordance with California Government Code Section 65583.2(g), the City will require replacement housing units subject to the requirements of California Government Code Section 65915(c)(3) on sites identified in the sites inventory when any new development (residential, mixed-use, or nonresidential) occurs on a site that has been occupied by or restricted for the use of lower-income households at any time during the previous five years.

This requirement applies to:

- Non-vacant sites;
- Vacant sites with previous residential uses that have been vacated or demolished.

Financing:	General Fund
Time Frame:	Ongoing, the replacement requirement will be implemented immediately and applied as applications on identified sites are received and processed.
Implementation Responsibility:	Community & Economic Development Department
Relevant Policies:	Policy 3.3, Policy 3.6

Program 13: Housing for a Variety of Needs

The City will encourage a variety of housing types to address the housing needs of a variety of household types, sizes, and incomes. This could include duplexes, townhomes, apartment buildings, and condominiums in neighborhoods and new subdivisions and will identify innovative and alternative housing options that provide greater flexibility and affordability in the housing stock while promoting mixed-income development. This may include consideration for further reduction in regulatory barriers for community land trusts, tiny houses, microhomes, cottage homes, small lot subdivisions, and other alternative housing types, as well as exploration of a variety of densities and housing types in all zoning districts.

The City will use the findings of this program to target development of a variety of housing types in areas of predominantly single-family development and of concentrated overpayment to reduce displacement risk, promote inclusion, and support integration of housing types based on income.

Financing:	General Fund
Time Frame:	Identify innovative and alternative housing options to help further housing production by December 2025; amend the Zoning Ordinance as needed.
Implementation Responsibility:	Community & Economic Development Department
Quantified Objective:	8 lower-income units, 8 moderate-income units, and 3 above moderate-income units to reduce displacement risk for all residents and facilities in income-integrated neighborhoods.
Relevant Policies:	Policy 1.2, Policy 2.1, Policy 4.4

Removal of Governmental Constraints

Program 14: Zoning Ordinance Amendments

- In compliance with State laws, the City will amend its Zoning Ordinance to address the provision of a variety of housing options, especially housing for special needs groups. Specifically, the City will amend the Zoning Ordinance to address the following:
 - **Density Bonus:** Consistent with Government Code, a density bonus up to 100 percent over the otherwise maximum allowable residential density under the applicable zoning district will be available to developers who provide affordable housing as part of their projects. Developers of affordable housing will also be entitled to receive incentives on a sliding scale to a maximum of three, where the amount of density bonus and number of incentives vary according to the amount of affordable housing units provided.
 - **Emergency Shelters:** Develop managerial standards for emergency shelters and allow sufficient parking to accommodate all staff working in the emergency shelter, provided that the standards do not require more parking for emergency shelters than other residential or commercial uses within the same zone, in compliance with Government Code Section 65583(a)(4)(A)(ii)). Additionally, allow residential uses by-right in zones that allow emergency shelters without a conditional use permit or other discretionary permit pursuant to Government Code Section 65583(a)(4).
 - **Low-Barrier Navigation Centers:** Permit low-barrier navigation centers, defined as low-barrier, temporary service-enriched shelters to help homeless individuals and families to quickly obtain permanent housing by-right in zones where mixed uses are allowed or in nonresidential zones that permit multifamily housing (Government Code Section 65662; AB 101).
 - **Residential Care Facilities:** Update the Zoning Ordinance to comply with the Lanterman Act and allow group homes for six or fewer persons in all residential zones. The Zoning Ordinance also needs to make provisions for large residential care facilities for more than six persons.
 - **Farmworker/Employee Housing:** Comply with the Employee Housing Act which requires farmworker housing up to 12 units or 36 beds be considered an agricultural use and permitted in any zone that permits agricultural uses, and employee housing for six or fewer employees to be treated as a single family structure and permitted in the same manner as other dwellings of the same type in the same zone.
 - **Reasonable Accommodation:** Establish a reasonable accommodation procedure to provide flexibility in policies, rules, and regulations in order to allow persons with disabilities access to housing.
 - **Definition of Family:** Remove the definition of family in the Zoning Ordinance, or amend the definition to ensure it does not differentiate between related and unrelated individuals, or impose a numerical limit on the number of persons in a family.
 - **Single-Room Occupancy (SRO) Housing:** Amend the Zoning Ordinance to address the provision of SRO housing.

- **Transitional and Supportive Housing:** Permit transitional housing and supportive housing as residential uses only subject to those restrictions that apply to other residential dwellings of the same type in the same zone (Government Code Section 65583(a)(5)). Additionally, allow supportive housing in multifamily and mixed-use zones (Government Code Section 65651).
- **Manufactured Housing:** Update the Zoning Ordinance to permit manufactured homes in a manner consistent with single family housing.

Financing:	General Fund
Time Frame:	Complete remaining Zoning Ordinance amendments by December 2024. Annually review the effectiveness and appropriateness of the Zoning Ordinance and process any necessary amendments to remove or mitigate potential constraints to the development of housing.
Implementation Responsibility:	Community & Economic Development Department
Relevant Policies:	Policy 1.1, Policy 2.7, Policy 5.2

Program 15: Reasonable Accommodations and Universal Design

The City will develop and formalize a general process that a person with physical and developmental disabilities can use to make a reasonable accommodation request to accommodate the needs of persons with disabilities and streamline the permit review process. The City will provide information to individuals with disabilities regarding reasonable accommodation policies, practices, and procedures based on the guidelines from HCD. This information will be available through postings and pamphlets at the public counter and on the City's website.

The City will also implement State requirements (Sections 4450 to 4460 of the California Government Code and Title 24 of the California Code of Regulations) to include accessibility in housing and public facilities for persons with disabilities:

- Encourage housing developers to include mobility-impaired accessibility in their project designs and prioritize these types of projects to increase housing mobility opportunities for seniors and persons with disabilities.
- Review regulations and procedures for City-funded or operated housing programs to ensure that they do not exclude participation by persons with disabilities.
- Include accessibility considerations in the preparation of the City's capital improvement plan and the allocation of funding for capital improvements in support of housing and residential neighborhoods for persons with physical or developmental disabilities.

Financing:	General Fund, SB 2 Grant Funding, LEAP Grant Funding
Time Frame:	Develop and adopt a reasonable accommodations ordinance by December 2024; create brochures on universal design and the reasonable accommodations ordinance by July 2025 and update biannually, or as needed.
Implementation Responsibility:	Community & Economic Development Department
Quantified Objective:	Assist two residents with reasonable accommodation requests to reduce displacement risk and encourage one accessible unit to improve housing mobility.
Relevant Policies:	Policy 4.1, Policy 4.5

Program 16: Lot Consolidation

To create additional opportunities for infill development and affordable housing, the City will help to facilitate lot consolidations to combine small lots identified as part of a larger site in the Housing Element into larger developable lots for housing. The City will meet with local developers and property owners to discuss development opportunities and incentives for lot consolidation to accommodate affordable housing units and consider additional incentives brought forth by developers. By 2026, the City will review the effectiveness of this program and revise as appropriate. The City will also evaluate grant funding for parcel assemblage land banking when it is available.

Financing:	General Fund (legislative efforts); Grant funding (implementation)
Timeframe:	Meet with developers and property owners starting in 2024 and annually thereafter. Based on the meetings with developers and property owners, add incentives as appropriate. Provide ongoing support for lot consolidation as applicable housing applications are received. Pursue grant funding during planning period if California legislation and/or programs enable a tax-increment or similar program that leads to funding for site assembly.
Implementation Responsibility:	Community & Economic Development Department
Relevant Policies:	Policy 1.1, Policy 1.2, Policy 1.4, Policy 1.5, Policy 2.4
Quantified Objective:	By December 2025 staff will have conducted an inventory of possible sites that could be merged and reached out to those property owners.

Program 17: Monitoring of Planning and Development Fees

The City charges various fees to review and process development applications. Such fees may add to the cost of housing development. The City will analyze housing-related development fees, particularly for multifamily housing, on an annual basis to ensure they do not unduly constrain development. As part of the analysis process, meet with multifamily developers at least once by December 2024 to request input regarding constraints associated with fees. Based on feedback received, reduce fees if found to be a constraint. Further, the City will offer deferred or reduced fees to facilitate affordable housing development, as appropriate.

Financing:	General Fund
Time Frame:	Meet with multifamily developers by December 2024 and revise fees, if necessary, by December 2025. Review fees annually.
Implementation Responsibility:	Community & Economic Development Department
Quantified Objective:	Facilitate construction of 40 multifamily units during the planning period, targeting missing-middle development in higher-resource areas and encouraging at least 15 of the units to be affordable to lower-income households.
Relevant Policies:	Policy 1.2, Policy 1.4

Program 18: Preliminary Applications (SB 330) and Streamlined Approval (SB 35)

The City will develop a preliminary application form and procedure or will adopt the Preliminary Application Form developed by HCD, pursuant to SB 330. The City will also establish a written policy and/or procedure, and other guidance as appropriate, to specify the SB 35 streamlining approval process and standards for eligible projects under Government Code Section 65913.4. The applications will be available on the City's website for developers interested in pursuing the streamlined process or vesting rights.

Financing:	General Fund
Time Frame:	Develop or adopt HCD's SB 330 preliminary application form by December 2024. Develop an SB 35 streamlined approval process by June 2025 and implement as applications are received.
Implementation Responsibility:	Community & Economic Development Department

Quantified Objective:	Facilitate construction of 3 very low-income units and 3 low-income units to increase housing mobility opportunities, prioritizing new opportunities in higher-resource areas.
Relevant Policies:	Policy 1.4, Policy 2.3, Policy 2.4

Program 19: Objective Design Standards

The City will develop objective design guidelines and standards to provide clear and objective standards related to single-family, multifamily, and mixed-use residential developments.

Financing:	General Fund
Time Frame:	Adopt objective design standards by December 2025 and implement thereafter.
Implementation Responsibility:	Community & Economic Development Department
Relevant Policies:	Policy 1.8, Policy 2.7

Housing Quality

Program 20: Housing and Rental Rehabilitation Programs

The City of Fowler does not participate in either of Fresno County's rehabilitation programs (Fresno County Housing Assistance Rehabilitation Program and Fresno County Rental Rehabilitation Program). These programs provide funding for eligible improvements, including energy-efficiency upgrades and installations, health and safety and hazard corrections, and accessibility modifications to reduce displacement risk and facilitate place-based revitalization. The City will identify opportunities to facilitate unit rehabilitation in Fowler through participation in regional programs or the establishment of local programs that provide similar benefits.

Financing:	CDBG and HOME funds
Time Frame:	Identify opportunities for rehabilitation programs by 2025.
Implementation Responsibility:	Community & Economic Development Department
Relevant Policies:	Policy 3.2, Policy 4.1

Program 21: Code Enforcement

The City's Community & Economic Development Department is in charge of enforcing the City's building codes with the objective of protecting the health and safety of residents. The City will continue to utilize code enforcement and substandard abatement processes to bring substandard housing units and residential properties into compliance with City codes.

Financing:	General Fund
Time Frame:	Make informational materials on rehabilitation assistance programs available by January 2025, to be provided on an ongoing basis when violations are confirmed, conduct code enforcement as complaints are received.
Implementation Responsibility:	Community & Economic Development Department
Quantified Objective	Pursue funding from state and federal programs to reinstate the City's Home Improvement Grant program (suspended with the dissolution of the Redevelopment Agency) with the goal of assisting 5 households over the planning period (1 very low-income, 1 low-income, and 3 moderate-income households).
Relevant Policies:	Policy 3.1, Policy 3.3

Housing Assistance

Program 22: First-Time Homebuyer Resources

Fowler residents have access to a number of homebuyer assistance programs offered by the California Housing Finance Agency (CalHFA):

- **Mortgage Credit Certificate (MCC):** The MCC Tax Credit is a federal credit which can reduce potential federal income tax liability, creating additional net spendable income which borrowers may use toward their monthly mortgage payment. This MCC Tax Credit program may enable first-time homebuyers to convert a portion of their annual mortgage interest into a direct dollar for dollar tax credit on their U.S. individual income tax returns.
- **CalPLUS Conventional Program:** This is a first mortgage loan insured through private mortgage insurance on the conventional market. The interest rate on the CalPLUS Conventional is fixed throughout the 30-year term. The CalPLUS Conventional is combined with a CalHFA Zero Interest Program (ZIP), which is a deferred-payment junior loan of three percent of the first mortgage loan amount, for down payment assistance.

- **CalHFA Conventional Program:** This is a first mortgage loan insured through private mortgage insurance on the conventional market. The interest rate on the CalHFA Conventional is fixed throughout the 30-year term.

CalHFA loans are offered through local loan officers approved and trained by CalHFA.

The City will promote all available homebuyer resources on the City's website and at public counters and will annually review funding resources available at the state and federal levels and pursue as appropriate to provide homebuyer assistance.

Financing:	CalHFA
Time Frame:	Ensure informational materials on all homebuyer resources are on the City's website and available at public counters by June 2024. Update materials annually, or as new information is provided by the County, and send out targeted promotion at least every other year.
Implementation Responsibility:	Community & Economic Development Department
Quantified Objective:	Connect 20 prospective homebuyers with the County program to facilitate housing mobility opportunities in the city.
Relevant Policies:	Policy 2.1, Policy, 2.4, Policy 2.5, Policy 2.8

Program 23: Energy Conservation

- The City promotes energy conservation in housing development and rehabilitation. The City will continue to promote and support Pacific Gas and Electric Company (PG&E) programs that provide energy efficiency rebates for qualifying energy-efficient upgrades by providing a link to PG&E programs on City website and make available brochures about PG&E programs at City counters. Additionally, the City will expedite review and approval of alternative energy devices, such as solar panels.

Financing:	General Fund
Time Frame:	Make information easily available on the City's website and at public facilities by June 2025.
Implementation Responsibility:	Community & Economic Development Department

Quantified Objective:	Assist five low-income residents annually in need of assistance with energy-efficiency improvements to reduce displacement risk due to housing costs.
Relevant Policies:	Policy 6.1, Policy 6.2, Policy 6.3

Program 24: Housing Choice Vouchers

The Housing Choice Voucher (HCV) Program extends rental subsidies to extremely low- and very low-income households, including families, seniors, and the disabled. The program offers a voucher that pays the difference between the current fair market rent (FMR) as established by the HUD and what a tenant can afford to pay (i.e. 30 percent of household income). The Fresno Housing Authority administers the housing choice voucher program in Fresno County. The City will:

- Provide information on the HCV program on City website and public counters.
- Refer interested households to the Fresno Housing Authority and encourage landlords to register their properties with the Housing Authority for accepting HCVs.
- Work with the Housing Authority to disseminate information on incentives for participating in the HCV program throughout the City neighborhoods with varying income levels to promote housing opportunities for all residents.
- Meet with the Fresno Housing Authority by June 2024 to discuss the process of developing printed informational materials, with the goal of making materials available at public counters by June 2025.

Financing:	HUD Section 8
Time Frame:	Provide information on the City's website by February 2024. Meet with the Housing Authority by June 2024 and develop informational materials by June 2025. Target outreach to property owners and landlords at least annually.
Implementation Responsibility:	Fresno Housing Authority and Community & Economic Development Department
Quantified Objective:	25 lower-income units in high-opportunity areas to promote access to resources and mobility for target households.
Relevant Policies:	Policy 2.2

Program 25: Housing Discrimination Monitoring and Referral

The Fresno Housing Authority publicizes all information related to housing opportunities, programs fair-housing information and assistance in English, Spanish, Hmong, French, German, Chinese, Arabic, Dutch, Italian, Korean, Portuguese, and Russian. However, while all public notices and information on the Housing Authority website are translated to all of the previously mentioned languages, general circulation of

information and secondary links, such as applications, are available only in English. The City will coordinate with the Housing Authority, Fresno Council of Governments (FCOG), and other Fresno County jurisdictions to encourage the development of Spanish-language printed materials to improve accessibility to fair housing resources for residents. If additional languages become more prevalent in the county, materials will be translated into those languages as needed.

The City will also:

- Establish a procedure to refer residents with fair housing questions or issues to the Fair Housing Council of Central Valley (FHC-CC), California Rural Legal Aid (CLRA), and other fair housing organizations.
- Provide fair housing information on the City’s website and in printed materials available in public buildings in both English and Spanish.
- Coordinate with Fresno Housing Authority to encourage the production of promotional materials in Punjabi.
- Encourage local fair housing service providers to conduct biannual trainings for landlords and tenants on fair housing laws, rights, and responsibilities and ongoing access to legal counseling.

Financing:	General Fund, grant funding
Time Frame:	Either individually or as part of the Countywide Housing Element Technical Committee (Program 1), meet annually with FHC-CC to discuss fair housing issues and opportunities for education. Make fair housing information available on the City’s website and in public buildings by June 2025.
Implementation Responsibility:	Community & Economic Development Department, Fresno Housing Authority
Quantified Objective:	Reduce displacement risk for 5 individuals or families resulting from language barriers and 3 from discrimination by landlords or property owners.
Relevant Policies:	Policy 5.1

Program 26: Improve Access to Resources

The City shall take the following actions to improve access to resources and opportunities citywide, but with a particular emphasis on neighborhoods with a concentration of lower-income residents who often face additional barriers in accessing resources:

- Work with Fresno County Rural Transit Agency (FCRTA) and other jurisdictions in the county to develop a fact sheet, or similar informational materials, of FCTA programs to be posted on the City’s website, social media, and in public buildings by January 2026, and advertised annually in

the City’s newsletter to help connect seniors and other residents to services in the city and throughout the county.

- Prioritize projects that facilitate place-based revitalization through the City’s Capital Improvement Plan, such as projects that improve public infrastructure in deteriorating or underserved areas.
- Post information about flood-related resources on the City’s website.
- Ensure program availability and funding announcements are made available in Spanish and translation is available at public meetings.
- Facilitate place-based revitalization and promote healthy environments for new housing by evaluating transitional buffers between residential and agricultural uses and highways and working with developers as projects are proposed to mitigate impacts associated with emissions from agricultural industries and traffic and facilitate access to healthy outdoor spaces.
- Meet with school district representatives by June 2025 to analyze whether housing security poses a barrier. Work with the school district to assist in securing grant funding for teacher recruitment and retention bonuses, classroom materials, and other incentives for teachers to facilitate positive learning environments citywide.

Financing:	General Fund
Time Frame:	Refer to each bulleted action for specific timeframes.
Implementation Responsibility:	Community & Economic Development Department
Quantified Objective:	Improve access to resources and reduce displacement risk resulting from a variety of factors for at least 8 residents.
Relevant Policies:	Policy 3.1, Policy 3.5, Policy 5.1, Policy 5.2

Quantified Objectives

The Housing Element must contain quantified objectives for the maintenance, preservation, improvement, and development of housing. The quantified objectives set a target goal to achieve based on needs, resources, and constraints. Table 1D-1 shows the quantified objectives for the 2023-2031 Housing Element planning period. These quantified objectives represent targets. They are not designed to be minimum requirements. They are estimates based on past experience, anticipated funding levels, and expected housing market conditions.

Table 1D-1 Summary of Quantified Objectives, 2023-2031

Program	Extremely Low	Very Low	Low	Moderate	Above Moderate
RHNA	15	94	57	47	141

Program	Extremely Low	Very Low	Low	Moderate	Above Moderate
New Construction					
Program 6 – Affordable Housing Incentives	1	1	3	8	
Program 9 – Extremely Low Income Households	15	94	57		
Program 11 – Encourage and Facilitate Accessory Units			2	3	2
Program 13 – Housing for a Variety of Needs			8	8	3
Program 17 – Monitoring of Planning and Development Fees			15	25	
Program 18 – Preliminary Applications and Streamlined Approval		3	3		
Rehabilitation					
Program 21 – Code Enforcement		1	1	3	
Conservation					
Program 23 – Energy Conservation			5		
Program 24 – Housing Choice Voucher			25		

Note: In some cases, quantified objectives overlap and therefore identify multiple strategies to achieve the RHNA.

SECTION 1D-2: SITES INVENTORY

Fifth Cycle Housing Element - AB 1233 RHNA Carryover Analysis

AB 1233 was signed into law on October 5, 2005, and applies to housing elements due on or after January 1, 2006. Specifically, the law states that if a jurisdiction fails to provide adequate sites in the prior planning period, within one year of the new cycle, the jurisdiction must rezone/upzone adequate sites to accommodate the shortfall. This requirement is in addition to rezoning/upzoning that may be needed to address the Regional Housing Needs Allocation (RHNA) for the new cycle.

This law affects the City of Fowler's 2023-2031 Housing Element, requiring the City to address its deficit in sites, if any, for the previous housing element cycle (2015-2023).

The potential AB 1233 penalty will be equal to the portion of RHNA not accommodated either through actual housing production or land made available for residential development within each income category. To determine any potential penalty, the analysis in this Housing Element uses the following approach outlined by HCD:

- Step 1: Subtracting the number of housing units constructed, under construction, permitted, or approved since January 1, 2015 by income/affordability level; and
- Step 2: Subtracting the number of units that could be accommodated on any appropriately zoned sites available in the city during the RHNA cycle.

In the previous planning period (fifth cycle), the RHNA assigned to the City of Fowler was 524 units (206 low-income, 75 moderate-income, and 243 above moderate-income units). The 2015-2023 Fowler Housing Element identified a surplus capacity of 849 units. The City of Fowler provided enough adequate sites within the City's 5th Cycle Housing Element. As a result, the City is not required to complete a carry-over analysis for its 6th Cycle Housing Element.

Sixth Cycle Housing Element RHNA Analysis

For the sixth cycle Housing Element update, Fowler has been assigned a RHNA of 339 units, including 94 very low-income units, 57 low-income units, 47 moderate-income units, and 141 above moderate-income units.

The sites inventory uses the following assumptions:

- ***Relation of density to income categories.*** The following assumptions were used to determine the income categories according to the allowed densities for each site:

Lower-income Sites. Sites that allow at least 16 units per acre were inventoried as feasible for lower-income (low- and very low-income) residential development in accordance with the market-based analysis included in this housing element. This includes sites with the following zoning:

- Sites that are Multi-Family Residential (RM-3, RM-3-A) (up to 21.8 units per acre);
- Sites that are zoned Neighborhood Commercial (C-1) and Community Commercial (C-2) (up to 21.8 units per acre); and
- Sites that are zoned Form Based Code Area (FBC) (up to 21.8 units per acre).

Moderate-Income Sites. Sites that are zoned Residential Medium (RM-2) allow for a density range of 5.6 to 13.5 dwelling units per net acre. Typical dwelling units include small apartments and other attached units. These areas were inventoried as feasible for moderate-income residential development.

Above Moderate-Income Sites. All other sites, which allow only single-family homes at lower densities, were inventoried as above moderate-income units (R-1 zones).

- ***Realistic Development Potential.*** The inventory assumes buildout of 80 percent of the maximum permitted density for all sites. This estimate is fairly consistent with suburban development and the City's development standards are not considered excessive. Furthermore, the City's FBC zone is specifically designed to provide flexibility and facilitate the efficient use of land by offering incentives such as off-site and shared parking options. Multi-family development in the RM and FBC zones can also exceed 21.8 units per acre with the approval of a CUP. Using an average density at 80 percent of maximum allowable density actually represents less than the mid-range density of each zone.

RHNA Summary

Table 1D-2 provides a summary of Fowler's ability to meet the 2023-2031 RHNA. The total RHNA for the 2023-2031 RHNA is 339 units, including 94 very-low-income units, 57 low-income units, 47 moderate-income units, and 141 above moderate-income units. After accounting for units built or under construction, planned and approved projects, and capacity on vacant sites, Fowler has a surplus capacity of 25 units. Residential potential on vacant RM, Commercial, and FBC properties is sufficient to meet the City's lower-income RHNA. Therefore, the City's sites inventory is more than adequate to accommodate the City's RHNA for this Housing Element planning period without including units built or under construction or planned and approved projects.

Table 1D-2 RHNA Summary, Fowler, December 2023

	Units by Income Level				Total Units
	ELI/VLI	LI	M	AM	
2023-2031 RHNA	94	57	47	141	339
Units Built or Under Construction	--	--	--	--	--
Planned or Approved Projects (Table 2D-4)	--	--	--	--	--
Capacity on Vacant Sites (Table 2D-2)	162		57	145	364
Surplus Capacity ¹	-11		-10	-4	-25

¹ Surplus Capacity is calculated by subtracting capacity on vacant sites and capacity on prezoned sites from the total RHNA.

FIGURE 1D-1 FOWLER SITES INVENTORY

SECTION 2D-6: LOCAL ASSESSMENT OF FAIR HOUSING

This page is intentionally left blank.

Availability of Infrastructure and Services

The City of Fowler provides water services to residents and businesses in the City. Fowler is served by six groundwater wells for its domestic water supply and is equipped with a network of mains, pipelines, and laterals that help to distribute water throughout the service area. An additional well is currently offline and another well is planned to open on the west side of State Route 99. The City has planned for a two percent increase in water supplies, which aligns with historical growth trends within the City. Although the projected water supply is sufficient to meet this two percent growth in demand, it is not sufficient for the full buildout of the General Plan by its planning horizon in 2040. To address this, goals, policies, and action items included in the General Plan ensure the necessary improvements to infrastructure. The City has infrastructure and planning procedures in place to ensure the service levels needed for future development during normal, dry, and multiple dry years is sufficient.

The Selma-Kingsburg-Fowler County Sanitation District (SKF), a Joint Power Authority, provides sewer service to the City of Fowler as well as to the Cities of Kingsburg and Selma. According to the District Engineer, the SKF treatment plant has a capacity of 8.0 (mgd) with existing flows of 4.2 mgd (52.5 percent of capacity). By 2026, the SKF Capital Improvement Program (CIP) projects total flow at 5.71 mgd (71 percent of capacity). Fowler has 2,061 residential units as of January 1, 2019. In 2025, if flow ratios from the three cities remain constant, SKF will have capacity for approximately 2,725 residential units in Fowler, significantly higher than the RHNA allocations for Fowler during the Housing Element period. At full capacity to 8.0 mgd, SKF would have capacity for an estimated 3,840 residential units in Fowler which is sufficient to meet the 6th Cycle RHNA.

Expansion plans for a wastewater treatment plant are generally required by the Regional Water Quality Control Board when 70 percent of design capacity is reached. This threshold is not expected at the SKF plant until after 2025. The District, however, is updating its Master Plan to include provisions for long-term expansion and will make interim improvements (refurbishing aerators, basin improvements, fleet replacements, etc.) in conformance with the 10-year CIP.

SECTION 1D-3: LOCAL ASSESSMENT OF FAIR HOUSING

Introduction

Assembly Bill (AB) 686 requires that all housing elements due on or after January 1, 2021, contain an Assessment of Fair Housing (AFH) consistent with the core elements of the analysis required by the federal Affirmatively Furthering Fair Housing (AFFH) Final Rule of July 16, 2015. Under California law, AFFH means “taking meaningful actions, in addition to combating discrimination, that overcome patterns of segregation and foster inclusive communities free from barriers that restrict access to opportunity based on protected characteristics.”⁷

California Government Code Section 65583 (10)(A)(ii) requires local jurisdictions to analyze racially or ethnically concentrated areas of poverty (R/ECAP), disparities in access to opportunity, and disproportionate housing needs, including displacement risk. Although this is the Housing Element for the City of Fowler, Government Code Section 65583(c)(10) requires all local jurisdictions to address patterns locally and regionally to compare conditions at the local level to the rest of the region. To that end, a Multijurisdictional Housing Element was completed for the cities of Firebaugh, Fowler, Fresno, Huron, Kerman, Kingsburg, Mendota, Orange Cove, Parlier, Reedley, San Joaquin, Sanger, Selma, and the County of Fresno, including a regional AFH and each participating jurisdiction prepared a local AFH.

This section is organized by fair housing topics. For each topic, the regional assessment is first, followed by the local assessment. Strategies to address the identified issues are included throughout the section. Through discussions with housing service providers, fair housing advocates, and preparation of this AFH, the City of Fowler identified factors that contribute to fair housing issues. These contributing factors are included in **Table 1D-11 Factors Contributing to Fair Housing Issues**, with associated actions to meaningfully affirmatively further fair housing related to these factors. Additional programs to affirmatively further fair housing are included in **Section 2D-1, Action Plan**.

This section also includes an analysis of the Housing Element’s sites inventory as compared with fair housing factors. The location of housing in relation to resources and opportunities is integral to addressing disparities in housing needs and opportunity and to fostering inclusive communities where all residents have access to opportunity. This is particularly important for lower-income households. AB 686 added a new requirement for housing elements to analyze the distribution of projected units by income category and access to high-resource areas and other fair housing indicators compared to citywide patterns to understand how the projected locations of units will affirmatively further fair housing.

⁷California Department of Housing and Community Development, *Affirmatively Furthering Fair Housing: Guidance for All Public Entities and for Housing Elements (April 2021 Update)*, April 27, 2021, preface page, https://www.hcd.ca.gov/community-development/affh/docs/affh_document_final_4-27-2021.pdf

Outreach

The City of Fowler completed a public outreach effort at the local and regional level as part of the regional Fresno County Multi-Jurisdictional Housing Element effort. Public outreach activities are discussed in more detail in 1D-6: Public Outreach and Engagement, but generally efforts included:

- Maintaining a regional project website;
- Conducting stakeholder consultations and focus groups;
- Hosting study sessions with Planning Commission, City Council, and the County Board of Supervisors; and
- Organizing community workshops.

Community Events

On August 24, 2022, the City had a booth at the regular Wednesday Nights at the Park event held at Panzak Park in Fowler. The City promoted the community event through social media pages, emails to stakeholders, and distribution of information through the FCOG email listserv and the Fresno Housing Authority to residents of affordable housing. The Fowler Unified School District also promoted the event to increase attendance.

At the event, the City met with residents to share information about the initial results of the FCOG Transportation Survey and future events related to the Housing Element update for residents to share their input. Residents were able to sign up for future updates on the housing element update using the sign in sheet provided. Five residents signed in, three of which were interested in receiving additional information. Due to the number of vendors and booths at the event, visitors to the City booth were limited.

Study Session

A City Council study session was held virtually on August 2, 2022, to discuss the Housing Element Update and process. The study session was open to the public and held in person. Few comments were provided and no public comment related to fair housing was received at the meeting, instead focusing on the implications of SB 9 and Zoning Ordinance updates to address new legislation.

Fair Housing Issues

Since 2017, the Tax Credit Allocation Committee (TCAC) and California Department of Housing and Community Development (HCD) have developed annual maps of access to resources such as high-paying job opportunities; proficient schools; safe and clean neighborhoods; and other healthy economic, social, and environmental indicators to provide evidence-based research for policy recommendations. This effort has been dubbed “opportunity mapping” and is available to all jurisdictions to assess access to opportunities within their community.

The TCAC/HCD Opportunity Maps can help to identify areas within the community that provide strong access to opportunity for residents or, conversely, provide low access to opportunity. The information from the opportunity mapping can help to highlight the need for housing element policies and programs that would help to remediate conditions in low-resource areas and areas of high segregation and poverty and to encourage better access for lower-income households and communities of color to housing in high-resource areas. TCAC/HCD categorized census tracts into high-, moderate-, or low-resource areas based on a composite score of economic, educational, and environmental factors that can perpetuate poverty and segregation, such as school proficiency, median income, and median housing prices. The TCAC/HCD Opportunity Maps use a regional index score to determine categorization as high, moderate, and low resource.

Areas designated as “highest resource” are the top 20.0 percent highest-scoring census tracts in the region. It is expected that residents in these census tracts have access to the best outcomes in terms of health, economic opportunities, and education attainment. Census tracts designated “high resource” score in the 21st to 40th percentile compared to the region. Residents of these census tracts have access to highly positive outcomes for health, economic, and education attainment. “Moderate resource” areas are in the top 30.0 percent of the remaining census tracts in the region and those designated as “moderate resource (rapidly changing)” have experienced rapid increases in key indicators of opportunity, such as increasing median income, home values, and an increase in job opportunities. Residents in these census tracts have access to either somewhat positive outcomes in terms of health, economic attainment, and education; or positive outcomes in a certain area (e.g., score high for health, education) but not all areas (e.g., may score poorly for economic attainment). Low-resource areas are those that score in the bottom 30.0 percent of census tracts and indicate a lack of access to positive outcomes and poor access to opportunities. The final designation are those areas identified as having “high segregation and poverty;” these are census tracts that have an overrepresentation of people of color compared to the county as a whole, and at least 30.0 percent of the population in these areas is below the federal poverty line (\$27,750 annually for a family of four in 2022).

At the time of this writing (Summer 2022), HCD’s AFFH Data Viewer included the 2021 TCAC/HCD Opportunity Map. Therefore, the following assessment of fair housing is based on data from 2021. However, since the time of writing, the AFFH Data Viewer was updated with the 2022 TCAC/HCD Opportunity Map followed by the subsequent 2022 COG Geography TCAC/HCD Opportunity Map, which is based on a similar formula but compares each tract to those within the COG region rather than regions defined by TCAC. In the case of Fresno County, the comparison region changed from the Central Valley Region to the boundaries of Fresno COG, resulting in internal comparisons of Fresno County cities and communities.

At the COG level, the data for Fresno County presents a potentially skewed perspective as most cities in the county have small populations, housing stocks, and employment centers compared to the cities of Fresno and Clovis. Fresno and Clovis, as the two largest cities in the county and among the largest in the region, provide access to educational and economic opportunities that are not typically found outside of large cities. Further, both, though particularly Clovis, include affluent neighborhoods that influence TCAC scores.

Therefore, access to resources using this methodology appears to weigh proximity to Fresno and Clovis more heavily than local resources. For example, in the 2021 TCAC/HCD Opportunity Map, the community of Biola and the City of Kingsburg are both designated as moderate to highest resource areas based on local context. However, in the 2022 COG Geography TCAC/HCD Opportunity Map, both are designated as low resource areas. The number of jobs, school performance, environmental conditions, median incomes, and other factors that are included in the Opportunity Map methodology did not change significantly between 2021 and 2022 in these communities. The primary driver of the change in resource area designation is likely based on proximity to resources and opportunities in the major cities of Fresno County. As many communities in the county are largely rural and agricultural in nature, most local resources have more limited capacity, but do serve the local population.

Given the potential limitations of an internal comparison, FCOG opted to maintain the analysis based on a larger geographic comparison to other jurisdictions in the Central Valley Region to reflect the interconnectedness of economies in this region, and similarities between the size and nature of many communities. However, where HCD has determined significant changes in resource area designation between the 2021 TCAC/HCD Opportunity Map and 2022 COG Geography TCAC/HCD Opportunity Map (i.e., high resource to low resource, or vice versa), the analysis notes the differences, potential causes, and strategies to address local discrepancies in access to opportunities.

The 2021 TCAC/HCD Opportunity Map designates the city as high resource south of East Adams Avenue and highest resource designation north of East Adams Avenue. In comparison, the 2022 COG Geography TCAC/HCD Opportunity Map designates the entire city as low resource. However, as is discussed in this analysis, many neighborhoods within the two census tracts in Fowler reflect positive economic, environmental, and educational characteristics that are more consistent with a moderate or high resource designation when compared to other jurisdictions in the region. In contrast, when taken only in the smaller context of the Fresno COG in the 2022 methodology, the quality of life indicators may not reflect as positive outcomes when compared against the higher scoring conditions in Clovis and Fresno.

For example, in the Sumner and Sunnyside, RJ Hill, and Aspire Avenue southwestern neighborhoods west of SR 99, positive indicators of quality of life include a moderate median income, moderately high ownership rates, moderate expected educational attainment scores, high anticipated economic outcome scores and more. Based on these characteristics, this neighborhood likely reflects moderate to high access to resources for residents in the regional context. However, according to the 2022 methodology, in comparison with the more skewed positive quality of life indicators at the COG layer from Clovis and Fresno, the less positive educational attainment scores, less positive environmental scores, and other factors yields a 2022 low resource designation. Similarly, the census tract east of SR 99 includes several neighborhoods with positive quality of life indicators of moderate to high educational attainment scores, moderately high anticipated economic outcome, relatively high homeownership rates, and others; although the small triangular shaped downtown neighborhood has a low economic percentile and a fairly equivalent distribution of occupancy tenure. In contrast, when taken in the context of the COG, economic domain and educational attainment scores are in the lower percentiles, as well as the environmental conditions, reflected in a 2022 TCAC/HCD Opportunity designation of Low Resource.

However, it is worth noting that the use of the TCAC/HCD Opportunity Maps are just the basis of the Assessment of Fair Housing, and a more detailed analysis of specific conditions within the jurisdiction provides a more comprehensive understanding of current patterns. The Opportunity Maps, and the full Assessment, inform programs to improve access to resources throughout the city.

As seen in Figure 3-6, Regional TCAC/HCD Opportunity Areas, in Section 3: Regional Assessment of Fair Housing, most of Fresno County, particularly in the incorporated cities, is primarily a mix of low-resource or moderate-resource areas and areas of high segregation and poverty, with pockets of high-resource designations. Kingsburg and Fowler are the only two cities along State Route 99 (SR 99) designated as high resource.

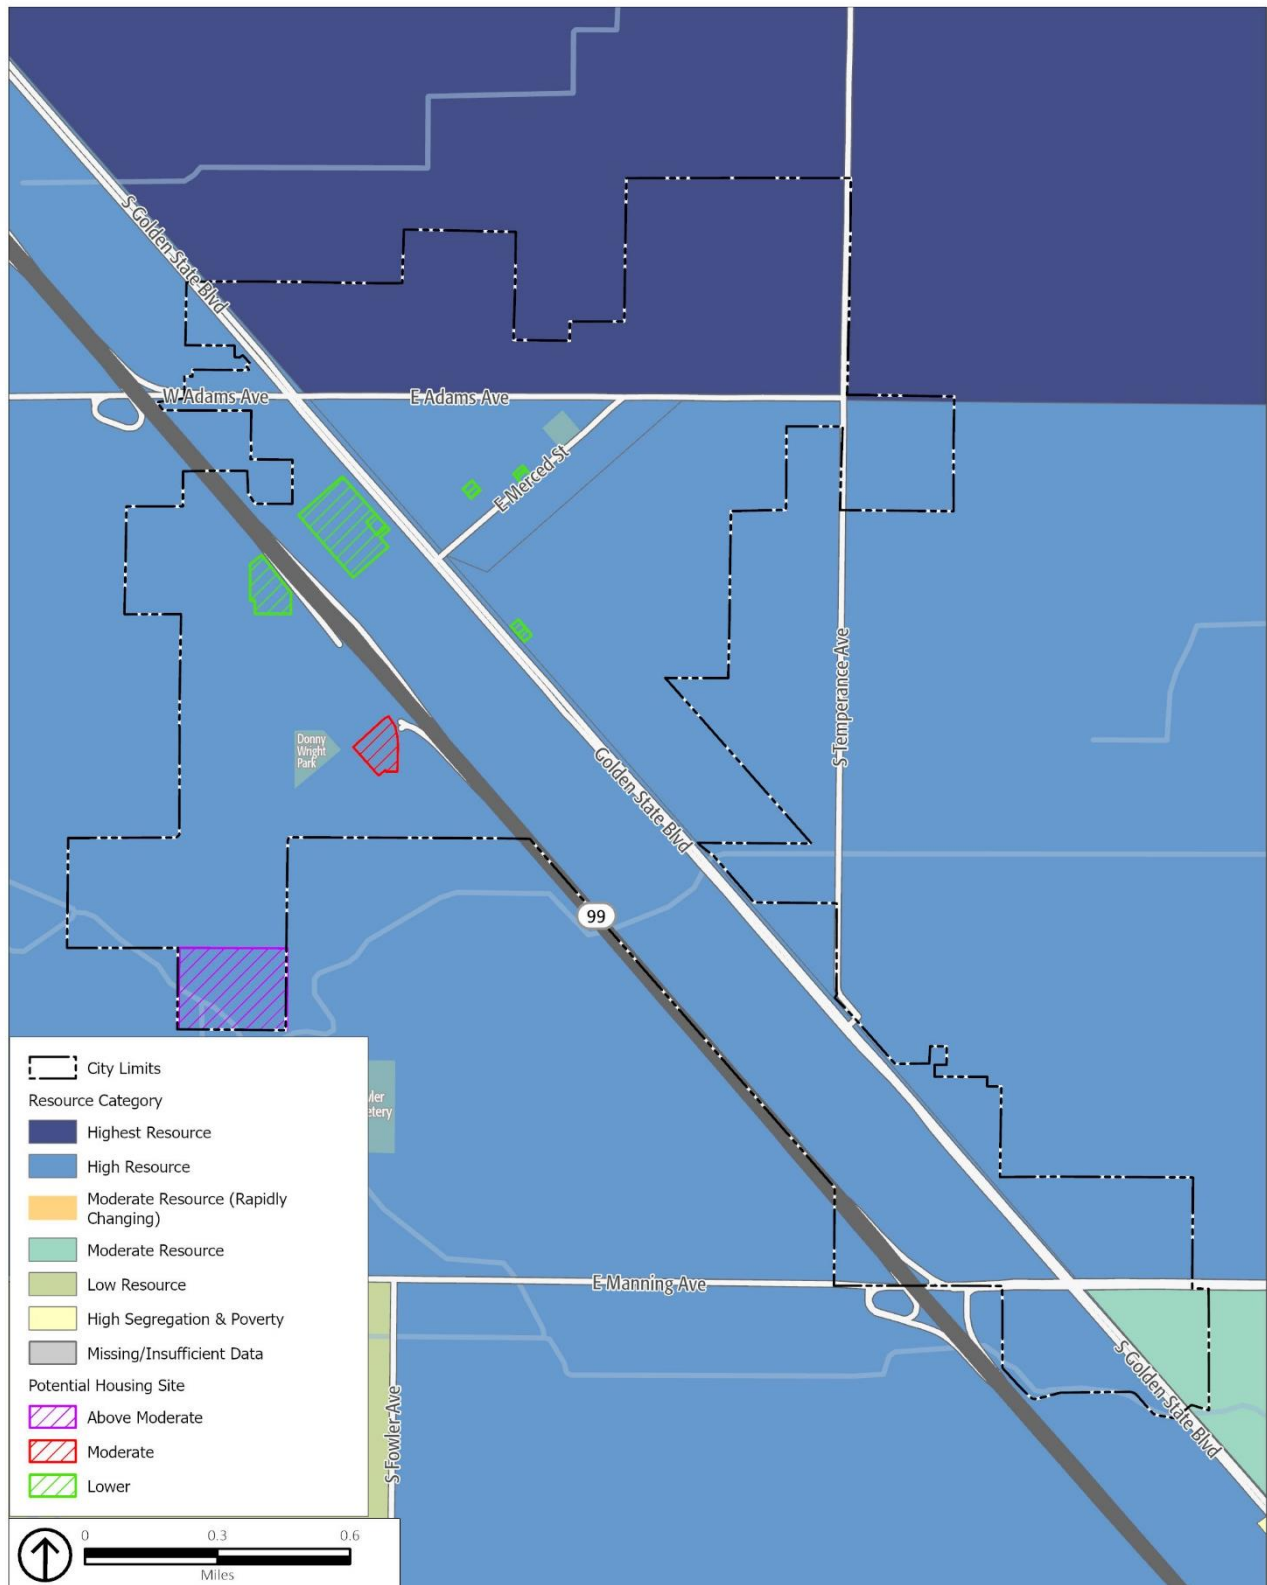

Patterns of Integration and Segregation

Income Distribution

The City of Fowler consists of two census tracts, both of which include unincorporated county land outside of city boundaries, and four block groups, two of which include adjacent unincorporated county areas. TCAC/HCD Opportunity Area maps designate the entire city as High or Highest Resource (**FIGURE 1D-2 LOCAL TCAC/HCD OPPORTUNITY AREAS**). According to 2016-2020 American Community Survey (ACS) data, the citywide median household income is \$59,663, which is below the statewide median of \$78,672, yet above the 2020 Fresno County median of \$57,109. Only the jurisdictions of Kerman, Kingsburg, Clovis, and the unincorporated county have median incomes higher than the City of Fowler.

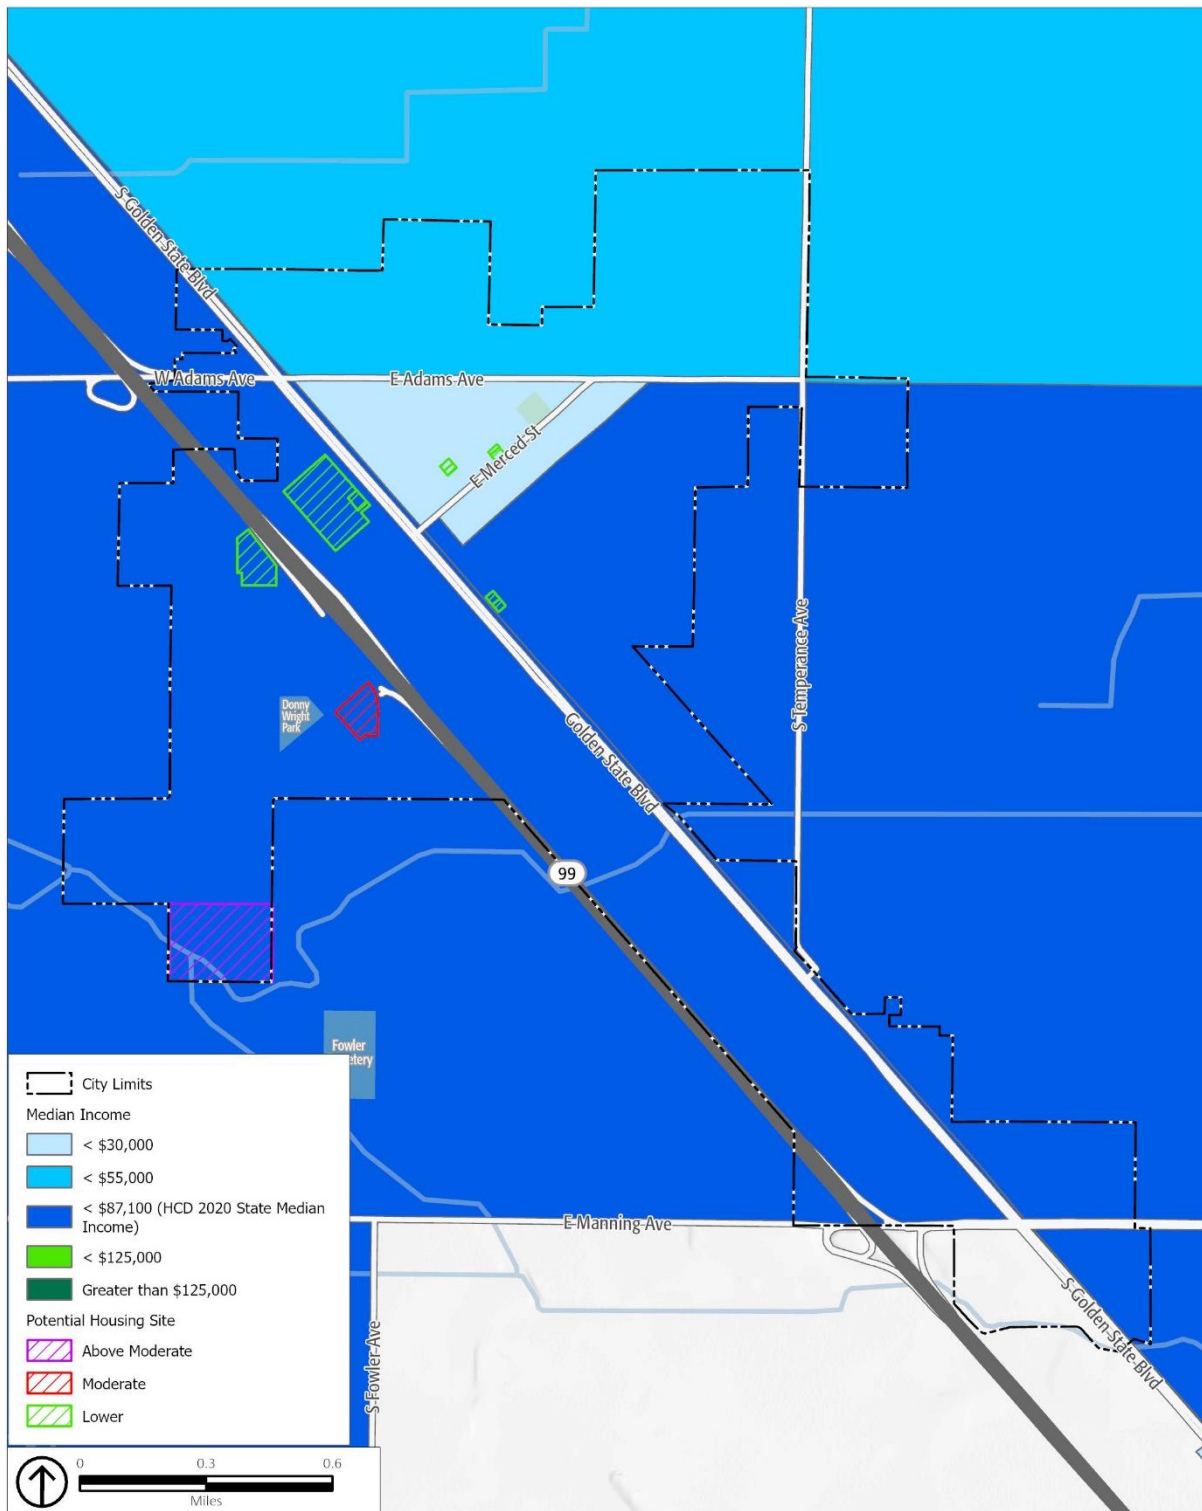

The area with the lowest median household income in Fowler, \$25,781, is reported in the central block group east of South Golden State Boulevard, bound by East Adams Avenue to the north and East Main Street to the south (**FIGURE 1D-3 LOCAL MEDIAN INCOME**). This area includes the downtown commercial area and businesses, city buildings, Panzak Park and the Edward Blaney Senior Center, Fremont Elementary School, Fowler Veterans Park, older residential housing, and industrial/agricultural processing. The adjacent block group to the north, which is predominantly unincorporated area, includes the East Adams Avenue neighborhood, affordable Fowler Apartments, and the Marshall School; this area has a median income of \$46,731. New market-rate residential subdivisions are currently under construction in this area, which suggests that the median income may increase in this area. The western and southeastern portions of the city have slightly higher median incomes. The southeastern block group, which includes the Fowler California neighborhood, has a median income of \$58,566, just above the county median, and includes business and commercial adjacent to the city core area, and two affordable housing complexes. The western block group, which encompasses the Sumner and Sunnyside, Aspire Avenue, and RJ Hill neighborhoods, has the highest median income of \$61,318. Residents in this neighborhood are in close proximity to a commercial corridor and have access to the Valley Mobile Home Park and Donny Wright Park.

FIGURE 1D-2 LOCAL TCAC/HCD OPPORTUNITY AREAS

Source: California Tax Credit Allocation Committee, 2021; City of Fowler, 2023; Placemarks, 2023

FIGURE 1D-3 LOCAL MEDIAN INCOME

Source: US Census (American Communities Survey 2015-2019); City of Fowler, 2023; Placeworks, 2023

The ACS estimates that, in the City of Fowler, 13.8 percent of households have incomes less than 30.0 percent AMI, which is considered extremely low income and corresponds to the poverty threshold, as compared to 16.7 percent in Fresno County and 9.0 percent statewide. Overall, the rate of households in poverty has decreased from 20.2 percent in 2010. When looking at the total population in poverty, the proportion of the total population in poverty in the portion of the city east of South Golden State Boulevard, is 20.8 percent, a decrease from the 2014 rate of 23.6 percent (**FIGURE 1D-4 LOCAL POVERTY RATE**). Similarly, on the west side of the rail line, the rate of population with a median income below the poverty threshold has declined from 24.4 percent in 2014 to 19.7 percent in 2020. Overall, 82.5 percent of households in poverty identify as Hispanic. These rates suggest there is a higher concentration of persons in poverty in the east side of the city where four affordable housing complexes and older housing stock are located. However, although data is not available at the block group level, 2016-2020 ACS data indicates that renters comprise 46.6 percent of the households in the city, and 95.1 percent of families in poverty are renters. Therefore, a higher number of persons in poverty may be present in the vicinity of the affordable rental housing developments throughout the city.

The median household income in Fowler has increased between 2014 and 2020. Citywide median household income in 2014 was \$44,539, while in 2020, citywide median household income was \$59,663. In 2020, the median household income had increased in the eastern census tract from \$35,017 in 2014, although this is a composite of three block groups that range from a median income below the poverty level to above the county median income. The western census tract had a median income of \$49,877, although both census tracts include a large area outside of the city boundary and so may not be reflective of conditions specifically for Fowler residents. However, the upward trend in income in Fowler suggests growing economic opportunities for residents, as several affordable housing options exist to reduce displacement risk.

Racial and Ethnic Characteristics

The City of Fowler's largest demographic group is Hispanic, comprising 66.4 percent of the city's population, placing the city among Fresno County jurisdictions with a lower proportion of Hispanic residents. Overall, non-White residents, including Hispanic, comprise 83.1 percent of the city's population. White non-Hispanic residents comprise 16.9 percent, followed by Asian at 13.1 percent, the second highest representation of Asian population in the county after the City of Fresno. Black and African-American residents comprise 1.4 percent of the population, and Other/Multiple Race at 1.8 percent, with all other racial and ethnic groups represented by smaller populations, each comprising less than 1.0 percent of the city's population.

There appears to be a pattern indicating a slightly uneven spatial distribution of demographic groups within the City of Fowler (**FIGURE 1D-5 LOCAL RACIAL DEMOGRAPHICS**), with the distribution of populations of color predominantly located in the southeastern (89.9 percent) and central (83.2 percent) portions of the city. Non-White residents in the northern East Adams and Marshall Estates neighborhoods represent 73.7 percent of the total population. In the western census tract, 61.3 percent of the population identifies as Hispanic, and 20.9 percent identifies as White, non-Hispanic. The Asian population is also

more highly represented in the western (14.0 percent) and southeast (12.2 percent) neighborhoods than in other areas of the city.

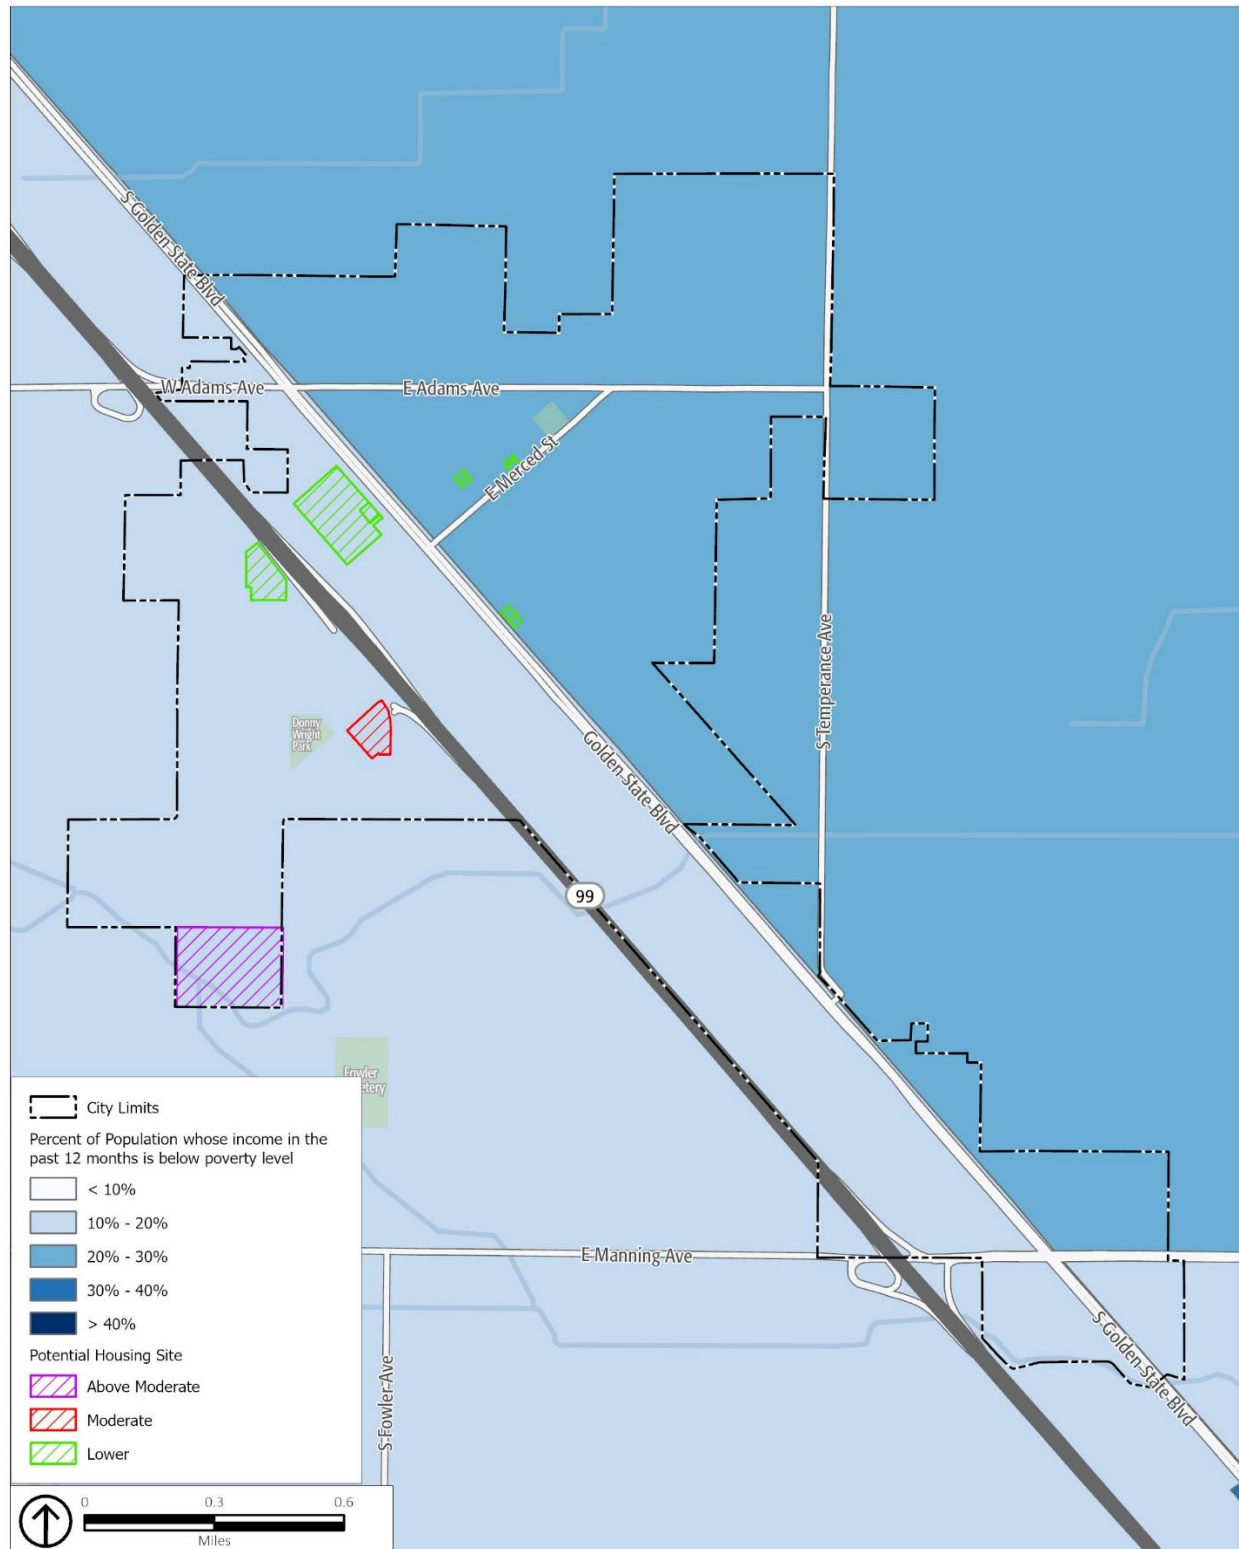

Within the central city area, where the median income is below \$30,000, the Hispanic population represents 86.0 percent of the population. In the eastern block group, the median income is just over the county median of \$57,100, but the proportion of the population that identifies as Hispanic decreases to 77.4 percent. Similarly, the western block group has relatively high median incomes, between \$55,000 and \$87,100, and has the lowest proportion of Hispanic residents, but the highest representation of Asian residents, while the proportion of White, Non-Hispanic is 20.9 percent. However, the correlation between non-White residents and income found in these areas is not found consistently throughout the city. The northern block group, in contrast, does not emulate this pattern. In this area, the median income is between \$30,000 and \$55,000, while the proportion of White, non-Hispanic residents is 26.3 percent, and the Hispanic population is 62.0 percent, suggesting that this pattern may be partially attributed to the racial and ethnic composition within the unincorporated area, which comprises almost the entirety of the block group.

The proportion of non-White residents in Fowler has increased between 2010 and 2020, becoming more diverse over time, mostly attributed to the increase in residents that identify as Other and Two or More Race classifications, increasing from 1.3 percent in 2010 to 4.4 percent in 2020. While the proportion of White non-Hispanic residents dropped slightly from 20.0 to 19.8 percent, the Hispanic population also dropped from 66.2 to 65.2 percent, as well as slight drops in the proportion of Asian and Black and African-American populations.

There are no areas identified as a R/ECAP, as defined by HUD, in the city, and no TCAC/HCD designations of an Area of High Segregation and Poverty. Further, the City of Fowler does not contain any racially concentrated areas of affluence (RCAs). As the proportions of White-identifying and Hispanic residents has decreased slightly, household income has risen (see Section 2: Housing Needs Assessment, “Income Distribution” section). Relatedly, the incidence of poverty has decreased, in combination with lower diversity rates than in many other jurisdictions within the county, suggests that there is income integration within the communities of color and opportunities for housing mobility.

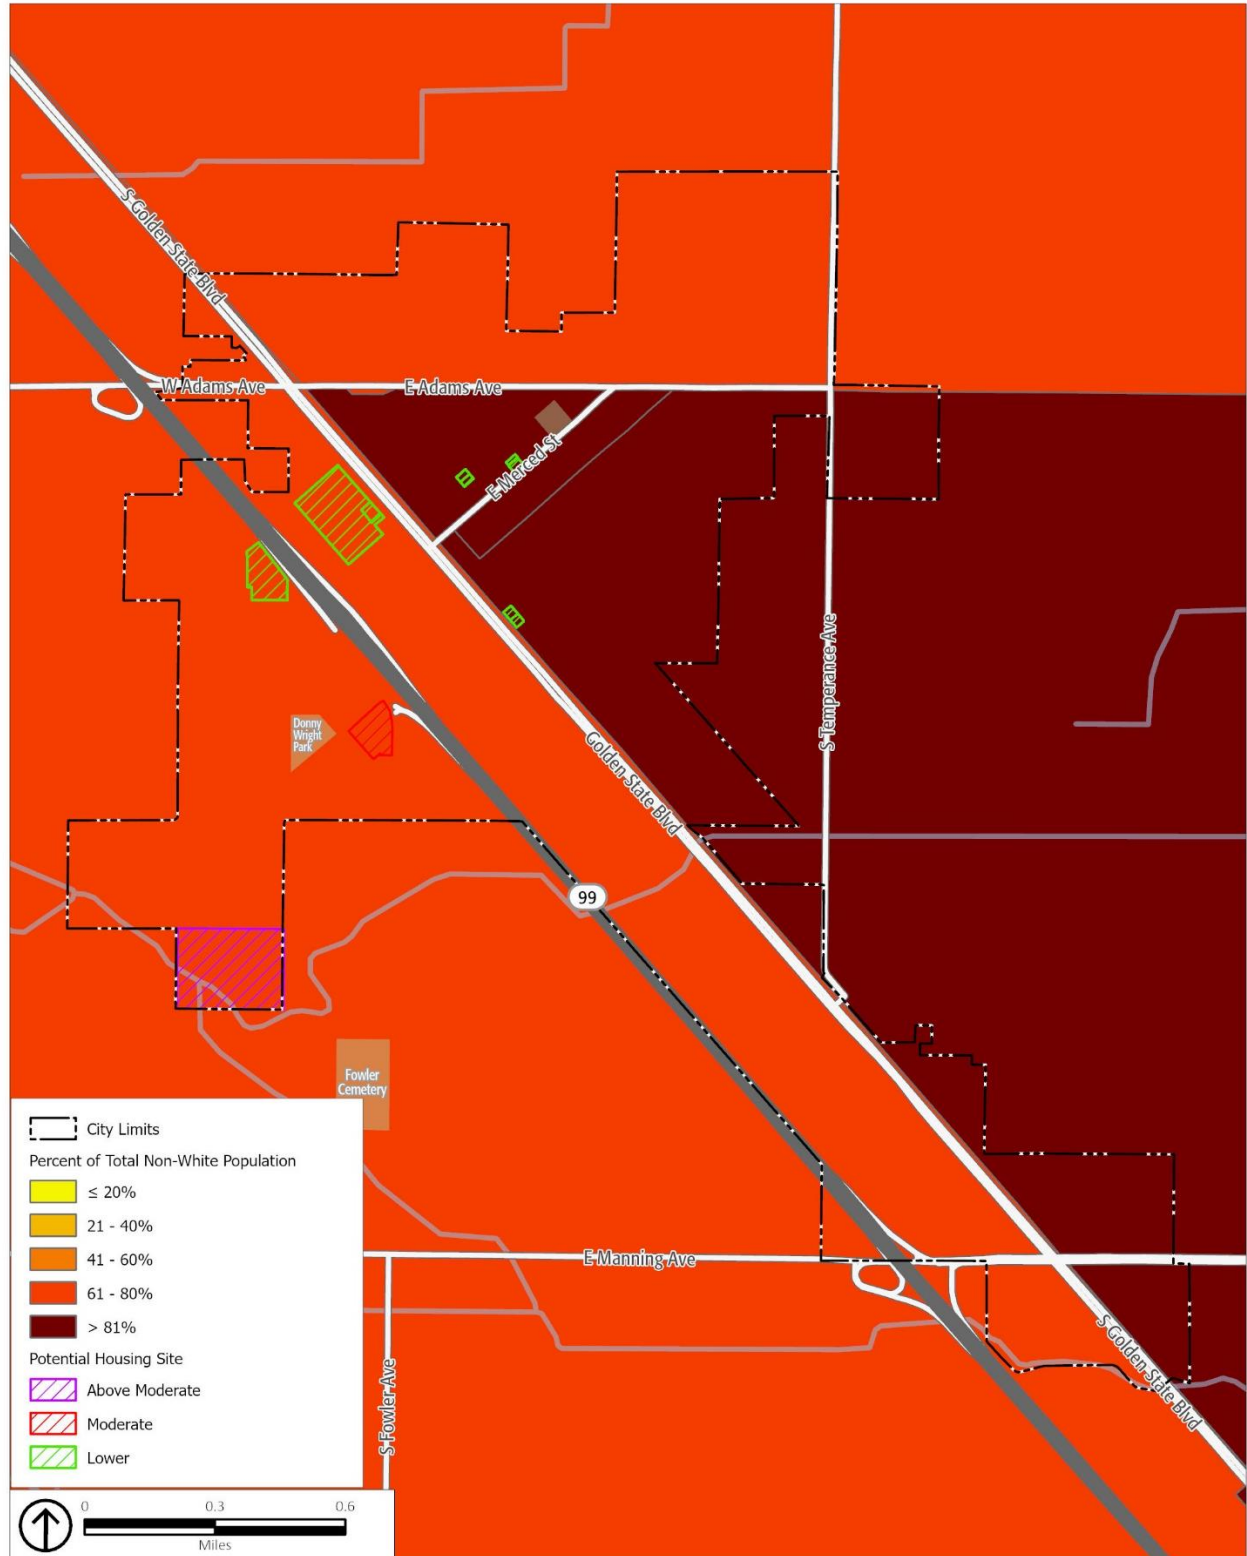

Program 4: Provision of Adequate Sites ensures there is sufficient land inventory to develop the variety of housing types necessary to meet the identified Regional Housing Needs Allocation (RHNA). The RHNA promotes the development of mixed-income neighborhoods by ensuring sites for a variety of housing choices. Additionally, several programs specifically support the development of housing types that may otherwise be underrepresented, such as Program 6: Affordable Housing Incentives, Program 7: Support Funding for Farmworker Housing, and Program 11: Encourage and Facilitate Accessory Units. Program 13: Housing for a Variety of Needs promotes the development of products to support the needs of households of various types, sizes, and incomes.

FIGURE 1D-5 LOCAL RACIAL DEMOGRAPHICS

Familial Status

Like several other jurisdictions in Fresno County, the majority of households in the City of Fowler are family households (78.3 percent). Family households are defined by California law as a household of two or more persons, regardless of relationship status. The City of Fowler's rate of married-couple households is 53.8 percent, and an additional 7.9 percent of households are unmarried couples. The western side of the city sees 43.0 percent of the population over age 18 (note: not households) living with a spouse and 5.7 percent living with an unmarried partner; fairly comparable to 46.1 percent and 9.1 percent in the eastern side of the city, respectively.

Approximately 16.6 percent of the City of Fowler households are family households headed by single adults, lower than both the Fresno County rate of 22.2 percent and 21.0 percent in California. The east side of the city sees a higher proportion of single-headed family households, at 23.2 percent of the population over age 18, compared to 13.1 percent in the western portion; similarly, a higher proportion of persons over the age of 18 live alone within the eastern side as compared to the west, at 9.9 percent compared to 6.0 percent.

The City of Fowler's proportion of single, female-headed households is 24.7 percent of total households, of which, 47.0 percent live alone, 25.7 percent have their own children, and 27.3 percent live with other related children, relatives, or roommates. Single, male-headed householders comprise 13.6 percent of total households, of which, 74.4 percent live alone and only 13.7 percent have their own children. While there is a higher representation of married- and unmarried-couple households in the eastern portion of the city, the rate of single householders is also higher in the eastern side of the city: as well, between 20.0 and 40.0 percent of children in the eastern tract reside with single female-headed households. It is possible that the rate of children residing in single female-headed households is higher in the east side of the city where all of the affordable rental complexes, the Magnolia public housing property, and all of the public schools are located (**FIGURE 1D-6 SINGLE-PARENT, FEMALE-HEADED HOUSEHOLDS WITH CHILDREN IN FOWLER**). Fewer than 20.0 percent of the female-headed households with children live on the west side of South Golden State Boulevard, within the portion of the city with no affordable housing complexes. and a lower proportion of single-person households

The rate of female-headed households with household incomes below the poverty line, at 42.0 percent, is higher than both the Fresno County rate and the statewide rate of 21.5 percent. In the eastern portion of the city, there are both higher rates of poverty and female-headed households, suggesting a possible concentration in proximity to commercial, agricultural, industrial, and other nonresidential uses. The slightly lower presence of single, female-headed households with children in the City of Fowler at 6.3 percent of total households as compared to 7.3 percent of households in Fresno County, may indicate barriers to housing for single-parent, female-headed households in high-opportunity areas within the City of Fowler. However, lower-income neighborhoods have TCAC/HCD high-resource designations, and proximity to these opportunities may offer benefits to single female householders with children, indicating that additional housing mobility opportunities for single-parent households, particularly those in poverty, should be provided.

FIGURE 1D-6 SINGLE-PARENT, FEMALE-HEADED HOUSEHOLDS WITH CHILDREN IN FOWLER

Source: U.S. Census (American Communities Survey 2015-2019); City of Fowler, 2023; Placeworks, 2023

Single-person households constitute 21.7 percent of total households, compared to 29.1 percent of households in Fresno County overall, and 23.7 percent of households statewide. Seniors living alone, comprising 9.6 percent of households both county- and statewide, constitute 6.5 percent of the City of Fowler's households. Of the seniors living alone, 65.2 percent are homeowners, and the remaining 34.8 percent are renters. This may suggest that the City of Fowler may be an attractive place for senior couples to retire, or that senior couples have aged in place and remain in their homes to access services and amenities in the city catering to senior needs.

Program 15: Reasonable Accommodations and Universal Design outlines a process for the City to ensure reasonable accommodations requests can accommodate the needs of persons with disabilities. Additionally, several programs specifically support the development of housing types that may otherwise be underrepresented, such as Program 6: Affordable Housing Incentives, Program 7: Support Funding for Farmworker Housing, Program 11: Encourage and Facilitate Accessory Units, and Program 13: Housing for a Variety of Needs.

Disability Rates and Services

Persons with disabilities typically have special housing needs due to physical or developmental capabilities, fixed or limited incomes, and higher health costs. Seniors typically experience disabilities at higher rates. Approximately 17.3 percent of the City of Fowler's population lives with one or more types of disabilities (Table 2-28, Seniors with Disabilities [2020], in Section 2: Housing Needs Assessment), greater than both the Fresno County rate of 12.9 percent and the state rate of 10.7 percent. Although there is a slightly lower population of older residents (15.0 percent) in the city compared to Fresno County at 19.5 percent, 51.3 percent of the senior population in the City of Fowler experiences one or more disabilities, the highest rate in the county.

Residents living with disabilities in the eastern side of the city, inclusive of the adjacent unincorporated area within the census tract, comprise 15.8 percent of the population, of whom, 40.7 percent are seniors (**FIGURE 1D-7 PERCENTAGE OF THE POPULATION WITH A DISABILITY IN FOWLER**). While seniors comprise 18.7 percent of the eastern portion of the city, 34.3 percent report a disability. In the western side of the city, the overall rate of disability is 9.7 percent. While seniors comprise only 11.7 percent of the population in this tract, 40.7 percent of this age cohort experiences one or more disabilities, representing 49.0 percent of total persons with disabilities in this tract.

FIGURE 1D-7 PERCENTAGE OF THE POPULATION WITH A DISABILITY IN FOWLER

Source: U.S. Census (American Communities Survey 2015-2019); City of Fowler, 2023; Placeworks, 2023

The spatial distribution of City of Fowler residents living with disabilities has shifted between 2014 and 2020, decreasing within the western tract and increasing in the eastern tract. In 2014, the eastern side of the city had a disability rate of 9.5 percent, compared to 15.8 percent in 2020, with seniors comprising 53.0 percent of total disabilities in this tract, which is 51.2 percent of the total senior population, although seniors made up just 9.9 percent of the population within this tract. In comparison, the western side had a rate of 10.9 percent in 2014 compared to 9.7 percent in 2020, with seniors comprising 44.7 percent of total persons with disabilities in this tract, although the proportion of seniors residing in the western side of the city in 2014 was comparable to the 2020 rate, at 11.4 percent. The shift in representation of persons with disabilities over the years may reflect increased accessibility of services, amenities, and housing opportunities catering to persons with disabilities available within the eastern side of the city.

As shown in Table 2-32, Disability by Type (2020), in Section 2: Housing Needs Assessment, ambulatory disabilities were the most prevalent disability type, reported by 52.6 percent of the population with a disability, followed by independent living problems at 37.1 percent, hearing difficulties at 32.7 percent, and vision difficulties at 22.5 percent. Cognitive difficulties and self-care problems were reported by 21.1 and 13.7 percent of the population with a disability, respectively. The City of Fowler has a small population of residents with developmental disabilities (less than 1.0 percent of the total population), of which, approximately 46.7 percent are under 18 years of age and live at home, with parents or a caregiver.

Residents with disabilities in the City of Fowler are served by the Fresno County Senior Resource Center, which operates an Adult Protective Services program, assisting both disabled adults and seniors with all requests for assistance. Fowler residents also have access to the Dial-A-Ride program, operated by the local Fresno County Rural Transit Agency (FCRTA) subsystem, which offers transportation services to the elderly (age 65 and older), disabled, low-income, and general public. Dial-A-Ride services are wheelchair equipped and operate Monday through Friday between 8:30 a.m. and 4:15 p.m., with fares priced at \$1.00 one-way or \$2.00 round trip. The Fresno County Human Services System, Department of Adult Services, also provides housing and basic needs assistance to elderly persons. The Fresno/Madera Area Agency on Aging (FMAAA) provides connections to programs, services, and resources elderly residents can use to maintain and improve their quality of life as they age.

For seniors and other persons requiring a supportive housing setting, there are 210 licensed care facilities in Fresno County with 4,953 beds. While the majority of these facilities are in the Cities of Fresno and Clovis, The Harvest at Fowler is a senior residential care facility with 36 beds to serve aging residents of Fowler.

Access to Opportunity

Transit Mobility

Transit mobility refers to an individual's ability to navigate the city and region on a daily basis to access services, employment, schools, and other resources. Indicators of transit mobility include the extent of transit routes, proximity of transit stops to affordable housing, and frequency of transit.

Fowler residents are served by FCRTA, providing fixed-route service on the Southeast, Kingsburg-Reedley, and Kings Area Regional Transit (KART) lines (see Figure 3-24, Fresno County Rural Transit Agency Intercounty Routes, in Section 3: Regional Assessment of Fair Housing).

Southeast Transit provides three round trips on weekdays between Fowler and Fresno, stopping in Fowler at the bus shelter on the west side of East Merced and North 7th Street, and at Children’s Hospital. Buses originating in Kingsburg arrive in Fowler at 7:28 a.m., 10:23 a.m., and 3:28 p.m. before traveling on to Fresno. Return service departs from Fresno at 8:45 a.m., 2:00 p.m., and 4:45 p.m., arriving in Fowler after approximately 20 to 30 minutes, continuing to Selma before terminating in Kingsburg. Service is provided on 30-passenger, Americans with Disability Act (ADA) wheelchair-accessible buses. Monthly passes for general service between Fowler and Fresno are priced at \$45.00, with discounted fares available for senior, youth, and disabled residents at \$35.00 monthly.

The Kingsburg-Reedley Transit line provides three daily round trips between Reedley College and Fowler on weekdays. Buses to Reedley originate in Kingsburg, stop in Selma, and stop in Fowler at approximately 7:22 a.m., 11:23 a.m., and 2:53 p.m., then continue to Parlier before arriving at Reedley College. Return service departs from Reedley College at 9:15 a.m., 12:20 p.m., and 3:45 p.m., stopping again in Parlier, then in Fowler at approximately 9:45 a.m., 12:50 p.m., and 4:15 p.m. before continuing to Selma and Kingsburg. Service is provided on 30-passenger, ADA wheelchair-accessible buses. Monthly passes for general service between Fowler and Reedley are priced at \$94.00, with discounted monthly student bus passes available for purchase through Reedley College at a rate of \$35.00.

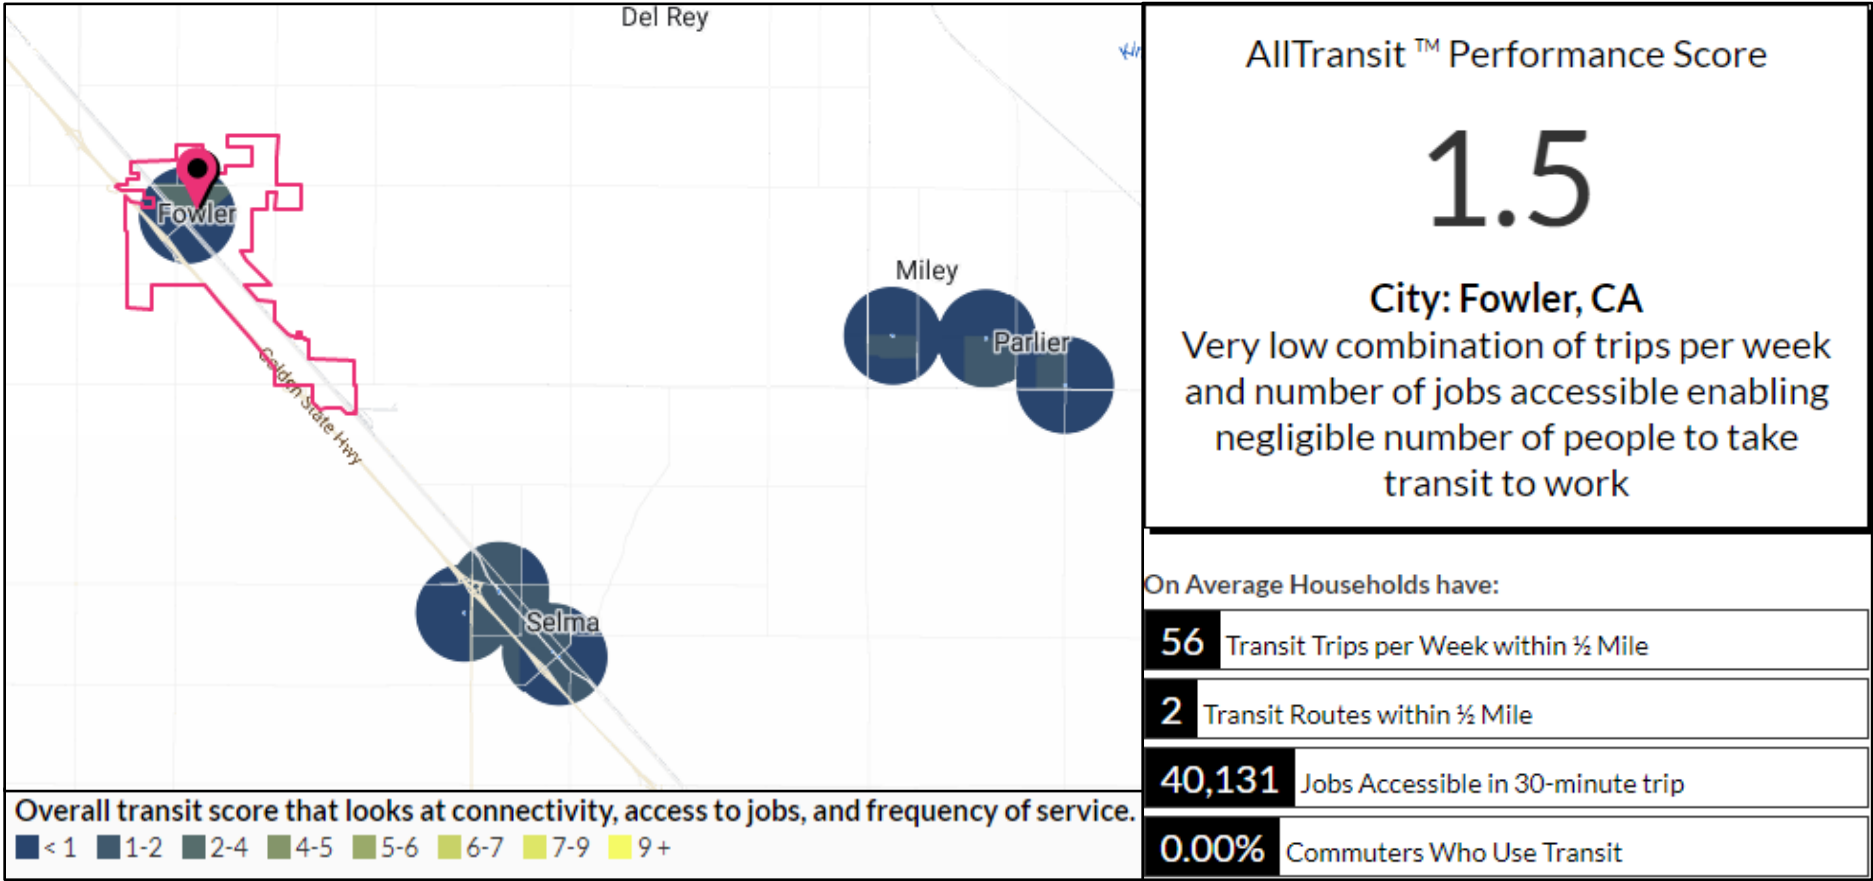

Kings Area Regional Transit (KART) is Kings County’s public transportation provider. KART provides regular, out-of-town transportation services to Fresno on weekdays. KART Transit Route 17 – Fresno provides service to Fresno originating in Hanford and stopping in Fowler at Valley Children’s Hospital before continuing on to Fresno, with return service from Fresno to Hanford stopping again at Valley Children’s Hospital. Monthly passes for general service between Fowler and Fresno are priced at \$60.00, with discounted rates for eligible groups available for \$50.00. Children 11 years of age and younger ride for free.

With daily access to the Cities of Fresno and Reedley, the FCRTA also provides Fowler residents with access to employment opportunities and connections to regional transit services, including Amtrak, Greyhound, and Fresno Area Express (FAX), which in turn provide connections within the metropolitan Fresno area and between Stockton, Bakersfield, and other regional hubs.

AllTransit is a transit and connectivity analytic tool developed by the Center for Neighborhood Technology for the advancement of equitable communities and urban sustainability. The tool analyzes the transit frequency, routes, and access to determine an overall transit score at the city, county, and regional levels. AllTransit scores geographic regions (e.g., cities, counties, Metropolitan Statistical Areas [MSAs]) on a scale of 0 to 10, with 10 being complete transit connectivity. **FIGURE 1D-8 FOWLER ALLTRANSIT PERFORMANCE SCORE**, shows Fowler’s AllTransit Performance score, including metrics representing average household transit access. Fowler’s score is 1.5, demonstrating “very low”

connectivity. **Table 1D-4 Fresno County Jurisdictions AllTransit Performance Scores**, shows transit accessibility in Fowler in relation to other Fresno County jurisdictions. Fowler’s score is consistent with other comparable Fresno County jurisdictions, which are typified by smaller rural and semi-rural communities. However, as described in Section 3: Regional Assessment of Fair Housing, the AllTransit methodology does not appear to fully capture FCRTA and KART services. Therefore, AllTransit scores identified at the jurisdictional level may not accurately reflect the complete range of transit opportunities available through private and public service providers. Among Fresno County jurisdictions, the City of Fresno represents an outlier both in terms of population size, degree of urbanization, and transit accessibility.

Housing Mobility

Approximately 46.6 percent of occupied households in Fowler are renter-occupied. Rates of renter occupancy are evenly distributed in Fowler. As shown in Section 2: Housing Needs Assessment, Table 2-18, for 2022, the California Department of Finance (DOF) reported an overall vacancy rate of 4.5 percent in Fowler. Vacancy data is not available by tenure through the DOF; however, the 2020 ACS 5-year estimate indicates a rental vacancy rate of 0.0 percent and an ownership unit vacancy rate of 2.2 percent, with an overall vacancy rate of 3.2 percent. A healthy housing market is generally considered to have a 5.0 percent vacancy rate. ACS 5-year estimate vacancy rates draw on large sample sizes and may not precisely represent vacancy on the ground. Instead, these rates are presented as general estimates indicating approximate conditions in the local housing market.

In Fowler, a substantial proportion of vacant properties were categorized as “other vacant,” a category of properties that are vacant but not available for rent or purchase. Properties may be categorized as “other vacant” due to one or more factors, which may include ongoing legal proceedings, active renovation or repair, abandonment, or an owner’s preference for vacancy, among other potential factors. These categories of vacancy are accounted for in the overall vacancy rate estimate but are not included in the rental and ownership vacancy rate estimates, which only consider those units immediately available for rent or purchase.

Fowler's very low rental vacancy rate indicates a tight rental market with few housing mobility opportunities for current and prospective renters. Similarly, the low ownership unit vacancy rate indicates an absence of available homes for sale in Fowler for prospective homebuyers.

The 2020 ACS 5-year estimate indicates that median gross rent is \$1,084 in Fowler, slightly higher than \$1,029 reported for Fresno County (see Section 2: Housing Needs Assessment). Fowler's vacancy rates are among the lowest in Fresno County, and median rents are higher than most other comparable Fresno County jurisdictions (see Section 2: Housing Needs Assessment).

Median rent in Fowler rose from \$723 in 2010 to \$1,084 in 2020, reflecting an increase of 49.9 percent over the 10-year period and indicating that renting costs have risen in recent years. Similarly, as found in Section 2: Housing Needs Assessment, Table 2-22, Home Sales Recorded in 2021-22, home prices in Fowler increased by 12.4 percent between 2021 and 2022. While rent is relatively affordable in Fowler compared to the state, rental costs have risen over the last 10 years. Additionally, a shortage of available housing units for rent and for sale may indicate limited mobility options for prospective and existing Fowler residents seeking ownership opportunities. In Fowler, affordable housing and denser housing options like the Ruby Court Apartments and Magnolia Commons are primarily found on the north side of the railroad, while residential housing on the south side of the railroad almost exclusively consists of single-unit homes. No Housing Choice Voucher (HCV) use is reported in the census tract south of the railroad, and approximately 5.1 percent of renters in the census tract north of the railroad use HCVs.

Program 22: Fresno County Homebuyer Assistance Program, Program 24: Housing Choice Vouchers, and Program 26: Improve Access to Resources all promote housing mobility by providing access to first-time homebuyer programs, housing choice vouchers, and similar programs. Additionally, Program 13: Housing for a Variety of Needs promotes the development of housing types to support households of various types, sizes, and incomes.

Employment Opportunities

The HUD jobs proximity index measures employment accessibility in residential neighborhoods by calculating distances to potential job locations within the area, with larger employment centers weighted more heavily, and factoring in the population size of the local workforce. According to this index, most primarily residential areas in Fowler score between the 56th and 89th percentiles, indicating close proximity to employment opportunities (**FIGURE 1D-9 JOBS PROXIMITY INDEX**). The section of the city north of East Adams Avenue scores the lowest, while areas southwest of South Golden State Boulevard score the highest. Fowler is close to the City of Fresno, the region's primary employment center, located approximately 10 miles northwest of Fowler, likely contributing to Fowler's relatively high index scores among Fresno County jurisdictions.

Fowler's primary industry is agriculture and agribusiness, with several businesses headquartered in the city, including Boghosian Raisin, Bee Sweet Citrus, and National Raisin Company. Approximately 91.3 percent of Fowler residents commute outside of the city for work, with 8.7 percent of residents both living and working within city limits. This figure has remained consistent over time – in 2010, 89.1 percent of Fowler

residents commuted outside of the city for work.⁸ Fowler residents primarily work in the industries of Health Care and Social Assistance (14.2 percent); Agriculture, Forestry, Fishing and Hunting (12.0 percent); and Educational Services (11.5 percent).⁹ In total, 73.3 percent of residents live within 24 miles of their workplace, an area that includes the Cities of Fresno, Reedley, Parlier, Sanger, Selma, and Bowles, each of which employ Fowler residents. This includes approximately 40.4 percent of Fowler residents who live within 10 miles of their place of employment. In contrast, 19.2 percent of Fowler residents travel more than 50 miles to work. Fowler is in a central location relative to several other jurisdictions. According to the ACS, the jobs-housing ratio in Fowler is 1.25, decreasing from a ratio of 1.63 in 2010, indicating an improved balance between employment and housing opportunities. A high jobs-housing ratio may indicate that adequate housing is less affordable or available to local workers, but a shortage of jobs for people that live in Fowler to work in Fowler.

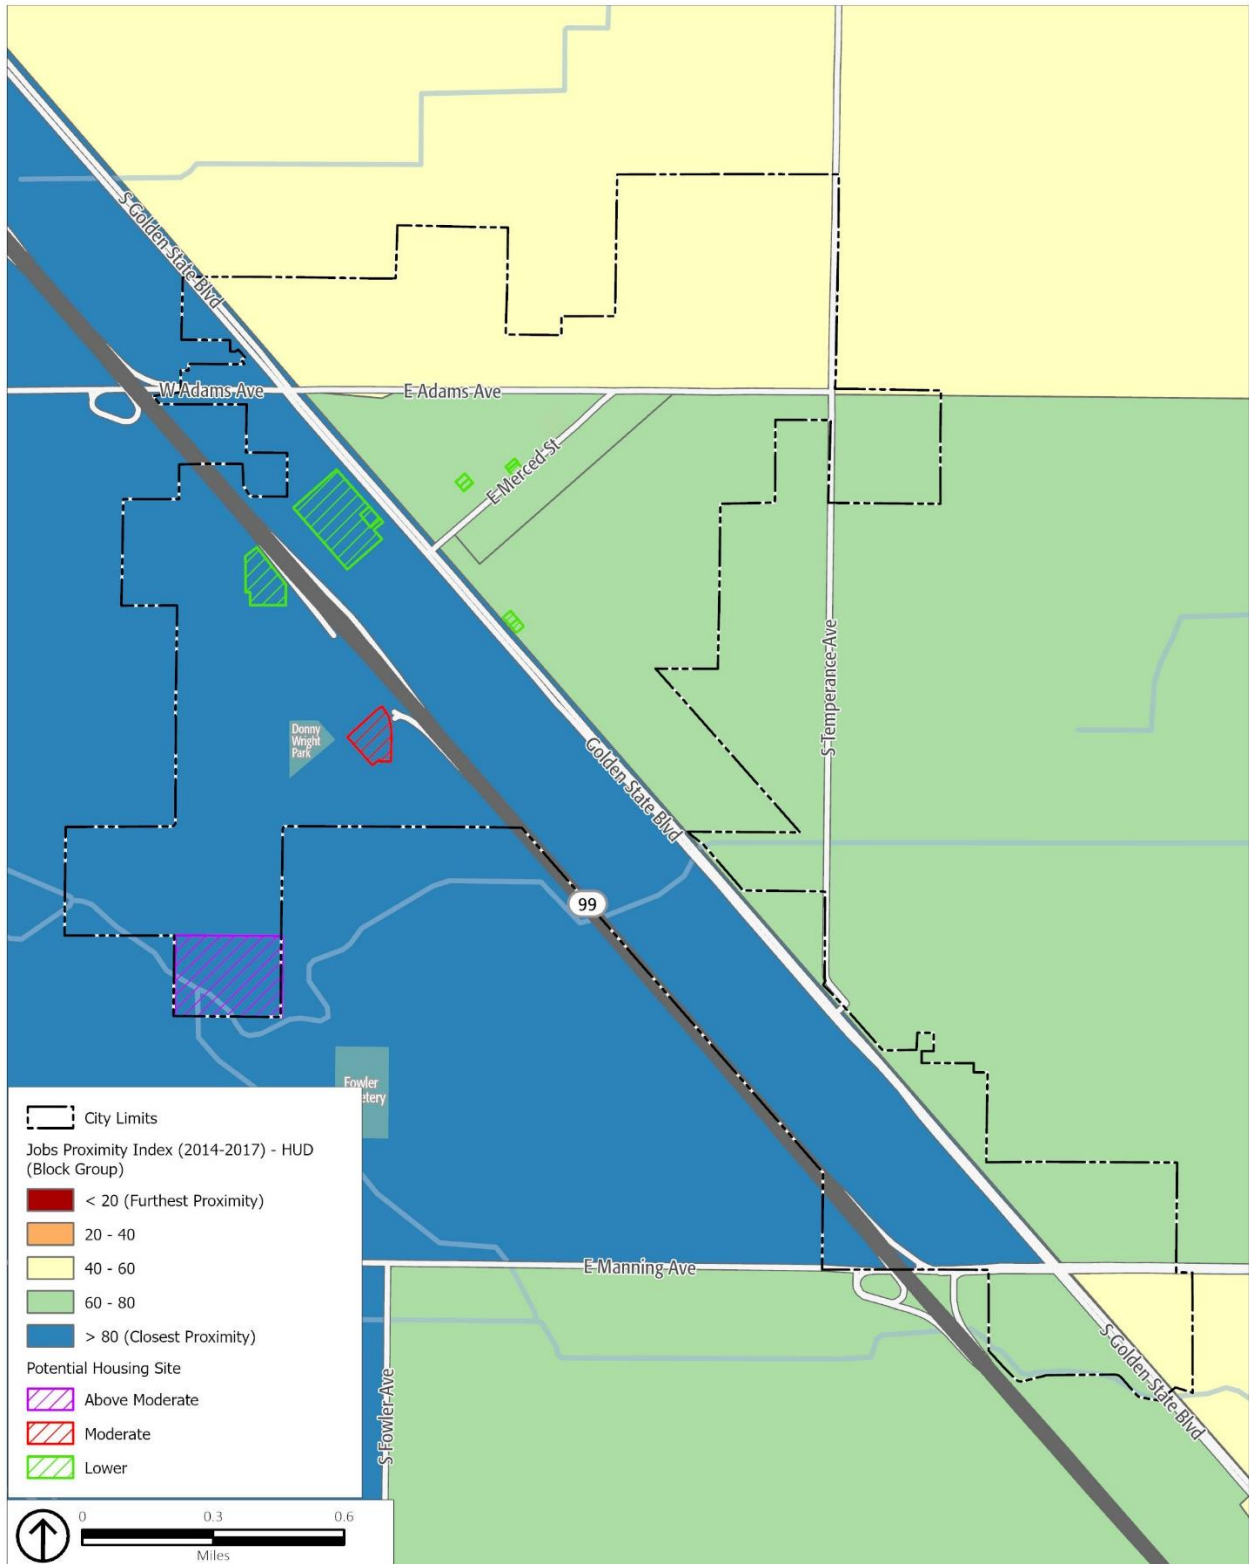

Commercial activity within Fowler is focused in the historical core, generally in the vicinity of South Golden State Boulevard, 6th Street, 7th Street, and East Merced Street. Given the nature of the city's main industries, many Fowler residents will likely continue to work outside of the city. The City's zoning map (**FIGURE 1D-10 ZONING IN FOWLER**) shows that the majority of land in the city is designated for residential uses. The prevalence of residential uses with strong access to Fresno's job market reflects the City's relatively high scores for HUD's jobs proximity index.

The City of Fowler's 2040 General Plan includes an economic development element which outlines access to economic opportunities within the City.

Educational Opportunities

Fowler students are served by the Fowler Unified School District (FUSD), which has eight public schools reported on by the California Department of Education (CDE), including three elementary schools, one middle school, one high school, and several alternative programs. One of these schools, Malaga Elementary, is outside of the City of Fowler. The alternative programs, including Fowler Academy Community Day, Fowler Academy Continuation, and Fowler Academy Independent Study, typically serve students who have experienced challenges in traditional school environments. While these schools have limited data on performance scores for English language arts (ELA) and mathematics, they offer a valuable resource for students to continue their education in a supportive environment.

Of the five schools for which ELA and mathematics performance scores were available in 2019, CDE reported that Fowler High, Fremont Elementary, and Marshall Elementary scored above state grade-level standards for ELA, with Marshall Elementary also scoring above the state grade-level standard for mathematics. All other scores for schools in the FUSD were below the state-grade level standards for ELA, mathematics, or both (see **Table 1D-5 School Performance Scores in Fowler, 2019**).

The proportion of each non-alternative school's population that was considered socioeconomically disadvantaged in 2019 ranged from 68.6 percent at Marshall Elementary to 75.9 percent at John Sutter Middle. For alternative and continuation programs, rates were substantially higher, ranging between 80.0 and 100.0 percent. Marshall Elementary is in an area with a median household income of \$46,731 and a TCAC/HCD Education Domain Score in the 24th percentile. John Sutter Middle is in an area where median household income is \$58,566 and the TCAC/HCD Educational Domain Score is also in the 24th percentile. Within the City of Fowler, TCAC/HCD Educational Domain Scores range between the 10th and 24th percentiles (**FIGURE 1D-11 LOCAL TCAC/HCD EDUCATIONAL DOMAIN SCORE**). This data indicates that students living in different parts of Fowler generally have similar levels of access to educational opportunities, regardless of median household income in the immediate vicinity of the schools.

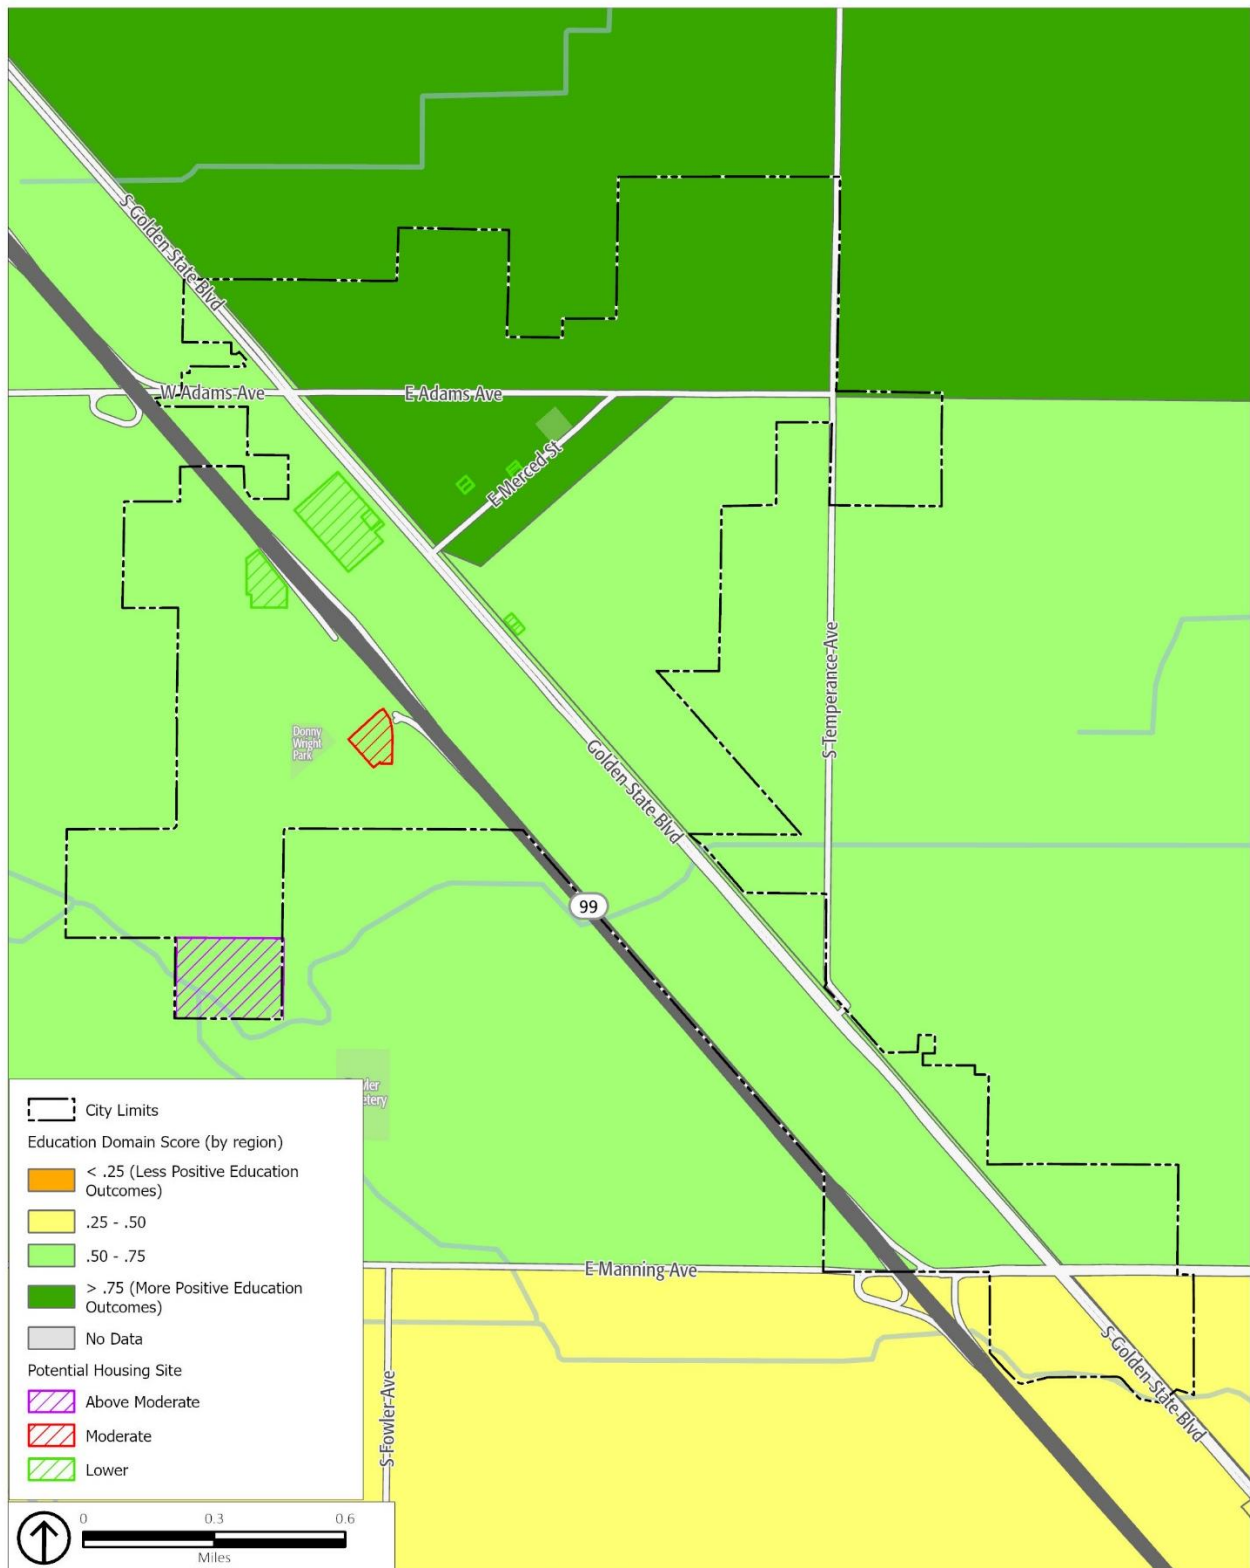

SECTION 2D-6: LOCAL ASSESSMENT OF FAIR HOUSING

Table 1D-5 School Performance Scores in Fowler, 2019

School Name	ELA Score	Math Score	Chronic Absenteeism Rate	Suspension Rate	Socioeconomically Disadvantaged	Foster Youth	English Learners
Fowler Academy Community Day (9-12)	-	-	-	8.6%	100.0%	0.0%	50.0%

Environmental Health

The Office of Environmental Health Hazard Assessment (OEHHA) reports CalEnviroScreen 4.0 scores for Fowler demonstrating relatively adverse environmental conditions, with census tracts in and around Fowler scoring between the 86th and 96th percentiles (**FIGURE 1D-12 CALENVIROSCREEN SCORES**). In Fowler, residents in different parts of the jurisdiction experience the same scores, indicating that residents across the city do not have different access to environmental outcomes.

The primary pollution indicators leading to high scores as reported by OEHHA's CalEnviroScreen, are, in order of significance, ozone, fine inhalable particles less than 2.5 micrometers (PM_{2.5}), diesel particulate matter (PM), pesticides, drinking water contaminants, groundwater threats, and solid waste. Fowler is in a sparsely populated area, with few industrial uses and relatively low pollution from vehicular emissions. However, commercial agriculture and natural resource extraction occurring close to Fowler may contribute to adverse environmental conditions. Population characteristics contributing to the high scores include asthma, low birth weight, education, unemployment, and poverty. The entirety of Fowler falls within the boundaries of an area considered to be a Senate Bill (SB) 535-qualifying disadvantaged community, representing the 25.0 percent of highest-scoring census tracts in CalEnviroScreen 4.0, census tracts previously identified in the top 25.0 percent in CalEnviroScreen 3.0, and census tracts with high amounts of pollution and low populations. This indicates that, as compared with statewide averages, Fowler represents an area of potential concern regarding fair housing and disproportionate exposure to environmental hazards and a concentration of vulnerable populations.

The City of Fowler's 2040 General Plan includes Community Health and Equity and Open Space elements, both of which includes policies and programs designed to increase access to healthy outdoor spaces and reduce exposure to pollutants.

Disproportionate Housing Need and Displacement Risk

Overcrowding

Overall, approximately 6.0 percent of households in Fowler are considered overcrowded, nearly identical to the percentage of overcrowding in Fresno County as a whole (6.1 percent). In addition, approximately 2.3 percent of households in Fowler report being severely overcrowded, compared to 3.6 percent of households in Fresno County. However, overcrowding is significantly higher among renters in Fowler, of whom, 9.8 percent are overcrowded, than among homeowners, of whom, 2.7 percent are overcrowded.

As shown in **FIGURE 1D-13 OVERCROWDING IN FOWLER**, the ACS estimates that overcrowding occurs at a slightly higher rate west of Golden State Boulevard (14.6 percent of households) than to the east (10.3 percent). Fowler has the second-lowest rate of overcrowding for all households among all jurisdictions in Fresno County, which may represent a balance of housing type with demand and need. According to the 2016-2020 ACS, approximately 69.7 percent of housing units in Fowler have three or more bedrooms, which typically reduce the need for occupants to share rooms.

Despite the relatively low rates of overcrowding currently, it has increased over the last decade. In 2010, approximately 5.3 percent of all households in Fowler experienced overcrowding, compared to 6.0 percent in 2020. This increase has been experienced exclusively by renters, who experienced overcrowding at a rate of 3.3 percent in 2010 compared to 9.8 percent in 2020. In contrast, homeowner overcrowding decreased from 5.6 to 2.7 percent. However, both renters and homeowners have experienced an increase in severe overcrowding, with renter severe overcrowding increasing from 1.4 to 3.0 percent and homeowner severe overcrowding from 3.0 to 4.4 percent. The increasing rate of overcrowding, particularly in light of the high proportion of larger housing units, may indicate a growing lack of affordability resulting in households needing to share costs, or may indicate that demand for housing exceeds supply.

Source: U.S. Department of Housing and Urban Development, 2020; City of Fowler, 2023; Placeworks, 2023

Overpayment

In Fowler, 22.6 percent of households are cost burdened, and 12.9 percent are severely cost-burdened, for a total of 35.5 percent of all households (**Table 1D-6 Cost Burden in Fowler, 2010-2018**). Of these households, approximately 71.5 percent are renters, though renters comprise only 46.6 percent of households in the city. In total, 35.2 percent of renters are cost burdened, and 18.8 percent are severely cost burdened, compared to 10.5 percent and 7.7 percent of homeowners, respectively. As shown in **FIGURE 1D-14 PERCENTAGE OF HOMEOWNERS OVERPAYING**, Fowler has one of the lowest rates of homeowner overpayment in the area east of Golden State Boulevard, when compared to the surrounding region. In this portion of the city, just 16.9 percent of homeowners are overpaying for housing. In comparison, west of Golden State Boulevard, 36.6 percent of homeowners are estimated to be overpaying for housing. While this rate is more reflective of patterns found in neighboring jurisdictions, the stark difference within the city may be as a result of the new construction that has occurred in the western portion of the city. In this area, Somerset Crossing and Aspire at Sunnyside are new homes that are priced from approximately \$400,000 to \$550,000, which has likely contributed to the significant rise in the median home value in Fowler in recent years, as described herein. In contrast to geographic discrepancies in homeowner overpayment, renter home value is relatively constant throughout the city (**FIGURE 1D-14 PERCENTAGE OF HOMEOWNERS OVERPAYING**). However, overall, the ACS estimates lower rates of renter overpayment in Fowler compared to neighboring cities and census tracts, including Sanger, Parlier, and Selma.

Table 1D-6 Cost Burden in Fowler, 2010-2018

Household Type	Cost Burdened			Severely Cost Burdened

Sources: CHAS 2006-2010 and 2014-2018

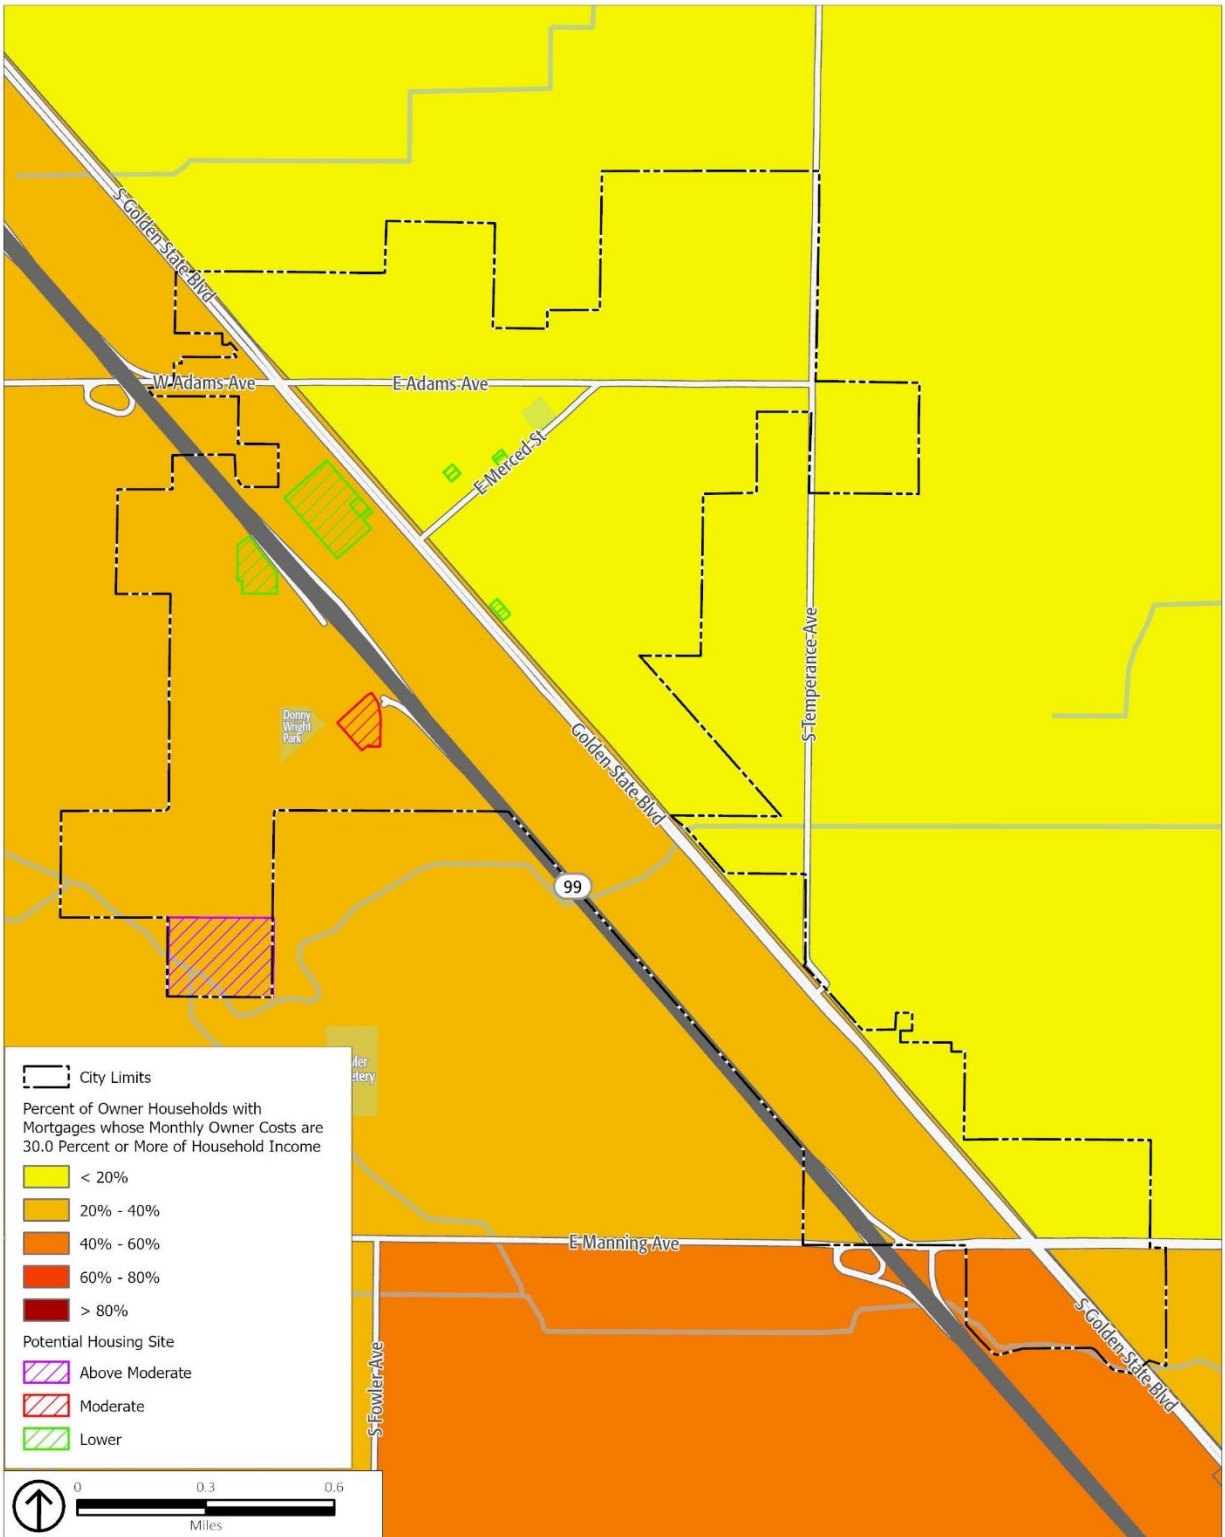

As discussed in the Overpayment section of Section 2: Housing Needs Assessment, overpayment often impacts lower-income households at a higher rate due to financial constraints. As such, these households are most at risk of displacement due to overpayment resulting from more limited flexibility in responding to changes in income or rent. In Fowler, 38.9 percent of all lower-income households are cost burdened and 31.8 percent are severely cost burdened, for a total of 70.7 percent of all lower-income households experiencing some degree of cost burden (**Table 1D-6 Cost Burden in Fowler, 2010-2018**). Lower-income renters experience overpayment at a significantly higher rate than homeowners, with 48.9 percent of renters overpaying, compared to just 14.0 percent of homeowners. This may suggest that lower-income homeowners live in the northern portion of the city, where homes tend to be older, are slightly smaller, and tend to be more affordable. Overpayment rates drop to 19.4 percent of moderate-income households, and 9.6 percent of above moderate-income households. The rate of above moderate-income households overpaying, particularly among homeowners, is relatively high compared to other jurisdictions in Fresno County, likely due to the availability of new construction units, which tend to be larger and therefore priced higher.

Since 2010, the rate of overpayment among lower-income households has increased significantly, which has primarily been as a result of increased overpayment among lower-income renters (**Table 1D-6 Cost Burden in Fowler, 2010-2018**). Moderate- and above moderate-income renters have also experienced moderate-to-large increases in overpayment as well. All income groups, across tenures, have experienced a decrease in severe overpayment since 2010, indicating that while households are still overpaying at a significant rate, the amount over 30.0 percent of their income they have to spend on housing has decreased. The greatest decrease in severe overpayment benefited lower-income homeowners. The changes in overpayment between 2010 and 2018 suggest growing unaffordability of the rental market for all households in Fowler.

While home value data from 2010 is not available, in May 2014, the median home value in Fowler was \$215,708, which had increased by 85.2 percent to \$399,394 in 2022 for an average annual increase of 10.6 percent, according to Zillow. Data on rental prices is more limited in Fowler, but it can be assumed that housing price increases have impacted rental units as well, particularly given the rising rates of overpayment among renters. The ACS estimates that the median gross rent increased from \$803 in 2015 to \$1,084 in 2020, for an average annual increase of 7.0 percent. While the median value of ownership units has increased more rapidly, lower- and moderate-income renters have been disproportionately impacted by rising housing costs in Fowler.

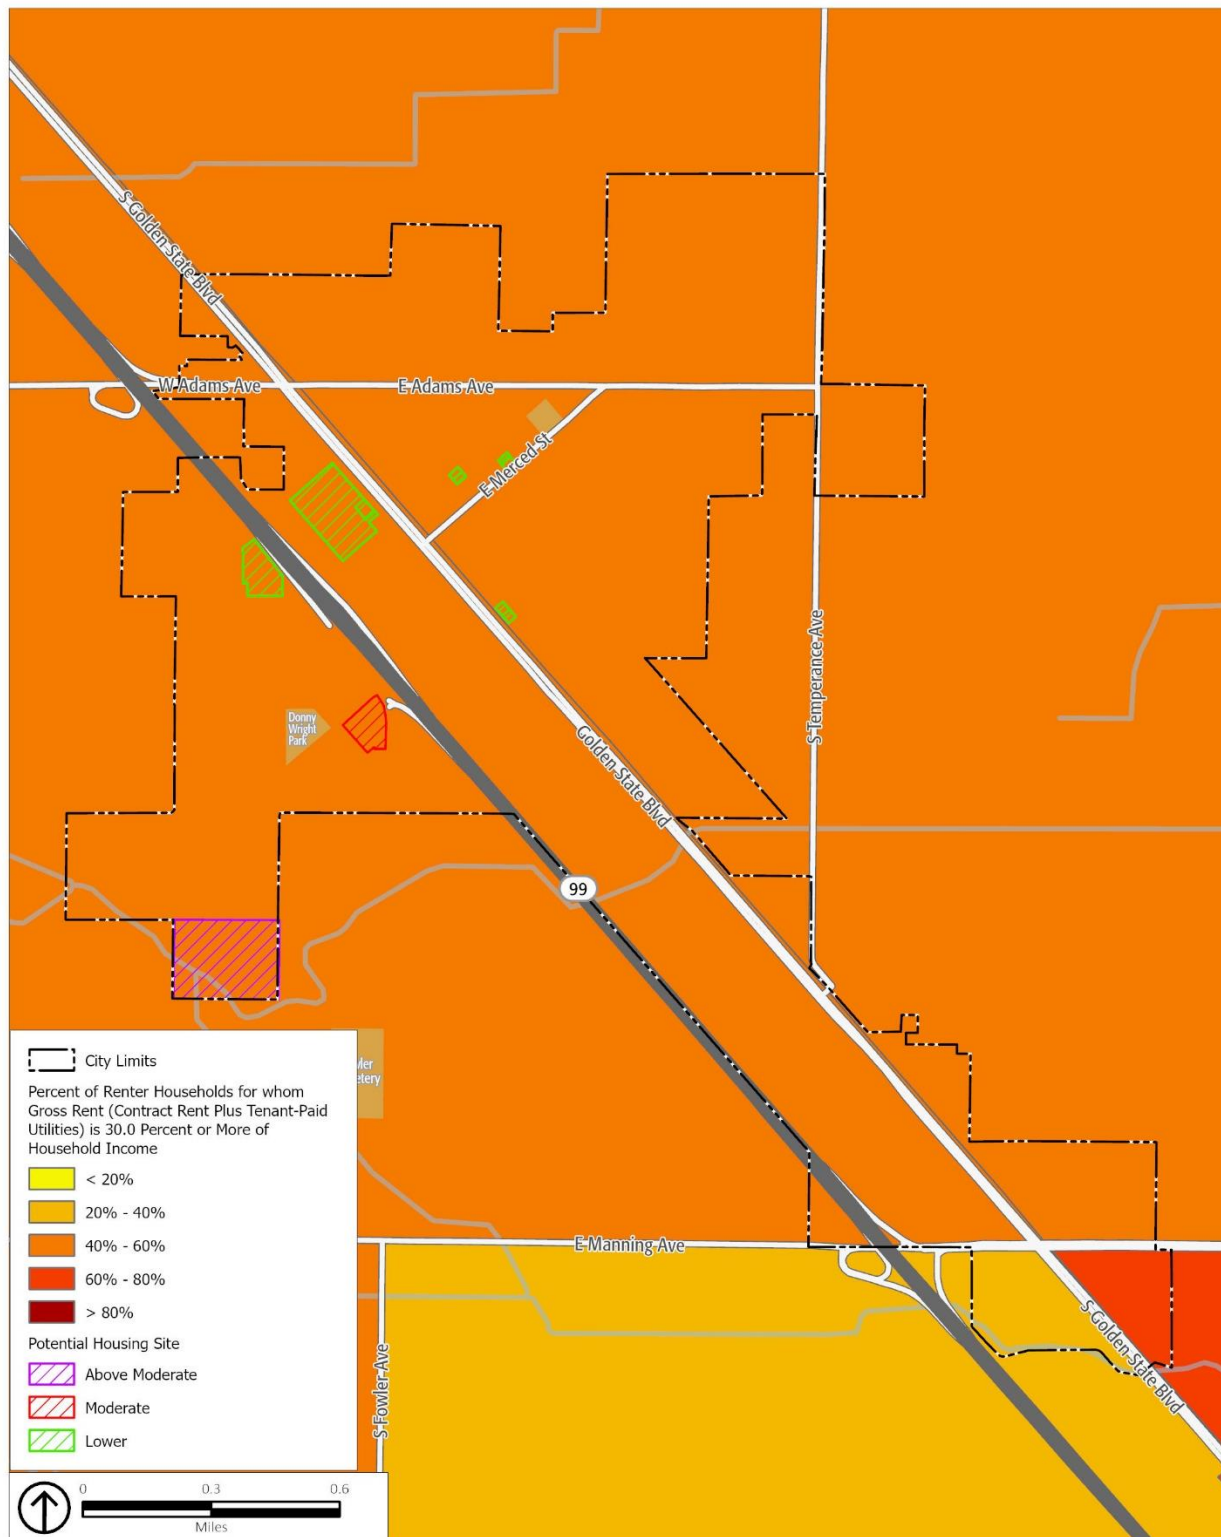

Program 22: Fresno County Homebuyer Assistance Program and Program 24: Housing Choice Vouchers outline the City's activities to increase access to homebuyer and housing choice programs that help promote housing mobility.

Substandard Housing Conditions

Approximately 51.7 percent of Fowler’s housing units are over 30 years old, and 31.3 percent of units are over 50 years old (**Table 2-19 Age of Housing Stock (2020), in Section 2: Housing Needs Assessment**). Older units are generally more frequently subject to maintenance issues than newer housing stock. Even units that are not urgently in need of repair may benefit from energy-efficiency improvements to reduce energy usage and related climate impacts. The oldest housing units in Fowler are largely concentrated in the center of the city, east of Golden State Boulevard, south of E. Adams Avenue, and west of S. Temperance Avenue. This area is closest to the original, and current, commercial district and the railway that brought early growth to the area. While considered a high-resource area, this portion of the city, and others, have a median income well below the state median. Therefore, it is possible that many households may not have the financial capacity to complete needed repairs on aging homes.

Another measure of substandard housing conditions is the presence of kitchen and plumbing facilities. The 2015–2019 ACS estimated that there are no owner-occupied units in Fowler that lack a complete kitchen or plumbing, but 60 renter-occupied units meet these criteria, all of which are occupied by lower-income residents. These units account for approximately 2.9 percent of Fowler’s total housing stock and 6.3 percent of renter-occupied units, indicating that renters, particularly lower-income renters, are disproportionately burdened by housing conditions.

Program 20: Housing and Rental Rehabilitation Programs seeks funding for targeted assistance for property owners and landlords of rental properties, code enforcement, and to market availability of rehabilitation assistance.

Homelessness

In January 2022, the Fresno-Madera Continuum of Care (FMCoC) published its Homeless Census and Survey Report (Point-in-Time [PIT]) count, which estimated 3,938 persons experiencing homelessness in Fresno County. Of that number, 1,728 persons were sheltered homeless and 2,210 were unsheltered homeless (Table 2-35, Total Unsheltered and Sheltered Homeless Count: Fresno County [2022], in Section 2: Housing Needs Assessment). Of this population, 3,397 individuals were counted in the City of Fresno and the remaining 541 were in the remainder of the county.

Throughout the FMCoC area, which includes Madera County, approximately 60.0 percent of the homeless population identified as male, 29.0 percent as female, and 1.0 percent as transgender. Approximately half of the population identified as Hispanic, 6.0 percent identified as Native American or Alaska Native, 3.7 percent as Asian, 15.6 percent as Black or African American, 0.8 percent as Native Hawaiian or Pacific Islander, 60.6 percent as White, and 12.8 percent as multi-racial or belonging to another race. Additionally, 205 people, or 4.9 percent of the homeless population, were veterans; 15.0 percent were survivors of domestic violence; and 19.0 percent had a serious mental illness. While the age of homeless persons was reported generally, it did not identify the senior population. The PIT report does not distinguish the characteristics of the homeless population in Fresno County, so it is assumed that these statistics generally represent the Fresno County population. Further, the 2022 PIT does not identify the locations of those individuals in the remainder of the county. However, in 2021, the County of Fresno released a

Homelessness Update that identified 196 homeless persons in the “rural informal county,” which includes the cities of Coalinga, Firebaugh, Fowler, Huron, Kerman, Kingsburg, Mendota, Orange Cove, Parlier, Reedley, Sanger, and Selma, and the unincorporated communities of Raisin City and West Park. No homeless residents were counted in Fowler.

Table 1D-7 Demographic Characteristics of the Homeless Population, 2022, identifies the proportion of each of the protected characteristics identified in the 2022 PIT compared to the proportion of each Fresno County jurisdictions’ population, to identify whether any protected classes are disproportionately represented as part of the homeless population. The percentages for a protected characteristic population in **bold** are overrepresented in the homeless population compared to that jurisdiction’s total population. As there are no known homeless persons in the City of Fowler, **Table 1D-7** compares the regional homeless population to the City’s population to identify discrepancies on a larger scale.

Table 1D-7 Demographic Characteristics of the Homeless Population, 2022

Sources: FCOG Data Packet, 2022; Fresno/Madera Continuum of Care, 2022; 2016-2020 ACS

As seen in **Table 1D-7 Demographic Characteristics of the Homeless Population, 2022**, all protected characteristics are overrepresented in the majority of Fresno County jurisdictions, with individuals with mental disabilities and residents that identify as Native American, Alaska Native, Black, African American, Native Hawaiian, Pacific Islander, White, or Other/Multiple Races being overrepresented in all Fresno County jurisdictions. Homelessness is often a cross-jurisdictional issue; therefore, the City participates in, and offers, several homelessness resources and programs that are available regionally, identified in **Table 1D-8 Services to Address Homelessness**.

Table 1D-8 Services to Address Homelessness

Service/Resource	Description	Operator	Location
Multi-Agency Access Program (MAP Point)	Traveling food truck and fixed locations that provide linkage to government resources and services (housing, behavioral health, physical health, food linkages, and transportation) at no cost to all residents of Fresno County	Fresno County Department of Behavioral Health (funding)/ Kings View Corporation (operation)	Countywide Physical locations: Firebaugh, Fowler, Fresno, Huron, Kerman, Mendota, Parlier, and Reedley
Fresno County Behavioral Health WARM Line	Available during weekday business hours for non-emergency emotional and coping support for residents throughout the county	Fresno County Department of Behavioral Health	Countywide
Multi-Agency Response to Community Homelessness (MARCH)	Countywide collaboration to address homelessness through coordination of resources regionally and cross-jurisdictionally, engagement of the community, attracting private funding to support community-specific programs, and inclusion of rural representatives selected by FCOG	FCOG/Jurisdictions	Countywide
Turning Point of Central California	Mental health services including a full-service partnership program	Contracted by Fresno County Department of Behavioral Health	Countywide
Fresno County Department of Social Services Homeless Assistance	Temporary housing, permanent housing, or arrears payments for families eligible for CalWorks once during a 12-month period	Fresno County Department of Social Services	Countywide
Catholic Charities	Clothing, shelter, diapers, a food pantry, rent and mortgage assistance, DMV ID vouchers, application assistance for CalFresh	Catholic Charities	Countywide

SECTION 2D-6: LOCAL ASSESSMENT OF FAIR HOUSING

Service/Resource	Description	Operator	Location
	and food stamps, application assistance for PG&E discounts, assistance with immigration services, and senior companionship assistance. Also has a Rural Outreach Program to serve residents throughout the region and work with migrant farmworkers.		Physical location: City of Fresno
Emergency Housing Voucher	Assist persons experiencing, at-risk of becoming, or recently homeless and those fleeing domestic violence, dating violence, sexual assault, stalking, or human trafficking	Fresno Housing and FMCoC	Countywide
United Way	Emergency informational services to connect persons in need with Homeless Prevention Programs, food and shelter assistance, help with landlord-tenant issues, legal services referrals, and more	United Way	Countywide
Groceries2Go	Provides grocery boxes of shelf-stable food items through an appointment-based system.	Central California Food Bank	Countywide
CalFresh Enrollment Assistance	Application assistance and assistance navigating the CalFresh process.	Central California Food Bank	Countywide
Fresh Produce Distribution	Mobile Pantry Program and Neighborhood Markets operating out of self-contained vehicles that travel to rural and remote areas throughout the county. A schedule of distribution locations is available online.	Central California Food Bank	Countywide
Senior Hunger Program	Food boxes to senior-serving partners tailored to the dietary needs of seniors.	Central California Food Bank	Countywide
Partner Feeding Sites	Provides food to over 220 sites including churches, community centers, and other organizations to feed hungry residents in local neighborhoods	Central California Food Bank	Countywide
USDA Partnership	Distribute food acquired by the USDA to 47 organizations in Fresno County.	Central California Food Bank	Countywide

SECTION 2D-6: LOCAL ASSESSMENT OF FAIR HOUSING

Service/Resource	Description	Operator	Location
Fresno County Food Map	Online service mapping locations of feeding sites, food banks, etc.	Fresno County	Countywide

Fresno County Department of Behavioral Health (funding)/ Kings View Corporation (operation)	Countywide

Emergency shelters also include Marjaree Mason Center, Fresno Rescue Mission, Evangel Home Inc., and Plaza Terrace.

Program 3: Homeless/Unhoused Needs outlines activities to address homelessness concerns in the City of Fowler.

Farmworkers

As discussed in the Regional Assessment of Fair Housing, farmworkers are considered a special needs group because they traditionally earn low wages and often migrate between farms, resulting in many farmworkers living in overcrowded and substandard housing conditions. Although Fresno County’s overall economy has historically been largely based on agricultural operations, the number of farmworkers living in each of the jurisdictions in the county in more recent years varies depending on location, size, and diversification of their individual economic base. Further, prior to the COVID-19 pandemic, the industry started shifting toward recruiting and employing H-2A visa workers, many of whom are from Mexico and Central America. However, farmworkers are essential to Fresno County’s and Fowler’s economies as well as to local and national food supplies, and their needs for safe and affordable housing resources must be addressed.

The 2017 Census of Agriculture identified 150 farm operations within the 93625 zip code, which includes the City of Fowler and land in unincorporated Fresno County around the city. Additionally, there are 300 farm operations in the adjacent 93725 zip code, to the west of Fowler, and 48 farm operations in the 93616 zip code, northeast of Fowler. It is likely that some portion of the farm operations in these zip codes, particularly in the areas closest to Fowler, employ farmworkers that reside or use resources in the city.

Despite its location within an active agricultural region of the county, only 7.5 percent of Fowler’s labor force is employed in agriculture, forestry, fishing and hunting, or mining, according to the 2016-2020 ACS. Other jurisdictions in the county (including unincorporated county) have higher rates of the labor force in these industries (see **Table 2-39 Estimated Farmworkers (2020)**). Though it is possible that not all these workers are engaged in farm labor, the data allow comparisons between jurisdictions and to gauge segments of the population at risk of overpayment, overcrowding, substandard housing conditions, or displacement.

Based on the most recent (2022) farmworker employment figures collected by the California Employment Development Department (EDD), there are 96,300 farmworkers employed throughout the county, yet

farmworker housing facilities for only 2,540 occupants were contracted by H2-A employers and farm operators, according to the HCD Employee Housing Facilities Permit Services database. Although this is equivalent to only about 2.6 percent of the farmworker employment countywide, it is important because H-2A workers must be provided with housing accommodations. The seasonal and often migrant nature of farm labor, and accounting for undocumented workers, suggest that this data likely underrepresents the actual farmworker population, because undocumented residents do not often participate in traditional data collection.

The Phase 1 COVID Farmworker Survey Report, completed by the California Institute for Rural Studies and published in February 2021, estimates that undocumented workers comprise approximately 50 percent of workers statewide. They are predominantly Mexican, and the majority are Mixteco and Trique indigenous non-Spanish-speaking people. According to the article “In the Valley of Fear,” published in December 2018 on workingimmigrants.com, most of the farmworkers in the San Joaquin Valley have been working the fields for at least a decade and have established families in the vicinity of their workplace.

Between September 2021 and January 2022, Fresno County conducted a Farmworker Survey and a Farmworker Employer Survey. A second round of each survey was conducted between February 2022 and July 2022. In total, the County surveyed 240 farmworkers and 170 farm employers. Only one respondent to the Farmworkers Survey reported residing in Fowler, though an additional four respondents lived in the nearby unincorporated community of Easton. Of this sample, all of the respondents disclosed their status as either permanent residents or citizens having lived in the U.S. for a minimum of 28 years. None of the respondents were H-2A visa workers. According to the countywide survey effort, 37.0 percent of the respondents reported being citizens, 38.2 percent reported being permanent residents, 16.0 percent identified their status as undocumented workers, 6.3 percent did not respond, and 1.3 percent had H-2A visa status. Due to the small representation of respondents residing in or near Fowler, a definitive determination of the proportion of undocumented workers cannot be made; therefore, the representation of undocumented workers throughout Fresno County as found by the survey may be applicable to the farmworker population in Fowler and surrounding communities.

According to the EDD, the most recent data from 2014 measured median wage for farmworkers at \$13.44 per hour, or approximately \$25,804 per year for full-time work, which is considered extremely low income, correlating with the 2019 poverty threshold of \$25,750. Seasonal workers without a year-round income could have lower incomes. The median income in the city is \$59,663, and 13.8 percent of the population lives below the poverty threshold. While 66.4 percent of the households in the city are Hispanic, 82.5 percent of the total households in poverty are Hispanic households. The findings from the Fresno County Farmworker Survey indicate that 99.6 percent of farmworkers surveyed countywide are Hispanic. When the ACS 2016-2020 data that 7.5 percent of the labor force in Fowler is employed in agriculture are combined with the above poverty and EDD wage data, it suggests that a majority of the labor force employed in agricultural industries are Hispanic (HNA Table 2-10, Employment by Industry), and it is likely that many of these workers have incomes below the poverty threshold.

To meet the housing needs of the farmworker population in Fowler, as shown by **Table 1D-9 Farmworker Housing Resources in Fowler**, the HCD Employee Housing Facilities Permit Services database identifies one H-2A visa housing facility within the vicinity of the city with capacity for 15 occupants. Even though there is a low proportion of persons engaged in the agricultural industries in Fowler, the lack of farmworker housing facilities, paired with the high proportion of Hispanic households in poverty, suggests that the farmworkers in the city may have difficulty finding affordable, appropriately sized housing.

Table 1D-9 Farmworker Housing Resources in Fowler

H-2A Visa Farmworker Housing Facilities			
Berberian 20 Dorm	4343 S. Fowler Ave. – Fowler	1	15

Source: HCD Employee Housing Facilities Permit Services database, January 2023.

Note: Facilities reported in operation as of 12/31/2022.

Given the shortage of farmworker housing units, many farmworkers are likely forced to pay market rate for their housing or find other options, such as sleeping in vehicles or garages. In Fowler, the H-2A farmworker facility is not suitable for families, based on unit size. Farmworkers that are citizens and permanent residents may have access to 170 HUD, USDA, or locally assisted affordable housing opportunities in Fowler, although they must compete with other lower-income households for the limited number of units. For undocumented workers, options are more limited, and a large number of farmworkers may live in spaces not intended for human habitation, such as shacks, outbuildings and sheds, and converted garages, often in severely overcrowded conditions.

Permanent resident farmworker households are included in ACS estimates and therefore part of CHAS housing need estimates. Consequently, the housing needs of lower-income farmworker households are not differentiated from other lower-income households experiencing overpayment, overcrowding, and substandard housing. Because about 7.5 percent of the labor force in Fowler are employed in agricultural operations and similar fields, farmworkers may comprise a portion of extremely low- and very low-income households that experience one or more housing problems in the city. Based on the Fresno County Farmworker Survey, 81.7 percent of respondents countywide reported incomes below \$2,500 per month, which corresponds to an extremely low-income household of four. However, the respondent from Fowler reported a household income of approximately \$2,900 per month, and of the four respondents residing in Easton, 50.0 percent had incomes above \$2,500 monthly. Despite these slightly higher-than-average incomes for farmworkers in the county, farmworkers in Fowler still likely face challenges finding affordable housing; or conversely, based on the difficulty of finding affordable housing in Fowler, lower-income farmworkers may choose to live elsewhere, which could be a reason for the low proportion of farmworkers in the city.

Based on socioeconomic and demographic characteristics indicators of the farmworker community in the San Joaquin Valley, it is likely that a portion of farmworker households that reside in the city, particularly those with lower incomes, have located housing opportunities in the central downtown neighborhood, where the median income is \$25,781 and 43.3 percent of residents are below the poverty line, conditions that reflect the regional farmworker population. While roughly 66.4 percent of the households in the city are Hispanic, the highest representation of Hispanic households (between 83.2 and 89.2 percent) is in the older central downtown and southeast portion of the city, adjacent to major transportation corridors, industrial, and other nonresidential uses. Though this area includes two of the three affordable housing complexes in the city, affordable housing opportunities not associated with assisted housing resources may also be found in the older residential stock. The higher proportion of Hispanic households in these areas aligns with the findings of the Farmworker Survey and statewide statistics that farmworkers are overwhelmingly Hispanic.

Citizens, noncitizens with permanent status, and H-2A visa workers are eligible for public housing, HCVs, USDA rural rental assistance, and Section 8 project-based rental assistance. Section 214 of the Housing and Community Development Act of 1980, as amended, makes certain categories of noncitizens eligible for assistance, including most categories of immigrants, but excludes unauthorized immigrants (e.g., undocumented) and those in temporary status (e.g., tourists and students). Section 214 applies to specific programs, primarily federal rental assistance programs administered by HUD and the USDA, including Public Housing, Housing Choice Voucher, Section 8 project-based rental assistance programs, and rural rental assistance. Undocumented residents are subject to eligibility requirements based on whether Section 214-covered programs are administered by HUD or USDA, which implement different regulatory treatment for mixed-status households depending on householder status. For HUD Section 214 projects, an ineligible noncitizen may reside with family members who are eligible to qualify for affordable housing (such as an undocumented single parent with U.S. citizen children or an undocumented worker married to an eligible householder), although Section 8 benefits are prorated depending on the number of undocumented household members. For USDA Section 214 projects, a undocumented householder would not be eligible to participate in the HCV program, and therefore would not qualify to live in any USDA-assisted affordable multifamily housing complexes (i.e., Fowler Apartments, Ruby Court Senior Apartments, and Walnut Grove Villas). However, a family with an eligible householder that includes undocumented household members (such as a U.S. citizen householder married to an undocumented worker) would qualify to reside in these properties and receive full HCV benefits. This assistance-ineligible population is considered underserved and at higher risk of overpayment, overcrowding, and displacement compounded by the legal complexities of eligibility and language barriers.

Similar to most jurisdictions in Fresno County, the majority of the residential opportunities in Fowler are single family detached and attached units, which comprise 75.5 percent of the housing stock. Multifamily units comprise 22.5 percent of the housing stock, of which 36.0 percent are affordable. Fowler has a small proportion of mobile homes (2.0 percent of the stock), which are naturally more affordable than single-family residential units and may serve as a valuable housing resource for workers unable to qualify for market rate or affordable rental housing, or other accommodations.

The high renter rate in the older single-family, lower-income central neighborhood, which does not have any affordable housing complexes, may support findings of the Farmworker Survey, where respondents countywide indicated that their preference for dwelling unit type are single-family units regardless of owner or renter status. Additionally, although the southwest portion of the city has a higher homeowner rate, it is likely that this distribution can be attributed to a newer single-family subdivision at the eastern edge of the city, because housing conditions and neighborhood characteristics in the remainder of this block group are similar to the older downtown housing stock and may have been converted to rentals. Of the farmworkers surveyed who live in Fowler and Easton, 60.0 percent are renters, and 58.2 percent of all survey respondents identified as renters, compared to the Fowler citywide rate of 46.6 percent. According to the Fresno County Farmworkers Survey, 95.6 percent of the renters responded that they desired to be homeowners. Further, 78.4 percent of the farmworker renter households consisted of three or more persons, of which 93.6 percent had resided in the U.S. for 10 or more years, 3.7 percent less than 10 years, and 2.7 percent did not respond. The prevalence of households with three or more persons, coupled with the longevity in the U.S. of the majority of the renters, and the preference for single-family unit type further substantiate the need for housing to accommodate families.

Conversely, the lower proportion of owner-occupied housing units corresponding to neighborhoods with lower incomes, higher representation of non-White population, and higher rates of poverty suggests that the cost of homeownership in one of the highest priced jurisdictions in the county, with a median priced home at \$455,000 (see **Table 2-22 Home Sales Recorded in 2021-22**, in the HNA) is more than the majority of households in the city, and likely farmworkers, are able to pay. For this reason, the low proportion of farmworkers residing in the city may reflect that farmworkers seeking homeowner opportunities choose to live in communities where the cost of housing for purchase is lower.

The Farmworker Survey found that the average household size of respondents was 3.9 persons, larger than average household size citywide (3.1 persons). In Fowler, the rate of overcrowding ranges from 10.3 percent to 14.6 percent, suggesting that farmworker households and other large households may face challenges finding adequately sized units, resulting in households sharing a dwelling or multiple family members sharing rooms. Survey results indicated that 58.4 percent of the farmworkers countywide were living in overcrowded conditions, with renter households finding units large enough to accommodate household size more of a challenge. Based on this, it is likely that larger lower-income farmworker renter households would have difficulty finding appropriately sized affordable housing in Fowler and might find more suitable housing elsewhere in the county or experience overcrowding and/or overpayment.

In response to the observed need for continued support and housing resources for local farmworkers, the City includes Program 8 to reach out to local farm employers to identify housing needs, seek funding to support development of farmworker housing, and provide materials on available resources and financial assistance on the City website.

Displacement Risk

The Urban Displacement Project, a joint research and action initiative of the University of California, Berkeley, and the University of Toronto, analyzes income patterns and housing availability to determine the level of displacement risk at the census-tract level. Levels of displacement risk range from “probable displacement” to “extreme displacement,” with four total levels of displacement risk, if displacement risk is present. The Urban Displacement Project has not identified any areas of elevated risk in Fowler, though the area north of S. Golden State Boulevard has been identified as a “vulnerable community” (**FIGURE 1D-16 VULNERABLE COMMUNITY DESIGNATION**). Vulnerability is defined as areas in which the share of very low-income residents is above 20.0 percent, and the tract meets at least two of the following criteria:

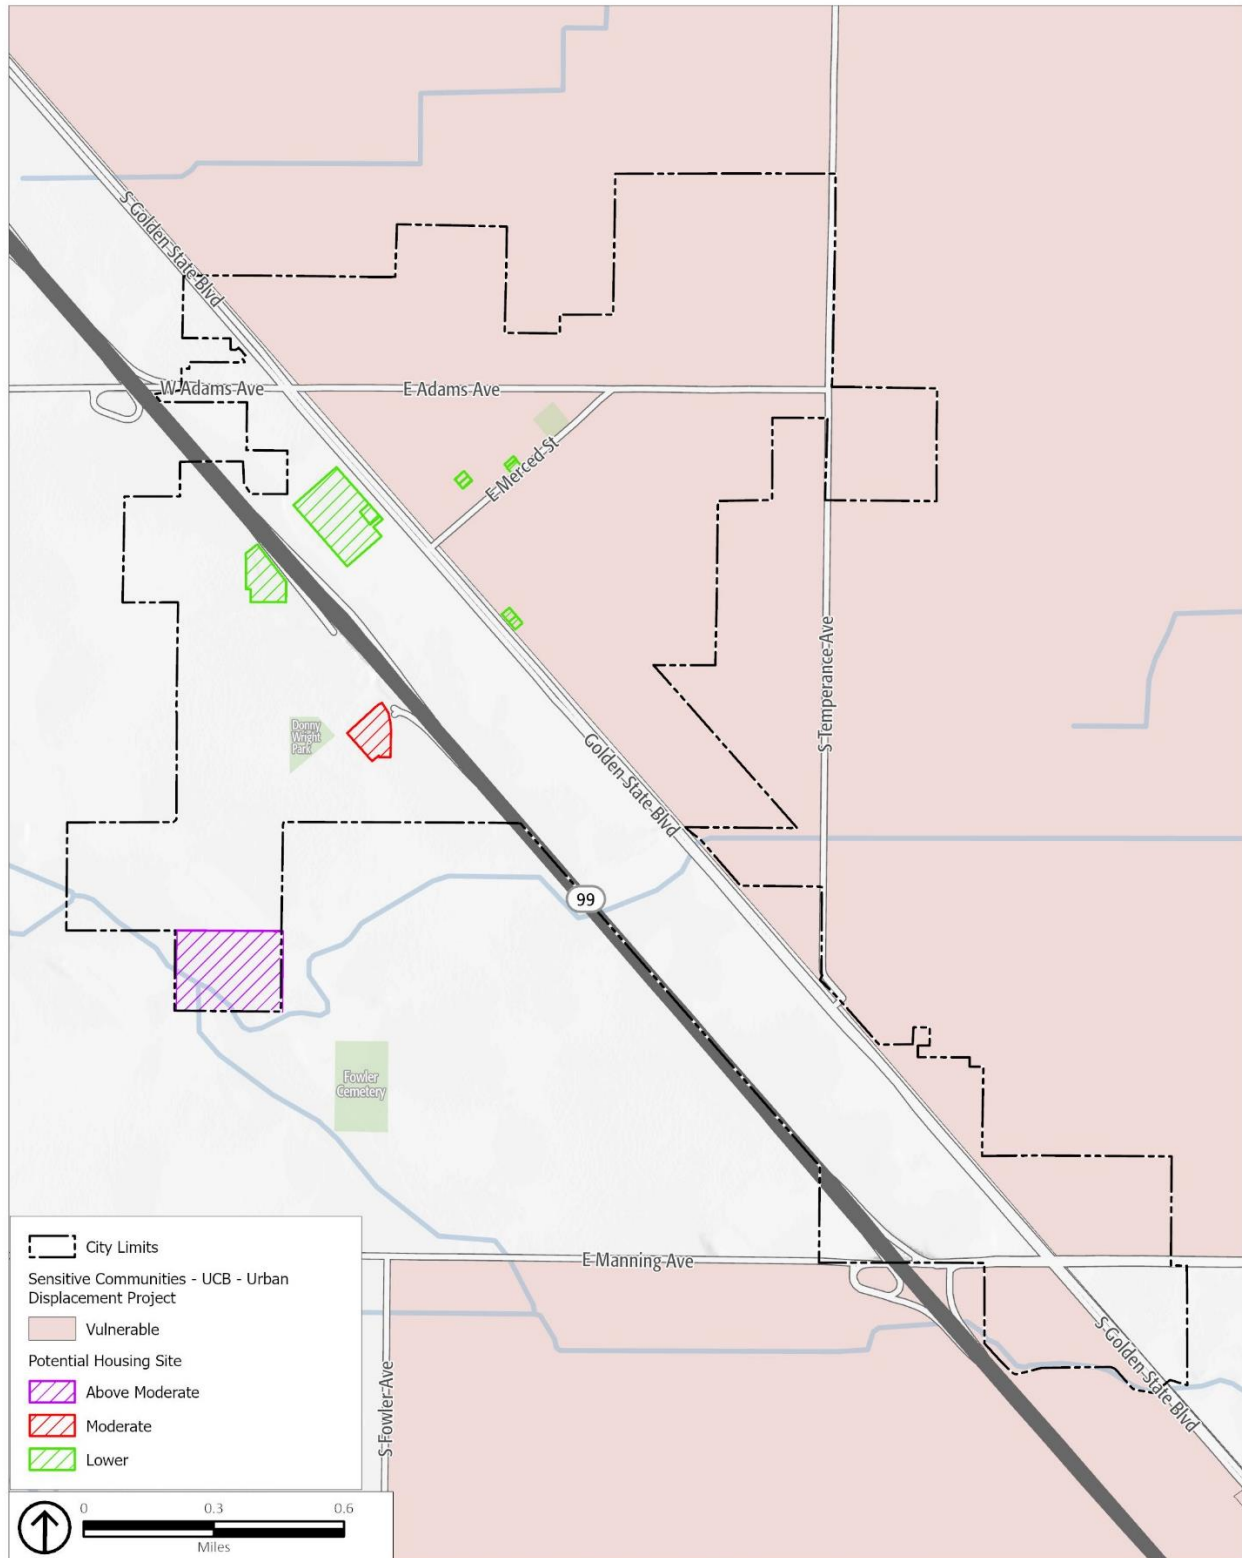

- Share of renters is above 40.0 percent,
- Share of people of color is above 50.0 percent,
- Share of very low-income households that are severely rent burdened households is above the county median, or
- They or areas in close proximity have been experiencing displacement pressures.

The Urban Displacement Project defines displacement pressures as a percentage change in rent greater than the county median for rent increases. While the Urban Displacement Project does not specify the conditions that led to the vulnerability determination for Fowler, it can be assumed that residents in northern Fowler experience heightened displacement risk compared to residents in the southern area and elsewhere in the county due to a combination of incomes and housing prices.

As found in the analysis of overpayment, for-sale home costs have increased by an average of 10.6 percent annually since 2014, and rental costs have increased by an average of 7.0 percent annually since 2015. In contrast, the ACS estimates that, since 2014, the median income in Fowler has increased by an average of 4.2 percent annually. When comparing change in median income to change in home prices, it is clear that the increase in housing costs outpaces increases in wages, indicating increasing displacement risk for residents of Fowler. Given the rapid increase in home values, current and prospective homeowners are likely impacted the greatest by changes in housing cost. In comparison, countywide, median incomes have increased by approximately 4.4 percent annually and rents have increased by 3.2 percent on average. While Zillow does not report countywide home values, the ACS estimates that these have increased by 3.9 percent annually, on average. Therefore, in contrast to conditions in Fowler, there may be a moderate decrease in displacement risk countywide due to home costs. The inflated displacement risk resulting from discrepancies in wages and housing costs in Fowler reflects a disproportionate need for affordable options in the city.

Program 22: Fresno County Homebuyer Assistance Program and Program 24: Housing Choice Vouchers outline the City’s activities to increase access to homebuyer and housing choice programs that help promote housing mobility, among other programs established in the housing element.

FIGURE 1D-16 VULNERABLE COMMUNITY DESIGNATION

Source: UC Berkeley Urban Displacement Project; City of Fowler, 2023; Placemarks, 2023

Other Relevant Factors

In addition to the indicators analyzed previously, there are several other factors that can influence housing mobility and access to opportunity in a jurisdiction. For example, historical development patterns may have resulted in neighborhoods that are largely or exclusively made up of single-family homes, or historical discrimination may have influenced a city's racial and ethnic composition. Further, given current market trends, newer market-rate neighborhoods may not be financially accessible to lower-income households without overpayment or overcrowding. Other factors may include public and private investment, local regulatory or economic development plans, and historical policies. Those factors that are considered relevant vary between jurisdictions and are described at the local level herein.

Land Use and Zoning Patterns

According to the 2016-2020 ACS, 75.5 percent of the housing stock in Fowler is single-family units, inclusive of single-family attached units, indicating a higher proportion of single-family units relative to other Fresno County jurisdictions. Duplex, triplex, and fourplex unit types make up approximately 7.0 percent of housing units. Approximately 9.3 percent of the housing stock consists of multifamily units in structures of five to nine units, which is a significantly higher proportion than Fresno County overall. The remainder of multifamily units (6.2 percent of total housing stock) are in structures with 10 or more units. Mobile homes, a housing type that is often naturally more affordable, comprise 2.0 percent of the housing stock, a slightly smaller proportion than other Fresno County jurisdictions, with the majority of the units in the Valley Mobile Home Park. Although the majority of the housing stock in the City of Fowler is made up of single-family detached and attached unit types, approximately 30.6 percent of the single-family detached and attached housing stock is renter occupied, indicating that a significant portion of the single-family housing stock has been converted to rental property, in addition to other unit types available for rent.

While in most communities single-family zoning can create desirable places to live, higher entry costs associated with this housing type can also pose a barrier to access for lower- and even moderate-income households, restricting access to economic, educational, and other opportunities that may be available in single-family neighborhoods. In the City of Fowler, all of the single-family residential neighborhoods are in areas designated as high resource by TCAC and HCD. Therefore, housing type does not necessarily indicate more positive access to educational, services, employment, and business resources. However, the price of available single-family units listed for purchase on Zillow.com in October 2022 generally exceeded the price threshold of moderate-income households, including the single-family residential areas in the vicinity of the downtown on the east side of the rail line, where the concentration of households with the lowest median income are found.

Affordable housing development in the current market typically requires higher-density zones to support construction; therefore, zones limited to single dwelling units on each lot generally do not support affordable development. As shown in **FIGURE 1D-10 ZONING IN FOWLER**, there are two base zones for higher-density multifamily housing. The RM-2 district is intended to accommodate a variety of housing types, such as small-lot single-family homes, detached zero lot line developments, duplexes, triplexes, fourplexes, townhouses, condominiums, and garden apartments. The RM-3 district is intended for high-

density residential development and accommodates attached homes, duplexes to fourplexes, apartment buildings, and condominiums. Mixed-uses with residential are permitted subject to a PUD within any C-1 or C-2 district, and higher-density residential is also accommodated in the Form-Based Code zone applied to the town center area.

The RM-2 and RM-3 zones in the City of Fowler are spread throughout the city, as seen in **FIGURE 1D-10**. However, a higher concentration of RM-3 parcels are found southeast of South 5th Street where the affordable Magill Terrace, Walnut Grove Villas, and Ruby Court age-restricted multifamily complexes are located; and four blocks within the downtown core area between Merced and Main Streets on the east side of South Golden State Boulevard. Additionally, the affordable Fowler Apartments are on an RM-3 parcel on East Adams Avenue surrounded by single-family residential zoning in the northern section of the city. RM-2 parcels are within the eastern community core area along East Main, Merced, Fresno, Vine, and Tulare Streets; as well as a large vacant parcel west of SR 99 at the corner of West Fresno Street and Fowler Avenue. The potential for mixed-use residential development in the C-2 zones as part of a PUD expands the opportunities for higher-density units within the high-resource designated corridor between SR 99 and Golden State Boulevard, fostering access to business, services, and employment opportunities, as well as direct access to the regional SR 99 throughfare. Although limited, there also are opportunities for integration of residential uses in the C-1 zones to the west of SR 99, providing a transition between the commercial uses adjacent to the freeway and lower-income residential neighborhoods to the west.

The location of RM-2 and RM-3 parcels in the city suggests some opportunities for income-integrated neighborhoods and improved access to services and amenities given proximity to the downtown business district, where mixed-use residential infill and redevelopment opportunities exist, and near parks and recreation opportunities. Many of the parcels zoned for multifamily and residential mixed-use are near the rail line and adjacent to industrial uses, which is consistent with a countywide pattern for multifamily housing, particularly affordable complexes, although in the City of Fowler, the potential for higher-density residential is in high-resource areas, regardless of proximity to nonresidential uses and major transportation thoroughfares.

Historical Development Patterns

According to Fresno County Sesquicentennial, the community of Fowler was established in 1872 when State Senator Thomas Fowler implemented the “Fowler Switch” along the southern extension of the Central Pacific Railway. In its early years, the community was a center for the cattle ranching industry, and activity surrounded the railroad tracks within the historical core. The Sanborn Company produced Fire Insurance maps in the early years of Fowler’s development, which provide insight on how the community grew and changed. In 1896, the City of Fowler was contained largely within a 16-block area bordered by Mariposa Street to the north, the Southern Pacific railway tracks to the west, Fifth Street to the east, and Fresno Street to the south. Blocks were laid out in a uniform grid and included north to south alleys. Despite the small size of the community, Merced Street east of the railroad had already become a center of commercial activity, with several buildings lining the public right-of-way. The city incorporated in 1908 and by 1945 had expanded north to Adams Avenue, remaining compact and walkable in form. Merced Street, east of the railway tracks, continued as a commercial center, adding new businesses and institutions along its route.

The railroad experienced reduced significance with the construction of the original SR 99 (now Golden State Boulevard). Later, construction of the new SR 99 and the removal of the train depot impacted the central functionality of the downtown. The vitality of the city's downtown core diminished as the freeway enhanced access to employment, commercial, and shopping resources in surrounding communities, while effectively bypassing the historical commercial core, resulting in residential development flourishing at the perimeter of the city. The city has since implemented a number of planning, design, revitalization, and economic development programs to support renewed interest and attention to the historical downtown, which promotes opportunities for mixed-income residential uses in the Form-Based Code zone, and place-based revitalization, as well as potential for residential uses at all income levels in the C-1 and C-2 zones between the central downtown and SR 99.

Limited new market-rate small multifamily infill projects are being completed in the older residential fabric within and surrounding the downtown, fostering higher-income housing integration and housing mobility options. Residential development has extended to the southeast with construction of three affordable multifamily complexes: Ruby Court Villas, an age-restricted senior complex; Walnut Grove Villas; and Magill Terrace, as well as a number of market-rate single-family residential subdivisions south of East South Avenue. Residential development has also expanded north of East Adams Avenue with construction of the affordable Fowler Apartments, and new single-family residential subdivisions in the northeastern and northwestern corners of the city.

Public Investment Patterns

Public and private investment typically includes construction, maintenance, and improvements to public facilities, including infrastructure, acquisition of land, and major equipment. Historically, investment in the City of Fowler has been influenced by the role of SR 99 through the city, which improved access to commercial and employment opportunities in surrounding jurisdictions, supporting expansion of residential development. Despite the highway facilitating access to other commercial cores, new development on West Merced Street after 2000 brought new economic development opportunities and services to the community primarily oriented toward SR 99. As a result, many properties adjacent to and west of Golden State Boulevard saw diminished activity or were vacated and many historical structures east of Golden State Boulevard deteriorated despite the addition of new commercial tenants. The disinvestment in the downtown led to fragmentation of downtown land uses and limited activity on street corridors. In December 2007, the Central Fowler Revitalization Plan was adopted, and the city's Zoning Code was subsequently amended in 2013 to adopt Form-Based Code regulations and standards to guide investment in the revitalization of the city core.

The City has taken significant action to promote place-based revitalization of the downtown, increase affordable housing mobility opportunities in the central core accessible to local commercial businesses and services resources, and provide mixed-income residential opportunities throughout the city, and any infrastructure or facilities in need of improvement citywide are identified for investment in the City's annual Capital Improvement Plan (CIP). The CIP is funded from a variety of sources that can each be used for specific purposes. These funds are allocated to improve roadways and other transportation infrastructure, implement the 2007 Downtown Revitalization Plan, and other projects, including:

- **Pedestrian Connectivity.** The City aims to improve accessibility and pedestrian mobility through installation and maintenance of Americans with Disabilities Act (ADA) curb ramps, reconstruction of deteriorating sidewalks, improved signalization at Manning Avenue, and maintenance of the Golden State Boulevard Bike Path.
- **Water and Sewer Infrastructure.** The City has allocated funding to improve water and sewer service capacity through the Annual Well Maintenance Program among other ongoing maintenance to infrastructure to support current and future development needs.
- **Public Facility Improvements.** The City aims to promote community activities and access to resources by funding improvements to the Fowler Public Library, Job Training Center, and Senior Center.
- **Parks and Recreation Facilities.** To promote safe and healthy spaces and outdoor recreation, the City allocates funding for improvements to local parks, including the Donny Wright Park and Panzak Park among others, as well as acquisition of new park land and construction of the new Harris Park.

Priority is based on projects that will result in the greatest community benefit, mitigate existing issues, and address public demand and need, particularly place-based revitalization within the Downtown Revitalization plan area. The City has secured funding for the restoration and improvement of storefronts along Merced Street, and new construction along West Merced has encouraged a continuous pedestrian environment across Merced Street. Additional investment, such as the fire station completed in 2020 and the new library along Seventh Street, has encouraged downtown's centrality.

In response to historical disinvestment downtown and based on the recommendations of the Central Fowler Revitalization Plan, the City is investing significant funds in continued downtown revitalization. Capital improvement projects focus on creating more public facilities, public safety, and recreational amenities for residents of the city, expanding the capacity of the water, sewer, and roadway infrastructure network, and preparing for expansion of the city's development within, and at the perimeter of the city for industrial, commercial, and residential development, including general maintenance and infrastructure rehabilitation throughout the city.

Local Knowledge

The Downtown Revitalization Plan includes Fowler's central commercial area and immediate neighborhoods, bounded by Adams Avenue along the northeast, Golden State Boulevard to the west, Tuolumne Street to the northwest, and Main Street to the south, including Merced Street west of Golden State Boulevard to SR 99. The area also includes the approximately one-mile section of the Golden State Boulevard Corridor between Adams Avenue to the north and West Peach Street to the south, and selected areas observed as important opportunities to connect existing neighborhoods and future development to the downtown and schools.

Adoption of a Form-Based Code for this area is intended to stimulate cohesive place-based revitalization to foster a vibrant town center through a mix of uses with shop fronts and commercial uses at street level, overlooked by canopy shade trees, upper-story residences, and offices. The inclusion of upper-story residences provides housing mobility opportunities for households of all incomes, potential for higher-income household integration into a portion of the city experiencing low median incomes and high rates of Non-White populations, as well as increased access to commercial, services, linkage to the multi-use pedestrian/bike path system and public facilities resources, as well as employment opportunities.

The “Highway Business” Overlay District is intended to promote attractive development along SR 99 through the City of Fowler and establish consistent standards with other jurisdictions in Fresno County. The regulations of this district seek to balance the economic health of the community with a visually improved corridor.

The Golden State Corridor Economic Development Infrastructure Improvements Project, financed by Measure C, will provide improved access to the community, including pavement, signalization, and bike trail improvements. The project includes a realignment of Golden State Boulevard through the city, which will provide new commercial parcels and increase demand for commercial development, increasing access to commercial resources and employment opportunities for existing and future residents. In the southern extension of the city between SR 99 and Golden State Boulevard, the Temperance/Valley Drive loop has been completed and 70.0 percent of the industrial property has been developed, including the Three Crowns industrial project, thus increasing demand for local affordable housing for the additional workforce, and conversely, expanding employment opportunities for existing residents.

Enforcement and Outreach Capacity

Compliance with Fair Housing Laws

In addition to assessing demographic characteristics as indicators of fair housing, jurisdictions must identify how they currently comply with fair housing laws or identify programs to become in compliance. The City of Fowler enforces fair housing and complies with fair housing laws and regulations through a twofold process: review of local policies and codes for compliance with state law, and referral of fair housing complaints to appropriate agencies. The following identifies how the City complies with fair housing laws:

- **Density Bonus Law (Government Code Section 65915).** The City has included **Program 14: Zoning Ordinance Amendments** to amend the density bonus ordinance to allow up to a 50.0 percent increase in project density depending on the proportion of units that are dedicated as affordable, and up to 80.0 percent for projects that are completely affordable, in compliance with state law.
- **No-Net-Loss (Government Code Section 65863).** The City has identified a surplus of sites available to meet the Regional Housing Needs Assessment allocation. In total, the City’s surplus unit capacity is 339 units, composed of 151 lower-income units, 47 moderate-income units, and 141 above moderate-income units.

- **Housing Accountability Act (HAA) (Government Code Section 65589.5).** The City does not condition the approval of housing development projects for very low-, low-, or moderate-income households or emergency shelters, unless specific written findings are made. Further, the City currently allows emergency shelters by-right, without limitations, in the M-1 zoning district.
- **Senate Bill 35 (Government Code Section 65913.4).** The City will comply with SB 35 by establishing a written policy or procedure, as well as other guidance as appropriate, to streamline the approval process and standards for eligible projects by September 2023 (**Program 18: Preliminary Applications (SB 330) and Streamlined Applications (SB 35)**).
- **Senate Bill 330 (Government Code Section 65589.5).** The City complies with SB 330, relying on regulations set forth in the law for processing preliminary applications for housing development projects, conducting no more than five hearings for housing projects that comply with objective general plan and development standards, and making a decision on a residential project within 90 days after certification of an environmental impact report or 60 days after adoption of a mitigated negative declaration or an environmental report for an affordable housing project. The City has included **Program 18: Preliminary Applications (SB 330) and Streamlined Applications (SB 35)** to formalize this process by establishing a written procedure to be made available on the City's website and at public counters.
- **California Fair Employment and Housing Act (FEHA) and Federal Fair Housing Act.** The City provides protections to residents through referrals to legal assistance organizations, such as California Rural Legal Assistance, to increase access to these organizations which may be able to provide assistance.
- **Review Processes (Government Code Section 65008).** The City reviews affordable development projects in the same manner as market-rate developments, except in cases where affordable housing projects are eligible for preferential treatment, including, but not limited to, on residential sites subject to AB 1397.
- **Assembly Bill 686 (Government Code Section 8899.50).** The City has completed this AFH and identified programs to address identified fair housing issues in Table 2D-6, Contributing Factors to Fair Housing Issues.
- **Equal Access (Government Code Section 11135 et seq.).** Upon request, the City provides translation services for all public meetings and materials and offers accessibility accommodations to ensure equal access to all programs and activities operated, administered, or funded with financial assistance from the state, regardless of membership or perceived membership in a protected class.

Fair Housing Outreach

Regional outreach efforts for the Multi-Jurisdictional Housing Element included interviewing Fair Housing of Central California (FHCC) for feedback on housing need, fair housing concerns, and opportunities to affirmatively further fair housing throughout the county. FHCC is a non-profit, civil rights organization dedicated to the elimination of discrimination in housing and the expansion of housing opportunities for all persons. They accomplish this through advocacy, assistance for victims of discrimination, and enforcement of fair housing laws.

In response to the request for input, FHCC noted that the most common fair housing issues reported throughout Fresno County are discrimination on the bases of disability and race. Further, they expressed concern about the aging multifamily housing stock becoming uninhabitable due to physical conditions. However, given the shortage of affordable housing in the region, FHCC noted that many units that have already physically deteriorated are still occupied, posing a risk to occupants. Discrimination by landlords or agents as well as deliberate segregation has resulted in fair housing concerns, particularly for protected and special needs populations, such as persons with disabilities and lower-income households.

FHCC emphasized a need for more government involvement in enforcement of fair housing laws. Currently, affordable housing options are often concentrated in specific neighborhoods. When developers are encouraged to continue to build affordable units in these areas as a result of zoning or other government regulations, this results in either intentional or unintentional segregation based on income. When asked about opportunities for local governments to actively improve outreach regarding fair housing and to combat existing issues, FHCC identified several opportunities including local rent controls to manage affordability and reduce displacement risk, code enforcement to ensure a safe and habitable housing stock, funding fair housing groups such as FHCC to enforce fair housing laws, and adjusting regulations or encouraging development of a variety of unit types and sizes throughout the jurisdiction to promote mobility and integration.

In response to the feedback received, the City has included Program 26: Improve Access to Resources to improve fair housing outreach capacity and multilingual accessibility to all public resources, information, and meetings, including fair housing resources. Steps to establish a procedure to connect residents with fair housing organizations, make information readily available and accessible on the City's website and in public buildings, and conduct biannual trainings for landlords on fair housing laws, rights, and responsibilities, are also covered by the programs identified in the Action Plan.

Discrimination Cases

In its 2020 Annual Report, the California Civil Rights Department (previously Department of Fair Employment and Housing) reported that it received nine housing complaints from residents of Fresno County, approximately 1.0 percent of the total number of housing cases in the state that year (880). As part of the Fair Housing Assistance Program (FHAP), the Civil Rights Department also dual-files fair housing cases with HUD's Region IX Office of Fair Housing and Equal Opportunity (FHEO), reporting them by the origin of the issue.

HUD FHEO reported that there were no cases filed, or inquires made, by residents of the City of Fowler between January 2013 and April 2021. However, a lack of formal cases does not necessarily mean that there is no discrimination in Fowler. In some cases, residents may be hesitant to report discrimination, such as in the case of undocumented residents that fear retaliation or may not be aware of fair housing legal assistance available to them.

Program 22: Fresno County Homebuyer Assistance Program and Program 24: Housing Choice Vouchers outline the City’s activities to increase access to homebuyer and housing choice programs that help promote housing mobility, among other programs established in the housing element.

Sites Analysis

The location of housing in relation to resources and opportunities is integral to addressing disparities in housing needs and opportunity and to fostering inclusive communities where all residents have access to opportunity. This is particularly important for lower-income households. AB 686 added a new requirement for housing elements to analyze the location of lower-income sites in relation to areas of high opportunity.

Table 1D-10 RHNA Capacity by Census Tracts in Fowler, presents the RHNA capacity by census tracts in the city, and the existing conditions of each tract as they relate to indicators of fair housing. **FIGURE 1D-17 CENSUS TRACTS IN FOWLER**, shows the location of each census tract within the city. Tract 16 includes land within the city as well as land within the adjacent unincorporated county to the north, south, and east. Tract 17 also includes land within the city as well as land within the adjacent unincorporated county to the north, south, and west. As shown, sites with stand-alone unit capacity for lower-, moderate-, and above moderate-income levels have been identified within census Tract 17, although there are no sites that co-locate unit capacity with potential for mixed-income development; while Tract 16 identifies only lower-income unit capacity.

Table 1D-10 RHNA Capacity by Census Tracts in Fowler

Census Tract	Existing Households	RHNA Capacity			AFFH Indicators												
					Integration and Segregation						Access to Opportunity			Displacement Risk			
		Low	Mod.	Above Mod.	Median Income	Poverty Rate	Low- to Moderate-Income Population	Non-White Population	Disability Rate	R/ECAP Status	Resource Designation	Jobs Proximity Index	CalEnviro Screen Percentile	Over-crowding Rate	Renter Over-payment Rate	Homeowner Over-payment Rate	% Renter Households
16	1,630	29	0	0	\$25,781 - \$58,566	20.8%	36.6% - 71.0%	73.7% - 89.2%	15.8%	No	High and Highest Resource	56 - 73	86th	10.3%	59.2%	16.9%	49.4%

FIGURE 1D-17 CENSUS TRACTS IN FOWLER

Source: U.S. Census; City of Fowler, 2023; Placeworks, 2023

As identified in the analysis of Patterns of Integration and Segregation, there are no census tracts that meet the criteria of being considered a R/ECAP in Fowler. In the regional context, as previously discussed, both census tracts in the city are designated High and Highest Resource. However, within Tract 16, the central downtown neighborhood has a population with socioeconomic indicators that reflect increased risk of displacement for segments of the community. This concentration of poverty and non-White population includes the triangular block group that includes the downtown area and older portions of the city, east of Golden State Boulevard, south of East Adams Avenue, and northwest of Main Street. This area has a median income of \$25,781 and 71.0 percent of the population falls within low/moderate-income categories, 43.3 percent of households with incomes below \$25,000 (correlating to poverty level), and a non-White population of 89.2 percent. Additionally, approximately 50.0 percent of households are renters, of which, 59.2 percent are cost burdened in this area.

The southeastern neighborhood in Tract 16 (south of Main Street) also has indicators that reflect a segment of the population at risk of displacement. While the median income is \$58,566, the rate of non-White population is 89.2 percent, 20.8 percent of households have incomes below \$25,000, the proportion of low/moderate-income households is 56.0 percent, and there is a high rate of renter households at 46.2 percent, of which, almost 60.0 percent overpay for housing. This neighborhood also has two multifamily complexes with 98 deed-restricted units, and housing stock consists of generally older, single- and small multifamily structures, as well as larger apartment complexes.

In addition, the neighborhoods in Tract 16 north of East Adams Avenue have a median income of \$46,731, a non-White population of 73.7 percent, 28.0 percent of the households have incomes below \$25,000, and 42.0 percent of the population falls within low/moderate-income categories. However, the majority of this portion of Tract 16 consists of new residential subdivisions and unincorporated area. The entire Tract 16 has a high CalEnviroScreen score, in the 87th percentile, ranking the tract as a disadvantaged community. A total of 8.0 percent of the RHNA unit capacity is identified in this tract to reduce the displacement risk for lower-income households. Only lower-income unit capacity (17.9 percent of lower-income unit capacity) is identified in Tract 16, with sites in the downtown neighborhood totaling 51.7 percent of Tract 16-unit capacity. The remainder of Tract 16-unit capacity is identified on sites adjacent to the Fowler Public Library south of the downtown, to increase affordable housing opportunities to facilitate housing mobility while allowing lower-income residents to remain in their neighborhood.

Tract 17, which includes the portion of the city west of Golden State Boulevard and encompasses the Sumner and Sunnyside, Aspire, and RJ Hill neighborhoods, has the highest percentage of RHNA unit capacity (64.8 percent), including all of the moderate- and above moderate-income sites and 82.1 percent of lower-income unit capacity. In this tract, 46.5 percent of the population are lower- and moderate-income households, with a slightly higher median income and a slightly lower poverty rate than tract 16, and a non-White population rate of 79.1 percent. While homeowners are the predominant tenure, 44.1 percent of households are renters; 41.3 percent of renters are cost burdened and 36.6 percent of homeowners are cost burdened, and overall 14.6 percent of households are overcrowded. Compounded by a high CalEnviroScreen score, this tract shows characteristics of vulnerability to displacement and

disproportionate housing need. Identified sites will include multifamily and single-family residential development. The inclusion of lower-income unit capacity will foster improved housing mobility for lower-income residents, facilitate mixed-income and more integrated, diverse neighborhoods, combat patterns of concentrated poverty in the downtown and older southeastern portions of the city, while additional moderate- and above moderate-income unit capacity housing stock provides mobility options for existing and future moderate- and higher-income households in a high-resource designated area.

The City has included **Program 13: Housing for a Variety of Needs** to support construction of higher-density housing in areas with better access to opportunities and encourage integration of a variety of unit types to facilitate mixed-income neighborhoods, combat patterns of income segregation, and provide housing mobility opportunities for a range of households. The distribution of sites identified in **Table 1D-10** is based on the availability of sites and potential for development during the planning period.

FIGURE 1D-18 through **FIGURE 1D-27** compare the distribution of projected units by income category of the following indicators compared to citywide patterns to understand how the projected locations of units will affirmatively further fair housing: TCAC opportunity areas, median income, predominant population, disability rates, educational score, environmental health, and overpayment. The following sites inventory discussion includes an analysis of the number of projected units by income category, and total RHNA capacity by income category to further assess the potential impacts of the sites inventory to affirmatively further fair housing.

Potential Effect on Patterns of Integration and Segregation

TCAC Resource Category

The entire city and surrounding unincorporated areas south of East Adams Avenue are designated as TCAC/HCD High Resource, and Highest Resource north of East Adams Avenue. All of the unit capacity identified to meet the RHNA is in High Resource opportunity areas, with none of the identified unit capacity in the Highest Resource designation north of East Adams Avenue. However, while the sites are identified in a census tract determined as High Resource, it should be considered in the context of comparison to opportunities and potential outcomes within other jurisdictions within the San Joaquin Valley region.

FIGURE 1D-18 PERCENT UNIT CAPACITY BY TCAC/HCD RESOURCE DESIGNATION

Source: City of Flower 2023, AFFH Dataviewer 1.0, 2016-2020 ACS

In the High Resource areas, opportunity for 100.0 percent of lower-income unit capacity has been identified on vacant parcels, therefore not risking displacement of existing residents. There are four sites with 9.3 percent of the lower-income unit capacity within the downtown core, and two lower-income sites with capacity for 8.6 percent of lower-income units in the vicinity of the intersection of Vine Street and Golden State Boulevard near the Fowler Public Library, all of which have access to commercial, light industrial, services, and transit amenities east of Golden State Boulevard. The majority of lower-income unit capacity (82.1 percent) is identified on sites in areas west of Golden State Boulevard that have slightly more positive quality of life indicators than the eastern portion of the city south of East Adams Avenue. Two sites totaling 61.1 percent of total lower-income unit capacity (29.6 percent of the total unit capacity west of Golden State Boulevard in Tract 17) are identified along N. 8th Street between West Tuolumne Street and the Valley Mobile Home Park in the vicinity of the downtown. An additional site has been identified adjacent to SR 99 off East Sumner Avenue and south of the Estrella Apartment complex, providing 21.0 percent of total lower-income unit capacity (and 10.1 percent of the total unit capacity on the west side). The lower-income units counter potential displacement of existing residents throughout the city by increasing the stock of affordable housing opportunities and provide opportunities for more income-integrated neighborhoods adjacent to newer single-family residential subdivisions.

Approximately 15.7 percent of the site inventory to meet the RHNA is identified as moderate-income, located on a vacant property within the western side of the city in the Aspire Avenue neighborhood near Donny Wright Park, with direct southbound access to SR 99. The moderate-income site contributes 17.0 percent of the unit capacity in the tract west of Golden State Boulevard. All of the above moderate-income unit site capacity, comprising 40.0 percent of the total unit capacity and 43.3 percent of the unit capacity west of Golden State Boulevard, is identified on a large High Resource-designated site south of the RJ Hill neighborhood, which helps to facilitate mixed-income neighborhoods and above moderate-income housing mobility.

Income

As previously discussed, Fowler is a low- to moderate-income community with a 2020 median income of \$59,663, slightly above the county median income of \$57,100, although household income levels vary between different areas of the city. While the household median income falls below the statewide median in all census tracts within the city, it is also below the county median in the downtown and East Adams Avenue neighborhoods, regardless of TCAC/HCD resource designations. However, there is no unit capacity identified in the East Adams Avenue neighborhood (north of East Adams Avenue), and only 4.1 percent of total unit capacity, all for lower-income households, identified in the downtown.

As shown in **FIGURE 1D-19 PERCENTAGE OF UNIT CAPACITY BY MEDIAN INCOME**, a larger percentage of the unit capacity (95.9 percent) has been identified on sites within areas that have median incomes correlating to the 2020 moderate-income category (80.0 -120.0 percent of 2020 AMI) west of Golden State Boulevard with a median income of \$61,318, and in the southeast Fowler California neighborhood east of Golden State Boulevard, which has a median income of \$58,566. Capacity for 9.3 percent of lower-income unit capacity is identified on sites at or below the 2020 Fresno County median income, which expands the more affordable housing stock resources and provides mobility opportunities for residents who want to move yet remain within their existing neighborhoods, thereby preventing displacement. In contrast, 90.7 percent of lower-income unit potential is distributed within the moderate-income neighborhoods, which facilitates de-concentration of lower-income households from the central downtown portion of the city, which has a median income corresponding closely to the 2020 HUD poverty threshold, to higher-income portions of the city. Further, future construction potential of lower-income units in higher-income neighborhoods not only integrates income mix in higher-income neighborhoods and facilitates housing mobility for lower-income households, it also aims to reduce existing income patterns and pressure on housing shortages in areas of concentrated need.

FIGURE 1D-19 PERCENTAGE OF UNIT CAPACITY BY MEDIAN INCOME

Source: City of Fowler, 2023, 2016-2020 ACS, and 2020 HCD State Income Limits for Fresno County

The inclusion of 100.0 percent of the moderate- and above moderate-income unit potential on vacant sites on the west side of the city will help to facilitate mixed-income neighborhoods and encourage future income integration in moderate-income neighborhoods and provides housing mobility opportunities for moderate- and above moderate-income households.

As presented in **FIGURE 1D-20 PERCENTAGE UNIT CAPACITY BY POVERTY RATE**, approximately 92.0 percent of RHNA unit capacity is identified west of Golden State Boulevard where poverty rates are between 10.0 and 19.9 percent, with 8.0 percent of unit capacity identified east of Golden State Boulevard. While at the tract level the poverty rate is fairly equivalent between the eastern (20.8 percent) and western (19.7 percent) sides of the city, at the block group level, the poverty rate within the downtown is 43.3 percent. Approximately 82.1 percent of lower-income unit capacity is identified on sites in the western tract to encourage the development of housing mobility opportunities for lower-income households in potentially more stable, higher-income neighborhoods while reducing the concentration of households in poverty in the downtown. The remainder of the lower-income site capacity (17.9 percent) is projected in areas with an existing need for an increased supply of affordable housing for households in poverty, lower-income, and overcrowded households to remain in their neighborhoods and reduce the risk of displacement; of which, 39.1 percent are identified on sites within the downtown. Development of these lower-income units in these areas will help to alleviate existing patterns of overpayment and overcrowding and encourage place-based revitalization through development of vacant, often unsightly parcels, providing new, safe housing in areas of more concentrated poverty.

FIGURE 1D-20 PERCENTAGE UNIT CAPACITY BY POVERTY RATE

Source: City of Fowler, 2023, and 2016-2020 ACS

In addition to 82.1 percent of lower-income units, all moderate- and above moderate-income units are projected in the slightly lower poverty neighborhoods to affirmatively further fair housing through mixed-income neighborhoods. In addition, the City has included **Program 11: Encourage and Facilitate Accessory Units** to actively promote construction of accessory dwelling units (ADUs) in higher median-income areas and monitor affordability of new ADUs to lower- and moderate-income households.

The combination of this program and facilitating the development of additional high-density housing in a community that has historically been dominated by single-family units will help ameliorate patterns of segregation, particularly in the downtown. The development of these sites will make Fowler more accessible to households with a wider range of incomes, while simultaneously increasing housing mobility opportunities and de-concentrating areas of poverty and low-income households.

Race and Ethnicity

As discussed previously, Fowler is among Fresno County's more diverse jurisdictions, which, while communities of color comprise 83.1 percent of the population, 66.4 percent identify as Hispanic, 13.1 percent identify as Asian, and 3.4 percent identify as Other (Black, Other, and American Indian). Only Clovis, Coalinga, Fresno, Kingsburg, and the unincorporated area have lower rates of Hispanic residents. As shown in **FIGURE 1D-5 LOCAL RACIAL DEMOGRAPHICS**, there is a pattern of a higher concentration of non-White households within the eastern tract of the city south of East Adams Avenue, predominantly Hispanic (between 77.2 and 80.0 percent) coinciding with older portions of the city, neighborhoods with relatively lower incomes and higher rates of poverty in the downtown; while the western tract and newer neighborhoods north of East Adams Avenue have Hispanic populations just over 61.0 percent and higher proportions of White non-Hispanic residents as well as a representation of Asian residents between 14.0 and 8.6 percent, respectively.

As shown in **FIGURE 1D-21 PERCENTAGE OF UNIT CAPACITY BY PERCENTAGE NON-WHITE POPULATION**, 8.0 percent of the capacity to meet the RHNA is in areas where more than 80.0 percent of the population identifies as non-White. Of the lower-income unit capacity, 82.1 percent is identified on sites in areas in which 70.0 to 79.9 percent of the population identifies as non-White. This offers an opportunity for lower-income, non-White households that may have been priced out and excluded from housing mobility opportunities to access resources in higher-income neighborhoods while facilitating income integration and reducing concentrations of non-White populations in the central downtown and southeast areas of the city. The remaining 17.9 percent of lower-income sites are within the tract with higher concentrations of non-White households to increase housing resources for residents who may otherwise be priced out and are vulnerable to displacement in their own neighborhoods.

FIGURE 1D-21 PERCENTAGE OF UNIT CAPACITY BY PERCENTAGE NON-WHITE POPULATION

Source: City of Fowler, 2023, and 2016-2020 ACS

As shown in **FIGURE 1D-21**, all of the moderate- and above moderate-income unit capacity is identified on sites in areas that have non-White populations between 70.0 and 79.9 percent, which will facilitate income integration and housing mobility opportunities for higher-income households through a more diverse range of housing types.

Disability

Approximately 12.9 percent of Fowler's population lives with one or more types of disability, as shown on Figure 2-32, Percentage of Population with a Disability, in the Housing Needs Assessment. As discussed previously, data indicates that a smaller proportion of residents in Fowler's higher-income areas on the east side of the city are living with disabilities (9.7 percent) compared to lower-income areas in the downtown and southeast neighborhoods, and that those residents who are living with a disability are found at higher rates (15.8 percent) in lower-income areas.

As illustrated by **FIGURE 1D-22 PERCENTAGE OF UNIT CAPACITY BY DISABILITY RATE**, approximately 92.0 percent of the total RHNA capacity identified in the sites inventory is in areas in which fewer than 10.0 percent of residents have a disability in the western tract of the city, and 8.0 percent in the eastern tract in which more than 15.0 percent of residents have a disability. As stakeholders identified, high housing costs and a shortage of permanently supportive housing in the county has generally increased displacement risk for residents with disabilities and presents a barrier to persons with disabilities.

FIGURE 1D-22 PERCENTAGE OF UNIT CAPACITY BY DISABILITY RATE

Source: City of Fowler, 2023, and 2016-2020 ACS

Approximately 82.1 percent of the lower-income unit capacity and all of the moderate- and above moderate-income unit capacity is identified in the western side of the city where the rate of disability is below 14.9 percent, although seniors comprise a larger portion of the persons with disabilities on the west side than the east. Locating units affordable to lower- and moderate-income residents in proximity to the Adventist Medical Center, the downtown commercial hub, and both SR 99 and Golden State Boulevard will help to improve access for and accommodate the needs of persons living with disabilities, who benefit from close access to services and amenities as well as proximity to transit.

An additional 17.9 percent of the lower-income unit capacity has been identified on sites where the rate of disabilities are above 15.0 percent of the population, providing housing mobility and additional affordable housing supply opportunities in the vicinity of the downtown to access resources.

Familial Status

As previously discussed, 6.3 percent of the households in the city are single, female-headed households with children, of whom, 42.0 percent had incomes below the poverty level, which suggests that single-parent, female-headed households may have more challenges securing housing. The spatial distribution of single-parent, female-headed households with children as a percentage of total households is generally consistent with median household incomes, as well as availability of affordable housing (all of the deed-restricted units and a greater amount of older housing stock in the city is on the east side of Fowler), and location of school facilities. As such, between 20.0 and 40.0 percent of children in the eastern tract reside in a single female-headed household, corresponding to most of the city's affordable housing resources, compared to below 20.0 percent of children residing in single female-headed households within the western side of the city.

As presented in **FIGURE 1D-23 PERCENTAGE OF UNIT CAPACITY BY PERCENTAGE OF CHILDREN IN FEMALE-HEADED HOUSEHOLDS**, approximately 8.0 percent of total unit capacity distributed on sites identified on 5th, 6th, and 7th Streets, providing the potential for 17.9 percent of the lower-income unit capacity in areas with the highest rate of children in female-headed households on the east side of the city. Housing unit potential on these sites increases the opportunities for female-headed households currently experiencing overpayment and/or overcrowding to acquire affordable and adequately sized housing with access to downtown businesses, medical facilities, and services; as well as Fremont Elementary School, Marshall Elementary School, Sutter Middle School, and Fowler High School. Additionally, 82.1 percent of the lower-income, and 100.0 percent of moderate- and above moderate-income anticipated units have been identified in areas with higher incomes yet lower representations of children in single, female-headed households, which will increase housing mobility opportunities for single, female-headed households at all income levels, as well as all other household types, to find appropriate units within Fowler, while contributing toward de-concentration of higher rates of poverty on the east side. Overall, female-headed households of any economic status will have access to new housing opportunities, as well as other single-parent households, persons living alone, seniors, lower-income families, and other households.

FIGURE 1D-23 PERCENTAGE OF UNIT CAPACITY BY PERCENTAGE OF CHILDREN IN FEMALE-HEADED HOUSEHOLDS

Source: City of Fowler, 2023, and 2016-2020 ACS

Potential Effect on Access to Opportunity

Job and Transit Proximity

Fowler residents are served by FCRTA, providing fixed-route service on the Southeast, Kingsburg-Reedley, and Kings Area Regional Transit (KART) lines (see Figure 3-34, Fresno County Rural Transit Agency Intercounty Routes, in Section 3: Regional Assessment of Fair Housing). Southeast Transit provides three round trips on weekdays between Fowler and Fresno, stopping in Fowler at the bus shelter

SECTION 2D-6: LOCAL ASSESSMENT OF FAIR HOUSING

on the west side of East Merced and North 7th Street, and at Valley Children’s Healthcare off West Fresno Street to the west of Golden State Boulevard. The single KART stop in Fowler is at Valley Children’s Healthcare.

While there is a prevalence of residential uses with strong access to Fresno’s job market, much of the employment in Fowler is provided by local fruit packing and distribution facilities, including Bee Sweet Citrus, National Raisin, Lion Raisins, Pacific Packaging, and more; as well as a strong presence of other manufacturing and packaging/distribution facilities. These local employment opportunities, as well as close proximity to employment in nearby Fresno and Clovis, is reflected in jobs proximity index scores between the 56th and 89th percentiles throughout the city, with higher ranking scores in the higher-income and high-resource western portions of the city.

As shown in **FIGURE 1D-24 PERCENTAGE OF UNIT CAPACITY BY JOBS PROXIMITY INDEX SCORES**, 92.1 percent of the RHNA unit capacity is sited in areas with the highest jobs proximity index score within the western side of the city, including 82.1 percent of lower-income and 100.0 percent of moderate- and above moderate-income unit capacity, thus improving access to employment opportunities within the industrial area in the southern portion of the city and north towards Fresno. As the city is predominantly residential, siting of unit capacity at all income levels in the higher-proximity areas will aid in improving access to employment opportunities both inside and outside of the city.

FIGURE 1D-24 PERCENTAGE OF UNIT CAPACITY BY JOBS PROXIMITY INDEX SCORES

Source: City of Fowler, 2023, and 2016-2020 ACS

The remaining 19.7 percent of lower-income unit capacity is on the east side, with 8.6 percent of lower-income unit capacity in the downtown area, and 9.3 percent of the unit capacity in close proximity to both the downtown and Valley Children's Healthcare that are currently serviced by inter-city transit providers, providing close proximity to transit for occupants of these units.

When considering where to locate future housing for all income levels, and particularly lower-income units, sites with access to West Merced Avenue to connect with SR 99 towards Fresno and jurisdictions to the south offers the most convenient access to jobs available within the city and transit to other parts in the region. Further, construction of these sites will help to further improve the jobs-housing ratio with residential development in and near Golden State Boulevard commercial and SR 99 transit corridors, thus improving jobs proximity for current and future residents of Fowler.

Environmental Health

As previously discussed, the Office of Environmental Health Hazard Assessment (OEHHA) reports CalEnviroScreen 4.0 scores for Fowler demonstrating relatively adverse environmental conditions, with census tracts in and around Fowler scoring between the 86th and 96th percentiles (**FIGURE 1D-12 CALENVIROSCREEN SCORES**). In Fowler, residents in different parts of the jurisdiction experience the same scores, indicating that residents across the city do not have different access to environmental outcomes. The entire city falls within the boundaries of areas considered SB 535-qualifying disadvantaged communities, the 25.0 percent highest-scoring census tracts in CalEnviroScreen 4.0. This indicates that, compared with statewide averages, portions of Fowler represent an area of potential concern regarding fair housing and disproportionate exposure to environmental hazards and a concentration of vulnerable populations.

All of the sites inventory capacity has been identified in neighborhoods scoring in the 87th to 92nd percentiles. Many of the lower-income sites are in areas with close proximity to the Golden State Boulevard commercial corridor and SR 99, while the moderate- and above-moderate sites are closer to agricultural uses. Development potential in the disadvantaged community is envisioned to improve environmental conditions through incorporation of outdoor spaces, transitional buffers and screening between residential and nonresidential uses, and promotion of pedestrian and bicycle facilities, thus promoting environmental sustainability. Investment through development of vacant sites with capacity for lower-income levels will help facilitate place-based revitalization in the downtown and older southeast neighborhoods and will increase the supply of affordable housing in an area susceptible to displacement due to housing costs, while also encouraging income integration in new development.

Further, all of the moderate- and above moderate-income capacity is identified in the western side of the city where scores are the highest, in the 92nd percentile, providing above higher-income housing mobility opportunities. The distribution of 82.0 percent of the lower-income unit capacity west of Golden State Boulevard facilitates housing mobility opportunities in higher-income neighborhoods, designed to promote environmental sustainability, and promotes a reduction of concentration of poverty and lower-income households in the downtown and southeastern neighborhoods.

Potential Effect on Displacement Risk

Overcrowding

Overcrowding in Fowler is relatively low in comparison to other jurisdictions in the county, which may represent a greater balance of housing type with demand and need. This may be partially attributed to 69.7 percent of housing units having three or more bedrooms, which typically reduces the need for occupants to share rooms, although these are predominantly single-family units, which have higher rates of homeownership. Overcrowding is significantly higher among renters (12.8 percent) compared to homeowners (4.4 percent), which, although slightly more households east of Golden State Boulevard are renters, indicates that overcrowding occurs at a higher rate west of Golden State Boulevard (14.6 percent of households) than to the east (10.3 percent) (**FIGURE 1D-13 OVERCROWDING IN FOWLER**). However, the incidence of overcrowding has been increasing in Fowler, which, particularly in light of the high proportion of larger housing units, may indicate a growing lack of affordability resulting in households needing to share costs, or may indicate that demand for housing exceeds supply, particularly in the west side.

As presented in **FIGURE 1D-25 PERCENTAGE UNIT CAPACITY BY OVERCROWDING**, the largest proportion of the unit capacity, 92.0 percent, is identified in areas of the city with higher overcrowding rates (above 12.0 percent) in the western tract, including 100.0 percent of moderate-income units and 82.1 percent of lower-income units to help to alleviate this issue by increasing the affordable housing supply. The remainder of the lower-income capacity will facilitate housing mobility opportunities near services and resources in the downtown commercial area east of Golden State Boulevard. Additionally, the inclusion of 100.0 percent of above moderate-income sites in the portions of the city with rates of overcrowding above 12.0 percent will ease pressure on the housing stock, thus potentially reducing displacement risk and overcrowding for these households as well as more units become available.

FIGURE 1D-25 PERCENTAGE UNIT CAPACITY BY OVERCROWDING

Source: City of Fowler, 2023, and 2016-2020 ACS

Overpayment

Similar to conditions throughout the state, owners and renters throughout Fowler are overpaying for housing, likely due to increases in housing costs that have outpaced wage increases, with 35.5 percent of households experiencing some level of overpayment, as shown by **Table 1D-6 Cost Burden in Fowler, 2010-2018, FIGURE 1D-14 PERCENTAGE OF HOMEOWNERS OVERPAYING, and FIGURE 1D-15 PERCENTAGE OF RENTERS OVERPAYING**. Of these cost burdened households, approximately 71.5 percent are renters, though renters comprise only 46.6 percent of households in the city. Lower- and moderate-income households are most at risk of displacement due to overpayment. Moderate-income renters are often more impacted by rising rental costs, as they are outside of eligibility for Section 8 and other affordable unit types, while the increase in median home value has primarily impacted lower-income households. Additionally, special-needs populations, including female-headed households, large families, persons with disabilities, and seniors, often fall into the lower-income category and may be particularly at risk of displacement when housing opportunities at affordable costs, sizes, or access to resources are not available.

East of Golden State Boulevard, just 16.9 percent of homeowners are overpaying for housing. In comparison, west of Golden State Boulevard, 36.6 percent of homeowners are estimated to be overpaying for housing, although poverty rates are lower and incomes higher than in the eastern side of Fowler. This may be partially attributed to the new market rate construction that has occurred in the western portion of the city, which is affordable only to above moderate-income households. In contrast to geographic discrepancies in homeowner overpayment, rental home value is relatively constant throughout the city.

As presented in **FIGURE 1D-26 PERCENTAGE UNIT CAPACITY BY RATE OF HOMEOWNER OVERPAYMENT**, in the western tract where homeowner overpayment rates are between 30.0 and 40.0 percent of homeowners, the majority of total unit capacity (92.0 percent) is identified, including all of moderate- and above moderate-income unit potential, and 82.1 percent of lower-income unit potential. Typically, above moderate-income units are unaffordable to cost-burdened households yet will provide housing mobility opportunities for higher-income households that may be overpaying due to limited availability of housing stock, while lower- and moderate-income housing units can help alleviate overpayment by providing additional housing stock to reduce competition for limited affordable housing mobility opportunities. On the east side, sites for 17.9 percent of new lower-income units have been identified with the intent of increasing the supply of affordable housing, thus reducing risk of displacement due to overpayment.

FIGURE 1D-26 PERCENTAGE UNIT CAPACITY BY RATE OF HOMEOWNER OVERPAYMENT

Source: City of Fowler, 2023, and 2016-2020 ACS

As shown in **FIGURE 1D-27 PERCENTAGE UNIT CAPACITY BY RATE OF RENTER OVERPAYMENT**, the distribution of RHNA unit capacity identifies 17.9 percent of lower-income unit capacity in areas with the highest rates of renter overpayment (59.2 percent) in the downtown neighborhoods. An increase in the supply of lower-income rental units in this portion of the city, particularly those near commercial and services in the downtown, will help to alleviate conditions that contribute to overpayment by reducing the gap between supply and demand for this type of housing. The identification of 82.1 percent of lower-income unit capacity in the western neighborhoods also facilitates lower-income integration in higher-income neighborhoods.

FIGURE 1D-27 PERCENTAGE UNIT CAPACITY BY RATE OF RENTER OVERPAYMENT

Source: City of Fowler, 2023, and 2016-2020 ACS

Special-needs groups that may be disproportionately affected by high housing costs include large families, single-parent households, and seniors. As discussed in the Overcrowding analysis, large family households often face housing challenges due to a lack of adequately sized affordable housing available. The higher costs of homes with multiple bedrooms can result in larger families experiencing a disproportionate cost burden and increase the risk of housing insecurity. The ACS also reports that single-parent households comprise 16.6 percent of the total households in Fowler, the majority of which are female single parents. Of female-headed, single-parent households, 42.0 percent are below the poverty threshold, indicating that these households may have to spend a greater percentage of their income on housing and are at risk for displacement without assistance. However, the identification of 82.1 percent of lower-income unit capacity in the tract with higher incomes provides additional housing supply to alleviate overpayment, and suggests that single female householders with children may be able to obtain housing in areas with lower rates of poverty, segregation, and renter overpayment.

Seniors, comprising 26.8 percent of Fowler's households, often face increased displacement risk due to overpayment as this population more frequently relies on fixed incomes, such as retirement savings or social security, with approximately 36.9 percent of seniors falling in the extremely low-income category. Additionally, 57.2 percent of all seniors are homeowners, a portion of which are likely to be lower income, indicating a need for affordable ownership units that accommodate the needs of seniors, as well as other persons with disabilities or special needs. Therefore, the addition of these units will help to alleviate existing overpayment by offering lower- and moderate-income units to current and future residents where there is need and increasing the housing stock overall to alleviate the demand on an existing shortage of housing at affordable price points, as well as responding to demands of special-needs populations. Further, the site capacity and distribution of units by income category will facilitate mobility opportunities for all households.

Contributing Factors

Through discussions with stakeholders, fair housing advocates, and this assessment of fair housing issues, the City identified factors that contribute to fair housing issues, as shown in **Table 1D-11 Factors Contributing to Fair Housing Issues**. While there are several strategies identified to address the fair housing issues, the most pressing issues are the concentration of lower-income households in the southeastern portion of the city where most multifamily uses are and barriers to strong educational, economic, and environmental conditions and opportunities. The combination of these factors present challenges to housing and economic mobility in the short and near term for many households, particularly lower-income households. Prioritized contributing factors are **bolded** in **Table 1D-11** and associated actions to meaningfully affirmatively further fair housing related to these factors are ***bold and italicized***. Additional programs to affirmatively further fair housing are included in **Section 1D-1, Action Plan**.

Table 1D-11 Factors Contributing to Fair Housing Issues

AFH Identified Fair Housing Issue	Contributing Factor	Meaningful Actions
Disparities in access to services and resources	<p>High jobs-housing ratio, indicating insufficient housing availability</p> <p>Low housing vacancy rates</p> <p>Limited transit connectivity</p> <p>Low-scoring school performance</p> <p>Exposure to commercial agricultural and natural resource extraction</p>	Programs 3, 9, 10, 11 and 25 promote access to educational opportunities, while Programs 20, 22, and 24 promote economic opportunities within the community.
Displacement risk for lower- and moderate-income renters	<p>Concentration of multifamily options in the southeastern portion of the city</p> <p>Rapid increases in rent costs</p>	Programs 7, 8, 9, 10, 11, 12, 13, 15, 16, 17, 20, 21, 22, 23, 25, and 26 are aimed at reducing displacement risk in the community.
Housing mobility barriers for current and prospective homeowners	<p>Cost of new construction in the southern portion of the city</p> <p>Cost of rehabilitation or repairs to older units</p>	Programs 7, 8, 9, 10, 11, 12, 13, 15, 16, 17, 20, 21, 22, 23, 25, and 26 are aimed at reducing displacement risk in the community.

SECTION 1D-4: CONSTRAINTS

Land Use Controls

General Plan

Analysis

The City of Fowler General Plan contains the following residential land use designations:

Low Density: 0.0-3.6 dwelling units per gross acre

Medium-Low Density: 3.7-5.5 dwelling units per gross acre

Medium Density: 5.6-13.5 dwelling units per gross acre

Medium-High Density: 8.0-13.5 dwelling units per gross acre

High Density: 13.6-21.8 dwelling units per gross acre

Community Commercial: 13.6-21.8 dwelling units per gross acre

Conclusion

The City offers a range of housing densities in the community. The densities are sufficiently high to allow the development of affordable housing for all income levels.

Recommended Action

None required.

Zoning Ordinance

Analysis

The City's Zoning Ordinance provides for the following residential districts:

One Family Residential (R-1-12, R-1-10, R-1-8.5, R-1-7, R-1-6, R-1-5): The R Districts are intended primarily to provide living areas at locations designated by the General Plan for Low, Medium Low, and Medium Density, involving single family dwellings.

Multi-Family Residential (RM-2-A, RM-2, RM-3-A, RM-3): The RM Multi-Family Residential Districts are intended primarily for the development of multifamily residential structures at densities consistent with policies of the General Plan. Multi-family housing is permitted by right in the RM zones. Multi-family housing exceeding 21.8 units per acre is conditionally permitted in the RM-3 zone.

In addition, the City's Zoning Ordinance allows residential uses in the following nonresidential zones:

Neighborhood Commercial (C-1): This district is intended primarily for the provision of retail and personal service facilities to satisfy the convenience-goods needs of the consumer relatively close to residential neighborhoods. Horizontal or vertical mixed-use development subject to the development standards of the RM-3 district is conditionally permitted.

Community Commercial (C-2): The Community Commercial District is to be applied to the community commercial areas of the City, as may be designated by the General Plan. These areas provide a wide range of retail, financial, governmental, professional, business service, and entertainment activities. Horizontal or vertical mixed-use development subject to the development standards of the RM-3 district is conditionally permitted.

Form-Based Code Area (FBC): The Form-Based Code Area is intended to foster a vibrant town center through a mix of uses with shop fronts and commercial uses at street level, overlooked by canopy shade trees, upper story residences, and offices. The code regulates land development by setting controls on building form in order to achieve the vision for the community set forth in the Fowler General Plan. Mixed-

use development and stand-alone residential development (subject to the RM-3 standards) are conditionally permitted, including developments that exceed 21.8 units per acre.

Urban Reserve District (UR): This district is intended to protect lands designated for eventual urban development to ensure the orderly conversion of these lands to nonagricultural use; to preserve lands best suited for agriculture from the encroachment of incompatible uses; and to provide appropriate areas for certain open uses of land that are not injurious to agriculture but that may not be harmonious with urban uses. The district allows one-family and farm employee housing that are incidental to permitted or conditionally permitted uses, including crops and the raising of animals or fowl.

Conclusion

The City's Zoning Ordinance provides for a range of housing options.

Recommended Action

None required.

Residential Development Standards

Analysis

Table 1D-12 lists and describes the residential zoning districts in the City of Fowler Zoning Ordinance that allow residential development. These development standards are typical and consistent with standards established in surrounding communities.

Table 1D-12 Residential Development Standards

Characteristics of Lot, Location, and Height	R-1-5	R-1-6	R-1-7	R-1-8.5	R-1-10	R-1-12	RM-2-A	RM-2	RM-3-A	RM-3
Minimum Lot Area (SF)	5,000 sf	6,000 sf	7,000 sf	8,500 sf	10,000 sf	12,000 sf	7,000 sf	7,000 sf	7,000 sf	7,000 sf
Minimum Lot Dimensions (Interior Lots)

Source: City of Fowler Zoning Ordinance, 2022

Note: Multifamily housing is conditionally permitted in the Neighborhood Commercial and Community Commercial zones, as well as the Form-Based Code Area at RM-3 standards.

Parking

Table 1D-13 shows residential parking requirements in Fowler, which vary by housing type.

Table 1D-13 Residential Parking Requirements

Residential Use		Required Parking Spaces	
Single-family		2 spaces per unit, including 1 garaged space	
Multi-family	Studio	1.5 spaces	1/2 of required spaces shall be covered; plus 1 guest space per each 5 units
	1 BR	1.5 spaces	
	2 BR	1.5 spaces	
	3 or more BR	2 spaces	
Secondary Dwelling Units		1 space	

Source: City of Fowler Zoning Ordinance, 2022

Specifically, the City of Fowler Zoning Ordinance provides reduced parking and encourages shared parking to “provide flexibility for the development or redevelopment of small sites” and “promote projects that use flexible and creative incentives to reduce parking needs.” Flexibilities offered by the Form Based Code include the following:

- 1.5 parking space per unit regardless of unit size;
- Parking requirement can be met on-site or within 350 feet of the site;
- Shared parking is encouraged; and
- Off-street parking is not required for properties fronting Merced Street between Seventh Street and the alley between Fourth and Fifth Streets; and
- Off-street parking can be reduced by 50 percent within other specified areas in the Form Based Code Area.

Building Height

Buildings or structures in the R-1 zones cannot exceed a maximum height of 35 feet or two stories. Building height in the R-2 and R-3 zones is subject to the same 35-foot limit but with no limitation on the number of stories.

Open Space and Park Requirements

For multifamily development, the City requires setting aside 10 percent of the space as usable open space (which include swimming pools, green space, landscaping, and recreation room). For a single-family development, 5 percent of the space is required to be set aside for usable open space. These requirements are in addition to the park development fees (discussed later). Overall, the park dedication requirement, the park improvement fees, and the open space requirements do not represent excessive constraints on residential development.

Conclusion

The City's development standards are reasonable and typical, and do not serve to constrain housing development and would not preclude the development of multi-family housing at the upper end of the allowable density range. The Form Based Code offers flexible parking standards with the expressed intent to encourage the efficient use of land and facilitate development/redevelopment of small infill sites. The Form Based Code Area (FBC) and RM 3 zones also allow for residential development to exceed 21.8 units per acre subject to approval of a CUP.

Recommended Action

None required.

Growth Management

Analysis

The Fowler General Plan contains a policy on growth management. Specifically, the policy establishes urban growth boundaries and associated thresholds which are used determine when development may continue into the next growth tier. Development thresholds do not require all land within previous tiers to be developed before moving into the next tier. However, the policy does require a minimum number of units at Medium High and High Density, which most closely translates to multi-family building typologies, be constructed before development continues into the next tier in order to encourage the construction of more affordable units. Additionally, the City permits deed-restricted affordable housing units be constructed in the next growth tier before development thresholds are met.

Conclusion

Fowler's growth management policy does not place a restriction on how many units may be built within the City, only restricting where units may be built to maintain orderly development patterns and adequate provision of services. Furthermore, the development thresholds provide some flexibility by not requiring 100 percent fill of a previous growth tier and by maintaining exceptions for affordable housing and some master planned developments. Therefore, the growth management policy would not unduly constrain the City's ability to accommodate its RHNA.

Recommended Action

None required.

Density Bonus

Analysis

The City's density bonus ordinance does not currently include provisions for moderate-income housing units, childcare facilities, land banking, or condominium conversions. Furthermore, the City's ordinance does not vary the density bonus granted based on the proportion of affordable units provided. The City will

need to amend the density bonus ordinance to meet all requirements of SB 1818 and AB 2222, among other related and minor amendments.

Conclusion

The City's density bonus provisions do not meet current State law requirements.

Recommended Action

Amend the Zoning Ordinance within one year of Housing Element adoption.

Zoning for a Variety of Housing Types

Analysis

Title 9 of the City of Fowler Municipal Code describes the City's regulations for residential development. **Table 1D-14** summarizes the housing types permitted and conditionally permitted under the Zoning Ordinance.

Table 1D-14 Variety of Housing Types

	R-1-5	R-1-6	R-1-7	R-1-8.5	R-1-10	R-1-12	RM-2-A	RM-2	RM-3-A	RM-3	UR

P = Permitted; P/A = Permitted with Administrative Approval; CUP = Conditional Use Permit; NP = Not Permitted

Source: City of Fowler Zoning Ordinance, 2022

The following is a description of the City’s requirements for various housing types:

Multifamily

Multiple family dwellings are permitted by right in the RM zone, and conditionally permitted in the commercial and Form Based Code zones.

Manufactured Housing

The City requires Administrative Approval for manufactured housing in the R and RM districts while single family dwellings are permitted by right.

Farmworker/Employee Housing

The Fowler Zoning Ordinance defines farm employee housing as “living quarters, including dwellings with sleeping accommodations and dining facilities, maintained for occupancy by persons employed principally in farming and related pursuits on land owned, leased or rented by the owner, lessee, or tenant of the site on which the farm employee housing is located; excepting a labor camp or trailer park.” While the City permits farm employee housing in the Urban Reserve zone district, the City’s definition of farmworker housing in the Zoning Ordinance is not consistent with State law, which specifically states that the housing needs not be occupied by persons employed by the farm operations on site.

Emergency Shelters

Government Code Section 65583(a)(4)(A) requires the City to allow emergency shelters without any discretionary action in at least one zone that is appropriate for permanent emergency shelters, regardless of its demonstrated need. The City amended the Zoning Ordinance on May 19, 2015 to permit emergency shelters by right in the M-1 zone. Legislation also requires that the City demonstrate site capacity in the zone identified to be appropriate for the development of emergency shelters. According to the Fresno/Madera Continuum of Care, the homeless population in Fowler is estimated at three persons. In compliance with Government Code Section 65583(a)(4)(I), there is ample land area to accommodate one or more facilities with 3 beds and 200 square feet per bed. With a buffer, a single facility with 3 beds could be accommodated in a building or facility of approximately 1,000 square feet. The available vacant Light Industrial sites listed in **Table 1D-9** offer adequate capacity for a potential shelter. Potential sites include 343-053-01S (1.41 acres), 343-053-305 (1.33 acres), and 340-190-57 (8.64 acres).

Table 1D-15 Potential Emergency Shelter Sites

APN	Acreage
343-053-01S	1.41
343-053-05	1.33
340-190-57	8.64
Total	11.38

Source: City of Fowler, 2023.

Transitional and Supportive Housing

The City amended the Zoning Ordinance on May 19, 2015 to address the provision of transitional and supportive housing as a residential use subject to the same development standards and regulations as similar uses in the same zones.

Single Room Occupancy (SRO) Units

The Zoning Ordinance does not currently contain provisions for SRO housing.

Residential Care Facilities

The Ordinance permits foster homes for six or fewer with an Administrative Approval in all residential zones. However, all other types of residential care facilities for six or fewer require a Conditional Use Permit. The Zoning Ordinance makes no provisions for large residential care facilities for more than six persons.

Second Units

The City permits secondary residential units in all of its residential zones, subject to additional development standards.

Conclusion

In summary, amendments to the City's Zoning Ordinance are required to address the provision of a variety of housing types:

Residential Care Facilities: The Zoning Ordinance needs to be updated to comply with the Lanterman Act and allow group homes for six or fewer persons in all residential zones. The Zoning Ordinance also needs to make provisions for large residential care facilities for more than six persons.

Manufactured Housing: The Zoning Ordinance will need to be updated to permit manufactured homes in a manner consistent with single family housing.

Single Room Occupancy (SRO) Housing: The Zoning Ordinance does not currently contain provisions for SRO housing.

Farmworker/Employee Housing: The Fowler Zoning Ordinance is not consistent with State law requirements for farmworker and employee housing.

Recommended Action

The Housing Element includes an action to amend the Zoning Ordinance to address residential care facilities, manufactured housing, SRO units, and farmworker and employee housing.

On/Off-Site Improvements

Analysis

Fowler has residential development requirements for residential streets, sidewalks, solar access, landscaping, walls, street lighting, and parking. Improvement requirements for new developments are regulated under the Subdivision Ordinance (Title 9, Chapter 4 of the Municipal Code). Major improvements required by the City include:

SECTION 2D-6: LOCAL ASSESSMENT OF FAIR HOUSING

Local roads are improved to a 40-foot curb-to-curb width within an overall 60-foot right of way. Gutters and monolithic sidewalks in a 5-foot pattern are required on all local streets with a 5-foot landscape strip. Right-of-way may be reduced to 56 feet for cul-de-sacs and short streets.

Major streets are developed to 70, 80, and 100-foot rights-of-way, depending on their classification. The subdivider is responsible for dedicating sufficient right-of-way adjacent to the project to provide one-half of the major street with two travel lanes, including curb, gutter, parking lane, sidewalk, and a 10-foot landscape strip on one side.

Sewer, water, and drainage lines are located in streets or within easements within the project boundaries. Easements for underground electrical, natural gas, telephone, and cable facilities are provided as requested by the affected utilities.

A landscaped strip 10 feet in width is required adjacent to major streets between the sidewalk and wall to include street trees, ground cover, and an automatic irrigation system.

In order to adequately provide water supply for use and safety purposes, it may be necessary for individual projects to dedicate a well site, install a well in the subdivision vicinity, or retrofit existing wells to increase flows from the wells.

In areas lacking master drainage facilities, a temporary on-site ponding basin adequate to remove surface water and storm water from the project is required.

Streetlights and traffic signs are required in accordance with the City’s Standard Specifications.

All utilities are placed underground, in accordance with the requirements of the utility concerned, in either City street easements or appropriate utility easements.

Conclusion

Development requirements of the City of Fowler are considered standard in the Central Valley and are comparable to surrounding cities. In order to reduce housing costs, the City does not require improvements other than those deemed necessary to maintain the public health, safety, and welfare.

Recommended Action

None required.

Fees and Exactions

Analysis

Some of the typical City fees are summarized in **Table 1D-16**.

Table 1D-16 Schedule of Fees for Residential Development

Permit Processing Fees	Base and Deposit
Pre-Application Design Review	

Permit Processing Fees		Base and Deposit
Conditional Use Permit	Minor #%	\$1,118
	Major #%	\$2,231
Site Plan Review	Minor #%	\$1,335
	Major #%	\$2,670
Subdivisions	Tentative Map, Tentative Parcel Map (5-10 units) #%	\$9,859
	Tentative Map (>10 units) #%	\$11,728
	Final Subdivision Map Check (5-10 units)	\$3,274
	Final Subdivision Map Check (> 10 units)	\$5,048
Land Use / Zoning	General Plan Amendment (Minor) #%	\$2,435
	General Plan Amendment (Major) #%	\$4,870
	Zoning Amendment (Minor) #%	\$2,405
	Zoning Amendment (Major)	\$4,804
	Negative Declaration #%^	\$5,861
	Mitigated Negative Declaration #%^	\$7,325
	Environmental Impact Report #%^	\$13,280
Development Impact Fees		
City Management and General Services	Single Family Residential	\$1,281/unit
	Multi-Family Residential	\$897/unit
Law Enforcement	Single Family Residential	\$903/unit
	Multi-Family Residential	\$632/unit
Fire Protection	Single Family Residential	\$1,069/unit
	Multi-Family Residential	\$748/unit
Parks	Single Family Residential	\$3,770/unit
	Multi-Family Residential	\$2,638/unit
Water Facilities	Single Family Residential	\$2,565/unit

Permit Processing Fees		Base and Deposit
	Multi-Family Residential	\$1,795/unit
Sewer Facilities	Single Family Residential	\$3,891/unit
	Multi-Family Residential	\$2,723/unit
Traffic	Single Family Residential	\$507/unit
	Multi-Family Residential	\$535 /unit
Ground Water Recharge	Single Family Residential	\$849/unit
	Multi-Family Residential	\$594/unit
Storm Drain	Single Family Residential	\$5,058/acre
	Multi-Family Residential	\$8,219/acre

Source: City of Fowler, 2022.

More Complex projects require a consultant proposal for estimated cost.

% Should a project require additional study, staff time, public hearings, or notification, then additional funds shall be deposited in an amount determined by the Director.

^ For Negative Declarations and EIRs prepared by qualified consultants under contract to the City, the fee shall be cost +

In addition to City fees, several regional fees are also charged for residential development: Regional Transportation Mitigation and Indirect Source Review. The Selma-Kingsburg-Fowler County Sanitation District also charges a one-time fee of \$5,154 per ESFR for connection. For school fees, the Fowler Unified School District has adopted the State Level I fee of \$4.79 per square foot of residential use.

Conclusion

In summary, the fees for plan check, permits, and development impact total approximately \$20,000-\$30,000 per unit. This constitutes approximately 18 percent of the estimated construction cost. However, approximately one-third of the fees are school and regional impact fees that are consistent throughout the County and would not serve to constrain housing development in Fowler.

Recommended Action

A program is included in the Housing Element to monitor the City's fees and impacts on residential development.

Processing and Permit Procedures

Analysis

The City permits most types of residential development by right with a site plan review by the staff. Residential uses in commercial and Form Based Code districts do require the approval of a Conditional Use Permit. For the Conditional Use Permit, the conditions for approval are:

- That the site for the proposed use is adequate in size and shape to accommodate such use and all yards, spaces, walls and fences, parking, loading, landscaping and other features required;
- That the site for the proposed use relates to streets and highways adequate in width and pavement type to carry the quantity and kind of traffic generated by the proposed use;
- That the proposed use will have no adverse effect on abutting property or the permitted use;
- That the conditions are deemed necessary to protect the public health, safety, and general welfare. Such conditions may include:
 - Special yards, spaces, and buffers;
 - Fences and walls;
 - Surfacing of parking areas subject to specifications;
 - Requiring street dedications and improvements (or bonds) subject to the provisions of site plan review of this article, including service roads or alleys when practical;
 - Regulation of points of vehicular ingress and egress;
 - Regulation of signs;
 - Requiring landscaping and the maintenance;
 - Requiring the maintenance of the grounds;
 - Regulation of noise, vibration and odors;
 - Regulation of time for certain activities;
 - A bond for the removal of such use within a specified period of time; and
 - Such other conditions as will make possible development in an orderly and efficient manner.

For Site Plan Review, the conditions for approval relate strictly to site planning considerations such signage, fences, ingress/egress, noise/vibration levels, location of utilities and landscaping, and hours of operation, etc.

The City has no community plan or specific plan implementation areas, environmentally sensitive areas, or other procedures to delay project processing. Although the City does have a Highway Beautification Overlay zone, the increased landscaping requirements in this zone are also not likely to delay project processing. The City encourages concurrent processing of applications and considers all entitlement applications, including the environmental document, at single public hearings before the Planning Commission and City Council.

Table 1D-17 Approvals and Processing Times for Typical Developments

	Single-Family	Single-Family (2–4 units)	Single-Family (5+ units)	Multi-Family (2–4 units)	Multi-Family (5+ units)	Mixed Use
Approvals Required	Director	Director	Planning Commission	Director	Director	Planning Commission
Processing Time	45 days	45-60 days	90 days	45-60 days	45-60 days	45-60 days

Conclusion

The City does not have a lengthy project review process.

Recommended Action

None required.

Building Codes

Analysis

The City uses several uniform codes, including the current California Building Code (CBC), the current California Electrical Code (CEC), the current California Plumbing Code (CPC), the current California Mechanical Code (CMC), and the current California Fire Code, as the basis for its building standards and code enforcement procedures.

Conclusion

No major local amendments to the building codes have been made that would significantly increase the cost of housing.

Recommended Action

None required.

Constraints on Housing for Persons with Disabilities

Analysis

California Building Code

The City adopted the current California Building Code, including Title 24 regulations of the code concerning accessibility for persons with disabilities.

Definition of Family

The definition of “family” in Fowler’s Zoning Ordinance is as follows: “An individual, or two (2) or more persons related by blood or marriage, or a group of not more than six (6) persons not necessarily related by blood or marriage, living together in a dwelling unit; full-time domestic servants of any such persons may reside on the same premises, and shall not be counted with respect to the foregoing definition.” This definition exceeds the zoning power of a local jurisdiction and would be considered restrictive.

Zoning and Land Use Policies

The Ordinance permits foster homes for six or fewer with an Administrative Approval in all residential zones. However, all other types of residential care facilities for six or fewer require a Conditional Use Permit. The Zoning Ordinance makes no provisions for large residential care facilities for more than six persons.

Reasonable Accommodation

The City does not currently have a formal process to grant reasonable accommodation requests. The Zoning Ordinance must be amended to establish a formal reasonable accommodations process.

Conclusion

Amendments to the City's Zoning Ordinance are required to address the definition of family, large residential care facilities (for more than six persons), and reasonable accommodation procedures.

Recommended Action

The Housing Element includes an action to amend the Zoning Ordinance to address the definition of family, residential care facilities, and reasonable accommodation procedures.

SECTION 1D-5: REVIEW OF PAST ACCOMPLISHMENTS

This section reviews and evaluates the City's progress in implementing the 2015-2022 Housing Element. It reviews the results and effectiveness of programs from the previous Housing Element planning period in order to make recommendations about the programs.

Table 1D-18 City of Fowler Program Evaluation

Program		Status	Evaluation	Recommendation
1	Regional Collaboration on Housing Opportunities	Ongoing	The City of Fowler continues to participate in the Countywide Housing Element Technical Committee which collaborates on implementation including infrastructure challenges, homelessness, and fair housing.	Modify. New Program 1.
2	Review Annexation Standards in Memorandum of Understanding			Modify. New Program 2.
3	Provision of Adequate Sites	Ongoing	The City created an inventory of undeveloped land resources in 2021.	Modify. New Program 4.
4	Monitoring of Residential Capacity (No Net Loss)	Ongoing	The City of Fowler continues to complete their Annual Progress Reports and participate in the RHNA allocation efforts to ensure there is no net loss in land zoned for residential development.	Addressed through other programs.
5	Lot Consolidation and Lot Splits	Ongoing	As part of the inventory of residential land resources the City planned to identify opportunities for lot consolidation or lot splitting by the end of 2019. SB 2 funds are dedicated to updating the subdivision ordinance and making it more user-friendly to further facilitate residential development.	Modify. New Program 16.
6	Water and Wastewater Capacity	Ongoing	The City continues to monitor and map water and wastewater concerns.	Modify. New Program 5.

Program		Status	Evaluation	Recommendation
			A water model was completed in 2020 to identify areas of concern related to water capacity.	
7	Affordable Housing Incentives	Ongoing	A comprehensive zoning ordinance update is underway which will update the City's Density Bonus Ordinance.	Modify. New Program 6.
8	Farmworker Housing	Ongoing	The City continues to work with the Fresno Housing Authority and Self-Help Enterprises in seeking grant funding for farmworker housing.	Modify. New Programs 7 and 8.
9	Preserving Assisted Housing	Ongoing	The City assisted the Fresno Housing Authority in their efforts to obtain tax credit allocation for their Walnut Grove apartment complex. The Magill Terrace project was completed in 2019. The City will continue to monitor their progress.	Modify. New Program 10.
10	Accessory Units	Ongoing	The City has amended their Accessory Dwelling Unit ordinances to be compliant with new state law. City staff has planned to conduct an ADU education program and makes information available through public channels.	Modify. New Program 11.
11	Zoning Code Amendments	Within one year of Housing Element adoption	The City of Fowler is currently undergoing an comprehensive zoning ordinance update. Density Bonus Ordinance updates will occur as part of this process.	Modify. New Program 14.
12	Monitoring Planning and Development Fees	Ongoing	The City monitors and evaluates their fees each January.	Modify. New Program 17.
13	Code Enforcement	Ongoing	The City will continue to look for grant programs to assist property owners to bring their homes into compliance with City	Modify. New Program 21.

SECTION 2D-6: LOCAL ASSESSMENT OF FAIR HOUSING

Program		Status	Evaluation	Recommendation
			codes. The City reinstated the code enforcement division in 2019 and hired a Community Compliance Officer in 2022.	
14	First-Time Homebuyer Resources	Ongoing	The City will update their website with references to additional resources for first-time homebuyers.	Modify. New Program 22.
15	Energy Conservation	Ongoing	The City continues to support PG&E programs that provide energy efficiency rebates and implements the Building codes that support and encourage alternative energy.	Modify. New Program 23.
16	Housing Choice Vouchers	Ongoing	The City updates community resources on their website, including information about housing choice vouchers.	Modify. New Program 24.
17	Fair Housing	Ongoing	The City updates their website and works with the Fair Housing Council of Central Valley and the Fresno Housing Authority to provide education to lenders, real estate professionals, and the community at large to promote fair housing services available in the region.	Addressed through new Programs 25 and 26.

Progress Toward the RHNA

Each jurisdiction in California is responsible for accommodating its share of the region's housing needs. The process of determining each jurisdiction's share of housing needs is called the Regional Housing Needs Assessment (RHNA). The RHNA projection period for the previous Housing Element was from January 1, 2015 to December 31, 2022. The City of Fowler was assigned a RHNA of 524 units, divided into four income categories:

Very Low-Income (less than 50 percent of the Area Median Income): 123 units

Low-Income (50 to 80 percent of the Area Median Income): 83 units

Moderate-Income (80 to 120 percent of the Area Median Income): 75 units

Above Moderate-Income (greater than 120 percent of the Area Median Income): 243 units

Table 1D-19 summarizes the City’s accomplishments in meeting the RHNA during the previous RHNA projection period. Since January 1, 2015, 346 new single-family units have been constructed in the City. The City has met 100 percent of its moderate-income RHNA. However, due to limited development interests in multifamily housing and limited funding available, no affordable housing units were constructed.

Table 1D-19 Units Built during RHNA Projection Period, City of Fowler, 2006-2013

	Very Low Income Units	Low Income Units	Moderate Income Units	Above Moderate Income Units	Total Units
2015-2022 RHNA	123	83	75	243	524
Units Built 2015-2022	0	0	149	197	346
Percent of RHNA Met	0.0%	0.0%	198.7%	81.1%	66.0%

Source: City of Fowler, 2022.

The City is seeing renewed interest in residential development and is also beginning to receive inquiries about mixed use development. To facilitate residential development in the future, recognizing the challenges of the City’s sites inventory being comprised primarily of small sites and commercial properties, the 2015-2023 Housing Element included the following programs: Adequate Sites; Sites Inventory Monitoring for “Not Net Loss”, and Lot Consolidation and Lot Splits.

Housing Rehabilitation

Prior to the dissolution of redevelopment, the City offered housing rehabilitation assistance to homeowners through the Home Improvement Grant Program. Between 2008 and 2012, the City assisted 58 households with Home Improvement Grants.

In 2008, Low Income Housing Tax Credit (LIHTC) was used to acquire and substantially rehabilitate 45 units at 1391 E. Summer Avenue (Ruby Court Apartments). Upon rehabilitation, this project offers low-income housing for seniors.

The City recognizes the importance of providing rehabilitation assistance to the City’s lower income households. The City will continue to utilize Code Enforcement efforts to preserve and improve housing quality in the City. In addition, the 2015-2023 Housing Element includes the Affordable Housing Incentives program to expand affordable housing opportunities in the City, including the acquisition/rehabilitation of existing housing and deed restriction as affordable housing.

Homebuyer Assistance

The City does not offer homebuyer assistance. Without redevelopment funds, homebuyer assistance is financially infeasible for a small community such as Fowler. However, the 2015-2023 Housing Element includes a program (First-Time Homebuyer Resources) to direct residents to available resources. Additionally, the City received Permanent Local Housing Allocation funds to provide grants to first-time homebuyers in the community.

At-Risk Analysis

Table 1D-20 shows assisted housing units in Fowler. There are 186 assisted affordable units in Fowler and no units are at risk of expiring in the next 10 years.

Table 1D-20 Assisted Housing Developments, Fowler

Name	Address	Target Population	Funding Source	# of Units	# of Affordable Units	Affordable Units Expiration	Risk Level
Ruby Court Apartments	1391 E Sumner Ave	Senior	USDA Section 515, Rural Development Rental Assistance; LIHTC	45	44	Perpetuity	Not at risk
Fowler Apartments	340 E Adams Ave	Family	USDA Section 515, Rural Development Rental Assistance	44	44	2042	Low
Walnut Grove Villa	1446 E Sumner Ave	Non-Targeted	USDA Section 515, Rural Development Rental Assistance	40	39	2073	Low
Magill Terrace	401 East Nelson Street	Family	HUD Public Housing	60	59	2071	Low
Total				189	186		
Total At Risk				--	0

SECTION 1D-6: PUBLIC OUTREACH AND ENGAGEMENT

State law requires cities and counties to make a diligent effort to achieve participation from all segments of the community in preparing a Housing Element. Section 65583[c][6] of the California Government Code specifically requires that “[t]he local government shall make a diligent effort to achieve public participation of all economic segments of the community in the development of the Housing Element, and the program shall describe this effort.”

The diligent effort required means that local jurisdictions must do more than issue the customary public notices and conduct standard public hearings prior to adopting a Housing Element. State law requires cities and counties to take active steps to inform, involve, and solicit input from the public, particularly low-income and racial and ethnic households that might otherwise not participate in the process. Spanish-language materials were available, and Spanish translation was made available by request.

To meet the requirements of State law, the City of Fowler completed the public outreach at both the local level and as part of the regional Fresno County Multi-Jurisdictional Housing Element effort to encourage community involvement. These efforts included:

- Regional Project Website
- Stakeholder Consultations and Focus Groups
- Study Sessions with Planning Commissions, City Councils, and the County Board of Supervisors
- Community Workshops

Regional efforts included three sets of community workshops, consultations, and a community survey, all of which are discussed in detail in Appendix 1: Regional Housing Element Public Outreach.

Joint Planning Commission/City Council Study Session

On August 2, 2022, a Joint Planning Commission/City Council Study Session was held to introduce the 2023-2031 Housing Element update and to review new State laws. The public was also invited to attend and participate in this event. Staff presented an overview of the Housing Element update process and required contents of the element, discussed early strategies and possible sites to meet the City’s RHNA, reviewed new state laws, and solicited feedback from the City Council, Planning Commission, and community members on these strategies and other housing needs in Fowler. City Council expressed concerns about the tensions between State and local land use control, the impacts of State laws at the local level, and about cities’ abilities to implement the new laws. No public comments or questions were received during the study session.

Community Workshop

California Coalition for Rural Housing (CCRH) staff attended a community event hosted by the City of Fowler. CCRH was able to support the City of Fowler in promoting the community event through social media updates, emails to stakeholders, distribution through the Fresno COG email list, and distribution through the Fresno Housing Authority to residents of affordable housing. The Fowler Unified School District also promoted the event with the community at a Fowler High School pep rally and an alumni event.

CCRH had a booth at the community event where the Coalition met with residents to share information about future events and workshops that residents could attend to provide their input on the housing element update process. Residents were able to sign up for future updates on the housing element update using the sign-in sheet provided. CCRH also shared information about the Central California Travel Survey which includes questions regarding the transportation and housing needs of Fresno County residents.

Local Stakeholder Consultations

To ensure that the City solicits feedback from all segments of the community, consultations were conducted with service providers and other stakeholders who represent different socioeconomic groups. Throughout the summer and fall of 2022, several interviews were conducted with stakeholders who work in areas such as housing, homelessness, and other social services in Fowler and throughout the Fresno County area. Summaries of interviews from stakeholders working in Fowler or the County as a whole are included below.

BIA of Fresno/Madera Counties

The President of the Building Industry Association of Fresno/Madera Counties (BIA), Mike Prandini, was interviewed in November 2022. The BIA is an industry organization that represents builders, developers, subcontractors, and affiliated businesses in the residential, commercial, and industrial building industry throughout the region.

The current shortage of housing has created demand, which can be a positive for BIA's members. Most jurisdictions have sufficient available land to build new housing. Kingsburg was identified as an outlier in this, as they have a growth limitation ordinance, so the two builders that work in the area have been able to work but at a slower pace. The statewide move to require all-electric utilities rather than gas is a concern. For market-rate housing, the State's vehicle miles traveled (VMT) regulations are a large barrier, as transit isn't reliable, and a car is necessary to get around. Builders have to pay a fee to get around the cost of mitigating car miles unless city councils can make a finding of an unavoidable impact. For affordable housing, the prevailing wage requirements are a barrier to development due to the increased cost. Infrastructure costs also affect both types of projects. Streamlining tools help control costs, but not enough. A lack of local water access is also a barrier to development. He expressed concern that the State assigned the RHNA without this in mind. There may not be enough water access to support the housing development that the State is looking to see.

In his experience, single-family homes are in greatest demand. There is a lot of demand for low-income housing projects, but these aren't financially viable for developers without government subsidy. However, including government subsidy in projects increases the overall cost to build, as it triggers prevailing-wage requirements. A recent affordable development in the City of Fresno cost around \$400,000 per unit to build. Condo-style projects are also a possibility, but in his experience, they don't tend to be successful in this region. To keep prices within reach of local residents, recent projects have needed to be built at higher densities. A typical project is between 8 and 15 units per acre on small lots, with single-family homes built as two-story structures in order to reach 1,200 or 1,300 square feet. Developers need to build higher-density projects to spread out the cost of infrastructure among a larger number of units. Demand isn't as high in smaller communities as it is in the cities of Fresno and Clovis. These cities have better access to jobs, education, and medical centers. VMT mitigation costs increase in

communities that are far from these economic centers, so it's less of an issue in closer communities like Sanger, Reedley, Kingsburg, Fowler, and Kerman. Reedley is too far away from the economic center of the region, which causes challenges. Many residents of Mendota and San Joaquin have incomes that are too low to afford development at its current costs. He indicated that more downpayment assistance and maintenance programs are needed throughout the region. Fresno Housing Authority has some, but they are limited.

Fair Housing of Central California

A representative from Fair Housing of Central California (FHCCC) was interviewed on September 27, 2022. The organization works to eliminate housing discrimination and expand housing opportunities to all persons. The FHCCC receives fair housing complaints and tracks these complaints by location, zip code, gender, race or ethnicity, and type of complaint. The most common fair housing issue that clients report is discrimination related to disability or race. She expressed concern that fair housing practices are not really embraced by local government, and that cities should avoid promoting the development of new housing in neighborhoods where segregation is deliberately continued by landlords and real estate agents. Her clients prefer decent, affordable, and accessible housing, but as the cost of purchasing a home increases, opportunities decline. She feels there is adequate rental housing in the community, including for seniors and persons with disabilities, but affordability and accessibility remain barriers.

Fresno Madera Continuum of Care

As a representative for the Fresno Madera Continuum of Care (CoC), Laura Moreno was interviewed in October 2022. Ms. Moreno is a program manager for Fresno County's Department of Social Services (DSS). The CoC does not provide direct services, but instead is a collaborative of agencies that work together to provide homeless services. At present, there is insufficient low-income housing for those who are homeless. Many people in the region are on a fixed income, including disability or social security, and cannot afford housing.

Law Office of Patience Milrod

Fresno-area civil rights attorney Patience Milrod was interviewed on October 31, 2022. While Ms. Milrod supports the continued attention to inclusionary housing, she has concerns about the passive language of "facilitate" and "encourage" that have been common in past Housing Elements. She identified code enforcement as a strategy for improving housing quality that could be strengthened. At present, rents are increasing while the quality of housing is decreasing, and there isn't a lot of energy locally to correct that imbalance. This particularly hurts lower-income households. With more aggressive code enforcement in place, she suggested that some landlords may decide that the cost of maintaining their property isn't worthwhile and may choose to sell to a community land trust or Habitat for Humanity rather than entering receivership. She would like to see that as a specific goal. The biggest barrier to finding affordable, decent housing in the region that she identified was that lower-cost housing tends to also be low quality or ill maintained. However, she cautioned that the supply problem won't be solved with suburban or exurban single-family dwelling units. There's also local disinclination to build lower-income housing in areas of opportunity. She suggested that cities should ask for affordability covenants in perpetuity and highlighted the land trust model as a way to enable that.

Central Valley Urban Institute

On September 7, 2022, Eric Payne, executive director of the Central Valley Urban Institute (CVUI), was interviewed. The CVUI is an advocacy organization working throughout the Fresno area. He indicated that there may be opportunities to increase affordable housing stock production, particularly within infill areas and brownfields as well as to increase homeownership through programs like the downpayment assistance program. However, he expressed concerns about high building costs, lack of financing, and poor leadership in the area. Community members would like to see intergenerational housing, middle-income housing, and “missing-middle” sized housing as well as housing to end homelessness, particularly among college-aged youth. At present, he does not believe that there are adequate opportunities for homeownership or adequate rental housing. The largest barriers are access to credit, lack of financial education, and existing housing cost burden. There is a lack of investment in programs that serve low to moderate-income communities.

Resources for Independence Central Valley

On November 1, 2022, a representative from the organization Resources for Independence Central Valley was interviewed. The representative expressed concern about laws in the City of Fresno that prevent homeless community members from camping or living in their cars. Homelessness is increasing, but the City is investing resources in enforcing these laws rather than providing assistance. There is funding to move homeless people around, but not to improve anyone’s living situation. Access to Section 8 can be a challenge, as the waiting list can be four or five years long. Additionally, rental housing can require incomes of two to three times the rent, which can be a barrier to some who need to access rental housing. For those who may be able to access housing, some landlords levy additional fees during the application process that can present a prohibitive cost. Credit checks are becoming a barrier for residents to get into housing. Community members with disabilities can experience additional challenges trying to find homes that have necessary accessibility features. Homeowners with disabilities end up needing to make expensive home improvements in order to make their homes accessible for themselves. For renters, these improvements may be more challenging to implement, and those who use service or support animals may experience discrimination against pets. There isn’t enough higher-density housing, housing near transit or major transportation corridors, or housing in good repair.

Llaves de tu Casa Iniciativa

As a follow-up to the regionwide stakeholder focus groups held in October and November 2022, a collection of members from the Llaves de tu Casa Iniciativa (LDTIC) met on December 13, 2022, to respond to several stakeholder interview questions. The initiative is a financial education program open to all County of Fresno residents but with a focus on increasing Latino homeownership rates. Eight initiative members represented organizations and companies, including Envision Fresno (Mirna Garcia), Self Help Enterprises (Rick Gonzales, Alicia Bohigian), CORE Home Loans (Pablo Estrada), Union Bank (Reyes Ruiz), the California Association of Realtors (Sabrina Brown), and the National Association of Hispanic Realtors (Aldiva Rubalcava, Lucy Sandoval). The group collectively serves Fresno County, and members also serve other counties in the Central Valley.

The opportunities for future housing in the region that the initiative members identified included LTDC's ability to provide homeownership education virtually and in partnership with other local organizations. There has been a lack of financial literacy in the community along with challenges in using technology and language barriers.

The initiative members expressed concerns about affordability, including the location of affordable housing in undesirable areas. Upzoning single-family zoning would create more opportunities for the development of multifamily housing in more desirable locations. Some funding is only available in certain areas, which can exacerbate existing patterns of segregation and close proximity to industrial uses. They also expressed concern about investors displacing community members in order to establish short-term rentals while community members live in hotels. The State's mandate to install solar panels on new homes was also cited as an additional cost that will drive up the buyers' or renters' cost.

The gap between ownership housing affordability and program income limits was identified as a barrier to accessing housing. Moderate-income households earn too much to qualify for housing assistance, but those who qualify aren't able to afford the housing available. In addition to a lack of multifamily rental housing, there aren't many condo buildings in the region, which could present another affordable homeownership strategy. The establishment of land trusts was also identified as a potential strategy for increasing affordability, as well as donations of land from municipalities.

Self Help Enterprises has partnered with the City of Clovis on their recent accessory dwelling unit program and has partnered with Salt + Light to develop tiny homes for transitional housing.

Fresno Housing Authority

Two representatives from the Fresno Housing Authority, Doreen Eley and Michael Duarte, were interviewed on January 11, 2023. The Fresno Housing Authority currently has housing projects in every jurisdiction participating in the Multi-Jurisdictional Housing Element except for Coalinga. The City of Fresno has a separate Housing Authority.

The representatives noted that there is tremendous demand for housing in all communities in Fresno County. The last time the Section 8 waiting list opened they received more than 50,000 applications. Recently, when a 60-unit development in Clovis opened, they received more than 10,000 applications. When a project in downtown Fresno opened, they received 4,000 applications within a two-week period. Rents are high, which is challenging for residents but good for developers. The region needs more housing opportunities for people experiencing homelessness.

In rural and unincorporated communities lack of water and sewer capacity are major concerns. The Housing Authority can't build housing in areas with no services.

For local developers, state funding and streamlining programs trigger skilled, trained, and prevailing wage requirements, which can be a barrier. Entitlement processing timelines are a barrier to development for the Housing Authority. The representatives gave the example of a recent project in San Joaquin where streamlined initiatives

were used, but the project still took a year to finish the project review process. Many communities don't have much staff capacity and have part-time consultants to complete the work.

There is also a lack of capacity among agencies that provide services in rural and unincorporated areas. This is especially challenging for special needs populations that need mental health services. There is a countywide Department of Behavioral Health, but no offices within smaller cities. The representatives gave the example of a Homekey project in Huron that the Housing Authority wanted to assist with, but there were no service providers available to serve the project.

While there is a lot of interest within the community for homeownership opportunities, more funding is available for multifamily rental projects. The Housing Authority is more focused on rental projects and arriving at deeper affordability levels.

The Housing Authority is following the State's lead in providing housing in high opportunity areas. There are lots of incentives to do this to compete for tax credits and other state funding programs. The representatives mentioned that they are trying to balance this need by also working to improve the lower-resource areas where folks are already living along with disadvantaged communities like Del Ray and Lenar.

The COVID-19 pandemic brought challenges for many residents of Housing Authority projects. There were increases in domestic violence, and it was challenging for property managers to enforce rules.

Public Comments

The City received ongoing public comments during the drafting of the Housing Element. Public comments included:

- Placeholder to be updated with public comments received during public review period.

All comments received were considered and used to inform the sites analysis and assessment of fair housing issues, and goals, policies, and actions were included and/or revised to incorporate the feedback received.

Summary of revisions made placeholder, to be determined by public comment.

Noticing of Study Sessions and Community Workshops

Notice of the Joint Study Session was made available as part of the City's standard meeting notice process for City Council and Planning Commission meetings.

The Community Workshop was advertised to members of the public through multiple information channels. Flyers in English and Spanish were distributed at local events in the community as well as at the Community Center. Current residents of the Riverland Apartments and prior applicants to that building received information through flyers and email, and residents in Fresno Housing Authority units received information about the workshops by email. The availability of Spanish translation was noted in outreach materials.

Noticing of the Draft Housing Element

Per California Government Code Section 65585, the draft Housing Element was made available for public comment for 30 days, from April 13 to May 13. Public comment was received, and an additional 10 business days was allowed to consider and incorporate public comments into the draft revision before submitting to HCD on [*pending*]. The draft was made available on the City's website and was noticed to residents through the same methods as the Planning Commission and City Council meetings. Additional direct noticing was sent to local housing advocate groups.
